(2) Ask him whether he fully understands (a) that by pleading guilty thereto he admits all the elements of the crime or offense, and (b) that he may be punished as explained to him.

In any such case he will also, in the manner below stated, make such impartial investigation, if any, as the doing of justice may appear to require.

(e) In the absence of a plea of guilty he will make a full, thorough, and impartial investigation of both sides of the entire matter before him. On behalf of the Government he will obtain the attendance of, swear, and examine such witnesses, and will obtain such other evidence, documentary and other, as may tend or may appear likely to tend to establish the allegations before him against the accused. On behalf of the accused he will, in the absence of a plea of guilty, obtain the attendance of, swear, and examine such witnesses, and will obtain such other evidence, documentary and other, as may tend to disprove or negative guilt of such allegations, or explain the acts or omissions charged, or show extenuating circumstances or establish good character. He will permit the accused fully to examine all witnesses that appear, and will, to the fullest extent, aid him in making such examination. He will, in every proper way, encourage and aid the accused in making his defense. In all cases he will extend to the accused full opportunity to testify in his own behalf and to make a statement in denial, in explanation, or in extenuation, and will, before arriving at a finding, assure himself, by inquiry of the accused, that he has no further testimony to offer and no further statement to make.

(f) Having done so, he will, as soon as the trial is concluded, arrive at his findings and record them in the proper place on the charges.

(g) In the event of the conviction of a soldier he will consider the evidence of previous convictions, if any, referred to him.

(h) In any case of conviction he will, as soon as trial is concluded, impose sentence and record it in the proper place upon the charges.

(i) In the event of a finding of not guilty of all the charges and specifications he will record an acquittal instead of a sentence.

(k) Having recorded his findings and an acquittal or sentence, he will subscribe his name, rank and organization as summary court, and then without delay transmit the record of trial to the appointing authority.

SECTION III.

PROCEDURE ON REVISION.

352. Of General or Special Courts-Martial. The procedure of general or special courts-martial when reconvened for the purpose of revising their action or correcting their records will in general be as indicated by the form of record of proceedings on revision. (Appendix 6.) The members of the court who participated in the findings and sentence or acquittal, together with the judge advocate and assistant judge advocate, if any, will assemble and the court will meet. It is not ordinarily necessary or proper that the accused be present, but there may be rare cases in which he should be present. The judge advocate will read to the court the indorsement of the appointing authority returning the record and directing the reconvening, or, if the record of trial

by a special court-martial has been returned to him orally for revision, may state briefly to the court the views and desires of the appointing authority as communicated to him. The court is then closed, considers and takes action upon the matter before it, is opened, and adjourns. As the action so to be taken is entirely corrective, a case will not be reopened by the calling or recalling of witnesses or otherwise.

353. Of Summary Courts-Martial. What has been said in respect to the procedure on revision by general or special courts-martial will, so far as applicable, govern such procedure by summary courts-martial.

CHAPTER XV. COURTS-MARTIAL—RECORDS OF TRIAL.

SECTION I.

GENERAL COURTS-MARTIAL.

354. Record Required—How Authenticated. Each general court-martial shall keep a separate record of its proceedings in the trial of each case brought before it, and such record shall be authenticated by the signature of the president and the judge advocate, but in case the record can not be authenticated by the judge advocate, by reason of his death, disability, or absence, it shall be signed by the president and assistant judge advocate, if any; and if there be no assistant judge advocate, or in case of his death, disability, or absence, then by the president and one other member of the court. (A. W. 33.)

355. What the Record is and by Whom Prepared. The legal record of a court-martial is that record which is finally approved and adopted by the court as a body and authenticated by the signatures of its president and judge advocate. The record is prepared by the judge advocate under the direction of the court, but the court as a whole is responsible for it, and the instrument which it approves as such is its record, however the same may have been made up. It is immaterial to the sufficiency of a record whether the same was kept or written by the judge advocate or by a clerk or a reporter acting under his direction.

356. Separate Record. Where several cases are tried by the same court the record of each case should not only be complete and independent in itself and as much an entirety, both in form and in substance, as if it were the only case tried, but should contain all that is essential to an original and independent official paper, and should be so perfected as to leave no material detail to be supplied from any previous or other record. Where sentence is pronounced the record should contain everything necessary to sustain it in fact and in law.

357. Contents of Record. (a) In General. The record of proceedings of a general court-martial will in each case show that all statutory requirements incident to that case have been complied with; will state a complete history of the proceedings, regular and irregular, had in open court in that case; and will set forth the material conclusions arrived at in both open and closed sessions. The only acts of the court or members not properly stated or set forth in the record of trial are the discussions, votes, etc., had while the court was closed for deliberation upon some matter such as a challenge, an objection, findings, sentence, etc. Such discussions, etc., are no part of the formal record, and, as to votes and opinions of particular members, a statement of these is precluded by A. W. 19. It is, in fact, only the result of a deliberation in closed session that is to be entered upon the record.

(b) In Detail. The record of proceedings in each case will show, among other things, each in its proper place:

1. A brief of itself in the prescribed form.
2. An index of itself in the prescribed form.
3. Whether a carbon copy of the record of trial was prepared, and if so, the disposition made thereof.
4. The place and date of each meeting of the court.
5. The fact and hour of each meeting.
6. The number, date, and source of the order appointing the court and of each amendatory order, each stated at the proper place in the record of trial.
7. The fact of the presence and the name, rank, and organization of each member, judge advocate and assistant judge advocate present at the assembling of the court or at any proceedings in revision.
8. The fact of the presence and the name, rank, and organization of each new member, new judge advocate, or assistant judge advocate who begins to participate therein, together with citation of the authority for his so doing.
9. The fact of the absence and the name, rank, and organization of each member and the judge advocate or assistant judge advocate absent at the assembling of the court or at any proceedings in revision, together with a statement of the reason for such absence.
10. That the accused was given opportunity to introduce counsel, and the action thereon.
11. That the accused and his counsel, if any, were present during all the open sessions of the court in his case except during such proceedings in revision as did not so require.
12. The name of each person, if any, who acted as reporter during any part of the trial, and that each such person was sworn.
13. The name, rank, and organization of each member present who, during the trial, announced himself as, or was alleged to be, ineligible to sit as a member, together with the alleged reason for such ineligibility, and the action had thereon.
14. The name of each person, if any, who acted as interpreter during any part of the trial, and that each such person was sworn.
15. That the accused was informed of his right to demand a copy of the record of his trial, and was asked whether or not he desired a copy thereof, together with his answer thereto.
16. That the order appointing the court and each amendatory order was read to the accused in court and that he was given opportunity to challenge each member of the court who sat as such during any part of the trial in his case, and the action, if any, had thereon.
17. That each member of the court who sat as such during any part of the trial of the case and each judge advocate and assistant judge advocate who appeared before the court in the case was sworn.
18. The several charges and specifications upon which the accused was arraigned.
19. The name, rank, and organization of the officer who subscribed the charges.
20. The pleas of the accused to the several specifications and charges upon which he was arraigned.
21. That after a plea of guilty the president—
 - (a) Explained to the accused (1) the elements constituting the offense to which he had pleaded guilty; (2) the maximum punishment for such offense;
 - (b) Asked the accused whether he fully understood (1) that by pleading

guilty thereto he admitted all the elements of the crime or offense; (2) that he may be punished as explained to him.

22. The answer of the accused thereto and the action, if any, had thereon.

23. That the several witnesses, were sworn.

24. That each witness recalled to testify was cautioned, upon being so recalled, that he was still under oath.

25. That if the accused was sworn as a witness he was so sworn at his own request.

26. The questions propounded and the answers given by each of the several witnesses as nearly as possible in the language used.

27. That the accused was given full opportunity to examine each witness who gave testimony.

28. The fact of the introduction of each deposition and other paper received in evidence by the court, and that it is appended to the record properly marked.

29. The exact and entire text read by the prosecution or defense from any publication to the court, together with the title of the publication, the edition thereof, and the proper page number.

30. In a proper case, that the accused had no testimony, or no further testimony, to offer or no statement to make, or both.

31. That when the accused did not testify or make a statement the president explained to him in court that he might testify in his own behalf if he so desired, or make a statement in denial, in explanation, or in extenuation.

32. Each motion, objection, argument, statement, etc., made in open court and the action, if any, had thereon.

33. The fact of each closing of the court.

34. The fact of each opening of the court and that the accused and his counsel, if any, were present when the court was opened.

35. If a note was made of recess taken, that the members, the judge advocate, assistant judge advocate, the accused and his counsel, if any, and the reporter, if any, were present when the court again proceeded to business.

36. In a joint trial, that each and every one of the several accused was accorded each and every right and privilege he would enjoy if tried separately, and, as to each accused, proper findings and sentence or acquittal. (The end here sought, however, will so far as practicable be attained by the use of appropriate general language without unduly burdening the record with repetitions.)

37. The findings of each of the several specifications and charges not disposed of as a result of a special plea.

38. In case of the conviction of a soldier, that the court was opened for the purpose of receiving evidence of previous convictions, and its action.

39. In case of receipt by the court of evidence of previous convictions, that a copy of each is appended to the record, properly marked.

40. In case of the conviction of a soldier, that the accused was asked whether the evidence of previous convictions, if any, was correct and whether the statement of his service, as shown on the charge sheet, was correct, and his answers thereto.

41. The sentence, acquittal, or other action finally taken.

42. In case of conviction of an offense for which the death penalty is made mandatory by law, that two-thirds of the members of the court concurred in the finding.

43. In case of a sentence to suffer death, that two-thirds of the members of the court concurred in the sentence.

44. The adjournment.

45. That the judge advocate, or, in a proper case, the assistant judge advocate, subscribed each day's proceedings.

46. That the president and the judge advocate, or, in a proper case, the president and an assistant judge advocate, or, in a proper case, the president and one other member, subscribed the record. (In any case in which a person other than the judge advocate subscribes the record in lieu of the judge advocate, the facts which make such action necessary will appear.)

47. In case the judge advocate has recorded the findings and sentence with a typewriter, a certificate that he recorded the findings and sentence of the court.

(c) Record of Revision. Subject to the modifications indicated by the form for proceedings in revision, the foregoing will, so far as applicable, govern in respect to such proceedings.

(d) Clemency Recommendation. A recommendation to clemency will not be embodied in the record proper, but will be bound into the record immediately after the exhibits. (See par. 332.)

SECTION II.

SPECIAL COURTS-MARTIAL.

358. Form and Substance. (a) Except as otherwise indicated by the form for record of trial by special court, or elsewhere, the requirements in respect of the form and substance of such records are in general the same as for records of trial by general courts-martial.

(b) Neither oral testimony received by the court nor statements nor arguments made will be recorded unless herein specifically required or ordered by competent authority. (See par. 154 (d).)

(c) Documentary evidence received by the court, the originals of which can properly be appended to the record, such as depositions, certain letters, recommendations to clemency, and other similar papers, will be so appended.

(d) Neither the originals nor copies of writings, the originals of which can not properly be appended to the record, such as certificates of discharge, recommendations as to character, and similar papers, need be so appended.

(e) If a special plea is made, the record will set out in full the proceedings had thereon, including all testimony taken thereon and statements made relative thereto, as well as the disposition thereof made by the court.

(f) Evidence of previous convictions, if any, will not be appended to the record, but will be returned by the trial judge advocate with the record of trial to the appointing authority.

(g) No certificate that the judge advocate recorded typewritten findings or sentence is required.

(h) The record will, at the end, contain sufficient space for the action of the reviewing authority. If necessary for this purpose, an extra sheet will be included.

359. Number of Copies. One copy only of the record will be prepared.

360. Not Indexed. The record will not be indexed.

361. Briefed. The record will be briefed as prescribed for the record of a general court-martial.

362. Bound. The record will be securely bound. The method of binding is not prescribed, but it must be such as will securely fasten together all the leaves and parts that comprise the record. Easily removable clips or paper fasteners will not be used for this purpose.

SECTION III.

SUMMARY COURTS-MARTIAL.

363. Form and Substance. The requirements in respect of the form and substance of records of trial by summary court are indicated in the form for record of trial by summary court. The findings and sentence or acquittal only are required to be recorded and subscribed by the summary court as such. The action of the commanding officer on the record, with date and his signature, completes the record, except when approval by superior authority is required.

SECTION IV.

CORRECTION OF RECORDS OF TRIAL.

364. Records of General or Special Courts-Martial. A record of trial by general or special court-martial which by reason of omission, error, or other defect is substantially incomplete or incorrect, or which in the opinion of the appointing authority shows improper action by the court, may be returned by the appointing authority to the president of the court, directing that the court be reconvened for such action as may be appropriate. In any such case the defective part of the record will be left unchanged and without erasure or interlineation, and the record of proceedings in revision will show specifically, ordinarily by page and line, the part of the original record that is changed and the change made. (See par. 352.)

365. Records of Summary Courts-Martial. A record of trial by summary court which by reason of omission, error, or other defect, is substantially incomplete or incorrect, or which, in the opinion of the appointing authority, shows improper action by the court, may be returned by the appointing authority to the summary court for such action as may be appropriate. (See par. 353.)

SECTION V.

DISPOSITION OF RECORDS OF TRIAL.

366. By Trial Judge Advocate. (a) Original Record. The judge advocate of a court-martial shall, with such expedition as circumstances may permit, forward to the appointing authority, or to his successor in command, the original record of the proceedings of the court in the trial of each case. The record should be forwarded as an inclosure to an indorsement by the judge advocate, returning to the appointing authority the charges and other papers referred to him, and forwarding at the same time the required copy of the reporter's voucher. The original record of the proceedings of a general court-martial appointed by the President will be sent by the trial judge advocate directly to the Judge Advocate General of the Army.

(b) Carbon Copy. The judge advocate of a general court-martial shall, if the accused so desires, deliver to the accused, after it has been corrected, completed, and certified as a true copy except as to findings, sentence, and exhibits not copied, the carbon copy, when one is prepared, of the record of his trial.

367. By Appointing Authority. (a) Records of Trial by General Courts-martial. After having been acted upon by the officer appointing the court, or by the officer commanding for the time being, the record of each trial by general court-martial, with the decisions and orders of the appointing authority made thereon, accompanied by the statement of service, if there be any, and

five copies of the order, if there be any, promulgating the case, will be transmitted directly to the Judge Advocate General of the Army.

(b) Records of Trial by Special Courts-martial. After having been acted upon by the officer appointing the court, or by the officer commanding for the time being, the record of each trial by special court-martial, accompanied by a copy of the order publishing the case, will be forwarded, ordinarily without indorsement or letter of transmittal, to the officer exercising general court-martial jurisdiction over the command, there to be filed in the office of the judge advocate for a period of two years, at the end of which time it may be destroyed.

(c) Records of Trial by Summary Courts-martial. The several records of trial by summary courts-martial within a command shall be filed together in the office of the commanding officer and shall constitute the summary-court record of the command.

(d) Reports of Trial by Summary Courts-martial. The report of trial by summary court (copy of record of trial) will, with the least practicable delay after action has been taken on the sentence, be completed and transmitted to the officer exercising general court-martial jurisdiction over the command, there to be filed in the office of the judge advocate for a period of two years, at the end of which time it may be destroyed.

SECTION VI.

LOSS OF RECORDS OF TRIAL.

368. Action to be Taken. When, prior to action by the reviewing authority, a record of trial by court-martial is lost or destroyed, a new record of trial in the case will, if practicable, be prepared and will become the record of trial in the case. Such new record will, however, only be prepared when the extant original notes or other sources are such as to enable the preparation of a complete and accurate record of the case. In any case of loss of a record of trial by court-martial the summary court, judge advocate, or other proper person will fully inform the appointing authority as to the facts and as to the action, if any, taken.

CHAPTER XVI.

COURTS-MARTIAL—ACTION BY APPOINTING OR SUPERIOR AUTHORITY.

SECTION I.

ACTION ON THE PROCEEDINGS.

369. Appointing Authority. The term appointing authority is employed to designate the officer whose province and duty it is to take action upon the proceedings of a court-martial after the same are terminated, and, when the record is transmitted to him for such action, to approve or disapprove the sentence or acquittal. This officer is ordinarily the commander who has convened the court. In his absence, however, or where the command has been otherwise changed, his successor in command, or, in the language of A. W. 46, "the officer commanding for the time being" is invested (by that article) with the same authority to pass upon the proceedings and order the execution of the sentence in a case of conviction. (Digest, p. 554, XIV, A, 1.)

370. Record of Action by Appointing Authority. Upon the receipt of the proceedings by the appointing authority, he will state at the end thereof in each case his decisions and orders.

371. Sentence Not Effective Until Approved. No sentence of a court-martial shall be carried into execution until the same shall have been approved by the officer appointing the court or by the officer commanding for the time being. (A. W. 46.) The acquittal of the accused does not entitle him to be released at once from confinement as in cases before civil courts. The acquittal is not effective until it has been acted on by the proper reviewing authority. But the announcement of the result of trial in orders is not essential to the validity of the sentence or acquittal. It is not necessary for the reviewing authority to approve the findings and proceedings.

372. Effect of Approval and Disapproval. While approval gives life and operation to a sentence, disapproval, on the other hand, nullifies it. A disapproval of the sentence of a court-martial by the reviewing authority is not a mere expression of disapprobation but is a final determinate act putting an end to the proceedings in the particular case and rendering them entirely nugatory and inoperative; and the legal effect of a disapproval is the same whether or not the officer disapproving is authorized finally to confirm the sentence. But to be thus operative a disapproval should be expressed. The effect of the entire disapproval of a sentence is not merely to annul the same as such but also to prevent the accruing of any disability or forfeiture, which would have been incidental upon an approval. (Digest, p. 563, XIV, E, 9, b, (1).)

373. Manner of Approval. The approval of the sentence should properly be of a formal character. The article requires the sentence to be approved. A formal approval of the findings only does not meet the requirement of the article. The sentence should be approved by "the officer appointing the court," or the officer commanding for the time being, although—as in a case of a sentence of dismissal in time of peace—he may not be empowered finally to confirm and give effect to the sentence. His approval is required as showing that he does not, as he is authorized to do, disapprove. (Digest, p. 174, CIV, A, 1, and A, 2.)

374. The Officer Commanding for the Time Being. The "officer commanding for the time being," indicated in A. W. 46, is an officer who has succeeded to the command of the officer who appointed the court; as where the latter has been regularly relieved and another officer assigned to the command; or where the command of the appointing officer has been discontinued, and merged in a larger or other command, at some time before the proceedings of the court are completed and required to be acted upon. Thus where, under these circumstances, a separate brigade has ceased to exist as a distinctive organization and been merged in a division, or a division has been similarly merged in an army or department, the commander of the division in the one case and of the army or department in the other, is "the officer commanding for the time being," in the sense of the article. So where a court was convened by a division commander, but before the reviewing authority had acted upon the sentence the division was discontinued and the organizations composing it were distributed among the divisions of another corps, it was held that the commander of this other corps was the officer "commanding for the time being." So, where, before the proceedings of a special court convened by a post commander were completed, the post command had ceased to exist and the command became distributed in the department, it was held that the department commander, as the legal successor of the post commander, was the proper authority to approve the sentence. (Digest, p. 174, CIV, C, 1; p. 175, CIV, C, 2, and see C, 4.)

375. Action When Accused is Transferred to Another Department. Where

an accused who has been tried by general court-martial proceeds with his command, from the department in which he has been tried to another department, before action has been taken on his case by the reviewing authority, the commanding general of the department in which he has been tried is the proper reviewing authority of the case. (Digest, p. 554, XIV, A, 3.)

376. Appointing Authority Must Act in Person. The appointing authority can not delegate to an inferior or other officer his function as reviewing authority as conferred by the forty-sixth article of war; nor can he authorize a staff or other officer to subscribe for him his decision and orders on the proceedings. He will sign in his own hand the action taken by him on the proceedings, his rank and the fact that he is the commanding officer appearing after his signature.

377. Powers Incident to Power to Approve. The power to approve the sentence of a court-martial shall be held to include:

(a) The power to approve or disapprove a finding and to approve only so much of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to approve, the evidence of record requires a finding of only the lesser degree of guilt; and

(b) The power to approve or disapprove the whole or any part of the sentence. (A. W. 47.)

The authority here conferred to approve only so much of a finding of guilty as involves a finding of guilty of a lesser included offense is coextensive with the power of courts-martial to convict of lesser included offenses. The more frequent occasions for the exercise of this authority are indicated below.

- (1) Affray.
 - (a) Assault.
 - (b) Breach of peace (disorder).
- (2) Assault with intent to commit murder.
 - (a) Any of the minor degrees of assault.
- (3) Battery.
 - (a) Assault.
- (4) Murder.
 - (a) Manslaughter.
 - Voluntary.
 - Involuntary.
 - (b) Attempt to commit.
 - (c) Felonious assault.
 - (d) Assault and battery
- (5) Mayhem.
 - (a) Assault with intent to commit.
 - (b) Assault and battery.
- (6) Rape.
 - (a) Assault with intent to commit rape.
 - (b) Assault and battery.
 - (c) Assault.
- (7) Robbery.
 - (a) Assault with intent to rob.
 - (b) Larceny from the person.
 - (c) Assault and battery.
 - (d) Assault.
- (8) Desertion.
 - (a) Attempt to desert.
 - (b) Absence without leave.

- (9) Willful disobedience of superior officer.
 - (a) Failure to obey.
- (10) Willful disobedience of noncommissioned officer.
 - (a) Failure to obey.
- (11) Refusal to receive and keep prisoners.
 - (a) Failure to receive and keep.
- (12) Quitting post to plunder or pillage.
 - (a) Quitting post.
- (13) Drunk on duty.
 - (a) Drunk.
- (14) Conduct unbecoming an officer and gentleman.
 - (a) Conduct to the prejudice of good order and military discipline.

378. Confirmation of Sentences. In the following cases confirmation by the President is required before the sentence of a court-martial is carried into execution:

- (a) Any sentence respecting a general officer.
- (b) Any sentence extending to the dismissal of an officer except that in time of war a sentence extending to the dismissal of an officer below the grade of a brigadier general may be carried into execution upon confirmation by the commanding general of the Army in the field or by the commanding general of the territorial department or division.
- (c) Any sentence extending to the suspension or dismissal of a cadet, and
- (d) Any sentence of death, except in the cases of persons convicted in time of war of murder, rape, mutiny, desertion, or as spies, and in such excepted cases a sentence of death may be carried into execution upon confirmation of the commanding general of the Army in the field or by the commanding general of the territorial department or division.

When the authority competent to confirm the sentence has already acted as the approving authority no additional confirmation by him is necessary. (A. W. 48.)

[Note: For statement by whom a sentence of dismissal from service or dishonorable discharge imposed by National Guard courts-martial, not in the service of the United States, must be approved before its execution, see sec. 107, act of June 3, 1916, 39 Stat., 166, Appendix 2, post.]

379. Powers Incident to Power to Confirm. The power to confirm the sentence of a court-martial shall be held to include—

- (a) The power to confirm or disapprove a finding, and to confirm so much only of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to confirm, the evidence of record requires a finding of only the lesser degree of guilt; and
- (b) The power to confirm or disapprove the whole or any part of the sentence. (A. W. 49.)

The manner of the exercise of the power conferred upon confirming authorities is indicated in the remarks in paragraph 377 relating to the power incident to approve a sentence as provided for under A. W. 47.

380. Mitigation of Punishment—Definition. By mitigating a punishment is meant a reduction in quantity or quality, the general nature of the punishment remaining the same. (Digest, p. 177, CXII, B.)

381. Mitigation or Remission of Sentences. The power to order the execution of the sentence adjudged by a court-martial shall be held to include *inter alia* the power to mitigate or remit the whole or any part of the sentence, but no sentence of dismissal of an officer and no sentence of death shall be mitigated or remitted by any authority inferior to the President. Any un-

executed portion of a sentence adjudged by a court-martial may be mitigated or remitted by the military authority competent to appoint, for the command, exclusive of penitentiaries and the United States Disciplinary Barracks, in which the person under sentence is held, a court of the kind that imposed the sentence, and the same power may be exercised by superior military authority; but no sentence extending to the dismissal of an officer or loss of files, no sentence of death, and no sentence approved or confirmed by the President shall be remitted or mitigated by any other authority. The power of remission and mitigation extends to all uncollected forfeitures adjudged by sentence of a court-martial. (A. W. 50.)

382. Mitigation, When Permissible. A sentence providing for dishonorable discharge only can not be mitigated. Subject to the limitations expressed in the Executive order prescribing maximum limits of punishment, forfeiture of pay adjudged by a court-martial may be mitigated to detention of pay for a like period, or less, and confinement at hard labor may be mitigated to hard labor without confinement for a like period or less. A sentence of dishonorable discharge, forfeiture of all pay and allowances due and to become due, and confinement at hard labor for a definite period may be mitigated to confinement at hard labor and a forfeiture of two-thirds of the soldier's pay per month for a period not exceeding that prescribed in the sentence.

383. Effect of Remission at Time of Approval. The action of a reviewing authority in approving a sentence and simultaneously remitting a portion thereof is legally equivalent to approving only the sentence as reduced. (Bul. 12, p. 5, War Dept., 1912.)

384. Commutation of Sentences. The power to commute sentences imposed by military tribunals, not being vested in military commanders, can be exercised by the President alone. Therefore a department commander can not commute to confinement at hard labor a sentence of dishonorable discharge awarded an enlisted man.

385. Adding to Sentences. Neither the reviewing authority nor any other officer is authorized to add to the punishment imposed by a court-martial. Where post orders classify all soldiers at a post according to their conduct, and provide that soldiers undergoing sentence of a court-martial will be denied pass privileges until the sentence is completed, such a provision adds to the punishment and is unlawful. (Bul. 46, p. 7, War Dept., 1914.)

386. Sentences in Excess of Legal Limit. Where a sentence in excess of the legal limit is divisible, such part as is legal may be approved and executed. (Digest, p. 564, XIV, E, 9, c.) Thus: When a sentence to confinement, hard labor without confinement, forfeiture, or detention of pay is in excess of the legal limit, the part within the limit is legal and may be executed.

387. Action on Sentence May be Modified Before Publication. Action taken by a reviewing officer upon the proceedings and sentence of a court-martial may be recalled and modified before it has been published and the party to be affected has been duly notified of the same. After such notice the action is beyond recall. An approval can not then be substituted for a disapproval or vice versa. (Digest, p. 565, XIV, E, 9, c.)

388. Where Conviction of Desertion is Disapproved—Grounds to be Stated. Where the reviewing authority disapproves a sentence for desertion he should indicate in his review whether his disapproval is based upon his belief that the evidence does not show an intent to desert, or is for some other reason that assumes the accused was guilty as charged. The reason for so indicating the grounds of his disapproval is to enable the Quartermaster Corps to decide whether the pay and allowances due at date of alleged desertion should be forfeited and whether the reward paid for apprehending the deserter, and the ex-

penses incurred by the Government in transporting him from point of apprehension, delivery, or surrender to the station of his company or detachment or to the place of trial, including the cost of transportation of the guard, should be set against the alleged deserter's pay, under A. R. 127, 1913. (12 Comp., 328; 15 idem., 661.)

389. Place of Confinement—Change of. The authority which has designated the place of confinement or higher authority may change the place of confinement of any prisoner under the jurisdiction of such authority; but when a military prison or post has been designated as the place of confinement of a prisoner under sentence, no power is competent to increase the punishment by designating a penitentiary as the place of confinement.

390. Loss of Files. Where a court-martial convened by a department commander for the trial of an officer sentences the accused to the punishment of a loss of files, the approval of the appointing authority is sufficient to give full effect to the sentence, and no action by superior authority can add anything to its effect or conclusiveness. Confirmation by the President is not essential to the execution of such a sentence; and the fact that the same involves a change in the Army Register does not make requisite or proper a revision of the case by the War Department. The department commander, however, can not restore the files, such action can be taken only by the President. (See A. W. 50.)

391. Suspension of Sentences Until Pleasure of President be Known. Any officer who has authority to carry into execution the sentence of death, or of dismissal of an officer, may suspend the same until the pleasure of the President shall be known; and in such case, he shall immediately transmit to the President a copy of the order of suspension, together with a copy of the proceedings of the court. (A. W. 51.)

392. Suspension of Sentence Not Involving Dishonorable Discharge. The authority competent to order the execution of a sentence adjudged by a court-martial may, if the sentence involve neither dismissal nor dishonorable discharge, suspend the execution of the sentence in so far as it relates to the forfeiture of pay or to confinement, or to both; and the person under sentence may be restored to duty during the suspension of confinement. At any time within one year after the date of the order of suspension such order may, for sufficient cause, be vacated and the execution of the sentence directed by the military authority competent to order the execution of like sentences in the command, exclusive of penitentiaries and the United States Disciplinary Barracks, to which the person under sentence belongs or in which he may be found; but if the order of suspension be not vacated within one year after the date thereof the suspended sentence shall be held to have been remitted. (A. W. 53.)

393. Suspension of Sentences of Dishonorable Discharge. The authority competent to order the execution of a sentence including dishonorable discharge may suspend the execution of the dishonorable discharge until the soldier's release from confinement; but the order of suspension may be vacated at any time and the execution of the dishonorable discharge directed by the officer having general court-martial jurisdiction over the command, exclusive of penitentiaries and the United States Disciplinary Barracks in which the soldier is held, or by the Secretary of War. (A. W. 52.) The object in seeking the legislation contained in A. W. 52 was to further the plan of giving soldiers convicted of purely military offenses an opportunity to reclaim themselves and gain restoration to the colors through service in disciplinary companies. Reviewing authorities will aid in the accomplishment of this object by discriminating action in passing upon sentences.

394. Place of Confinement to be Designated by Reviewing Authority. When

the sentence of a general court-martial prescribes dishonorable discharge and confinement, so much of the sentence as relates to confinement will be expressed in substantially the following form:

To be confined at hard labor at such place as the reviewing authority may direct for ——— [leaving to the reviewing authority the designation of the place of confinement].

395. Forms for Action on Sentence by Reviewing Authority. (See Appendix 10.)

396. When Confinement in a Penitentiary May be Directed. Except for desertion in time of war, repeated desertion in time of peace, and mutiny, no person shall under the sentence of a court-martial be punished by confinement in a penitentiary unless an act or omission of which he is convicted is recognized as an offense of a civil nature by some statute of the United States, or at the common law as the same exists in the District of Columbia, or by way of commutation of a death sentence, and unless also the period of confinement authorized and adjudged by such court-martial is one year or more: Provided, That when a sentence of confinement is adjudged by a court-martial upon conviction of two or more acts or omissions any one of which is punishable under these articles by confinement in a penitentiary, the entire sentence of confinement may be executed in a penitentiary: Provided further, That penitentiary confinement hereby authorized may be served in any penitentiary directly or indirectly under the jurisdiction of the United States: Provided further, That persons sentenced to dishonorable discharge and to confinement not in a penitentiary shall be confined in the United States Disciplinary Barracks or elsewhere as the Secretary of War or the reviewing authority may direct, but not in a penitentiary. (A. W. 42.)

[Note: For a full statement of the law relating to penitentiary confinement, the War Department policy with reference to the segregation of general prisoners convicted of offenses punishable with penitentiary confinement and requirements placed upon appointing authorities in stating the law applicable where such confinement is directed, see Chap. XIII, Sec. II, pars. 337, 339, and 341.]

397. When Confinement in Disciplinary Barracks Will be Directed. The United States Disciplinary Barracks at Fort Leavenworth, Kans., or one of its branches will be designated as the place of confinement of all general prisoners other than residents of Porto Rico, the Canal Zone, Hawaiian Islands, or the Philippine Islands who are to be confined for six months or more and who are not to be confined in a penitentiary pursuant to the preceding paragraph. From time to time detailed instructions will be issued as to which of the barracks shall be designated and as to when the prisoners shall be transferred to them.

398. When Confinement in Post Will be Directed. A military post, station, or camp will be designated as the place of confinement of any general prisoner whose case does not come within the terms of paragraphs 396 and 397 of this section.

399. Coöperation of Reviewing Authorities. The successful segregation of general prisoners according to the grade of their offense as prescribed by the three preceding paragraphs must depend to a considerable extent upon the coöperation of officers exercising general court-martial jurisdiction. The demand for prison labor at posts is not deemed a sufficient reason for a departure from the rule of segregation prescribed.

400. Court-martial Orders. Trials by general courts-martial, including so much of the proceedings as will give the charges and specifications, the pleas, findings, and sentence, and the action and remarks of the reviewing authority

will be announced in general orders issued from the War Department or in general court-martial orders from the headquarters exercising general court-martial jurisdiction. If the charges contain matter which for any reason is unfit for publication, such matter will be omitted from the order, but a copy thereof will be promptly furnished by the reviewing authority to the commanding officer of the post at which the officer or soldier is confined, to be included with the papers required to be sent to the commanding officer of the post or other places of confinement where the sentence of confinement is to be executed. Trials by special courts-martial will also be published in orders similar in form to general court-martial orders. (For forms, see Appendix 11.)

SECTION II.

ACTION AFTER PROMULGATION OF SENTENCE.

401. Date of Beginning of Sentence. The order promulgating the proceedings of a court and the action of the reviewing authority will, when practicable, be of the same date. When this is not practicable, the order will give the date of the action of the reviewing authority, which date will be the beginning of a sentence of confinement, as well where dishonorable discharge is imposed as where it is not. A sentence of confinement is continuous until the term expires, except where the prisoner is absent without authority or under a parole which proper authority revokes or is delivered to the civil authorities under A. W. 74. It is appropriate for the appointing authority to consider, at the time of approval, confinement served by an accused prior thereto, and in a proper case make it the basis of mitigation of the sentence.

402. Applications for Clemency. The power to remit or mitigate punishment imposed by a court-martial, vested in the authority who appointed the court or the corresponding authority under whose jurisdiction the sentence is being executed, extends only to unexecuted portions of a sentence. If the punishment be one imposed by a general court-martial, it may be remitted or mitigated only by an officer competent to order a general court-martial and under whose jurisdiction the sentence is being executed. The fact that a soldier has been dishonorably discharged through his sentence does not affect this power. An application for clemency in case of a prisoner sentenced to confinement in a penitentiary or in the United States Disciplinary Barracks or any branch thereof will be forwarded to The Adjutant General of the Army for the action of the Secretary of War and the President. A military prisoner sentenced to confinement in a penitentiary or in the United States Disciplinary Barracks or any branch thereof will, so far as concerns the exercise of clemency, be considered to have passed beyond the jurisdiction of the department or other commander from the date of the approval of his sentence. The power to commute sentences imposed by military tribunals, not being vested in military commanders, can be exercised by the President only.

403. Remission of Suspended Sentence of Dishonorable Discharge. Requests to remit the dishonorable discharge under a suspended sentence of dishonorable discharge are requests for clemency, and will be made to the authority empowered to extend clemency.

404. Clemency Applications Limited to One in Six Months. It appearing that the expenditure of much unnecessary time and labor is involved in the reexamination in the War Department upon further applications for clemency of cases relating to military prisoners which have received recent and thorough consideration in connection with prior applications, the Secretary of War has directed that where such further application is received at the War Department

within six months of such prior consideration the case will not be reëxamined unless there be set forth in the application new and material reasons for the granting of clemency, but that the applicant will be advised of the recent consideration and of the action had thereon.

CHAPTER XVII. PUNITIVE ARTICLES.

SECTION I.

ENLISTMENT—MUSTER—RETURNS.

FIFTY-FOURTH ARTICLE.

405. Any person who shall procure himself to be enlisted in the military service of the United States by means of willful misrepresentation or concealment as to his qualifications for enlistment, and shall receive pay or allowances under such enlistment, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

A fraudulent enlistment is an enlistment procured by means of a willful misrepresentation in regard to a qualification or disqualification for enlistment, or by intentional concealment of a disqualification which has had the effect of causing the enlistment of a man not qualified to be a soldier and who but for such false representation or concealment would have been rejected.

Willful means intentional, thus excluding cases of mistake or forgetfulness.

Misrepresentation and concealment include any act, statement, or omission, however made, which has the effect of conveying an untruth or concealing the truth concerning the applicant's qualifications or disqualifications for enlistment.

The misrepresentation or concealment may be in matters which are designed to open the door to inquiry concerning the qualifications or disqualifications for enlistment, such as questions as to previous service, previous applications for enlistment, etc.

The qualifications or disqualifications may be prescribed by law, regulations, or orders.

Answers to questions having no bearing on the applicant's qualifications for enlistment, such as questions as to applicant's name, address, or immaterial statements as to age, are not sufficient.

ANALYSIS AND PROOF.

The article applies only to enlisted men.

The article defines one offense, i.e., fraudulent enlistment.

I. FRAUDULENT ENLISTMENT.

PROOF.

- (a) The enlistment of the accused in the military service as alleged.
- (b) That the accused willfully misrepresented a certain fact or facts regarding his qualifications or disqualifications for enlistment, or willfully—that is, intentionally—concealed a disqualification, as alleged.
- (c) That enlistment was procured by such misrepresentation or concealment.
- (d) That under such enlistment the accused received either pay or allowances, or both, as alleged.

(e) Where a soldier enlists without a discharge (see twenty-ninth article), the proof should include the fact that at the time of the alleged enlistment the accused was a soldier, and that the enlistment was entered into without a regular discharge from the former enlistment.

FIFTY-FIFTH ARTICLE.

406. Any officer who knowingly enlists or musters into the military service any person whose enlistment or muster in is prohibited by law, regulations, or orders shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article.

The prohibited enlistment must be knowingly made, i.e., it must be shown that the accused knew that the person enlisted or mustered in by him was within the prohibited class.

Knowingly includes not only a certainty of belief but also such a degree of belief as the ordinarily prudent man acts upon.

The enlistment or muster in of the person must be at the time prohibited by law or by regulations or orders that were operative as to the accused.

This excludes cases where the enlistment or muster in was prohibited by regulations or orders of the existence of which the accused was not aware or at the time chargeable with knowledge.

ANALYSIS AND PROOF.

The article applies only to officers.

The article defines two offenses which may be treated under one heading as follows:

I. UNLAWFUL ENLISTMENT (OR MUSTER IN).

PROOF.

(a) The enlistment or muster in by the accused officer of the person named, as alleged.

(b) That such person was within the classes whose enlistment or muster in were prohibited at the time of such enlistment or muster in.

(c) That the accused knew this at the time of the enlistment or muster in of such person.

FIFTY-SIXTH ARTICLE.

407. * * * Any officer who knowingly makes a false muster of man or animal, or who signs or directs or allows the signing of any muster roll knowing the same to contain a false muster or false statement as to the absence or pay of an officer or soldier, or who wrongfully takes money or other consideration on mustering in a regiment, company, or other organization, or on signing muster rolls, or who knowingly musters as an officer or soldier a person who is not such officer or soldier, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article for requirements as to muster rolls and definition of the offenses.

Muster has been defined as the assembling, inspecting, entering upon the formal rolls, and officially reporting as a component part of the command of persons or public animals. (Winthrop, p. 852.)

ANALYSIS AND PROOF.

The article applies only to officers.

The article defines a number of offenses which may be treated under the following heads:

- I. Making false muster.
- II. Signing, directing, or allowing the signing of false muster rolls.
- III. Taking money or other consideration on muster or signing muster rolls.
- IV. Mustering as an officer or soldier one who is not.

I. MAKING FALSE MUSTER.

PROOF.

- (a) That the muster of a certain man or animal was made by the accused officer, as alleged.
- (b) That the muster was false as alleged.
- (c) That the accused officer knew this at the time of making the muster.

II. SIGNING, DIRECTING, OR ALLOWING THE SIGNING OF FALSE MUSTER ROLLS.

PROOF.

- (a) That the accused officer signed the muster roll or directed or allowed the signing of the muster roll as alleged.
- (b) That such muster roll was false in certain particulars as alleged.
- (c) That the accused officer knew this at the time he signed the roll or directed or allowed it to be signed as alleged.

III. TAKING MONEY OR OTHER CONSIDERATION ON MUSTER OR SIGNING MUSTER ROLLS.

PROOF.

- (a) That the accused officer made the muster of the organization or signed the muster rolls as alleged.
- (b) That he accepted money or other consideration as a compensation or reward for making the muster or signing the muster rolls.
- (c) That the taking of such money or other consideration was wrongful—that is, without legal excuse.

IV. MUSTERING AS AN OFFICER OR SOLDIER ONE WHO IS NOT.

PROOF.

- (a) That the accused officer mustered as an officer or soldier a certain person, as alleged.
- (b) That the person so mustered was not such officer or soldier.
- (c) That the accused knew this when he made the muster.

FIFTY-SEVENTH ARTICLE.

408. Every officer commanding a regiment, an independent troop, battery, or company, or a garrison, shall, in the beginning of every month, transmit through the proper channels, to the Department of War, an exact return of the same, specifying the names of the officers then absent from their posts, with the reasons for and the time of their absence. Every officer whose duty it is to render to the War Department or other superior authority a return of the state of the troops under his command, or of the arms, ammunitions, clothing, funds, or other property thereunto belonging, who knowingly makes a false return thereof shall be dismissed from the service and suffer such other punishment as a court-martial may direct. And any officer who, through neglect or design, omits to render such return shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article, the penal part of which applies broadly to "every officer whose duty it is to render to the War Department or other superior authority a return of the state of the troops under his command, or of the arms, ammunition, clothing, funds, or other property thereunto belonging."

ANALYSIS AND PROOF.

The article applies to commanding officers only.

The article defines two offenses:

I. Making false returns.

II. Omitting to render returns.

I. MAKING FALSE RETURNS.

As to knowingly, see remarks under fifty-fifth article.

PROOF.

(a) That the accused officer was a commanding officer, as alleged.

(b) That it became his duty as such to render to a certain superior authority a certain return as specified.

(c) That he complied with such duty, and that the return so made was false in certain particulars, as alleged.

(d) That the accused officer knew that the return was false at the time of making it.

II. OMITTING TO RENDER RETURNS.

The term "neglect" involves the idea of culpability and includes the case of an officer who, knowing the return to be due, fails to render it through remissness or procrastination.

PROOF.

(a) That the accused officer was a commanding officer as alleged.

(b) That it became his duty as such to render to a certain superior authority a certain return as specified.

(c) That he omitted through neglect or design to render such return.

SECTION II.

DESERTION—ABSENCE WITHOUT LEAVE.

FIFTY-EIGHTH ARTICLE.

409. Any person subject to military law who deserts or attempts to desert the service of the United States shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

Desertion is absence without leave accompanied by the intention not to return.

Both elements are essential to the offense. The offense becomes complete when the person absents himself without authority from his place of service with intent not to return thereto. A prompt repentance and return are no defense, nor is it a defense that the deserter at the time of departure intended to report for duty elsewhere. Thus, where a soldier leaves his post intending never to

go back unless a certain event happens, or leaves his post with such intent and reports at another post, he is a deserter; but unless such intent exists at some time the soldier can not be a deserter whether his purpose is to stay away a definite or indefinite length of time. Where a soldier, without having been discharged, again enlists in the Army or in the Militia in the service of the United States, such enlistment is, by the twenty-ninth article, made sufficient evidence of desertion. In such a case, proof of the intent permanently to stay away from his former place of service and of the status of absence without leave therefrom are unnecessary.

ANALYSIS AND PROOF.

The article includes all persons subject to military law. See Article 2.

The article defines two offenses, as follows:

I. Desertion.

II. Attempting to desert.

I. DESERTION.

PROOF.

(a) That the accused absented himself, or remained absent without authority, from his place of service, as alleged.

(b) That he intended, at the time of absenting himself or at some time during his absence, to remain away permanently from such place.

(c) That his absence was of a duration and was terminated as alleged.

(d) That his act was done, if so alleged, in the execution of a certain conspiracy, or in the presence of a certain outbreak of Indians, or of a certain unlawful assemblage which his organization was opposing, or in time of war where the court will not take judicial notice of the existence of a status of war.

(e) Where the soldier enlisted without a discharge (see twenty-ninth article), that the accused was a soldier in a certain organization of the Army as alleged; and that, without being discharged from such organization, he again enlisted in the Army, Navy, Marine Corps, or some foreign army as alleged. In this case proof of the absence without leave and of the intention not to return become unnecessary.

II. ATTEMPTING TO DESERT.

An attempt to desert is an overt act other than mere preparation toward accomplishing a purpose to desert.

Usually the endeavor of the accused toward getting away will be frustrated by an agency independent of his own will; but once the attempt is made a turning back by the accused of his own accord does not obliterate the offense. An instance of the offense is: A soldier intending to desert hides himself in an empty freight car on the post, intending to effect his escape from the post by being taken out in the car.

PROOF.

(a) That the accused made the attempt by doing the overt act or acts alleged.

(b) That he intended to desert at the time of doing such act or acts.

(c) That his act was done, if so alleged, in the execution of a certain conspiracy, or in the presence of a certain outbreak of Indians, or a certain unlawful assemblage which his organization was opposing, or in time of war where the court will not take judicial notice of the existence of the status specified.

FIFTY-NINTH ARTICLE.

410. Any person subject to military law who advises or persuades or knowingly assists another to desert the service of the United States shall, if the offense be committed in time of war, suffer death, or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the definition of desertion under the next preceding article.

As to knowingly, see remarks under the fifty-fifth article.

The offenses of persuading and assisting desertion are not complete unless the desertion occurs; but the offense of advising is complete when the advice is given, whether the person advised deserts or not.

It is not necessary that the accused act alone in giving the advice or assistance, or in the persuasion; and he may act through other persons in committing the offenses.

ANALYSIS AND PROOF.

The article applies to all persons subject to military law. See article 2.

The article defines three offenses, as follows:

I. Advising desertion.

II. Persuading desertion.

III. Assisting desertion.

I. ADVISING DESERTION.**PROOF.**

(a) That the accused advised a person subject to military law to desert the service as alleged.

(b) That the act was done, if so alleged, in time of war, where the court will not take judicial notice of the status of war.

II. PERSUADING DESERTION.**PROOF.**

(a) That the accused used persuasion to induce a person subject to military law to desert the service as alleged.

(b) That the person whom he persuaded deserted as alleged, and was induced to do so by such persuasion. See proof of desertion in the next preceding article, items (a) and (b).

(c) That the act was done, if so alleged, in time of war, where the court will not take judicial notice of the status of war.

III. ASSISTING DESERTION.**PROOF.**

(a) That the accused knowingly assisted a person subject to military law to desert the service as alleged.

(b) That the person given such assistance deserted as alleged. See proof of desertion in the next preceding article, items (a) and (b).

(c) That the act was done, if so alleged, in time of war, where the court will not take judicial notice of the status of war.

SIXTIETH ARTICLE.

411. Any officer who, after having discovered that a soldier in his command is a deserter from the military or naval service or from the Marine Corps, retains such deserter in his command without informing superior authority or the commander of the organization to which the deserter belongs shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See definition of desertion under article 58.

Discovered does not imply a certainty on the one hand or a mere suspicion on the other. It implies such a belief as the ordinarily prudent officer would act upon.

ANALYSIS AND PROOF.

The article applies only to commanding officers.

The article defines one offense:

I. RETAINING A DESERTER.

PROOF.

- (a) That the accused officer exercised a certain command as alleged.
- (b) That while so in command he discovered that a certain soldier in his command was a deserter from the military or naval service, or from the Marine Corps, as alleged.
- (c) That such soldier was in fact such a deserter. See proof of desertion under fifty-eighth article, items (a) and (b).
- (d) That he retained such deserter in his command without informing superior authority or the commanding officer of the organization to which the deserter belongs, as alleged.

SIXTY-FIRST ARTICLE.

412. Any person subject to military law who fails to repair at the fixed time to the properly appointed place of duty, or goes from the same without proper leave, or absents himself from his command, guard, quarters, station, or camp without proper leave, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The article is designed to cover every case not elsewhere provided for where any person subject to military law is through his own fault not at the place where he is required to be at a time when he should be there.

The first part of the article—that relating to properly appointed place of duty—applies whether such place is appointed as a rendezvous for several or for one only. Thus, it would apply in the case of a soldier failing to report as the kitchen police or leaving such duty after reporting.

A soldier turned over to the civil authorities upon application is not punishable under this article for the period he is held by them under such delivery. So, also, where a soldier is absent with leave and is held, tried, and acquitted by the civil authorities, his status does not change to absence without leave. But where the soldier is absent without leave when tried, although acquitted, or being absent with leave is convicted and held beyond the expiration of his pass, or being absent without leave is unable to return through sickness or lack of transportation facilities, or other disabilities, the period of the absence without leave will include the time he is so detained; but, in view of the fact that the absence during such time is enforced, it would be appropriate not to consider the length of such detention for the purpose of administering punishment in the case.

In computing the length in days of a period of absence for the purpose of determining the maximum punishment for an absence without leave under this article periods of 24 hours are considered one day. Thus, a soldier who absents himself from 11.59 p. m. one day to 12.01 a. m. the next is absent only a fraction of a day as far as the maximum punishment order is concerned, although the period of absence cover parts of two calendar days.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See Article 2.

The article defines a number of offenses which may be treated under the general term "Absence without leave."

I. ABSENCE WITHOUT LEAVE.

PROOF.

(1) Where the accused fails to appear at or goes from a place of duty.

(a) That a certain authority appointed a certain time and place for a certain duty by the accused, as alleged.

(b) That he failed to report to such place at the proper time, or having so reported went from the same without authority from any one competent to give him leave to do so.

(2) Where the accused is charged with absenting himself without proper leave.

(a) That the accused absented himself from his command, guard, quarters, station, or camp for a certain period, as alleged.

(b) That such absence was without authority from any one competent to give him leave.

SECTION III.

DISRESPECT—INSUBORDINATION—MUTINY.

SIXTY-SECOND ARTICLE.

413. Any officer who uses contemptuous or disrespectful words against the President, Vice President, the Congress of the United States, the Secretary of War, or the governor or legislature of any State, Territory, or other possession of the United States in which he is quartered shall be dismissed from the service or suffer such other punishment as a court-martial may direct. Any other person subject to military law who so offends shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The contemptuous or disrespectful words, as used in this article, cover language disrespectful and contemptuous in themselves, such as abusive epithets, denunciatory or contumelious expressions, or intemperate or malevolent comments upon official or personal acts, etc., or words disrespectful or contemptuous because of the connection in which and the circumstances under which they are used.

It is essential that a person against whom such words are used be in one of the offices named at the time; but it is immaterial whether the words are spoken against him in his official or private capacity.

The truth or falsity of the statements is, as a rule, immaterial.

Trials for offenses covered by this article have usually been for the use of "contemptuous or disrespectful words against the President," or the Government mainly as represented by the President. The deliberate employment of denunciatory or contumelious language in regard to the President, whether spoken in public or published, or conveyed in a communication designed to be made public, has, in repeated cases, been made the subject of charges and trial under this article. (Digest, p. 120; Winthrop, p. 872.)

The language used must be disrespectful or contemptuous. Adverse criticism of the Executive expressed in emphatic language in the heat of political discussion, but not apparently intended to be personally disrespectful, should not be made the basis of trial under this article. (Idem.)

ANALYSIS AND PROOF.

The article applies to any person subject to military law.

The article defines a number of offenses which may be treated under the general term of "disrespect toward the President, etc."

I. DISRESPECT TOWARD THE PRESIDENT, ETC.

PROOF.

(a) That the accused used certain contemptuous or disrespectful words against the President, or other of the authorities mentioned in the article, as alleged.

(b) Where such words are not contemptuous or disrespectful in themselves that the words were used under certain circumstances or in a certain connection, or that a certain intended meaning gave them the character of contemptuous or disrespectful words, as alleged.

SIXTY-THIRD ARTICLE.

414. Any person subject to military law who behaves himself with disrespect toward his superior officer shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The disrespectful behavior contemplated by this article is such as detracts from the respect due to the authority and person of a superior officer. It may consist in acts or language, however expressed.

It is not essential that the disrespectful behavior be in the presence of the superior, but in general it is considered objectionable to hold one accountable under this article for what was said or done by him in a purely private conversation.

The officer toward whom the disrespectful behavior was directed must have been the superior of the accused at the time of the acts charged; but by superior is not necessarily meant a superior in rank, as a line officer, though inferior in rank, may be the commanding officer, and thus the superior of a staff officer, such as a surgeon.

Disrespect by words may be conveyed by opprobrious epithets or other contemptuous or denunciatory language. (Winthrop, p. 874.)

Disrespect by acts may be exhibited in a variety of modes—as neglecting the customary salute, by a marked disdain, indifference, insolence, impertinence, undue familiarity, or other rudeness in the presence of the superior officer. (Winthrop, p. 875.)

It is not essential that the behavior be intentional, and it is immaterial that only facts were stated; but where the person who did the acts or spoke the words did not know that the person against whom they were directed was his superior officer, such ignorance is a defense.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See Article 2.

The article defines one offense, that is, disrespect toward a superior officer.

I. DISRESPECT TOWARD A SUPERIOR OFFICER

PROOF.

(a) That the accused did or omitted to do certain acts or spoke certain words toward a certain officer, as alleged.

(b) That the behavior involved in such acts, omissions, or words was that

under certain circumstance or in a certain connection or with a certain meaning, as alleged.

(c) That the officer toward whom the acts, omissions, or words were directed was the accused's superior officer.

SIXTY-FOURTH ARTICLE.

415. Any person subject to military law who, on any pretense whatsoever, strikes his superior officer or draws or lifts up any weapon or offers any violence against him, being in the execution of his office, or willfully disobeys any lawful command of his superior officer, shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The phrase "on any pretense whatsoever" is not to be understood as excluding as a defense the fact that the striking was done in legitimate self-defense or in the discharge of some duty, such as is enjoined by the sixty-seventh article.

By "superior officer" is meant not only the commanding officer of the accused, whatever may be the relative rank of the two, but any other commissioned officer of rank superior to that of the accused. That the accused did not know the officer to be his superior is available as a defense.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See Article 2.

The article embraces offenses indicated by the following diagram:

These offenses may be treated under the following heads:

- I. Assaulting superior officer.
- II. Disobeying superior officer.

I. ASSAULTING SUPERIOR OFFICER.

The word "strikes" means an intentional blow with anything by which a blow can be given.

The phrase "draws or lifts up any weapon against" covers any simple assault committed in the manner stated.

The offense consisting either in a mere threatening of violence without anything further being proposed, or in an attempt to do violence which is not effectuated. The weapon chiefly had in view by the word "draw" is no doubt the sword; the term might, however, apply to a bayonet in a sheath, or to a pistol; and the drawing of either in an aggressive manner, or the raising or brandishing of the same minaciously in the presence of the superior and at him is the sort of act contemplated. The raising in a threatening manner of a firearm (whether or not loaded) or of a club, or any implement or thing by which a serious blow could be given, would be within the description—"lifts up." (Winthrop, p. 879.)

The phrase "offers any violence against him" comprises any form of battery or of mere assault not embraced in the preceding more specific terms "strikes" and "draws or lifts up." But the violence where not executed must be physically attempted or menaced. A mere threatening in words would not be an offering of violence in the sense of the article. (Winthrop, pp. 879 and 880.)

An officer is in the execution of his office "when engaged in any act or service required or authorized to be done by him by statute, regulation, the order of a superior or military usage." (Winthrop, p. 881.)

PROOF.

(a) That the accused struck a certain officer with or without a certain thing or weapon or drew or lifted up a certain weapon against him or offered violence against him, as alleged.

(b) That such officer was the accused's superior officer at the time.

(c) That such superior officer was in the execution of his office at the time, as alleged.

II. DISOBEYING SUPERIOR OFFICER.

The willful disobedience contemplated is such as shows an intentional defiance of authority, as where a soldier is given an order by an officer to do or cease from doing a particular thing at once and refuses to do what is ordered or simply omits to do it.

Where the order is operative in futuro a mere neglect to comply with it "through heedlessness, remissness, or forgetfulness" is an offense chargeable not in general under this article, but under the "general article" (Winthrop, p. 884), and the same is true of a mere refusal to obey such an order before the time set for its execution.

The order must relate to military duty and be one which the superior officer is authorized under the circumstances to give the accused. Disobedience of an order which has for its sole object the attainment of some private end or which is given for the sole purpose of increasing the penalty for an offense which it is expected the accused may commit is not punishable under this article.

An accused can not be convicted of a violation of this article if the order was in fact unlawful; but, unless the order is plainly illegal, the disobedience of it is punishable under the general article, i.e., the ninety-sixth article.

To justify from a military point of view a military inferior in disobeying the order of a superior, the order must be one requiring something to be done which is palpably a breach of law and a crime or an injury to a third person, or is of a serious character (not involving unimportant consequences only) and if done would not be susceptible of being righted. An order requiring the performance of a military duty or act can not be disobeyed with impunity unless it has one of these characteristics.

That obedience to a command involved a violation of the accused's religious scruples is not a defense.

Failure to comply with the general or standing orders of a department, district, post, etc., or with the Army Regulations, is not an offense under this article, but under the ninety-sixth article; and so of a nonperformance by a subordinate of any mere routine duty.

The form of the order is immaterial, as is the method by which it is transmitted to the accused; but the communication must amount to an order and the accused must know that it is from his superior officer; that is, a commissioned officer who is authorized to give the order whether he is superior in rank to the accused or not.

PROOF.

- (a) That the accused received a certain command from a certain officer as alleged.
 (b) That such officer was the accused's superior officer.
 (c) That the accused willfully disobeyed such command.

SIXTY-FIFTH ARTICLE.

416. Any soldier who strikes or assaults, or who attempts or threatens to strike or assault, or willfully disobeys the lawful order of a noncommissioned officer while in the execution of his office, or uses threatening or insulting language, or behaves in an insubordinate or disrespectful manner toward a noncommissioned officer while in the execution of his office, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

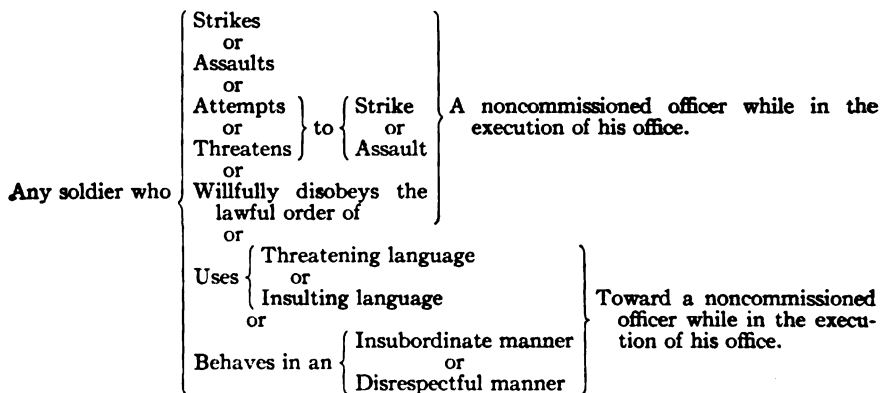

This article has the same general objects with respect to noncommissioned officers as the sixty-third and sixty-fourth articles have with respect to commissioned officers, namely, to insure obedience to their lawful orders, and to protect them from violence, insult, or disrespect.

The terms "willful disobedience," "lawful order," and "in the execution of his office" are used in the same sense as in the sixty-fourth article.

ANALYSIS AND PROOF.

The article applies to enlisted men only.

The article embraces offenses indicated by the following diagram:

These offenses may be briefly treated under the following headings:

I. Assaulting a noncommissioned officer.

II. Disobeying a noncommissioned officer.

III. Using threatening or insulting language or behaving in an insubordinate or disrespectful manner toward a noncommissioned officer.

I. ASSAULTING A NONCOMMISSIONED OFFICER.

For definition of the offense, see ninety-third article, item IX.

The part of the article relating to assaults covers any unlawful violence against a noncommissioned officer in the execution of his office, whether such violence is merely threatened or is advanced in any degree toward actual application.

PROOF.

(a) That the accused soldier struck a certain noncommissioned officer with a certain thing, or assaulted, or attempted or threatened to strike or assault him in a certain manner, as alleged.

(b) That such noncommissioned officer was at the time in the execution of his office, as alleged.

II. DISOBEYING A NONCOMMISSIONED OFFICER.**PROOF.**

(a) That the accused soldier received a certain command from a certain noncommissioned officer, as alleged.

(b) That the noncommissioned officer was in the execution of his office.

(c) That the accused soldier willfully disobeyed such command.

III. USING THREATENING OR INSULTING LANGUAGE OR BEHAVING IN AN INSUBORDINATE OR DISRESPECTFUL MANNER TOWARD A NONCOMMISSIONED OFFICER.

The phrase "while in the execution of his office" limits the application of this part of the article to language and behavior within sight or hearing of the noncommissioned officer toward whom it is used; the word "toward" not being used in the same sense as in the sixty-third article.

PROOF.

(a) That the accused used certain language or did or omitted to do certain acts under certain circumstances, or in a certain manner or with a certain intended meaning, as alleged.

(b) That such language or behavior was used toward a certain noncommissioned officer.

(c) That such noncommissioned officer was at the time in the execution of his office, as alleged.

SIXTY-SIXTH ARTICLE.

417. Any person subject to military law who attempts to create or who begins, excites, causes, or joins in any mutiny or sedition in any company, party, post, camp, detachment, guard, or other command shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

Mutiny imports collective insubordination, and necessarily includes some combination of two or more persons in resisting lawful military authority.

Sedition implies the raising of commotion or disturbance against the State; it is a revolt against legitimate authority and differs from mutiny in that it implies a resistance to lawful civil power.

The concert of insubordination contemplated in mutiny or sedition need not be preconceived nor is it necessary that the act of insubordination be active or violent. It may consist simply in a persistent and concerted refusal or omission to obey orders or to do duty with an insubordinate intent.

ANALYSIS AND PROOF.

The article applies to any person subject to military law.

The article defines five offenses relating to mutiny and five relating to sedition.

I. Attempting to create a mutiny (or sedition).

II. Beginning a mutiny (or sedition).

III. Joining in a mutiny (or sedition).

IV. Exciting a mutiny (or sedition).

V. Causing a mutiny (or sedition).

I. ATTEMPTING TO CREATE A MUTINY OR SEDITION.

An attempt to commit a crime is an act done with specific intent to commit the particular crime and proximately tending to, but falling short of, its consummation. There must be an apparent possibility to commit the crime in the manner specified. Voluntary abandonment of purpose after an act constituting an attempt is not a defense.

The intent which distinguishes mutiny or sedition is the intent to resist lawful authority in combination with others. The intent to create a mutiny or sedition may be declared in words, or, as in all other cases, it may be inferred from acts done or from the surrounding circumstances.

A single individual may harbor an intent to create a mutiny and may commit some overt act tending to create a mutiny or sedition and so be guilty of an attempt to create a mutiny or sedition, alike whether he was joined by others or not, or whether a mutiny or sedition actually followed or not.

PROOF.

(a) An act or acts of accused which proximately tended to create a certain intended (or actual) collective insubordination.

(b) A specific intent to create a certain intended (or actual) collective insubordination.

(c) That the insubordination occurred or was intended to occur in a company, party, post, camp, detachment, guard, or other command.

II-III. BEGINNING OF JOINING IN A MUTINY.

There can be no actual mutiny or sedition until there has been an overt act of insubordination joined in by two or more persons, and so no person can be guilty of beginning or joining in a mutiny unless an overt act of mutiny is proved. A person can not be guilty of beginning a mutiny unless he is the first, or among the first, to commit an overt act of mutiny; a person can not join in a mutiny without joining in some overt act. Hence presence of the accused at the scene of mutiny is necessary in these two cases.

PROOF.

(a) The occurrence of certain collective insubordination in a company, party, post, camp, detachment, or other command.

(b) That the accused began or joined in the certain collective insubordination.

IV-V. CAUSING OR EXCITING A MUTINY.

As in II and III, supra, no person can be guilty of causing or exciting a mutiny unless an overt act of mutiny follows his efforts. But a person may excite or cause a mutiny without taking personal part in or being present at the demonstrations of mutiny which result from his activities.

PROOF.

(a) The occurrence of certain collective insubordination in a certain company, party, post, camp, detachment, or guard, or other command.

(b) Acts of the accused tending to create or excite the certain collective insubordination.

SIXTY-SEVENTH ARTICLE.

418. Any officer or soldier who, being present at any mutiny or sedition, does not use his utmost endeavor to suppress the same, or knowing or having reason to believe that a mutiny or sedition is to take place, does not without delay give information thereof to his commanding officer shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See pages 1421, 1422.

ANALYSIS AND PROOF.

The article applies only to officers and soldiers. It defines two offenses relating to mutiny and two relating to sedition.

I. Being present at a mutiny (or sedition), failing to use the utmost endeavor to suppress it.

II. Having knowledge or reason to believe that a mutiny (or sedition) is to take place, failing to give information thereof to his commanding officer without delay.

I. FAILURE TO SUPPRESS MUTINY (OR SEDITION).

Mere presence countenancing such collective insubordinations and disturbances as mutinies, riots, and seditions has been considered criminal for over a century. The article goes a step further and requires of officers and soldiers their utmost endeavors to suppress such disorders.

One is not present at a mutiny unless an act or acts of collective insubordination occur in his presence.

Utmost endeavor is a relative term. The rule governing the lawful use of force to suppress crime or arrest wrongdoers is that as much force may be used as is reasonably necessary to accomplish the desired purpose, and no more. This article has been construed as authorizing and requiring the most extreme measures—even to the using of a dangerous weapon and the taking of life—where such extreme measures are reasonably necessary. But all the circumstances of necessity are to be considered. Means which in war and before the enemy would be not only justified, but laudable, might, in time of peace, render the person employing them criminally and civilly liable for abuse of authority.

PROOF.

(a) The occurrence of an act or acts of collective insubordination in the presence of the accused.

(b) Acts or omissions of the accused which constitute a failure to use his utmost endeavor to suppress such acts.

II. FAILURE TO GIVE INFORMATION OF MUTINY (OR SEDITION).

Where circumstances known to the accused are such as would have caused a reasonable man in the same or similar circumstances to believe that a mutiny or sedition was impending, these circumstances will be sufficient to charge the accused with such reason to believe as will render him culpable under the article.

It is not a necessary element of the crime that the impending mutiny or sedition materialize.

"Delay" imports the lapse of an unreasonable time without action.

The expression "commanding officer" here includes in its meaning any officer having a military command over the person who has knowledge or reason to believe that a mutiny or sedition is impending.

PROOF.

(a) That the accused knew that a mutiny or sedition was impending or that he knew of circumstances that would have induced, in a reasonable man, a belief that a mutiny or sedition was impending.

(b) Acts or omissions of the accused which constitute a failure or unreasonable delay in informing his commanding officer of his knowledge or belief.

SIXTY-EIGHTH ARTICLE.

419. All officers and noncommissioned officers have power to part and quell all quarrels, frays, and disorders among persons subject to military law and to order officers who take part in the same into arrest, and other persons subject to military law who take part in the same into arrest or confinement, as circumstances may require, until their proper superior officer is acquainted therewith. And whosoever, being so ordered, refuses to obey such officer or noncommissioned officer or draws a weapon upon or otherwise threatens or does violence to him shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

A fray is a fight in a public place to the terror of the people, in which acts of violence occur or dangerous weapons are exhibited or threatened to be used. All persons aiding or abetting a fray are principals. The word "frays" is thus seen to be somewhat restrictive, but the words "quarrels" and "disorders" include any disturbance of a contentious character from a mere war of words to a rout or riot.

To quell is to quiet, allay, abate, or put down.

It is immaterial under the article whether the officer or noncommissioned officer who essays to part or quell quarrels, frays, and disorders is on a duty status or not, as it is immaterial whether the persons engaged in the disorder are superior to him in rank or not.

ANALYSIS AND PROOF.

The punitive portion of the article applies to all persons subject to military law. It is designed to enforce the authority of officers or noncommissioned officers to part and quell certain disorders and to order the participants into confinement or arrest.

The article defines four crimes:

- I. Refusal to obey an order of an officer or noncommissioned officer placing the accused in arrest or confinement.
- II. Upon being ordered into arrest or confinement, drawing a weapon on the officer or noncommissioned officer giving the order.
- III. Upon being ordered into arrest or confinement, threatening the officer or noncommissioned officer giving the order.
- IV. Upon being ordered into arrest or confinement, doing violence to the officer or noncommissioned officer giving the order.

I. DISOBEDIENCE OF ORDERS INTO ARREST OR CONFINEMENT.

It should appear that the power conferred by the article was being exercised for the purpose stated, and therefore the charges and proof should refer to the order given during the disorder. It should be made to appear that the accused heard or understood the order and knew that the person giving it was an officer or noncommissioned officer.

PROOF.

- (a) That the accused was a participant in a certain quarrel, fray, or disorder occurring among persons subject to military law.
- (b) That during the disorder a certain officer or noncommissioned officer ordered the accused into arrest (if accused is an officer) or into arrest or confinement (if accused is a person subject to military law other than an officer), with a view to quell or part the disorder.
- (c) That the accused refused to obey.

II, III, IV. THREATENING, DRAWING A WEAPON UPON, OR OFFERING VIOLENCE TO, AN OFFICER OR NONCOMMISSIONED OFFICER.

The proof of the second, third, and fourth crimes defined by the article should follow in form and essentials the proof required under the first crime (disobedience of order into arrest or confinement, *supra*), except that instead of proving a refusal to obey (par. 3, *supra*), drawing a weapon, making a threat, or doing violence must be proved as the consummation of the particular offense. The word threat as here used includes any menacing action, either by gesture or by words.

SECTION IV.

ARREST; CONFINEMENT.

SIXTY-NINTH ARTICLE.

420. An officer charged with crime or with a serious offense under these articles shall be placed in arrest by the commanding officer, and in exceptional cases an officer so charged may be placed in confinement by the same authority. A soldier charged with crime or with a serious offense under these articles shall be placed in confinement, and when charged with a minor offense he may be placed in arrest. Any other person subject to military law charged with crime or with a serious offense under these articles shall be placed in confinement or in arrest, as circumstances may require; and when charged with a minor offense such person may be placed in arrest. Any person placed in arrest under the provisions of this article shall thereby be restricted to his barracks, quarters, or tent, unless such limits shall be enlarged by proper authority. Any officer who breaks his arrest or who escapes from confinement before he is set at liberty by proper authority shall be dismissed from the service or suffer such other punishment as a court-martial may direct; and any other person subject to military law who escapes from confinement or who breaks his arrest before he is set at liberty by proper authority shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The arrest of an officer has been compared to an enlargement on bail, the security being the officer's commission. It is for this reason that the punishment may include dismissal. The distinction between arrest and confinement lies in the difference between the kinds of restraint imposed. In arrest the restraint is moral restraint imposed by the orders fixing the limits of arrest, or by the terms of the article. Confinement imports some physical restraint.

ANALYSIS AND PROOF.

The article applies to all persons subject to military law. The article defines two crimes:

- I. Breach of arrest.
- II. Escape from confinement.

I. BREACH OF ARREST.

The offense is committed when the person restrained infringes the limits set by orders, or by the sixty-ninth article of war, and the intention or motive that actuated him is immaterial to the issue of guilt, though, of course, proof of inadvertence or bona fide mistake is admissible to guide the court in assessing punishment. The unlawfulness of the arrest is a valid defense, but innocence of the accusation upon which the arrest is imposed is entirely irrelevant.

PROOF.

- (a) That the accused was duly placed in arrest.
- (b) That before he was set at liberty by proper authority he transgressed the limits fixed by the sixty-ninth article of war or by the orders of proper authority.

II. ESCAPE FROM CONFINEMENT.

An escape may be either with or without force or artifice, and either with or without consent of the custodian. Any completed casting off of the restraint of confinement, before being set at liberty by proper authority, is an escape from confinement, and a lack of effectiveness of the physical restraint imposed is immaterial to the issue of guilt. It seems, however, that an escape is not complete until the prisoner has, momentarily at least, freed himself from the restraint of his confinement, so, if the movement toward escape is opposed, or before it is completed an immediate pursuit ensues, there will be no escape until opposition is overcome, or pursuit is shaken off. In cases where the escape is not completed the offense should be charged as an attempt under the ninety-sixth article of war.

PROOF.

- (a) That the accused was placed in confinement.
- (b) That he freed himself from the restraint of his confinement before he had been set at liberty by proper authority.

SEVENTY-FIRST ARTICLE.

421. No provost marshal or commander of a guard shall refuse to receive or keep any prisoner committed to his charge by an officer belonging to the forces of the United States, provided the officer committing shall, at the time, deliver an account in writing, signed by himself, of the crime or offense charged against the prisoner. Any officer or soldier so refusing shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The words "commander of a guard" include a commander of any rank or grade, and hence a noncommissioned officer or private. The term "any prisoner" includes civil as well as military prisoners who are committed according to the terms of the article. A provost marshal or commander of a guard may receive a prisoner without an account of the charge against him or other due formality of commitment, but he must receive the prisoner where the required account in writing accompanies the commitment.

A mere name or description of the offense charged in common parlance when written and signed by the committing officer is a sufficient "account in writing."

ANALYSIS AND PROOF.

The article applies to officer and soldiers.
The article defines one crime:

- I. REFUSING TO RECEIVE OR KEEP A PRISONER COMMITTED WITH A WRITTEN ACCOUNT OF THE OFFENSE CHARGED AGAINST HIM SIGNED BY THE OFFICER COMMITTING THE PRISONER.

PROOF.

- (a) That the accused was a provost marshal or commander of a guard.
- (b) That a certain prisoner was committed to his charge by a certain officer belonging to the forces of the United States.
- (c) That, at the time of commitment, the committing officer delivered to

the accused a written account of the crime or offense charged against the prisoner, which account was signed by the committing officer.

(d) That the accused refused to receive or keep the prisoner.

SEVENTY-SECOND ARTICLE.

422. Every commander of a guard to whose charge a prisoner is committed shall, within twenty-four hours after such confinement, or as soon as he is relieved from his guard, report in writing to the commanding officer the name of such prisoner, the offense charged against him, and the name of the officer committing him; and if he fails to make such report he shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The term "commander of a guard" includes commanders of any rank or grade.

The term "prisoner" includes civilian as well as military prisoners.

The term "commanding officer" imports the commander to whom the guard report is properly made.

ANALYSIS AND PROOF.

The article applies to officers and soldiers. It defines one offense:

I. FAILURE TO RENDER A REPORT AS PRESCRIBED.

PROOF.

- (a) That the accused was commander of a certain guard.
- (b) That a prisoner was committed to his charge.
- (c) That the accused—
 1. Failed to make any report at all, or,
 2. That the report rendered was not in writing, or,
 3. That no report was rendered within 24 hours after confinement, or as soon as accused was relieved from his guard, or,
 4. That the report failed to set forth one or more of the particulars prescribed.

SEVENTY-THIRD ARTICLE.

423. Any person subject to military law who, without proper authority, releases any prisoner duly committed to his charge, or who through neglect or design suffers any prisoner so committed to escape, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The article describes three long-recognized common-law crimes.

It looks to the punishment of any person who is responsible for the unauthorized release or escape of a prisoner duly committed to his charge, and hence any member of a guard, party, escort, and convoy, or any person subject to military law to whose charge a prisoner is committed may be guilty of an offense under this article. Where a prisoner is committed to the commander of a guard, party, escort, or convoy, and is released by, or escapes from, a subordinate or subordinates to whom the commander has duly delegated custody of the prisoner, or to whom that custody duly falls as an incident of duty, all will be responsible under this article, except those who can show that the escape or release occurred under circumstances against which they could not reasonably guard.

The words "any prisoner" import both military and civilian prisoners.

A person may receive a prisoner in his capacity as commander or member of a guard, or he may be burdened with such a responsibility as a personal

trust. In the former case, the lowest authority competent to release the prisoner is the chief of the command, of the guard by which the prisoner is held. In the latter case, the authority who has imposed the trust, and who was competent to do so, is the lowest "proper authority" to order a release.

While a commander of the guard must receive a prisoner properly committed by any officer, the power of the committing officer ceases as soon as he has committed the prisoner, and he is not a "proper authority" to order a release.

An officer is not responsible under this article unless the prisoner was duly committed, but, as was pointed out in the discussion of the seventy-first article, an officer may receive a prisoner not committed in strict compliance with the terms of that article or other law, and if, having so received a prisoner, he releases such prisoner, or suffers him to escape, he may be held to answer, under the ninety-sixth article, for any dereliction of duty that may be predicated on his conduct in the case.

ANALYSIS AND PROOF.

The article applies to any person subject to military law.

The article defines three crimes:

- I. Releasing a prisoner without proper authority.
- II. Suffering a prisoner to escape through neglect.
- III. Suffering a prisoner to escape through design.

I. RELEASING A PRISONER WITHOUT PROPER AUTHORITY.

A release imports a removal of restraint from the prisoner in which the custodian is the sole actor, and in which the prisoner takes no initiative.

PROOF.

- (a) That a certain prisoner was duly committed to the charge of the accused.
- (b) That the accused released him without proper authority.

II. SUFFERING A PRISONER TO ESCAPE THROUGH NEGLIGENCE.

The word "neglect" is here used in the sense of the word "negligence."

Negligence is a relative term. It is defined in law as the absence of due care. The legal standard of care is that which would have been taken by a reasonably prudent man in the same or similar circumstances. This test looks to the standard required of persons acting in the capacity in which the accused was acting. Thus, if the accused is an officer, the test will be, "How would a reasonably prudent officer have acted?" If the circumstances were such as would have indicated to a reasonably prudent officer that a very high order of care was required to prevent escape, then the accused must be held to a very high order of care. The test is thus elastic, logical and just.

A prisoner can not be said to have escaped until he has overcome the opposition that restrained him, and shaken off immediate pursuit. Once he has done these things, the fact that he returns, is taken in a fresh pursuit, is killed, or dies, will not relieve the person accused of guilt under this article.

PROOF.

- (a) That a certain prisoner was duly committed to the charge of the accused.
- (b) That the prisoner escaped.
- (c) That the accused did not take such care to prevent escape as a reasonably prudent person, acting in the capacity in which the accused was acting,

would have taken in the same or similar circumstances. (This constitutes neglect.)

(d) That the escape was the proximate result of the neglect of the accused.

III. SUFFERING A PRISONER TO ESCAPE THROUGH DESIGN.

In law a wrongful act is designed when it is intended or when it results from conduct so shockingly and grossly devoid of care as to leave room for no inference but that the act was contemplated as an extremely probable result of the course of conduct followed. Thus, on a charge of suffering a prisoner to escape through design, evidence of gross negligence may be received as probative of design.

It sometimes happens that a prisoner has been permitted larger limits than should have been allowed, and an escape is consummated without hindrance. It does not at all follow that such an escape is to be considered as designed. The conduct of the responsible custodian is to be examined in the light of all the circumstances of the case, the heinousness of the crime with which the prisoner is charged, the notoriety of the prisoner's guilt, the probability of his return, and the intention and motives of the custodian.

PROOF.

- (a) That a certain prisoner was duly committed to the charge of the accused.
- (b) That the prisoner escaped.
- (c) 1. Acts of the accused tending to permit escape. 2. Acts of the accused probative of a design to suffer the escape.
- (d) That as a result of these acts and of this design the prisoner escaped.

SEVENTY-FOURTH ARTICLE.

424. When any person subject to military law, except one who is held by the military authorities to answer, or who is awaiting trial or result of trial, or who is undergoing sentence for a crime or offense punishable under these articles, is accused of a crime or offense committed within the geographical limits of the States of the Union and the District of Columbia, and punishable by the laws of the land, the commanding officer is required, except in time of war, upon application duly made, to use his utmost endeavor to deliver over such accused person to the civil authorities, or to aid the officers of justice in apprehending and securing him, in order that he may be brought to trial. Any commanding officer who upon such application refuses or willfully neglects, except in time of war, to deliver over such accused person to the civil authorities or to aid the officers of justice in apprehending and securing him shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

When, under the provisions of this article, delivery is made to the civil authorities of an offender undergoing sentence of a court-martial, such delivery, if followed by conviction, shall be held to interrupt the execution of the sentence of the court-martial, and the offender shall be returned to military custody, after having answered to the civil authorities for his offense, for the completion of the said court-martial sentence.

DEFINITIONS AND PRINCIPLES.

I. REFUSING TO DELIVER ACCUSED PERSONS.

The words "commanding officer," as here used, import the officer who is chief of the complete integral place, body of troops, or detachment, wherein the person accused is serving at the time application is duly made. The words

"upon application duly made" prescribe a condition precedent to responsibility. They are inserted to prevent the possibility of false arrests, and to enable the commanding officer to satisfy himself of the true official character of him who makes the application, of the subsistence of an actual accusation against the person sought, and of the locus of the charged crime or offense.

The commanding officer should require that the application show that the crime or offense is alleged to have been committed within the geographical limits of the States of the Union and the District of Columbia. A sufficient form of application will be a written communication setting forth the fact of such an accusation of crime or offense committed within the prescribed limits as would subject the accused person to arrest by the civil authorities for the purposes of trial, or that a warrant for such arrest has issued, and a request that the commanding officer deliver the person accused to the civil authorities or assist them in apprehending or securing him. When the military jurisdiction has actively attached in any of the ways prescribed in the article, the commanding officer may, but he is not required to, make the prescribed delivery.

II. REFUSING TO AID IN APPREHENDING ACCUSED PERSONS.

The commanding officer is required not only to deliver the person accused but to aid in apprehending and securing him. The article therefore contemplates cases where, after apprehension by either the military or civil authorities, an application is duly made to a commanding officer for his assistance in securing a person subject to military law and accused of crime.

"Utmost endeavor" is to be understood in a reasonable sense with reference to the circumstances of the particular case. Thus, if the accused is not within military control, as where he is absent as a deserter, nothing more can be required of a commander than to furnish civil authority such information of his whereabouts and the prospect of his return as may be available.

While commanding officers are enjoined to use their utmost endeavor in carrying out the provisions of this law, a mere inadvertent neglect to take some necessary step toward delivery, apprehension, or securing of the person accused will not constitute an offense under this article, which contemplates only refusals and willful neglects to act.

ANALYSIS AND PROOF.

The punitive portion of the article applies only to officers, but the obligation to deliver or assist in apprehending and securing rests on all persons subject to military law.

The article defines two offenses:

I. Refusing or willfully neglecting to deliver an accused person.

II. Refusing or willfully neglecting to aid in apprehending and securing an accused person.

The essentials of proof are similar in both cases.

PROOF.

(a) That the accused was the commanding officer of a certain integral place, body of troops, or detachment.

(b) That a certain person under his command stood accused of a certain crime or offense, committed within the geographical limits of the States of the Union and the District of Columbia.

(c) That application was duly made to the accused officer by a person in proper civil authority—

1. To deliver the accused person to the civil authorities; or
2. To aid the officers of justice in apprehending and securing, or either, the accused person.

(d) Acts or omissions of the accused officer which constitute a refusal or a willful neglect to deliver the accused person or to aid in apprehending or securing him.

SECTION V.

WAR OFFENSES.

SEVENTY-FIFTH ARTICLE.

425. Any officer or soldier who misbehaves himself before the enemy, runs away, or shamefully abandons or delivers up any fort, post, camp, guard, or other command which it is his duty to defend, or speaks words inducing others to do the like, or casts away his arms or ammunition, or quits his post or colors to plunder or pillage, or by any means whatsoever occasions false alarms in camp, garrison, or quarters, shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

Misbehavior is by no means confined to acts of cowardice. It is a general term, and as here used it renders culpable under this article any conduct by an officer or soldier not conformable to the standard of behavior before the enemy set by the history of our arms. Running away is but a particular form of misbehavior specifically made punishable by this article.

"The enemy" imports any hostile body that our forces may be opposing and well includes a rebellious mob, a band of renegades, or a tribe of Indians.

ANALYSIS AND PROOF.

The article applies only to officers and soldiers. It defines seven offenses:

- I. Misbehavior before the enemy.
- II. Running away before the enemy.
- III. Shamefully abandoning or delivering up any command.
- IV. Speaking words inducing others to misbehave, run away, or abandon or deliver up any command.
- V. Casting away arms or ammunition.
- VI. Quitting post or colors to plunder or pillage.
- VII. Occasioning false alarms.

I. MISBEHAVIOR BEFORE THE ENEMY.

Under this clause may be charged any act of treason, cowardice, insubordination, or other unsoldierly conduct committed in the presence of the enemy.

PROOF.

- (a) That the accused was serving in the presence of an enemy.
- (b) Acts or omissions of the accused not conformable to the standard of soldierly conduct set by the history of our arms.

II. RUNNING AWAY BEFORE THE ENEMY.

- (a) That the accused was serving in the presence of an enemy.
- (b) That he misbehaved himself by running away.

III. SHAMEFULLY ABANDONING OR DELIVERING UP ANY COMMAND.

While the word "abandon" is broad enough to include a case in which a soldier or a subordinate officer leaves a fort, post, guard, or command which it is his duty to defend, it is probable that this clause of the article looks only to offenses by the commanding officers of such commands, and that abandonment by a subordinate should be charged as misbehavior or running away.

The words "deliver up" are synonymous with the word "surrender."

The surrender or abandonment of a command by an officer charged with its defense can only be justified by the utmost necessity and extremity, such as the exhaustion of provisions or water, the absence of hope of relief, and the certainty or extreme probability that no further effort could prevent the place, with its garrison, their arms, and magazines, from presently falling into the hands of the enemy. Unless such absolute necessity is shown, the conclusion must be that the surrender or abandonment was shameful within the meaning of this article.

An officer's duty to defend may be imposed by orders or by the circumstances in which he finds himself at a particular stage of operations; but an officer will find less justification in abandoning a post that he has been ordered to defend than in abandoning one that he has decided to defend. He will have less justification in delivering up a post than in abandoning it, and in delivering up a post that he has been ordered to defend he will have no justification at all except such as can be found in proof that no further resistance was possible.

PROOF.

(a) That the accused was charged by orders or by circumstances with a duty to defend a certain fort, post, camp, guard, or other command.

(b) That without justification he abandoned it or surrendered it.

IV. SPEAKING WORDS INDUCING OTHERS TO MISBEHAVE, RUN AWAY, OR TO ABANDON OR DELIVER UP ANY COMMAND.

The words "to do the like" refer to the offenses of misbehavior and running away, as well as to abandoning or delivering up a command.

The inducement contemplated is verbal only, but it may include any argument, persuasion, threat, language of discouragement or alarm, or false or incorrect statement which may avail to bring about an unnecessary surrender, retreat, or any misbehavior before the enemy. The offense will not be complete, however, unless the words spoken do induce some person other than the accused to misbehave, run away, or abandon or surrender a command. It is to be noted, however, that speaking words whose natural tendency is to induce others to do any of these things may in itself constitute misbehavior of the speaker within the meaning of the article, although the words spoken induce no misconduct on the part of others.

PROOF.

(a) That some person other than the accused misbehaved in the presence of the enemy or ran away or abandoned or delivered up any command which it was his duty to defend.

(b) Words spoken by the accused which induced such action.

V. CASTING AWAY ARMS OR AMMUNITION.

PROOF.

(a) That the accused cast away certain arms or ammunition as specified.

VI. QUITTING POST OR COLORS TO PLUNDER OR PILLAGE.

The word "post" includes any place of duty, whether permanently or temporarily fixed. The term "colors" was used to include cases where the offender's organization is moving, but the words "quits his post," as here used, import any unauthorized leaving of that place where the accused should be.

In proving this crime an intent to pillage or plunder must be shown. The words "to pillage or plunder" may be properly paraphrased "to seize and appropriate public or private property." The offense is no less committed, though the quitting is by quasi authority, as where soldiers quit the place where they should be to go forth and maraud in company with an officer or noncommissioned officer.

The act is complete when the accused has left his post with the described intent, although he may never have consummated his design.

PROOF.

- (a) That the accused left his post of duty.
- (b) That the intention of the accused in leaving was to seize and appropriate private or public property.

VII. OCCASIONING FALSE ALARMS.

The article is intended as well to guard the repose and tranquillity of troops as to avoid the ill effect on morale which must inevitably follow needless excursions and alarms. The article contemplates the spreading of false and disturbing rumors and reports as well as the needless giving of such alarm signals as the beating of drums and the blowing of trumpets.

The intent is immaterial. If the alarm was given, and it appears that there was no material cause or occasion which should reasonably justify a general alarm, the offense is complete.

PROOF.

- (a) That an alarm was occasioned in a certain camp, garrison, or quarters.
- (b) Conduct of the accused which occasioned the alarm.
- (c) That there was no reasonable or sufficient justification in fact for occasioning the alarm.

SEVENTY-SIXTH ARTICLE.

426. If any commander of any garrison, fort, post, camp, guard, or other command is compelled, by the officers or soldiers under his command, to give it up to the enemy or to abandon it, the officers or soldiers so offending shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

When the surrender or abandonment of a command is induced by words spoken, the offense should be charged under the seventy-fifth article. Where the surrender or abandonment is compelled by acts rather than words, the charge should be laid under the present article.

The offense here contemplated is very like that of a mutiny which results in the surrender or abandonment of any command, but, unlike mutiny, no concert of action is an essential element of this offense. The offense is not complete until the command is abandoned or given up to the enemy. The compulsion need not consist in the use of actual violence or force. A refusal to obey orders or to do duty or to participate in measures of defense would be as effective compulsion as if forcible restraint were resorted to.

ANALYSIS AND PROOF.

The article applies to officers and soldiers.

The article defines one crime.

I. SUBORDINATES COMPELLING COMMANDER TO SURRENDER.

PROOF.

- (a) That a certain commander has abandoned his command or given it up to the enemy.
- (b) That the accused was under the command of this commander.
- (c) Acts or omissions of the accused that compelled the commander to abandon his command or give it up to the enemy.

SEVENTY-SEVENTH ARTICLE.

427. Any person subject to military law who makes known the parole or countersign to any person not entitled to receive it according to the rules and discipline of war, or gives a parole or countersign different from that which he received, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

A countersign is a word given from the principal headquarters of a command to aid guards and sentinels in their scrutiny of persons who apply to pass the lines.

A parole is a word used as a check on the countersign. It is imparted only to those who are entitled to inspect guards and to commanders of guards.

ANALYSIS AND PROOF.

The article applies to any person subject to military law.

It defines two offenses:

- I. Making known the parole or countersign.
- II. Giving a parole or countersign different from that received.

I. MAKING KNOWN THE PAROLE OR COUNTERSIGN.

The class of persons entitled to receive the countersign will expand and contract under the varying circumstances of war. Who these persons are will be determined largely, in any particular case, by the general or special orders under which the accused was acting. It is no defense under the terms of this law that the accused did not know that the person to whom he communicated the countersign or parole was not entitled to receive it. Before imparting such a word it behooves a person subject to military law to determine at his peril that the person to whom he presumes to make known the word is a person authorized to receive it.

The intent or motive that actuated the accused is immaterial to the issue of guilt, as would also be the circumstance that the imparting was negligent or inadvertent. It is likewise immaterial whether the accused had himself received the password in the regular course of duty or whether he obtained it in some other way.

PROOF.

- (a) That the accused made known the countersign or parole to a certain person, known or unknown.
- (b) That the person was not entitled to receive it.

II. GIVING A PAROLE OR COUNTERSIGN DIFFERENT FROM THAT RECEIVED.

The intent or motive that actuated the accused is immaterial to the issue of guilt.

PROOF.

(a) That the accused received a certain countersign or parole.

(b) That he gave a parole or countersign different from that which he received.

SEVENTY-EIGHTH ARTICLE.

428. Any person subject to military law who, in time of war, forces a safeguard shall suffer death or such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

A safeguard is a detachment, guard, or detail posted by a commander for the purpose of protecting some person or persons, place, or property. The term also imports a written order left by a commander with an enemy subject or posted upon enemy property for the protection of the individual or property concerned.

Any trespass on the protection of the safeguard will constitute an offense under the article, provided that the accused was aware of the existence of the safeguard.

ANALYSIS AND PROOF.

The article applies to all persons subject to military law.

It defines one offense:

I. FORCING A SAFEGUARD.

PROOF.

(a) That a safeguard had been issued or posted for the protection of a certain person or persons, place, or property.

(b) That, with knowledge of the safeguard, or under circumstances that charged him with notice of the safeguard, the accused trespassed upon its protection.

SEVENTY-NINTH ARTICLE.

429. All public property taken from the enemy is the property of the United States and shall be secured for the service of the United States, and any person subject to military law who neglects to secure such property or is guilty of wrongful appropriation thereof shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

Immediately upon its capture from the enemy public property becomes the property of the United States. Neither the individual who takes it nor any other person has any private right in such property. On the contrary, every person subject to military law has an immediate duty to take such steps as are within his powers and functions to secure such property to the service of the United States and to protect it from destruction or loss.

ANALYSIS AND PROOF.

The article applies to all persons subject to military law. See A. W. 2.

It defines two offenses:

I. Neglecting to secure captured public property.

II. Wrongful appropriation of captured public property.

I. NEGLECTING TO SECURE CAPTURED PUBLIC PROPERTY.

The neglect will consist in a failure to take such steps as a reasonably prudent man acting in the capacity in which accused was acting would have taken in the same or similar circumstances to secure the property in question to the service of the United States.

PROOF.

- (a) That certain public property was captured from the enemy.
- (b) That the functions of the accused vested him with a certain power and imposed on him a certain duty to secure such property to the service of the United States.
- (c) Acts or omissions of the accused which evidence a failure to take such steps to secure the property to the service of the United States as would have been taken by a reasonably prudent person acting in the capacity in which the accused was acting and in the same or similar circumstances.

II. WRONGFUL APPROPRIATION OF CAPTURED PUBLIC PROPERTY.

Any unauthorized and unjustified act in disposition of property which is inconsistent with the true owner's right of complete dominion over it is a wrongful appropriation of it. A wrongful appropriation is distinguished from a neglect in that it presumes some act, while a neglect may consist solely in an omission.

PROOF.

- (a) That certain public property was captured from the enemy.
- (b) Acts of the accused in disposition of the captured public property, inconsistent with the United States' right of complete dominion over that property.

EIGHTIETH ARTICLE.

430. Any person subject to military law who buys, sells, trades, or in any way deals in or disposes of captured or abandoned property, whereby he shall receive or expect any profit, benefit, or advantage to himself or to any other person directly or indirectly connected with himself, or who fails whenever such property comes into his possession or custody or within his control to give notice thereof to the proper authority and to turn over such property to the proper authority without delay, shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial, military commission, or other military tribunal may adjudge, or by any or all of said penalties.

DEFINITIONS AND PRINCIPLES.

This article is broader than the preceding one in the following particulars: It protects abandoned as well as captured property and private as well as public property.

Unless the property is private or abandoned property or unless the acts charged fall within the descriptions of this article, the offense should be charged under article 79, supra.

ANALYSIS AND PROOF.

The article applies to all persons subject to military law. See A. W. 2: It defines a number of offenses which may be treated as follows:

- I. Any dealing in or disposition of captured or abandoned property whereby the accused receives or expects to receive an advantage.
- II. Failure or delay in reporting the receipt of and in turning over to proper authority captured or abandoned property.

I. DEALING IN CAPTURED OR ABANDONED PROPERTY.

This portion of the article addresses itself to several specific acts of wrongful dealings and looks especially to cases where, instead of appropriating the property to his own use in kind, the accused in any other way deals with it to advantage. The article prohibits receipt as well as disposition of captured or abandoned property by barter, gift, pledge, lease, or loan. It lies against the destruction or abandonment of such property if any of these acts are done in the receipt or expectation of profit, benefit, or advantage to the actor or to any other person directly or indirectly connected with himself. The expectation of profit need not be founded on contract; it is enough if the prohibited act be done for the purpose, or in the hope, of benefit or advantage, pecuniary or otherwise.

PROOF.

(a) That the accused has disposed of, dealt in, received, etc., certain public or private or abandoned property.

(b) That by so doing the accused received or expected some profit or advantage to himself or to a certain person connected in a certain manner with himself.

II. FAILURE OR DELAY IN REPORTING THE RECEIPT OF CAPTURED OR ABANDONED PROPERTY.

Proper authority is any authority competent to order the disposition of the property in question, and the required report should be direct or through such channels as the customs and rules of the service prescribe.

PROOF.

(a) That certain captured or abandoned property came into the possession, custody, or control of the accused.

(b) Acts or omissions of the accused which evidence his failure in reporting the receipt of, and in turning over without delay, such property to proper authority.

EIGHTY-FIRST ARTICLE.

431. Whosoever relieves the enemy with arms, ammunition, supplies, money, or other thing, or knowingly harbors or protects or holds correspondence with or gives intelligence to the enemy, either directly or indirectly, shall suffer death, or such other punishment as a court-martial or military commission may direct.

DEFINITIONS AND PRINCIPLES.

"Enemy" imports enemy citizens as well as soldiers and does not restrict itself to the enemy government or its army. All the citizens of one belligerent are enemies of the Government and of all the citizens of the other.

ANALYSIS AND PROOF.

This article describes, in nearly every phrase, an overt act of treason. The word whosoever, as it is here used, subjects to the jurisdiction of courts-martial and military commissions all persons, either military or civil, who, in the theater of operations and during the continuance of war, traffic with the enemy in any of the ways herein denounced.

The article defines four offenses:

- I. Relieving the enemy.
- II. Harboring or protecting the enemy.
- III. Holding correspondence with the enemy.
- IV. Giving intelligence to the enemy.

I. RELIEVING THE ENEMY.

"Relieves," in the sense here used, is substantially equivalent to furnishes or supplies. It is immaterial whether the articles furnished are needed by the enemy or whether the transaction is a donation or sale. Knowledge or intent is not an essential in proof of this offense.

PROOF.

(a) That the accused either directly or indirectly furnished the enemy with a certain article or articles.

II. HARBORING OR PROTECTING THE ENEMY.

An enemy is harbored or protected when he is shielded either physically or by use of any artifice, aid, or representation from any injury or misfortune which in the chance of war may befall him. It must appear that the offense is knowingly committed. But, as in all other cases where knowledge must be proved, circumstances sufficient to put a reasonable man on notice will be sufficient to charge the accused with notice.

PROOF.

(a) That the accused harbored or protected a certain person.

(b) That the person so protected was an enemy, and that the accused had notice or is chargeable with notice of this fact.

III. HOLDING CORRESPONDENCE WITH THE ENEMY.

Correspondence does not necessarily import a mutual exchange of communication. The rule requires absolute nonintercourse, and any communication, no matter what may be its tenor or intent, is here denounced. The prohibition lies against any method of communication whatsoever, from the winking of an eye to the sending of script, and the offense is complete the moment the communication emanates from the accused whether it reaches its destination or not. The words "directly or indirectly" are construed as applying to this offense, and they include within the prohibition communications printed in newspapers and intended for the enemy and to communications conveyed to the enemy through friendly or neutral hands. It is essential to prove that the offense was knowingly committed.

Citizens of neutral powers resident in or visiting invaded or occupied territory can claim no immunity from the customary laws of war which threaten punishment for communication with the enemy. The offense of communicating with the enemy when committed by a resident of occupied territory constitutes war treason and is properly charged under this article.

PROOF.

(a) That the accused uttered a certain communication.

(b) That the communication was intended for a certain person, and that the accused had notice or is chargeable with notice that this person was an enemy.

IV. GIVING INTELLIGENCE TO THE ENEMY.

This is a particular case of corresponding with the enemy rendered more heinous by the fact that the communication contains intelligence that may be useful to the enemy for any of the multifarious reasons that make informa-

tion valuable to belligerents. As in the preceding case, knowledge must be proved, and it is immaterial to the issue of guilt whether the intelligence was conveyed by direct or indirect means. The word "intelligence" imports that the information conveyed is true, at least in part.

PROOF.

- (a) That the accused knowingly conveyed to the enemy certain information.
- (b) That the information was true, at least in part.

EIGHTY-SECOND ARTICLE.

432. Any person who in time of war shall be found lurking or acting as a spy in or about any of the fortifications, posts, quarters, or encampments of any of the armies of the United States, or elsewhere, shall be tried by a general court-martial or by a military commission, and shall, on conviction thereof, suffer death.

DEFINITIONS AND PRINCIPLES.

See below.

ANALYSIS AND PROOF.

The words "any person" bring within the jurisdiction of courts-martial and military commissions all persons of whatever nationality or civil status who may be accused of the offense denounced by the article.

The article defines one crime—being a spy.

I. BEING A SPY.

The principal characteristic of this offense is a clandestine dissimulation of the true object sought, which object is an endeavor to obtain information with the intention of communicating it to the hostile party.

Thus, soldiers not wearing disguise, dispatch riders, whether soldiers or civilians, and persons in aircraft who carry out their missions openly and who have penetrated hostile lines are not to be considered spies, for the reason that, while they may have resorted to concealment, they have practiced no dissimulation.

It is necessary to prove an intent to communicate information to the hostile party. This intent will very readily be presumed on proof of a deceptive insinuation of the accused among our forces, but this presumption may be rebutted by very clear evidence that the person had come within the lines for a comparatively innocent purpose, as to visit his family, or that he has assumed a disguise to enable him to reach his own lines.

It is not essential that the accused obtain the information sought or that he communicate it. The offense is complete with the lurking or dissimulation with intent to accomplish these objects.

An act of espionage completed by the escape of the accused to his own lines can not be the subject of trial if the quondam spy is later captured.

A person living in occupied territory who, without dissimulation, merely reports what he sees or what he hears through agents to the enemy may be charged under the preceding article with communicating or giving intelligence to the enemy, but he may not be charged under this article with being a spy.

PROOF.

- (a) That the accused was found at a certain place within our lines, acting clandestinely, or under false pretenses.
- (b) That he was obtaining, or endeavoring to obtain, information with intent to communicate the same to the enemy.

SECTION VI.

MISCELLANEOUS CRIMES AND OFFENSES.

EIGHTY-THIRD ARTICLE.

433. Any person subject to military law who willfully, or through neglect, suffers to be lost, spoiled, damaged, or wrongfully disposed of, any military property belonging to the United States shall make good the loss or damage and suffer such punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The loss, etc., may be said to be willfully suffered when the accused knowing the loss, etc., to be imminent or actually going on, takes no steps to prevent it, as where a sentinel seeing a small and readily extinguishable fire in a stack of hay on his post allows it to burn up. A suffering through neglect implies an omission to take such measures as were appropriate under the circumstances to prevent a probable loss, damage, etc.

The willful or neglectful sufferance specified by the article may consist in a deliberate violation or positive disregard of some specific injunction of law, regulations, or orders; or it may be evidenced by such circumstances as a reckless or unwarranted personal use of the property; causing or allowing it to remain exposed to the weather, insecurely housed or not guarded; permitting it to be consumed, wasted, or injured by other persons; loaning it to an irresponsible person by whom it is damaged, etc. (Winthrop, p. 862.)

ANALYSIS AND PROOF.

The article applies to any one subject to military law. See article 2.
The article embraces eight offenses, indicated by the following diagram:

These offenses may be briefly treated under the heading "Suffering military property to be lost, etc."

I. SUFFERING MILITARY PROPERTY TO BE LOST, ETC.

PROOF.

(a) That certain military property was lost, spoiled, damaged, or wrongfully disposed of in the manner alleged.

(b) That such loss, spoiling, damage, or wrongful disposition was suffered by the accused through a certain omission of duty on his part.

(c) That such omission was willful, or negligent, as alleged.

(d) The value of the property, as alleged.

EIGHTY-FOURTH ARTICLE.

434. Any soldier who sells or wrongfully disposes of or willfully or through neglect injures or loses any horse, arms, ammunition, accouterments, equipment, clothing, or other property issued for use in the military service, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See definitions under A. W. 80, pages 232, 233.

Accouterments applies in the military sense to those parts of the soldier's equipment which are issued by the Ordnance Department * * * in connection with his arms and ammunition, such, for example, as belts and cartridge pouches. (Digest, p. 1084.)

Clothing includes all articles of clothing whether issued under a clothing allowance or otherwise; for example, overcoats and sweaters as now issued are articles of clothing. That the property sold, disposed of, lost, or injured was issued to someone other than the accused is immaterial; the article applies to any property issued for use in the military service.

ANALYSIS AND PROOF.

This article applies to enlisted men only.

The article defines a number of offenses, indicated by the following diagram:

These offenses may be treated under the following heads:

I. Selling or wrongfully disposing of military property.

II. Willfully or through neglect injuring or losing military property.

I. SELLING OR WRONGFULLY DISPOSING OF MILITARY PROPERTY.

See matter under A. W. 80, Item I.

PROOF.

(a) That the accused soldier sold or otherwise disposed of certain property in the manner alleged.

(b) That such disposition was wrongful.

(c) That the property was issued for use in the military service.

(d) The value of the property as alleged.

II. WILLFULLY OR THROUGH NEGLIGENCE INJURING OR LOSING MILITARY PROPERTY.

A willful injury or loss is one that is intentionally occasioned. A loss or injury is occasioned through neglect when it is the result of a want of such attention to the nature or probable consequences of an act or omission as was appropriate under the circumstances.

Accouterments applies in the military sense to those parts of the soldier's equipment which are issued by the Ordnance Department in connection with his arms and ammunition, such for example as belts and cartridge pouches. (Digest, p. 1084.)

Clothing includes all articles of clothing, whether issued under a clothing allowance or otherwise; for example, overcoats and sweaters as now issued are articles of clothing. That the property sold, disposed of, lost, or injured was issued to some one other than the accused is immaterial; the article applies to any property issued for use in the military service.

PROOF.

- (a) That certain property was injured in a certain way or lost, as alleged.
- (b) That such property was issued for use in the military service.
- (c) That such injury or loss was willfully caused by the accused in a certain manner, as alleged; or that such injury or loss was the result of certain neglect on the part of the accused.
- (d) The value of the property, as alleged.

EIGHTY-FIFTH ARTICLE.

435. Any officer who is found drunk on duty shall, if the offense be committed in time of war, be dismissed from the service and suffer such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall be punished as a court-martial may direct. Any person subject to military law, except an officer, who is found drunk on duty shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

The article does not require that the accused shall have become drunk, but that he shall have been found, i.e., discovered or perceived, to be drunk, when on duty, and it does not therefore necessarily follow that his drunkenness shall have commenced after the duty has been entered upon. To permit an officer or soldier, when inebriated, to go upon any duty of importance, while in general involving an injustice to the individual, is also a reprehensible act and a military offense in the superior who knowingly suffers it. But the fact that he was already intoxicated can not render the party himself any the less legally liable under the article, if, after having entered upon the duty, his intoxication continues and his condition is detected. But, on the other hand, a soldier (or officer), is not "found" drunk in the sense of the article if he is simply discovered to be drunk when ordered, or otherwise required, to go upon the duty, upon which, because of his condition, he does not enter at all. (Winthrop, pp. 944, 945.)

Whether the drunkenness was caused by liquor or drugs is immaterial, but where the sole cause was a liquor or drug duly prescribed by a medical officer of the Army or a civil physician and taken in good faith according to the prescription no offense is committed.

The fact that the accused, owing to an unsuspected susceptibility, permanent or temporary, was made drunk by indulging in a very small amount of intoxicant is not a defense.

Any intoxication which is sufficient to sensibly impair the rational and full exercise of the mental and physical faculties is drunkenness within the meaning of the article. (Digest, p. 540.)

Where the accused is charged under this article, a conviction under the general article of being under the influence of liquor is wholly inconsistent if he was found in such condition while on duty. The article requires no particular degree of drunkenness, and if the accused was found so far under the influence of liquor as to be punishable at all he was found drunk on duty within the meaning of this article.

The term "duty" as used in this article, means of course military duty. But—it is important to note—every duty which an officer or soldier is legally required, by superior military authority, to execute, and for the proper execution of which he is answerable to such authority, is necessarily a military duty. (Winthrop, p. 949.)

The words "on duty," as used in this article, have also received an authorita-

tive interpretation. As applied to the commanding officer of a post, or of an organization, or detachment in the field, the senior officer present, in the actual exercise of command, is constantly on duty; the term being here used in contradistinction to "on leave." In the case of other officers, or of enlisted men, the term "on duty" has been held to relate to the performance of duties of routine or detail, in garrison or in the field; the words "off duty," in respect to such persons, relating to such periods or occasions when, no duty being required of them by orders or regulations, officers and men are said to occupy that status of leisure known to the service as being "off duty." (Davis, p. 408.)

In time of war and in a region of active hostilities the circumstances are often such that all members of a command may properly be considered as being continuously on duty within the meaning of this article.

A medical officer of a post, where there are constantly sick persons under his charge who may at any moment require his attendance, may, generally speaking, be deemed to be "on duty" in the sense of the article during the whole day and not merely during the hours regularly occupied by sick call, visiting the sick, or attending hospital. If found drunk at any other hour he may in general be charged with an offense under this article. (Digest, p. 127.)

So, also, an officer of the day and members of the guard are on duty during their entire tour within the meaning of this article, but a sentinel found drunk on post is chargeable under the next succeeding article. The article also applies to cases where the duty being performed is merely a preliminary one, such as a reporting for inspection by a soldier designated for guard or a reporting under orders for duty at a post to the commanding officer.

The offense of a person who absents himself from his duty and is found drunk while so absent, or who is relieved from duty at a post and ordered to remain there to await orders, and is found drunk during such status, is not chargeable under this article.

ANALYSIS AND PROOF.

This article applies to any person subject to military law. See Article 2. The article defines one offense, namely, being found drunk on duty.

I. BEING FOUND DRUNK ON DUTY.

PROOF.

- (a) That the accused was on a certain duty, as alleged.
- (b) That he was found drunk while on such duty.

EIGHTY-SIXTH ARTICLE.

436. Any sentinel who is found drunk or sleeping upon his post, or who leaves it before he is regularly relieved, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall suffer any punishment, except death, that a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

As to drunkenness, see matter under eighty-fifth article, page 1442.

The term "sentinel" does not include a watchman.

A sentinel is on post within the meaning of this article not only when he is walking a duly designated sentinel's post, as is ordinarily the case in garrison, but also "when he may be stationed in observation against the approach of an enemy, or on post to maintain internal discipline, or to guard stores, or to guard prisoners while in confinement or at work." (Digest, p. 128.)

The fact that the sentinel was not posted in the regular way is not a defense.

ANALYSIS AND PROOF.

The article applies only to sentinels.

The article defines three offenses, namely:

- I. Being found drunk on post.
- II. Being found sleeping on post.
- III. Leaving post before being relieved.

I. BEING FOUND DRUNK ON POST.

As to drunkenness, see matter under eighty-fifth article, page 1442.

PROOF.

(a) That the accused soldier was posted as a sentinel on a certain post, as alleged.

(b) That he was found drunk while on such post.

II. BEING FOUND SLEEPING ON POST.

The fact that the accused had been previously overtaxed by excessive guard duty is not a defense, although evidence to that effect may be received in extenuation of the offense.

PROOF.

(a) That the accused soldier was posted as a sentinel on a certain post, as alleged.

(b) That he was found sleeping while on such post.

III. LEAVING POST BEFORE BEING RELIEVED.

The offense of leaving post is not committed when a sentinel goes an immaterial distance from the point, path, area, or object which was prescribed as his post.

PROOF.

(a) That the accused soldier was posted as a sentinel on a certain post, as alleged.

(b) That he left such post without being regularly relieved.

EIGHTY-SEVENTH ARTICLE.

437. Any officer commanding in any garrison, fort, barracks, camp, or other place where troops of the United States may be serving who, for his private advantage, lays any duty or imposition upon or is interested in the sale of any victuals or other necessities of life brought into such garrison, fort, barracks, camp, or other place for the use of the troops, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article.

ANALYSIS AND PROOF.

This article applies to commanding officers only.

The article defines offenses which may be treated under two heads, as follows:

- I. Laying a duty or imposition upon the bringing in of victuals, etc.
- II. Being interested in the sale of victuals, etc.

I. LAYING A DUTY OR IMPOSITION UPON THE BRINGING IN OF VICTUALS, ETC.

A commanding officer who should prohibit the entry into his camp of peddlers of vegetables for the troops, permitting it only if the peddlers pay him for the privilege, would be guilty of this offense whether any money was actually paid or not.

PROOF.

(a) That the accused officer was in command of a certain place where troops of the United States were serving, as alleged.

(b) That he laid a certain duty or imposition upon the bringing into such command of victuals or other necessities of life for the use of such troops, as alleged.

(c) That such duty or imposition was laid for his own private advantage.

II. BEING INTERESTED IN THE SALE OF VICTUALS, ETC.

The interest need not be a direct interest, such as that attaching to a partnership, or part ownership, of the articles introduced for sale, but may be one of an indirect or contingent character, as, for instance, an interest arising from an agreement or mutual understanding between the officer and the owner of the supplies that the former shall receive a percentage on the sales, or a commission on all profits above a certain sum, or some present of money or goods in return for his sanction of the speculation or promotion of the business. (Winthrop, p. 870.)

Thus a commanding officer commits this offense when he agrees with a peddler to exclude others in consideration of some advantage to himself.

A commanding officer might become interested in the sale of articles by the post exchange within the meaning of this article.

PROOF.

(a) That the accused officer was in command of a certain place where troops of the United States were serving, as alleged.

(b) That he became pecuniarily interested in a certain way in the sale of certain victuals or other necessities of life to such troops, as alleged.

(c) That he so became interested for his own private advantage.

EIGHTY-EIGHTH ARTICLE.

438. Any person subject to military law who abuses, intimidates, does violence to, or wrongfully interferes with any person bringing provisions, supplies, or other necessities to the camp, garrison, or quarters of the forces of the United States shall suffer such punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article.

This article in no way interferes with the lawful powers of a military commander to exclude persons or supplies inimical to health or good order of his command. The purpose of this article is to prevent the diminishing or cutting off the supply of necessities brought in by private persons through any abuse, intimidation, doing violence to, or wrongfully interfering with, such persons. The prohibition against interference, etc., therefore, applies not only while such persons are coming to the camp, etc., but also while they remain and during their return therefrom.

The wrongful interference contemplated would include not only any wrongful act not included in the terms "abuse, etc.," which prevents, obstructs, or delays the movements of the person, but any wrongful interference with the supplies themselves, such as stealing or destroying them.

ANALYSIS AND PROOF.

This article applies to any person subject to military law. The article defines a number of offenses which may be briefly treated under one head, as follows:

I. INTIMIDATING, DOING VIOLENCE TO, OR WRONGFULLY INTERFERING WITH PERSONS BRINGING NECESSARIES.

PROOF.

(a) That a certain person named or described was bringing provisions, supplies, or other necessities to a certain camp, garrison, or quarters of the forces of the United States, as alleged.

(b) That the accused abused, intimidated, did violence to, or wrongfully interfered with such person while so engaged and in the manner alleged.

EIGHTY-NINTH ARTICLE.

439. All persons subject to military law are to behave themselves orderly in quarters, garrison, camp, and on the march; and any person subject to military law who commits any waste or spoil, or willfully destroys any property whatsoever (unless by order of his commanding officer), or commits any kind of depredation or riot shall be punished as a court-martial may direct. Any commanding officer who, upon complaint made to him, refuses or omits to see reparation made to the party injured, in so far as the offender's pay shall go toward such reparation, as provided for in article one hundred and five, shall be dismissed from the service, or otherwise punished, as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article and the definitions under the respective offenses as given below.

ANALYSIS AND PROOF.

This article divides itself into two parts, one embracing all persons subject to military law, and the other commanding officers only.

The article defines a number of offenses which may be briefly treated under the following headings:

- I. Committing any waste or spoil.
- II. Willfully destroying property.
- III. Committing depredation or riot.
- IV. Refusing or omitting to see reparation made.

I. COMMITTING ANY WASTE OR SPOIL.

The terms "waste" or "spoil" as used in this article refer to such acts of voluntary destruction of or permanent damage to real property as burning down buildings, tearing down fences, cutting down shade or fruit trees, and the like.

PROOF.

(a) That the accused being with a certain command in quarters, camp, garrison, or on the march, committed waste or spoil on certain property in the manner alleged.

(b) That such acts were not ordered by his commanding officer.

II. WILLFULLY DESTROYING PROPERTY.

To be destroyed it is not necessary that the property be completely demolished or annihilated. It is sufficient if it is so far injured as to be useless for the purpose for which it was intended.

PROOF.

(a) That the accused being with a certain command in quarters, camp, garrison, or on the march, destroyed certain property, as alleged.

(b) That such destruction was willful and was not ordered by his commanding officer.

III. COMMITTING DEPREDAATION OR RIOT.

The terms "any kind of depredation or riot," include plundering, pillaging, robbing, and any other willful damage to property not included in the preceding specific terms of the article. Injuries to persons are not made punishable by this article.

PROOF.

(a) That the accused being with a certain command in quarters, camp, garrison, or on the march, committed certain acts of depredation on certain property, or certain acts of rioting resulting in injury to certain property, as alleged.

IV. REFUSING OR OMITTING TO SEE REPARATION MADE.

Refusing to entertain a proper complaint at all; refusing or omitting to convene a board for the assessment of damage; or to act on such proceedings, or to direct the proper stoppages are instances of this offense.

PROOF.

(a) That the accused was the commanding officer of a certain command in quarters, garrison, camp, or on the march, as alleged.

(b) That a complaint was duly made to him by a certain person of damage to or loss of certain property occasioned by troops of the accused's command, as alleged.

(c) That the accused either refused to see reparation made or omitted in the manner alleged to see reparation made to the party injured in so far as the offender's pay would go toward such reparation.

NINETIETH ARTICLE.

440. No person subject to military law shall use any reproachful or provoking speeches or gestures to another; and any person subject to military law who offends against the provisions of this article shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article.

The article is intended to prevent what frequently are the first steps toward quarrels, fights, or serious offenses.

Reproachful speeches and gestures are such as involve censorious comment on the actions or opinions of another. Provoking speeches and gestures are such as tend to exasperate or to arouse anger and resentment.

ANALYSIS AND PROOF.

This article applies to any person subject to military law. The article defines offenses which may be treated under one heading, as follows:

I. USING PROVOKING SPEECHES OR GESTURES.

PROOF.

- (a) That the accused used certain speeches or gestures to a certain person, as alleged.
- (b) That the speeches or gestures were reproachful or provoking.
- (c) That the person to whom such speeches or gestures were addressed is in one of the classes of persons subject to military law.

NINETY-FIRST ARTICLE.

441. Any person subject to military law who fights or promotes or is concerned in or connives at fighting a duel, or who having knowledge of a challenge sent or about to be sent fails to report the fact promptly to the proper authority shall, if an officer, be dismissed from the service or suffer such other punishment as a court-martial may direct; and if any other person subject to military law, shall suffer such punishment as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See the terms of the article.

A duel is a concerted fight between two persons with deadly weapons, the object of which is claimed to be the satisfaction of wounded honor. (Wharton, vol. 2, p. 555.)

[Note: The offenses made punishable by this article are of such infrequent occurrence that it is considered inadvisable to comment more fully upon them. In a case of doubt, works on military law should be consulted.]

ANALYSIS AND PROOF.

This article applies to any person subject to military law.

The article embraces a number of offenses which may be briefly treated under the following headings:

- I. Fighting or promoting a duel.
- II. Being concerned in or conniving at fighting a duel.
- III. Failing to report knowledge of a challenge.

I. FIGHTING OR PROMOTING A DUEL.

Fighting or promoting a duel would include such acts as the sending, giving, or accepting a challenge, or the carrying of a challenge or acceptance, the arrangement of the preliminaries, and, in general, any act by which a duel is intentionally furthered, encouraged, or incited, whether the duel takes place or not.

PROOF.

- (a) That the accused fought a duel with a certain person as alleged, or that he promoted a duel between certain persons in the manner alleged.

II. BEING CONCERNED IN OR CONNIVING AT FIGHTING A DUEL.

Being concerned in or conniving at fighting a duel would include the being present thereat in some capacity other than a principal, as in the case of seconds and doctors.

PROOF.

- (a) That the accused was concerned in or connived at fighting a certain duel in the manner alleged.

III. FAILING TO REPORT KNOWLEDGE OF A CHALLENGE.

A challenge is a written or verbal demand, request, or invitation to another to fight a duel.

To constitute a challenge no particular form is necessary. It is enough if what was sent or about to be sent, considered in connection with the circumstances, amounts to such a demand, request or invitation. However, an effort to provoke a challenge or an announcement of a willingness to accept one is not a challenge.

As to knowledge, see matter under fifty-fifth article.

PROOF.

(a) That the accused knew that a certain challenge had been sent, or was about to be sent, as alleged.

(b) That he either did not report the fact to the proper authority at all, or that he unnecessarily delayed making such report, as alleged.

NINETY-SECOND ARTICLE.

442. Any person subject to military law who commits murder or rape shall suffer death or imprisonment for life, as a court-martial may direct; but no person shall be tried by court-martial for murder or rape committed within the geographical limits of the States of the Union and the District of Columbia in time of peace.

DEFINITIONS AND PRINCIPLES.

See the terms of the article and the matter under the treatment of the several offenses defined therein.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See Article 2.

The article defines two offenses, as follows:

I. Murder.

II. Rape.

I. MURDER.

Murder is the unlawful killing of a human being with malice aforethought. (Federal Penal Code, 1910, sec. 273.)

"Unlawfully" as used in the definition of murder means without legal justification or excuse.

A homicide done in the proper performance of a legal duty is justifiable. Thus, executing a person pursuant to a sentence of death; killing in suppressing a mutiny or in preventing the escape of a prisoner where no other available means are adequate; killing an enemy in battle; and killing to prevent the commission of a felony attempted by force or surprise, such as murder, burglary, or arson, are cases of justifiable homicide.

The right and duty of a sentinel over a prisoner in his charge in case of attempted escape is discussed in the Manual of Interior Guard Duty, 1914.

This right and duty extends to other members of the guard whose duties include the safe-keeping of such prisoner. (Digest, 1912, p. 583.)

The same principles apply to the arrest of a soldier by officers or soldiers authorized to make the particular arrest.

A party of soldiers left their camp at night in time of war without leave contrary to positive orders and proceeded to a neighboring town, where they created a disturbance. Their commanding officer followed them, found them in a saloon, and was about to arrest them, when they broke from him,

and knowing who he was disregarded his order to halt and ran away from him. He repeated his order, and not being obeyed and having no other means of detaining them, fired upon them while fleeing with a pistol, and shot and killed one of them. Held, that he did not use undue force in endeavoring to maintain discipline and to arrest the offenders whom he was endeavoring to return to their stations, and that he was not guilty of an offense requiring punishment, and that his conduct under the circumstances in which he was placed was justified. (Digest, p. 480.)

The general rule is that "The acts of a subordinate officer or soldier, in compliance with his supposed duty, or of superior orders, are justifiable, and he will be protected against the consequences, unless they are manifestly beyond the scope of his authority, and such that a man of ordinary sense and understanding would know to be illegal, where he acts in good faith and without malice." (Wharton on Homicide, 3d ed., p. 731.)

The foregoing principles should not be construed as conferring immunity on an officer or soldier who willfully or through culpable negligence does acts endangering the lives of innocent third parties in the discharge of his duty to prevent escape or effect an arrest.

But where a guard fired on a prisoner fleeing down a public street which was apparently clear, under circumstances that would have justified the homicide of the prisoner, and thereby accidentally killed a young woman whom he did not see at the time he shot, it was held that the homicide was excusable.

A homicide which is the result of an accident or misadventure in doing a lawful act in a lawful manner, or which is done in self-defense on a sudden affray, is excusable. Thus, where a lawful operation, performed with due care and skill, causes the death of the patient, the homicide is excusable. To excuse a killing on the ground of self-defense upon a sudden affray, the killing must have been necessary to save the person's life or the lives of those whom he is bound to protect, or to prevent great bodily harm to himself or them. The danger must be believed on reasonable grounds to be imminent, and no necessity will exist until the person, if not in his own house, has retreated as far as he safely can. The person doing the killing must not have been the aggressor and intentionally provoked the difficulty; but if he withdraws in good faith and his adversary follows and renews the fight, the latter becomes the aggressor.

The death must take place within a year and a day of the act or omission that caused it, and the offense is committed at the place of such act or omission although the victim may have died elsewhere.

Malice does not necessarily mean hatred or personal ill will toward the person killed, nor an actual intent to take his life, or even to take anyone's life. The use of the word "aforethought" does not mean that the malice must exist for any particular time before commission of the act, or that the intention to kill must have previously existed. It is sufficient that it exist at the time the act is committed. (Clark, pp. 187, 188.)

Malice aforethought may exist when the act is unpremeditated. It may mean any one or more of the following states of mind preceding or coexisting with the act or omission by which death is caused; (a) An intention to cause the death of, or grievous bodily harm to, any person, whether such person is the person actually killed or not (except when death is inflicted in the heat of a sudden passion, caused by adequate provocation); (b) knowledge that the act which causes the death will probably cause the death of, or grievous bodily harm to, any person, whether such person is the person actually killed or not, although such knowledge is accompanied by indifference whether death or

grievous bodily harm is caused or not, or by a wish that it may not be caused; (c) intent to commit any felony; (d) an intent to oppose force to an officer or other person lawfully engaged in the duty of arresting, keeping in custody, or imprisoning any person, or the duty of keeping the peace, or dispersing an unlawful assembly, provided the offender has notice that the person killed is such officer or other person so employed. (Clark, p. 187.)

PROOF.

(a) That the accused killed a certain person named or described by certain means, as alleged. This involves proof—

- (1) That the person alleged to have been killed is dead.
- (2) That he died in consequence of an injury received by him.
- (3) That such injury was the result of the act of the accused.
- (4) That the death took place within a year and a day of such act.

(b) That such killing was with malice aforethought; that is, that the accused was in one or more of the states of mind described above.

II. RAPE.

Rape is the having of unlawful carnal knowledge of a woman by force and without her consent.

As the carnal knowledge must be unlawfully had, a husband who has carnal knowledge of his wife forcibly where she does not consent is not guilty of this offense; but he is guilty when he assists another man in having such carnal knowledge.

Any penetration, however slight, of the woman's genitals is sufficient carnal knowledge, whether emission occurs or not.

The offense may be committed on a female of any age, on a man's mistress, or on a common harlot.

Force, actual or constructive, and a want of consent are indispensable in rape, but the force involved in the act of penetration is alone sufficient force where there is in fact no consent.

Where there is actual consent to the connection, though such consent be obtained by fraud, there is no rape; thus, where a woman agrees to connection with a physician on his false representation that the act is part of the required treatment, or where a man successfully passes himself off to a woman as her husband and is admitted by her to connection as such, the crime of rape is not committed.

There is no consent where the woman is so idiotic as to be incapable of consenting, and a man having connection with her not believing that he has her consent is guilty of rape. So also where the woman is insensible, unconscious, or asleep, or where her apparent consent was extorted by violence to her person or fear of sudden violence. A child under the age of 10 is presumed incapable of consenting.

Mere verbal protestations and a pretense of resistance do not of course show a want of consent, but the contrary, and where a woman fails to take such measures to frustrate the execution of the man's design as she is able to and are called for by the circumstances the same conclusion may be drawn.

It has been said of this offense that "it is true that rape is a most detestable crime * * *; but it must be remembered that it is an accusation easy to be made, hard to be proved, but harder to be defended by the party accused, though innocent."

PROOF.

(a) That the accused had carnal knowledge of a certain female, as alleged;

(b) That the act was done by force and without her consent; or that the female was under the age of 10 years.

NINETY-THIRD ARTICLE.

443. Any person subject to military law who commits manslaughter, mayhem, arson, burglary, robbery, larceny, embezzlement, perjury, assault with intent to commit any felony, or assault with intent to do bodily harm, shall be punished as a court-martial may direct.

DEFINITIONS AND PRINCIPLES.

See matter under several offenses listed in the article.

ANALYSIS AND PROOF.

This article applies to any person subject to military law. The article defines the following offenses, namely:

- I. Manslaughter.
- II. Mayhem.
- III. Arson.
- IV. Burglary.
- V. Larceny.
- VI. Robbery.
- VII. Embezzlement.
- VIII. Perjury.
- IX. Assault with intent to commit any felony.
- X. Assault with intent to do bodily harm.

I. MANSLAUGHTER.

Manslaughter is unlawful homicide without malice aforethought and is either voluntary or involuntary.

Voluntary manslaughter is where the act causing the death is committed in the heat of sudden passion caused by provocation.

Involuntary manslaughter is homicide unintentionally caused in the commission of an unlawful act not amounting to a felony, nor likely to endanger life, or by culpable negligence in performing a lawful act, or in performing an act required by law. (Clark, pp. 197, 204.)

In involuntary manslaughter the provocation must be such as the law deems adequate to excite uncontrollable passion in the mind of a reasonable man; the act must be committed under and because of the passion, and the provocation must not be sought or induced as an excuse for killing or doing bodily harm. (Clark, p. 197.)

The killing may be manslaughter only even if intentional, but where sufficient cooling time elapses between the provocation and the blow the killing is murder, even if the passion persists. Instances of adequate provocation are: Assault and battery, inflicting actual bodily harm or a gross insult; an unlawful imprisonment; and the sight by a husband of an act of adultery committed by his wife. If the person so assaulted or imprisoned, or the husband so situated at once kills the offender or offenders in a heat of a sudden passion caused by their acts, manslaughter only has been committed.

Instances of inadequate provocation are: Knowledge by the brother of a female of her seduction; insulting or abusive words or gestures; and injuries to property.

In involuntary manslaughter in the commission of an unlawful act the act must be *malum in se* and not merely *malum prohibitum*. Thus the driving of an automobile in slight excess of the speed limit fixed by ordinance is not the kind of unlawful act contemplated, but voluntarily engaging in an affray is such an act. To use an immoderate amount of force in suppressing a mutiny

is an unlawful act, and if death is caused thereby the one using such force is guilty of manslaughter at least.

Instances of culpable negligence in performing a lawful act are: Negligently conducting target practice so that the bullets go in the direction of an inhabited house within range; pointing a pistol in fun at another and pulling the trigger, believing, but without taking reasonable precautions to ascertain, that it would not be discharged; carelessly leaving poisons or dangerous drugs where they may endanger life.

Instances of culpable negligence in performing an act required by law are: Gross negligence or inattention by those in charge of controlling or operating trains in the discharge of their duties; culpable failure on the part of a parent to provide food, shelter, and medical attendance for his helpless child where able to do so.

Where there is no legal duty to act there can, of course, be no neglect. Thus where a stranger makes no effort to save a drowning man, or a person allows a mendicant to freeze or starve to death, no crime is committed.

PROOF.

(a) See item (a) under "Proof of murder" under ninety-second article.

(b) The facts and circumstances of the case, as alleged, indicating that the homicide amounted in law to manslaughter.

II. MAYHEM.

Mayhem at common law is "a hurt of any part of a man's body whereby he is rendered less able, in fighting, either to defend himself or to annoy his adversary." (Bishop, vol. 2, p. 579.)

The offense at common law did not include such injuries which merely disfigure, such as cutting off the nose or ear; but did include such injuries as knocking out a front tooth, or castration, which were supposed to weaken a man's fighting ability.

The injury must be willfully and maliciously done, but need not be premeditated. If the hurt is done under circumstances which would excuse or justify a homicide, no offense is committed.

A person inflicting such a hurt upon himself is guilty of this offense, and if another does it at his request, both are so guilty.

PROOF.

(a) That the accused inflicted on a certain person a certain injury in the manner alleged.

(b) The facts and circumstances of the act showing such injury to have been inflicted intentionally and maliciously.

III. ARSON.

Arson, at the common law, is the malicious burning of another's house. (Bishop, vol. 2, p. 5.)

The house must be the dwelling house of another, as the offense is against the habitation, not against property as such.

The term "dwelling house" includes outbuildings that form part of the cluster of buildings used as a residence. A mere scorching is not a burning. To constitute a burning some part, however small, of the house must be actually consumed or disintegrated by charring or by a blaze.

A shop or store is not the subject of arson unless occupied as a dwelling. It is not arson to burn a house that has never been occupied or which has been

permanently abandoned; but it is arson if the occupant is merely temporarily absent. It is not arson to burn one's own dwelling, whoever owns it, or even the dwelling of another at his request, and this is so even if there is an intent to burn an adjoining house belonging to a third party; but it is arson if such house is actually burned. A house occupied by another than the owner is a subject of arson by the owner.

The burning must be willful and malicious, which excludes a burning arising from negligence or mischance, unless the accused was engaged in the commission of a felony. Where a man, who, in setting fire to his own house to get the insurance, burns his neighbor's, he is guilty of arson in burning the neighbor's house.

PROOF.

- (a) That the accused burned a certain dwelling house of another, as alleged.
- (b) Facts and circumstances indicating that the act was willful and malicious.

IV. BURGLARY.

Burglary at common law is the breaking and entering, in the night, of another's dwelling house, with intent to commit a felony therein. (Bishop, vol. 2, p. 56.)

To constitute burglary the house must be a dwelling house of another, dwelling house including outhouses within the curtilage or the common inclosure; there must be an actual breaking, or there must be the constructive breaking involved where an entry is effected by fraud or false pretenses, by intimidation, by conspiracy with a servant or other inmate, or by descent of a chimney; there must be an entry; the breaking and entry must both be at night; but not necessarily on the same night, and there must be an intent to commit a felony in the house at the time of the breaking and of the entering, but the felony need not be committed. (Clark and Marshall, pp. 595, 596.)

A store is not a subject of burglary unless part of or used also as a dwelling house, as where the occupant uses another part of the same building as his dwelling; or where the store is habitually slept in by his servants or members of his family.

The house must be in the status of being occupied at the time of the breaking and entering. It is not necessary to this status that any one actually be in it; but if the house has never been occupied at all or has been left without any intention of returning to it this status does not exist. Separate dwellings within the same building as a flat in an apartment house or a room in a hotel are subjects of burglary by other tenants or guests, and in general by the owner of the building himself. At common law a tent is not a subject of burglary.

There must be a breaking, actual or constructive. Merely to enter through a hole left in the wall or roof or through an open window or door, even if left only slightly open and pushed farther open by the person entering, will not constitute an actual breaking; but where there is any removal of any part of the house designed to prevent entry, other than the moving of a partly open door or window, it is sufficient. Thus opening a closed door or window or other similar fixture, or cutting out the glass of a window or the netting of the screen is a sufficient breaking. So also the breaking of an inner door by one who has entered the house without breaking, or by a servant lawfully within the house, but who has no authority to enter the particular room is a sufficient breaking, but unless such a breaking is followed by an entry into the particular room with intent to commit a felony therein, burglary is not committed.

There is a constructive breaking when the entry is gained by a trick, such as concealing oneself in a box; or under false pretense, such as personating a gas or telephone inspector; or by intimidating the inmates through violence or

threats into opening the door; or through collusion with a confederate, an inmate of the house; or by descending a chimney, even if only a partial descent is made, and no room is entered. An entry must be effected before the offense is complete; but the entry of any part of the body, even a finger, is sufficient; and an insertion into the house of an instrument, except merely to facilitate further entrance, is a sufficient entry.

Both the breaking and entry must be in the nighttime, which at common law was the period between sunset and sunrise when there is not sufficient daylight to discern a man's face, and both must be done with the intent to commit a felony in the house. It is immaterial whether the felony be committed or even attempted, and where a felony is actually intended it is no defense that its commission was impossible. The felony intended may be a statutory felony.

PROOF.

(a) That the accused broke and entered a certain dwelling house of a certain person, as specified.

(b) That such breaking and entering was done in the nighttime.

(c) The facts and circumstances of the case (for instance, the actual commission of the felony) which indicate that such breaking and entering were done with the intent to commit the alleged felony therein.

V. LARCENY.

Larceny at common law is the taking and removing, by trespass, of personal property which the trespasser knows to belong either generally or specially to another, with the felonious intent to deprive him of his ownership therein. (Bishop, vol. 2, p. 440.)

In larceny there must be a taking and carrying away. When actual physical possession is obtained and the property moved the least distance, the taking and carrying away is complete. Such possession must, however, be complete; thus, enticing a domestic animal a short distance, or seizing property secured by a chain, or causing another to drop property by knocking his hand is not a taking of such property. The taking need not be by the hands of the thief. Thus, where one, having the required intent to steal, entices a horse into his own stable without touching him, or procures an insane person to take the goods, or procures a railroad company to deliver another's trunk by changing the check on it, he is guilty of larceny.

The taking must be by trespass; that is, the property must be taken from the actual or constructive possession of the owner without his consent.

One who has a lawful right to the possession of the property of another can not steal it. Thus where an article is borrowed or hired in good faith the bailee does not commit larceny if he subsequently during the bailment decides to and does convert the article to his own use. But if at the time the article is borrowed, etc., the borrower intends to convert it, such a taking is by trespass and his act a larceny. And where the possession of an article is obtained by fraud, although no intent to steal existed at the time, a subsequent forming and carrying out of such intent is a larceny, as the taking and keeping possession in such a case is a continuing trespass. Thus where a horse was hired by one who really intended to go farther than he stated to the owner, but who did not intend to steal the horse, it was held that his subsequent conversion of the animal was a larceny.

These rules apply to any case of bailment, but do not apply where the owner intends to part with the ownership of the property. Where a carrier of goods in a bale, or a person intrusted with a trunk for safekeeping, breaks bulk and appropriates part or all of the contents, he is guilty of larceny regardless of what his intention was when he received the property.

The principle of the rules as to a bailee who accepts the possession of property in good faith, or who intends at the time to steal it, applies to cases of property delivered by mistake. Thus, where an article intended for one is delivered to another by mistake the latter's acceptance of the possession, knowing of the mistake and with the required intent, is a larceny; but if he accepts it in ignorance of the mistake and in good faith as intended for him, his subsequent appropriating to his own use is not a larceny, as there was no trespass in the taking.

This same rule applies where a person is paid by mistake more money than he is entitled to.

The possession of goods may be in one person although the goods themselves be in the actual manual control of another, who is said to have the custody of them. Thus, where the owner of a coin gives it to a friend to examine on the spot, he still retains the possession, and if the recipient goes away with the coin intending to steal it he is guilty of larceny. So, too, a guest at a hotel or a private house has the bare custody of articles such as those in his room or given him for use at the table and can commit a larceny of such articles.

Where a servant receives goods or coins from his master to use, care for, or employ for a specific purpose in his service, the master retains possession and the servant has the custody only and may commit larceny of them. The fact of the existence of the relationship of master and servant does not prevent the latter from being a bailee of the former's property, in which case the rules as to bailees apply; for instance, a master might lend his servant a horse to use on the latter's own business. Where, however, a servant receives goods or coins from a third person on behalf of his master he has the possession of the goods or coins and can not commit a larceny of them until they have reached the possession of his master, which they do when delivered into his hands or deposited in the receptacle or place provided for the purpose. Thus, if a clerk receive some coins for his master in the course of business and places in the cash drawer or safe belonging to the master he no longer has the possession of the coins and his taking of them with the requisite intent would be larceny; but he does not relinquish possession if, merely for his own convenience, he uses the safe or drawer as a hiding place. His subsequent taking of the coins would not, therefore, be larceny.

This distinction between custody and possession is of the utmost importance, for it is often very difficult to determine whether the crime is larceny or embezzlement, each particular case depending upon the peculiar circumstances. To illustrate the doctrine: Where a third person hands a clerk money to pay a bill which he owes the clerk's employer, and the clerk, instead of putting the money into his employer's safe or other proper place, puts it into his own pocket and appropriates it, or hides it on the premises and afterwards carries it off, he does not commit larceny, for, as the money has not reached its destination, but is merely in transit, the master has not obtained possession, either actual or constructive. If, however, the clerk puts the money in the safe, it is in his employer's constructive possession; and if he takes it out again and converts it, he is guilty of larceny. If it is not the duty of the clerk to put the money in the safe, but he is required to keep it on his person for his master, then, as soon as he receives the money, it has reached its ultimate destination, and he will be guilty if he appropriates it, instead of holding it for his master. If a master gives his servant a check to take to the bank and get cashed he has mere custody of the check itself, and commits larceny if he appropriates it; but if he cashes the check and appropriates the money he commits embezzlement only, as the money has never been in the master's possession. (Clark, pp. 285, 286.)

Where the owner of an article delivers it to another, intending at the time an unconditional passing of the property as well as the possession, the other can not be guilty of larceny, whatever the inducement employed by him. Thus where property is obtained from a dealer and the false pretense of being sent for it by a regular charge customer, or where property is bought on credit with no intention of paying, or where a bogus check is given in payment of goods or in exchange for money, or where money is borrowed on false pretenses with the understanding that different coins or bills are to be returned is no larceny.

In the case of property delivered by servants or agents, such delivery can not go beyond the actual or apparent authority of the servant or agent. So where a master sends his servant with a c. o. d. package and the purchaser induces the servant to give him the package without payment or pays with a worthless check, intending to keep the package, it is larceny.

The reason for the rule above stated as to an intention to pass the property preventing the taking from amounting to larceny is that the consent of the owner precludes the existence of an essential element of larceny, viz., a trespass. But where the taking overlaps the consent given it is pro tanto a trespass and where the other elements of larceny are present, he who does the taking is guilty of the offense. Thus where one gets candy from a slot machine by using a counterfeit coin, or where a customer after buying a cigar takes the whole box of matches provided by owner of the store for the use of his customer, the act in each case is a trespass, and the offenders are guilty of larceny if the other elements of that offense are present.

Another application of the rule that the consent must be as broad as the taking is made in cases where the owner's intent is to pass the property in the goods only when a condition is fulfilled. Thus where goods are handed to a purchaser on a cash sale the title is not intended to pass until the price is paid; and if the person receiving them runs off with the goods without paying for them and with the required intent, he is guilty of larceny.

This rule applies in many analogous cases. For instance it is larceny "for a man to whom money is handed to be changed to run off with it or keep it, *animo furandi*, and refuse to give the change, though the intention may be that he shall keep part of it as payment for goods purchased or as a loan, for there is no consent to part with the money without receiving the change." (Clark and Marshall, p. 467.) In these cases of conditional delivery the recipient has only the bare custody and it is therefore immaterial whether the intent to steal existed at the time of the delivery, or was formed later.

The taking may be from any one having possession of the property; hence, property may be stolen from one who himself has stolen it, and the owner of goods may steal them from a bailee with a special property in them.

One retains the constructive possession of property although it is actually out of his control until some one else takes possession, except in the case of abandoned property. So where a desk was sold and coins were afterwards found by the purchaser in a secret drawer and taken by him, he takes it from the possession of the owner. Where a person finds property he has a right to take it and examine it. If the circumstances give him no clue to the ownership he can rightfully appropriate it and this act or a subsequent refusal to give it up to the owner will not be a larceny, as there was no trespass in the taking. If the circumstances do give him such a clue he can rightfully assume possession for the owner and a subsequent change of intent and an appropriation of the property would not be a larceny, but where he intends to appropriate it at the time he assumes possession he is guilty of larceny, and none the less so if he intends to return it in the event that a reward is given.

In larceny, as in other crimes, the evil intent and the act must coexist; that is, as stated in the definition of larceny, the taking and removing by trespass must be with the particular intent described.

But where the possession of property is obtained by a trespass the subsequent retention of the property without right is a continuing trespass, and however innocent the original intent of the trespasser, he commits larceny if while wrongfully retaining possession he has the intent to steal. Thus where an animal belonging to one person becomes mingled with the herd of another and is driven off by mistake, without the knowledge of either person, there is a continuing trespass, and if on discovering his mistake the owner of the herd converts the animal to his own use he is guilty of larceny.

The felonious intent in larceny is that entertained by a thief; i.e., a fraudulent intent to deprive the owner permanently of his property in the goods or of their value or a part of their value. Unless such a purpose exist with the taking and carrying away by trespass there is no larceny.

Thus larceny is not committed where the taking was without any intent at all as regards the property, as in the case of property taken by mistake or accidentally; or where the intent was to take one's own property, as in the case of property taken under a bona fide claim of right, however unfounded; or where the intent was to take another's property temporarily from his possession, as in the case of property taken for a temporary use, or in fun, or out of curiosity, or to keep for him, or to deprive him of the power of using it. Thus if one takes a horse merely to enable him to escape with stolen property, or takes property from a drunken friend in order to prevent him from losing it, or taking a cudgel out of the owner's hand to prevent a beating there is no larceny.

Whether the required intent exists where property is taken to pawn or hold for a reward depends upon the circumstances. Some cases of taking property to pledge would come within the above rule as to temporary use, as where the intent is in good faith to redeem and return it; but in the absence of such intent the taking is larceny.

Where the taking is with the design of returning it to the owner, but in the hope of obtaining a reward, it is not larceny; but if the purpose is to keep the property until a reward is offered it is. Taking property with the intent to sell it back to the owner or return it to him for some other consideration is, of course, more indicative of than inconsistent with the existence of the required intent. Thus, stealing a railroad ticket is none the less stealing because it was intended to be returned to the railroad when made use of.

Once the goods are taken and removed with the felonious intent above described the offense is complete and is none the less a larceny because the thief may have had in mind a disposition of the property without benefit or advantage to himself. Thus, an intent to give it to another or to destroy it out of revenge, or to prevent its use as evidence or otherwise against himself or another, does not prevent the felonious taking of another's property from being larceny.

In line with this principle it has been held that a servant who clandestinely took his master's oats for the purpose of feeding them to his master's horse was guilty of larceny.

When a larceny has been committed a prompt repentance by the thief, followed by a return of the property or payment for it, is no defense.

Under the common law personal property only can be stolen. Thus, where trees, fences, crops, or fixtures are cut down or severed by a trespasser and immediately taken away by him, there is no larceny. But should the trespasser, after cutting down some trees, for instance, leave the fallen timber and relin-

quish his possession, the possession of the owner attaches to the property in its new character as personal property, and a subsequent taking by the trespasser with intent to steal is larceny.

At common law a piece of paper may be stolen, though its value is less than that of the smallest coin; but if the paper is so written upon as to be evidence of valid and subsisting agreement, it loses its value as a piece of paper and is no longer a subject of larceny. Thus, a promissory note, a bank note or a post-exchange check or other writing evidencing a chose in action is not a subject of larceny at common law.

PROOF.

- (a) The taking by the accused of the property as alleged.
- (b) The carrying away by the accused of such property.
- (c) That such property belonged to a certain other person named or described.
- (d) That such property was of the value alleged, or of some value.
- (e) The facts and circumstances of the case indicating that the taking and carrying away were by trespass and with a fraudulent intent to deprive the owner permanently of his property or interest in the goods or of their value or a part of their value.

VI. ROBBERY.

Robbery at common law is the taking, with intent to steal, of the personal property of another, from his person or in his presence, against his will, by violence or intimidation. (Clark, p. 323.)

The felonious and forcible taking from the person of another goods or money to any value by violence or putting him in fear. (Bouvier's Law Dictionary, 15th ed., vol. 2, p. 601.)

Robbery includes larceny and the elements of that offense must always be present. See matter under heading "V" under this article.

Thus it is not robbery to take one's own property, unless the person from whom it is taken has a special property in the goods and the right to possession; nor is it robbery to take property that is honestly believed to be one's own or to take it for a merely temporary use.

It is not necessary that the person from whom the property is taken be the actual owner—it is enough if he have a possession or a custody that is good against the taker.

The property must be taken from the person or in his presence; but to be in the presence it is not necessary that the owner be within any certain distance of his property; it is enough if he be near enough to be in control of his property. Thus where some persons entered a house and forced the owner by threats to disclose the hiding place of valuables in an adjoining room, and then, leaving the owner tied, went into such room and stole the valuables their offense was held to be robbery.

The taking must be against the owner's will by means of violence or intimidation. The violence or intimidation must precede or accompany the taking. Thus where property is taken by stealth from the person of its owner it is not robbery in case the thief overcomes a forcible effort to retake it; or the owner is deterred by the threats of the thief from making an attempt to retake it.

The violence must be actual violence to the person, but the amount of violence used is immaterial. It is enough where it overcomes the actual resistance of the person robbed, or puts him in such a position that he makes no resistance, or suffices to overcome the resistance offered by a chain or other fastening by which the article is attached to the person. Where an article is merely snatched out of another's hand or a pocket is picked by stealth and no other force is used

and the owner is not put in fear, the offense is not robbery. But if in snatching the article resistance is overcome, there is sufficient violence, as where a woman's earring is torn from her ear or a hair ornament entangled in her hair is snatched away. So, also, when a person's attention is diverted by being jostled by a confederate of a pickpocket, who is thus enabled to steal the person's watch, it is a robbery.

Other instances of robbery by violence are where a man is knocked insensible and his pockets rifled, and where an officer steals property from the person of a prisoner in his charge after handcuffing him on the pretext of preventing his escape.

It is equally robbery whether the robber prevents resistance by rendering his victim physically incapable of making any, or by putting him, by threat or menaces, in such fear that he is warranted in making none. The fear must be a reasonably well-founded apprehension of present or future danger, and the goods must be taken while such apprehension exists. The danger apprehended may be, for instance, his own death or some bodily injury to him, or the destruction of his habitation, or a prosecution for sodomy.

In the last case it is immaterial whether the person threatened with the prosecution is innocent or guilty of the offense. A danger of being prosecuted for any other offense is held not to be sufficient. (Clark and Marshall, p. 865.)

PROOF.

- (a) The larceny of the property. See proof under larceny above.
- (b) That such larceny was from the person or in the presence of the person alleged to have been robbed.
- (c) That the taking was by violence or putting in fear, as alleged.

VII. EMBEZZLEMENT.

Embezzlement is a fraudulent appropriation of another's property by a person to whom it has been intrusted or into whose hands it has lawfully come. It differs from larceny in that the original taking of the property was lawful or with the consent of the owner, while in larceny the felonious intent must have existed at the time of the taking. (Cyc., vol. 15, p. 488.)

Embezzlement is not a common law but a statutory offense.

The purpose of embezzlement statutes is to meet the case of a servant, clerk, bailee, or other person to whom the possession of property is intrusted by or for the owner, and who fraudulently misappropriates it to his own use or otherwise, the circumstances being such that the act is not larceny.

The gist of the offense is a breach of trust, and can not be committed unless some fiduciary relationship exists between the owner and the person in possession of the property and unless such possession was taken by virtue of such relationship.

PROOF.

- (a) That the accused was the clerk or servant of a certain other person or stood in some other fiduciary relationship to that person, as alleged.
- (b) That in such fiduciary capacity the accused received into his possession certain money or property of such person, as alleged.
- (c) That he converted or appropriated to his own use such money or property during the existence of such fiduciary relationship.
- (d) The facts and circumstances indicating that the accused had in so doing the fraudulent intent to deprive the owner permanently of his property in the goods or money, or of their value or a part thereof.

VIII. PERJURY.

Perjury, at common law, is the willful and corrupt giving, upon a lawful oath, or in any form allowed by law to be substituted for an oath, in a judicial proceeding or course of justice, of false testimony material to the issue or matter of inquiry. (Clark, p. 385.)

The false testimony must be willfully and corruptly given; that is, with a deliberate intent to testify falsely.

It is not perjury to testify by mistake to what is believed to be true, however unfounded the belief may be; hence, a witness may contradict under oath testimony formerly given by him without committing perjury, since he may on each occasion have believed his testimony to be true. On the other hand, a witness may commit perjury by testifying that he knows a thing to be true, when in fact he either knows nothing about it at all or is not sure about it, and this is so whether the thing be true or false in fact. So, also, a witness may commit perjury in testifying falsely as to his belief, remembrance, or impression, or as to his judgment or opinion on matters of fact. Thus, where a witness swears that he does not remember certain facts, when in fact he does, he commits perjury, if the other elements of the offense are present. So, also, where a witness testified that in his opinion a certain person was drunk when in fact he entertains the contrary opinion.

The oath must be one required or authorized by law and must be duly administered by one authorized to administer it. If no particular form of oath is prescribed by statute, the form of oath is immaterial, but "there must be in some form, in the presence of an officer authorized to administer it, an unequivocal and present act by which the affiant takes upon himself the obligation of an oath." (Clark and Marshall, p. 863.)

Thus, where a person merely delivers an affidavit signed by him to an officer authorized to administer the oath thereto, and without anything more being said or done the officer signs the jurat, no oath has been administered.

Where a form of oath has been prescribed a literal following of the statute is not essential. It is sufficient if the oath administered conforms in substance to the statutory form.

An oath includes an affirmation where the latter is authorized in lieu of an oath.

It is no defense that the witness voluntarily appeared, or that he was incompetent as a witness, or that his testimony was given in response to questions that he could have declined to answer, even if he was forced to answer it over his claim of privilege.

It is a defense, however, if the tribunal or magistrate had no jurisdiction of the cause in which the false testimony was given.

The false testimony must be material to the issue or matter of inquiry, but the issue or matter of inquiry may be a collateral one.

Thus perjury may be committed by giving material false testimony with respect to the credibility of a material witness, or in an affidavit in support of a request for a continuance, as well as by giving testimony with respect to a fact from which a legitimate inference may be drawn as to the existence or non-existence of a fact in issue. It is no defense that such testimony would have been excluded if objected to as incompetent, or that it was not believed, or that it did not affect the result in any way, or that subsequent proceedings rendered it immaterial.

PROOF.

- (a) That a certain judicial proceeding or course of justice was pending.
- (b) That the accused was sworn in such proceeding.
- (c) That such oath was administered to the accused in a matter where an oath was required or authorized by law, as alleged.

- (d) That such oath was administered by a person having authority to do so.
- (e) That upon such oath he gave the testimony alleged.
- (f) That such testimony was false, and material to the issue or matter of inquiry.
- (g) The facts and circumstances indicating that such false testimony was willfully and corruptly given.

IX. ASSAULT WITH INTENT TO COMMIT ANY FELONY.

An assault with intent to commit any felony is an assault made with a specific intent to murder, rape, rob, or to commit manslaughter, sodomy, or other common-law felony.

An assault is an attempt or offer with unlawful force or violence to do a corporal hurt to another. (Clark and Marshall, p. 271.)

Raising a stick over another's head as if to strike him, presenting a fire-arm ready for use within range of another, striking at another with a cane or fist, assuming a threatening attitude and hurrying toward another are examples of assaults.

Some overt act is necessary in any assault. Mere preparation, such as unfastening the catch on a pistol holster in order that the pistol may be drawn, or picking up a stone at a considerable distance from another without making any attempt or offer to throw it, is not an assault.

The force or violence must be physical; mere words, however threatening, or insulting gestures are not by themselves sufficient to constitute an assault.

Furthermore, in an assault there must be an intent, actual or apparent, to inflict corporal hurt on another.

Where the circumstances known to the person menaced clearly negative such intent there is no assault. Thus, where a person accompanies an apparent attempt to strike another by an unequivocal announcement in some form of his intention not to strike, there is no assault. This principle was applied in a case where the defendant raised his whip and shook it at the prosecutor within striking distance, saying, "If you weren't an old man, I would knock you down."

Viewed solely as an attempt to commit a battery there must be an actual or constructive intent to do a corporal hurt to another, and an act of unlawful violence or force begun to be executed with a view to inflicting such hurt. How such purpose is defeated is immaterial.

The following have been held to be assaults: Riding after a person so as to compel him to seek safety in an inclosure to avoid a beating, though the assailant was never near enough to hit him; rushing upon another in a threatening attitude although before quite close enough to strike, the person threatened strikes in self-defense or the attack is frustrated by a third person.

It is also an assault where the person in order to avert the taking effect of the unlawful violence yields to a demand of his assailant. Thus, where A, being within striking distance of B, raises a weapon for the purpose of unlawfully striking him, stating that he will strike unless B does a certain thing, and B does that thing, thereby averting the blow, A commits an assault.

It is not a defense to a charge of assault that for some reason unknown to the assailant his attempt was bound to fail. Thus, where a soldier loads his rifle with what he believes to be a good cartridge and, pointing it at a person, pulls the trigger, he is guilty of assault, although the cartridge was so defective that it could not be used. The same principle was applied to a case where a person in a house shoots through the roof at a place where he supposed a policeman was concealed, though the policeman was at another place on the roof.

The intent need not be to injure a particular person, and mere recklessness

may supply the place of intent. Thus, where one strikes at A believing him to be B, he is guilty of assaulting A; and where one fires a loaded and capped pistol at another recklessly, and not knowing or seeking to know whether it is loaded or not, he commits an assault.

To constitute an assault, however, it is unnecessary that there be an actual or constructive intent to hurt anyone or a believed ability to inflict such hurt.

If there be to the person set upon an apparent present intent to injure, coupled with an apparent present ability to do so, it is sufficient.

The better opinion, however, is to the effect that if a person presents a gun at another, or threatens him with a stick or other weapon, and thereby reasonably puts him in fear and causes him to act on the defensive, or to retreat, there is an assault, whether there is any actual intention to injure or not. In a comparatively late Massachusetts case it was held that a man who pointed an unloaded gun at another was guilty of an assault, although he may have known that it was not loaded and may have had no intention to injure. "It is not the secret intent of the assaulting party," said the court, "nor the undisclosed fact of his ability or inability to commit a battery, that is material, but what his conduct and the attending circumstances denote at the time to the party assaulted. If to him they indicate an attack, he is justified in resorting to defensive action. The same rule applies to the proof necessary to sustain a criminal complaint for an assault. It is the outward demonstration that constitutes the mischief which is punished as a breach of the peace." (Clark and Marshall, pp. 277, 278.)

If there be such a demonstration of violence, coupled with an apparent ability to inflict the injury, so as to cause the person at whom it is directed reasonably to fear the injury unless he retreat to secure his safety, and under such circumstances he is compelled to retreat to avoid an impending danger, the assault is complete, though the assailant may never have been within the actual striking distance of the person assailed. (Clark and Marshall, p. 281, note.)

There must, however, be an apparent present ability. To aim a pistol at a man at such a distance that it clearly could not injure would not be an assault.

A battery is an assault in which force is applied, by material agencies, to the person of another, either mediately or immediately. Thus, it is a battery to spit on another; to push a third person against him; to set a dog at him which bites him; to cut his dress while he is wearing it, though without touching or intending to touch his person; to shoot him; and to cause him to take poison. So it is a battery for a man to fondle against her will a woman not his wife. The force may be applied through conductors more or less close. Thus, to strike the dress of the person assailed, or the horse on which he is riding, or the house in which he resides, may be as much a battery as to strike his face; and sending an explosive machine by express from New York to San Francisco may be as much a battery as taking it to San Francisco in person. It is not, however, a battery to lay hands on another to attract his attention, or in a party falling to seize another for support. Sending a missile into a crowd also is a battery on anyone whom the missile hits; and so is the use, on the part of one who is excused in using force, of more force than is required. (Wharton, vol. 1, pp. 566, 567.)

I. ASSAULT WITH INTENT TO MURDER.

This is an assault aggravated by the concurrence of a specific intent to murder; in other words, it is an attempt to murder.

As in other attempts there must be an overt act, beyond mere preparation or threats, or an attempt to make an attempt.

Thus, it was held not an assault with intent to murder where the defendant

drew a pistol from his hip pocket, but because of its becoming caught in the lining of his coat, did not make any actual attempt to inflict an injury with the pistol on the person alleged to have been assaulted.

To constitute an assault with intent to murder by firearms it is not necessary that the weapon be discharged; and in no case is the actual infliction of injury necessary. Thus, where a man with intent to murder another deliberately assaults him by shooting at him the fact that he misses does not alter the character of the offense.

Where the intent to murder exists, the fact that for some reason unknown the actual consummation of the murder is impossible by the means employed does not prevent the person using them from being guilty of an assault with intent to commit murder where the means are apparently adapted to the end in view. Thus, where a soldier intending to murder another loads his rifle with what he believes to be a good cartridge and aims and discharges his rifle at the other, it is no defense that he, by accident, got hold of a cartridge so defectively loaded that the bullet did not leave the gun.

In order to constitute this offense the specific intent to murder must exist, and the facts must be such that had death been caused by the act the offense would have been murder, but the converse of this latter proposition is not always true, as a man may be guilty of murder without intending to kill. Thus, where a workman recklessly throws a heavy object from the roof of a building into a street where he knows people are likely to be passing and thereby kills a person, he may be guilty of murder; but where the person is merely injured, the offense of assault with intent to commit murder is not committed.

To constitute this offense there must be a specific intent to murder the person assaulted and this intent must exist at the time of the assault.

A general felonious intent of a specific design to commit another felony is not sufficient, and where a person is too drunk to entertain the specific intent the offense is not murder. But where the accused intending to murder A shoots at and wounds B, mistaking him for A, he is guilty of assaulting B with intent to murder him; so also where a man fires into a group with intent to murder some one he is guilty of an assault with intent to murder each member of the group.

2. ASSAULT WITH INTENT TO COMMIT MANSLAUGHTER.

This offense differs from assault with intent to murder in the lack of the elements of malice necessary to constitute the latter crime.

It is an attempt to take human life in a sudden heat of passion.

The specific intent to kill is necessary and the act must be done under such circumstances that had death ensued the offense would have been manslaughter.

What has been said under the head of assault with intent to commit murder applies to the offense of assault with intent to commit manslaughter.

3. ASSAULT WITH INTENT TO COMMIT RAPE.

This is an attempt to commit rape in which the overt act amounts to an assault upon the woman intended to be ravished. Indecent advances, importunities however earnest; mere threats; and actual attempts to rape wherein the overt act is not an assault do not amount to this offense. Thus, where a man, intending to rape a woman, stealthily concealed himself in her room to await a favorable opportunity to execute his design but was discovered and fled, it was held that he was not guilty of an assault with intent to commit rape.

No actual touching is necessary. Thus where a man entered a woman's

room and got in the bed where she was and within reach of her person for the purpose of ravishing her he commits the offense, although he did not touch the woman.

This offense may be committed on a woman who is insane or an imbecile, or while she is drugged or intoxicated, or asleep, provided the offense would be rape if the purpose was carried out. But where an attempt to have connection with a woman capable of consenting and whose consent thereto has been obtained by fraud there can be no assault with intent to commit rape.

Thus an attempt to have connection with a woman who has consented thereto in the belief that one personating her husband is her husband can not be an assault with intent to commit rape.

The intent to have carnal knowledge of the woman assaulted by force and without her consent must exist and concur with the assault. In other words, the man must intend to overcome any resistance by force, actual or constructive, and penetrate the woman's person. Any less intent will not suffice. Thus where a man assaults a woman, his purpose being to seduce her, the offense is not committed.

Once an assault with intent to commit rape is made it is no defense that the man voluntarily desisted or that the woman yields her consent to the connection, so that no rape is committed.

4. ASSAULT WITH INTENT TO ROB.

This is an attempt to commit robbery wherein the overt act is an assault and the concurrent intent is forcibly to take and carry away property of the person assaulted from his person or in his presence by violence or putting him in fear.

The accused can not set up as a defense that he intended to take only money and that the person he attempted to rob had none.

5. ASSAULT WITH INTENT TO COMMIT SODOMY.

Sodomy consists in sexual connection with any brute animal, or in sexual connection, per anum, by a man with any man or woman. (Wharton, vol. 2, p. 538.)

Penetration of the mouth of the person does not constitute this offense.

Both parties are liable as principals if each is adult and consents; but if either be a boy of tender age the adult alone is liable, and although the boy consent the act is still by force.

Penetration alone is sufficient.

An assault with intent to commit this offense consists of an assault on a human being with intent to penetrate his or her person per anum.

That which has been stated, with regard to the evidence and manner of proof in cases of rape, ought especially to be observed upon a trial for this heinous offense. When strictly and impartially proved, the offense well merits strict and impartial punishment; but it is from its nature so easily charged and the negative so difficult to be proved that the accusation ought clearly to be made out. The evidence should be plain and satisfactory in proportion as the crime is detestable.—4 Bla. Com., 215. (Archbold's Criminal Practice and Pleading, 7th ed., vol. 2, pp. 185, 186, note.)

PROOF.

(1) Assault with intent to murder:

(a) That the accused assaulted a certain person, as alleged.

(b) The facts and circumstances of the case indicating the existence at the

time of the assault of the specific intent of the accused to kill such person, and that the killing would have been murder had death resulted.

[Note: Both the specific intent and the malice may be inferred from the deliberate use of a deadly weapon in a way calculated to cause death, or from other deliberate acts of violence likely to result in death or great bodily harm.]

(2) Assault with intent to commit manslaughter:

(a) That the accused assaulted a certain person, as alleged.

(b) The facts and circumstances of the case indicating the existence at the time of the assault of the specific intent of the accused to kill such person and that the killing would have been voluntary manslaughter had death resulted.

(3) Assault with intent to commit rape:

(a) That the accused assaulted a certain female, as specified.

(b) The facts and circumstances of the case indicating the existence at the time of the assault of the intent of the accused to penetrate the person of such female at all events by overcoming any resistance on her part by actual or constructive force; and the facts and circumstances indicating that the offense of rape would have been committed had the accused succeeded in carrying out his purpose.

(4) Assault with intent to rob:

(a) That the accused assaulted a certain person, as alleged.

(b) The facts and circumstances of the case indicating the existence at the time of the assault of the intent on the part of the accused forcibly to steal property of such person from his person or in his presence by violence or putting him in fear.

(5) Assault with intent to commit sodomy:

(a) That the accused assaulted a certain person, as alleged.

(b) The facts and circumstances of the case indicating the concurrent intent to commit the offense on such person.

X. ASSAULT WITH INTENT TO DO BODILY HARM.

This is an assault aggravated by the specific present intent to do bodily harm to the person assaulted by means of the force employed.

It is not necessary that any battery actually ensue, or, if bodily harm is actually inflicted, that it be of the kind intended. Where the accused acts in reckless disregard for the safety of others it is not a defense that he did not have in mind the particular person injured.

PROOF.

(a) That the accused assaulted a certain person, as alleged.

(b) The facts and circumstances of the case indicating the concurrent intent thereby to do bodily harm to such person.

NINETY-FOURTH ARTICLE.

444. Any person subject to military law who makes or causes to be made any claim against the United States, or any officer thereof, knowing such claim to be false or fraudulent; or

[2] Who presents or causes to be presented to any person in the civil or military service thereof, for approval or payment, any claim against the United States, or any officer thereof, knowing such claim to be false or fraudulent; or

[3] Who enters into any agreement or conspiracy to defraud the United States by obtaining, or aiding others to obtain, the allowance or payment of any false or fraudulent claim; or

[4] Who, for the purpose of obtaining, or aiding others to obtain, the ap-

proval, allowance, or payment of any claim against the United States or against any officer thereof, makes or uses, or procures, or advises the making or use of, any writing or other paper, knowing the same to contain any false or fraudulent statements; or

[5] Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, makes, or procures, or advises the making of, any oath to any fact or to any writing or other paper knowing such oath to be false; or

[6] Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, forges or counterfeits, or procures, or advises the forging or counterfeiting of any signature upon any writing or other paper, or uses, or procures, or advises the use of any such signature, knowing the same to be forged or counterfeited; or

[7] Who, having charge, possession, custody, or control of any money or other property of the United States, furnished or intended for the military service thereof, knowingly delivers, or causes to be delivered, to any person having authority to receive the same, any amount thereof less than that for which he receives a certificate or receipt; or

[8] Who, being authorized to make or deliver any paper certifying the receipt of any property of the United States furnished or intended for the military service thereof, makes or delivers to any person such writing, without having full knowledge of the truth of the statements therein contained and with intent to defraud the United States; or

[9] Who steals, embezzles, knowingly and willfully misappropriates, applies to his own use or benefit, or wrongfully or knowingly sells or disposes of any ordnance, arms, equipments, ammunition, clothing, subsistence stores, money, or other property of the United States furnished or intended for the military service thereof; or

[10] Who knowingly purchases or receives in pledge for any obligation or indebtedness from any soldier, officer or other person who is a part of or employed in said forces or service, any ordnance, arms, equipment, ammunition, clothing, subsistence stores, or other property of the United States, such soldier, officer, or other person not having lawful right to sell or pledge the same:

Shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial may adjudge, or by any or all of said penalties. And if any person, being guilty of any of the offenses aforesaid while in the military service of the United States, receives his discharge or is dismissed from the service, he shall continue to be liable to be arrested and held for trial and sentence by a court-martial in the same manner and to the same extent as if he had not received such discharge nor been dismissed.

DEFINITIONS AND PRINCIPLES.

See the respective headings under which the defenses defined by this article are treated below.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See article 2.

The article embraces a large number of offenses which may be treated under headings corresponding to the numbered paragraphs of the article, as follows:

I. Making or causing to be made a false or fraudulent claim.

II. Presenting or causing to be presented for approval or payment a false or fraudulent claim.

III. Entering into an agreement or conspiracy to defraud the United States through false claims.

IV. Making, using, procuring, or advising the making or use of a false writing or other paper in connection with claims.

V. False oath in connection with claims.

VI. Forgery, etc., of signature in connection with claims.

VII. Delivering less than amount called for by receipt.

VIII. Making or delivering receipt without having knowledge that the same is true.

IX. Embezzlement, misappropriation, sale, etc., of military property.

X. Purchasing or receiving in pledge of military property.

I. MAKING OR CAUSING TO BE MADE A FALSE OR FRAUDULENT CLAIM.

Making a claim is a distinct act from presenting it. A claim may be made in one place and presented in another. This section does not relate to personal claims against an officer of the United States, but to claims against the United States made to such officer or otherwise. It is not necessary that the claim be allowed or paid nor that it be made to the person to be benefited by the allowance or payment. The claim must be made or caused to be made with knowledge of its fictitious or dishonest character. This does not include claims, however groundless they may be, that are honestly believed by the maker to be valid, nor claims that are merely made negligently or without ordinary prudence, but it does include claims made by a person who has the belief of the false character of the claim that the ordinarily prudent man would have entertained under the circumstances. (See also the discussion under "II" of this article.)

An instance of making a false claim would be where an officer having a claim respecting property lost in the military service knowingly includes articles that were not in fact lost and submits such claim to his commanding officer for the action of the board.

PROOF.

(a) That the accused made or caused to be made a certain claim against the United States as alleged.

(b) That such claim was false or fraudulent in the particulars specified.

(c) That when the accused made the claim or caused it to be made he knew that it was false or fraudulent in such particulars.

(d) The amount involved, as alleged.

II. PRESENTING OR CAUSING TO BE PRESENTED FOR APPROVAL OR PAYMENT A FALSE OR FRAUDULENT CLAIM.

See second paragraph of the article and matter under heading "I."

The claim must be presented to some person having authority to approve or pay it. False and fraudulent claims include not only those containing some material false statement, but also claims that the person presenting knows to have been paid, or for some other reason knows he is not authorized to present or receive money on.

Where an officer knows that a certain duly assigned pay account of his is outstanding and that the assignee can collect on it if he chooses to do so, it is no defense to a charge against such officer of presenting for payment a second account covering the same period as the assigned account that the second account was presented relying on the assignee's statement that he would not present the first. But where the accused has good grounds to believe and actually does believe when he presents the second account that the assigned

account had been canceled or surrendered by the assignee, his presentation of the second claim does not constitute this offense. A cancellation or surrender of the first account after the presentation of the second account is, of course, no defense to the charge.

Presenting to a paymaster a false final statement, knowing it to be false, is an example of an offense under this paragraph.

PROOF.

(a) That the accused presented or caused to be presented for approval or payment to a certain person in the civil or military service of the United States, a certain claim against the United States, as alleged.

(b) That such claim was false or fraudulent in the particulars alleged.

(c) That when the accused presented the claim or caused it to be presented he knew it was fictitious or dishonest in such particulars.

(d) The amount involved, as alleged.

III. ENTERING INTO AN AGREEMENT OR CONSPIRACY TO DEFRAUD THE UNITED STATES THROUGH FALSE CLAIMS.

See the third paragraph of this article.

A conspiracy is the corrupt agreeing together of two or more persons to do by concerted action something unlawful either as a means or an end. (Bishop, vol. 2, p. 98.)

The mere entry into a corrupt agreement for the purpose of defrauding the United States through any of the means specified constitutes the offense. An example of this offense is an agreement between a contractor and an officer to defraud the United States by means of a padded voucher to be certified as correct by the officer.

PROOF.

(a) That the accused and one or more other persons named or described entered into an agreement.

(b) That the object of the agreement was to defraud the United States.

(c) That the means by which the fraud was to be effected were to obtain or assist certain other persons to obtain the allowance or payment of a certain false or fraudulent claim, as specified.

(d) The amount involved, as alleged.

IV. MAKING, USING, PROCURING, OR ADVISING THE MAKING OR USE OF A FALSE WRITING OR OTHER PAPER IN CONNECTION WITH CLAIMS.

See the fourth paragraph of the article, and matter under headings "I" and "II."

It is not necessary to the offense of making a writing knowing it to contain false or fraudulent statements that such writing be used or attempted to be used, or that the claim in support of which it was made be presented for approval, allowance, or payment. The false or fraudulent statement should, however, be material.

In the offense of procuring the making or use of the writing or other paper, the paper must be made or used; but in the offense of advising such acts the making or use of the paper is not necessary. Examples of offenses under this paragraph are: Willfully inducing another to make to the United States a lease of premises containing a false and fraudulent statement with a view of obtaining the allowance of a false claim for rent against the United States; falsification by a soldier of an entry in the company clothing book for the

purpose described in this paragraph of the article; and the making by an officer in his pay account of false and fraudulent statements with a view to securing the payment of such account.

PROOF.

(a) That the accused made or used or procured or advised the making or use of a certain writing or other paper, as alleged.

(b) That certain statements in such writing or other papers were false or fraudulent, as alleged.

(c) That the accused knew this.

(d) The facts and circumstances indicating that the act of the accused was for the purpose of obtaining or aiding certain others to obtain the approval, allowance or payment of a certain claim or claims against the United States, as specified.

(e) The amount involved, as alleged.

V. FALSE OATH IN CONNECTION WITH CLAIMS.

See the fifth paragraph of the article and matter under headings "I," "II," and "IV."

PROOF.

(a) That the accused made or procured or advised the making of an oath to a certain fact or to a certain writing or other paper, as alleged.

(b) That such oath was false, as alleged.

(c) That the accused knew it was false.

(d) The facts and circumstances of the case indicating that the act was for the purpose of obtaining or aiding certain others to obtain the approval, allowance, or payment of a certain claim or claims against the United States, as alleged.

VI. FORGERY, ETC., OF SIGNATURE IN CONNECTION WITH CLAIMS.

See the sixth paragraph of the article and matter under headings "I" and "II" above.

The term "forges or counterfeits" includes any fraudulent making of another's signature, whether an attempt is made to imitate the handwriting or not.

PROOF.

(a) That the accused forged or counterfeited the signature of a certain person on a certain writing or other paper or that he procured or advised the act as specified; or that he used the forged or counterfeited signature of a certain person or procured or advised its use, knowing such signature to be forged or counterfeited, as alleged.

(b) The facts and circumstances of the case indicating that his act was for the purpose of obtaining or aiding certain others to obtain the approval, allowance, or payment of a certain claim or claims against the United States, as alleged.

VII. DELIVERING LESS THAN AMOUNT CALLED FOR BY RECEIPT.

See the seventh paragraph of the article.

It is immaterial in this offense by what means, whether by deceit, collusion, or otherwise, the accused effected the transaction, or what his purpose was in so doing.

Instances of this offense are:

A contractor gave a receipt for a greater amount than was due him from the United States. Thereupon the disbursing officer gave him the full amount called for by the receipt, but received back from the contractor the excess over the amount actually due.

A disbursing officer, having delivered to a creditor of the United States less money than was actually due, received a receipt signed in blank by the creditor, which he afterwards completed by writing the true amount due.

PROOF.

(a) That the accused had charge, possession, custody, or control of certain money or property of the United States furnished or intended for the military service thereof, as alleged.

(b) That he obtained a receipt for a certain amount or quantity of such money or property, as alleged.

(c) That for such receipt he knowingly delivered, or caused to be delivered, to a certain person having authority to receive it an amount or quantity of such money or property less than the amount or quantity thereof specified in such receipt.

(d) The value of the undelivered money or property, as alleged.

VIII. MAKING OR DELIVERING RECEIPT WITHOUT HAVING KNOWLEDGE THAT THE SAME IS TRUE.

See the eighth paragraph of the article.

The following is an instance of an offense under this paragraph: An officer, being in collusion with a contractor, knowingly received from him an amount of supplies intended for the military service less than the amount shown on the receipt for the supplies, which receipt was certified to by the officer and delivered to the contractor with the intent to defraud the United States.

PROOF.

(a) That the accused was authorized to make or deliver a certificate of the receipt from a certain person of certain property of the United States furnished or intended for the military service thereof, as alleged.

(b) That he made or delivered to such person such certificate, as alleged.

(c) That such certificate was made or delivered without the accused having full knowledge of the truth of a certain material statement or statements therein.

(d) The facts and circumstances indicating that his act was done with intent to defraud the United States.

(e) The amount involved, as alleged.

IX. EMBEZZLEMENT, MISAPPROPRIATION, SALE, ETC., OF MILITARY PROPERTY.

For definitions and principles respecting larceny and embezzlement, see headings "V" and "VII" under the ninety-third article.

Misappropriating is devoting to any unauthorized purpose. The misapplication meant is where such purpose is for the party's own use or benefit.

For the definition of "disposes of," see heading "I" under the eightieth article.

The larceny, embezzlement, etc., must be of the particular kind of property mentioned in the article. Post exchange and company funds and money appropriated for other than the military service do not come within the description "money of the United States furnished or intended for the military service thereof." The term "embezzlement" as used in this article does not

include acts or omissions not within the definition of embezzlement, but which are expressly declared by statute to be embezzlements. Such statutory embezzlements are chargeable, however, under the ninety-sixth article.

The misappropriation of the property or money need not be for the benefit of the accused; the words "to his own use and benefit" qualify the words "applies only."

Instances of misappropriation are:

An officer of the Quartermaster's Department used teams, tools, and other public property in his possession as such officer in erecting buildings, etc., for the benefit of an association composed mainly of civilians, of which he was a member.

An officer of the Quartermaster's Department loaned public property (corn) to a contractor for the purpose of enabling him to fill a contract made with the United States through another officer.

An instance of misapplication is the temporary use by a quartermaster of Government horses in his charge to draw his private carriage on nonpublic business.

PROOF.

In larceny and embezzlement:

(a) See proof under headings "V" and "VII" under the ninety-third article.

(b) That the property belonged to the United States and that it was furnished or intended for the military service thereof.

In misappropriation and misapplication:

(a) That the accused misappropriated or applied to his own use certain property in the manner alleged.

(b) That such property belonged to the United States and that it was furnished or intended for the military service thereof.

(c) The facts and circumstances of the case indicating that the act of the accused was willfully and knowingly done.

(d) The value of the property, as specified.

In wrongful sale or disposition:

(a) That the accused sold or in a certain manner disposed of certain property, as specified.

(b) That such property belonged to the United States and that it was furnished or intended for the military service thereof.

(c) The facts and circumstances indicating that the act was knowingly or wrongfully done.

(d) The value of the property, as specified.

X. PURCHASING OR RECEIVING IN PLEDGE OF MILITARY PROPERTY.

See the tenth paragraph of the article and matter under fifty-fifth article.

To constitute this offense the accused must know not only that the person selling or pawning the property was in one of the specified classes but that the property was the property of the United States. As to "knowingly" see "Definitions and principles" under fifty-fifth article.

PROOF.

(a) That the accused purchased, or received in pledge, for a certain obligation of indebtedness certain military property of the United States, as alleged, knowing it to be such property.

(b) That such property was purchased or so received in pledge from a certain soldier, officer, or other person who was a part of or employed in

the military service of the United States, as alleged, and that the accused knew the person selling or pledging the property to be such soldier, officer, or other person.

(c) That such soldier, officer, or other person had not the lawful right to sell or pledge such property.

(d) The value of the property, as alleged.

NINETY-FIFTH ARTICLE.

445. Any officer or cadet who is convicted of conduct unbecoming an officer and a gentleman shall be dismissed from the service.

DEFINITIONS AND PRINCIPLES.

The conduct contemplated is action or behavior in an official capacity which, in dishonoring or disgracing the individual as an officer, seriously compromises his character and standing as a gentleman, or action or behavior in an unofficial or private capacity which, in dishonoring or disgracing the individual personally as a gentleman, seriously compromises his position as an officer and exhibits him as morally unworthy to remain a member of the honorable profession of arms. (Winthrop, p. 1106.)

There are certain moral attributes common to the ideal officer and the perfect gentleman, a lack of which is indicated by acts of dishonesty or unfair dealing; of indecency or indecorum; of lawlessness, injustice, or cruelty.

Not every one is or can be expected to meet ideal standards or to possess the attributes in the exact degree demanded by the standards of his own time; but there is a limit of tolerance below which the individual standards in these respects of an officer or cadet can not fall without his being morally unfit to be an officer or cadet or to be considered a gentleman.

This article contemplates such conduct by an officer or cadet which, taking all the circumstances into consideration, satisfactorily shows such moral unfitness.

This article includes acts made punishable by any other article of war, provided such acts amount to conduct unbecoming an officer and a gentleman; thus, an officer who embezzles military property violates both this and the preceding article.

Instances of violation of this article are:

Knowingly making a false official statement; dishonorable neglect to pay debts; opening and reading another's letters; giving a check on a bank where there were no funds to meet it, and without intending that there should be; using insulting or defamatory language to another officer in his presence, or about him to other military persons; being grossly drunk and conspicuously disorderly in a public place; public association with notorious prostitutes; cruel treatment of soldiers; committing or attempting to commit a crime involving moral turpitude; failing without a good cause to support his family.

For other instances, see Digest, pages 140-143, and Winthrop, pages 1107-1115.

ANALYSIS AND PROOF.

This article applies to officers and cadets only.

The article defines one offense, viz.:

I. CONDUCT UNBECOMING AN OFFICER AND A GENTLEMAN.

PROOF.

(a) That the accused did or omitted to do the acts as alleged.

(b) The circumstances, intent, motive, etc., as specified.

NINETY-SIXTH ARTICLE.

446. Though not mentioned in these articles, all disorders and neglects to the prejudice of good order and military discipline, all conduct of a nature to bring discredit upon the military service, and all crimes or offenses not capital, of which persons subject to military law may be guilty, shall be taken cognizance of by a general or special or summary court-martial, according to the nature and degree of the offense, and punished at the discretion of such court.

DEFINITIONS AND PRINCIPLES.

See matters under the respective headings under which the offenses are treated.

ANALYSIS AND PROOF.

The article applies to any person subject to military law. See article 2. The article embraces offenses falling within the classes described therein, and not mentioned in the other punitive articles. The offenses may be treated under the following headings:

I. Disorders and neglects to the prejudice of good order and military discipline.

II. Conduct of a nature to bring discredit upon the military service.

III. Crimes or offenses not capital.

I. DISORDERS AND NEGLECTS TO THE PREJUDICE OF GOOD ORDER AND MILITARY DISCIPLINE.

The disorders and neglects include all acts or omissions to the prejudice of good order and military discipline not made punishable by any of the preceding articles.

By the term "to the prejudice," etc., is to be understood directly prejudicial, not indirectly or remotely merely. An irregular or improper act on the part of an officer or soldier can scarcely be conceived which may not be regarded as in some indirect or remote sense prejudicing military discipline; but it is hardly to be supposed that the article contemplated such distant effects, and the same is, therefore, deemed properly to be confined to cases in which the prejudice is reasonably direct and palpable. (Winthrop, p. 1123.)

Instances of such disorders and neglects in the case of officers are: Disobedience of standing orders, or of the orders of an officer when the offense is not chargeable under a specific article; allowing a soldier to go on duty knowing him to be drunk; rendering himself unfit for duty by excessive use of intoxicants; drunkenness.

Instances of such disorders and neglects in the cases of enlisted men are: Failing to appear on duty with a proper uniform; appearing with dirty clothing; malingering; abusing public animals; refusing to submit to treatment necessary to render him fit for duty; refusing to submit to a necessary and proper operation not endangering life (see G. O. 43, W. D., 1906); careless discharge of firearms; personating an officer; making false statements to an officer in regard to matters of duty.

PROOF.

(a) That the accused did or failed to do the acts alleged.

(b) The circumstances, intent, etc., as specified.

II. CONDUCT OF A NATURE TO BRING DISCREDIT UPON THE MILITARY SERVICE.

"Discredit," as here used, means to injure the reputation of.

The principal object of including this phrase in the general article was to make military offenses those acts or omissions of retired soldiers which were not elsewhere made punishable by the Articles of War but which are of a nature to bring discredit on the service, such as a failure to pay debts.

There is, however, a limited field for the application of this part of the general article to soldiers on the active list in cases where their discreditable conduct is not made punishable by any specific article or by the other parts of the general article.

PROOF.

- (a) That the accused did or failed to do the acts alleged.
- (b) The circumstances, intent, etc., as specified.

III. CRIMES OR OFFENSES NOT CAPITAL.

The crimes referred to in A. W. 96 manifestly embrace those not capital committed in violation of public law as enforced by the civil power. (U. S. v. Grafton, 206 U. S., 348.)

All crimes or offenses wherever committed that are not made punishable by death are included, except such as are specifically included in some other article and (in view of the ninety-second article) except murder or rape committed in time of peace within the geographical limits of the States of the Union and the District of Columbia.

Within this description would be a noncapital crime which, although designated by the laws of the jurisdiction where committed with one of the names used, for instance, in the ninety-third article, is not within the common-law definition of the offense.

Thus section 90 of the Federal Penal Code of 1910 provides that a failure by an officer to render accounts for public money received by him unless authorized to retain it as salary, pay, or emolument is an embezzlement of such funds. Such an embezzlement not being within the definition of embezzlement as the term is used in the ninety-third and ninety-fourth articles would be chargeable under the general article.

The elements of some of the more common crimes that are chargeable under this article will now be discussed.

(1) Assault.

(2) Assault and battery. See matter under heading "IX" under ninety-third article.

A battery is any unlawful touching or injury, however slight, to the person of another directly or indirectly done in an angry, revengeful, rude or insolent manner. Throwing water or spitting in a person's face is a battery. So, merely taking hold of another's clothing, or pushing another against him, or striking a horse on which he is riding causing him to be thrown; striking his cane while in his hand, is a battery when done unlawfully and in the manner described.

If the injury is accidentally inflicted in doing a lawful act without culpable negligence the offense is not committed; but where personal injury results from the reckless doing of an act likely to result in such injury, the offense is committed.

It is no defense that the injury took place on a person for which it was not intended, or that the injury was not the immediate result of the defendant's acts. Thus, if a person throws a firecracker in a crowd where it is tossed from hand to hand and finally explodes and puts out a man's eye, the offense is committed.

(3) Assault with a dangerous weapon, instrument, or other thing. See matter under heading "IX," under ninety-third article.

Weapons, etc., are dangerous when they are used in such manner that they are likely to produce death or great bodily harm. Mere capability of being so used is not enough.

Boiling water may be so used as to be a dangerous thing, and a pistol may be so used as not to be a dangerous weapon.

(4) Forgery. At common law "forgery is the fraudulent making of a false writing which, if genuine, would be apparently of some legal efficacy." (Bishop, vol. 2, p. 301.)

Some of the instruments that are subjects of forgery are checks, indorsements, orders for the delivery of money or goods, railroad tickets, and receipts.

A false writing includes a false instrument that is in part or entirely printed, engraved, written with a pencil, or made by photography or other device.

A false writing may be made by materially altering an existing writing, by filling in a paper signed in blank, or by signing an instrument already written.

The writing must be false—must purport to be what it is not.

Thus, signing another's name to a check with intent to defraud is forgery, as the instrument purports on its face to be what it is not. But where, after the false signature of such person is added the word *by* and the signature of the person making the check, thus indicating an authority to sign, the offense is not forgery even if no such authority exists, as the check on its face is what it purports to be.

Forgery may be committed by signing one's own name to an instrument. Thus, where a check payable to the order of a certain person comes into the hands of another of the same name, he commits forgery, when, knowing the check to be another's, he indorses it with his own name, intending to defraud.

Forgery may also be committed by signing a fictitious name, as where a person signs a check payable to himself with a fictitious name; but when he passes a check signed by him with a fictitious name, credit being extended to him without regard to his name, forgery is not committed.

To constitute a forgery the instrument must have apparent legal efficacy. The fraudulent making of an instrument affirmatively invalid on its face is not a forgery. But this requirement does not ordinarily prevent the fraudulent making of a signature on a check, for instance, from being a forgery even if there be no resemblance to the genuine signature and the name is misspelled.

The false writing must be made with intent to defraud. A person who signs another's name to an instrument believing that he has authority to do so does not commit a forgery.

It is immaterial, however, that anyone be actually defrauded or that no further step be made toward carrying out the intent to defraud than the making of the false writing.

(5) Sodomy. See assault with intent to commit sodomy under heading "IX," under ninety-third article.

PROOF.

Crimes in general:

(a) That the accused did or failed to do the acts alleged.

(b) The circumstances, intent, etc., as specified.

(1) Assault:

(a) That the accused did the overt act alleged.

(b) The facts and circumstances of the case indicating either that such an act was an actual attempt with force and violence to do a corporal hurt to a certain person or that such act was apparently such an attempt and conveyed to the mind of the person set upon a well-grounded apprehension of such injury.

(2) Assault and battery:

(a) That the accused assaulted a certain person, as alleged.

(b) That an injury resulted to such person, as specified.

(3) Assault with a dangerous weapon, instrument, or other thing:

(a) That the accused assaulted a certain person with a certain weapon, instrument, or thing.

(b) That facts and circumstances of the case indicating that such weapon, instrument, or thing was used in a manner likely to produce death or great bodily harm.

(4) Forgery:

(a) That a certain instrument was made. (The instrument itself should be produced, if available.)

(b) That such instrument is a forgery.

(c) That the accused forged it.

(d) The facts and circumstances of the case indicating the intent of the accused thereby to defraud a certain person.

(5) Sodomy:

See proof under heading "IX," under ninety-third article.

CHAPTER XVIII. COURTS OF INQUIRY.

SECTION I.

CONSTITUTION.

447. When and by Whom Ordered. A court of inquiry to examine into the nature of any transaction of or accusation or imputation against any officer or soldier may be ordered by the President or by any commanding officer, but a court of inquiry shall not be ordered by any commanding officer except upon the request of the officer or soldier whose conduct is to be inquired into. (A. W. 97.)

448. Limitation Upon Power to Convene. There is no statutory restriction to the meaning of the term "commanding officer," consequently any commander of the officer or soldier who makes the request would have authority to convene the court, but if the charge to be inquired into is beyond the jurisdiction of a court-martial which such commander can appoint, he would not, by analogies of the service in the administration of military justice, be the proper convening authority in such case. (Op. J. A. G., approved by Secretary of War, Sept. 19, 1874.)

449. Discretion as to Ordering Court. Neither the President nor a commanding officer is obliged to order a court of inquiry on demand of an officer or soldier. Where the facts are thoroughly understood by the authority who is requested to order a court of inquiry or can be satisfactorily ascertained by an investigating officer, the commanding officer may, in his discretion, refuse the application; but in the event of such refusal the party, if not satisfied, may appeal to higher authority. (Winthrop, p. 805.)

SECTION II.

JURISDICTION.

450. As to Persons. A court of inquiry may examine into the conduct of officers or soldiers only (A. W. 97), and the inquiry is confined to those actually in the service. (Digest, p. 586, XVIII, B.)

451. As to Time. The statute of limitations (A. W. 39) does not apply to courts of inquiry. There is no legal objection therefore to investigating transactions that are remote in time.

452. As to Subject Matter. The inquiry is limited to transactions of or accusations or imputations against officers or soldiers. (A. W. 97.) The principal uses which courts of inquiry are expected to serve are: (a) For determining whether there should be a trial by court-martial in a particular instance; (b) for informing and advising superior authority in cases which appear not to call for trial by court-martial, but for some other military or administrative action; and (c) for the vindication of character or conduct. (Winthrop, p. 805.)

SECTION III. COMPOSITION.

453. Members. A court of inquiry shall consist of three or more officers. (A. W. 98.) The Secretary of War may assign retired officers, with their consent, upon courts of inquiry. (Act of Apr. 23, 1904.) In time of war retired officers may be employed on active duty in the discretion of the President. (Act of June 3, 1916.)

454. Recorder. For each court of inquiry the authority appointing the court shall appoint a recorder. (A. W. 98.) The recorder is not an adviser of the court nor a prosecutor before it, but will assist the court, if it so desires, in all matters leading to correct conclusions of fact and law.

455. Convening Order. The form of the convening order is similar to that for a court-martial. It details the members and recorder by name, fixes the time and place of meeting, specifies the subject matter of inquiry, and directs a report of the facts only, or of the facts with an opinion on the merits of the case.

456. Rank of Members. There is no statute prescribing the rank of members, but when it can be avoided they should not be inferior in rank to the officer whose conduct is being inquired into. The decision of the appointing authority, as indicated by the order convening the court, is conclusive as to whether or not it can be avoided.

457. Reporter and Interpreter. The president of a court of inquiry has the same power to appoint reporters and interpreters as is delegated to the president of a court-martial. (A. W. 115.) They are usually paid at the rates fixed by Army regulations for those of courts-martial. (A. R. 986-988.) An enlisted man may be detailed to serve as stenographic reporter and will receive extra pay as provided in A. R. 986.

SECTION IV. POWERS.

458. To Summon and Examine Witnesses. A court of inquiry and the recorder thereof shall have the same power to summon and examine witnesses as is given to a court-martial and the judge advocate thereof. (A. W. 101.)

459. Refusal to Appear or Testify. Any person not subject to military law who, being duly subpoenaed to appear as a witness before a court of inquiry or before any officer, military or civil, designated to take a deposition to be read in evidence before such court, willfully neglects or refuses to appear, or refuses to qualify as a witness, or to testify, or to produce documentary evidence which such person may have been legally subpoenaed to produce, shall be deemed guilty of a misdemeanor and punished as in like offenses with respect to courts-martial. (A. W. 23.)

460. Contempt. A court of inquiry has no authority to punish for contempt, but any conduct before it to the prejudice of good order and military discipline by persons subject to military law may be made the subject of charges against the offender.

SECTION V.

PROCEDURE.

461. General Principles. A court of inquiry is governed by the general principles of military law, applying the analogies of a court-martial where they are applicable, and recurring to adjudged cases, precedents, rules, authoritative legal opinions, and approved books of legal exposition where there is no pertinent paramount stated rule. (28 Op. Atty. Gen., 364.) A court of inquiry is not really a court in the legal sense of the term, for no criminal issue is formed before it, it arraigns no accused, receives no plea, makes no findings of guilt or innocence, awards no punishment, and expresses no opinion unless specially ordered to do so.

462. Presence of Party Whose Conduct is Being Investigated. The presence of the party whose conduct is being investigated is not essential and his absence does not affect the authority of the court to proceed with the hearing.

463. Counsel. The party whose conduct is being inquired into shall have the right to be represented before the court by counsel of his own selection, if such counsel be reasonably available. (A. W. 99.) So also the accuser, where there is one, should usually be allowed to be present with counsel, and a similar privilege may properly be extended to any officer who will be materially involved in the inquiry. (Winthrop, p. 812.)

464. Challenge. Members of a court of inquiry may be challenged by the party whose conduct is being inquired into, but only for cause stated to the court. The court shall determine the relevancy and validity of any challenge, and shall not receive a challenge to more than one member at a time. (A. W. 99.)

465. Reduced Numbers. Where the number of members is reduced by casualty or challenge, the court may proceed with the reduced number, if not below the minimum, but the appointing authority should be notified in order that he may detail new members if he desires to do so. If any testimony has been taken before a new member is added, it should be read to him in the presence of the other members. In the absence of the recorder the junior member can not act as recorder. The proper procedure is to notify the convening authority and adjourn to await the appointment of another recorder.

466. Oaths. The recorder of a court of inquiry shall administer to the members the following oath:

You, A. B., do swear (or affirm) that you will well and truly examine and inquire, according to the evidence, into the matter now before you, without partiality, favor, affection, prejudice, or hope of reward. So help you God.

After which the president of the court shall administer to the recorder the following oath:

You, A. B., do swear (or affirm) that you will, according to your best abilities, accurately and impartially record the proceedings of the court and the evidence to be given in the case in hearing. So help you God.

In case of affirmation the closing sentence of adjuration will be omitted. (A. W. 100.)

Witnesses shall take the same oath or affirmation that is taken by witnesses before courts-martial, and a reporter or interpreter shall, before entering upon his duties, take the oath or affirmation required of a reporter or an interpreter for a court-martial. (A. W. 101.)

467. Examination of Witnesses. The examination of witnesses may be by the court, by a member thereof, or by the recorder, in the discretion of the court. The party whose conduct is being inquired into or his counsel, if any, shall be permitted to examine and cross-examine witnesses so as fully to investigate

the circumstances in question. (A. W. 101.) A witness may not be compelled to answer any question which would tend to incriminate or degrade him. (A. W. 24.)

468. Depositions. Depositions to be read in evidence before courts of inquiry are taken and admitted in evidence under the same rules governing their taking and admissibility in evidence before courts-martial. (A. W. 25, 26.)

469. Conclusions. The court must, as a finding, give its conclusions as to the facts, and, when ordered, must also give an opinion on the merits of the case. The conclusions or opinion may not be unanimous, in which case a dissenting conclusion or opinion is authorized.

470. Obligation of Secrecy. The oath of members of a court of inquiry, unlike that of members of a court-martial, does not enjoin upon them secrecy as to the votes and opinions of members, but under the custom of the service it would be conduct prejudicial to discipline to divulge the recommendation or opinion of the court until announced by the appointing authority, or to disclose the vote or opinion of a member unless legally required to do so.

471. Revision by Court. If not satisfied with the investigation, or with the report or opinion, the reviewing authority may reassemble the court, in the same manner as a court-martial, and return the proceedings with direction either to have the investigation pursued further and completed, or the report of the facts made more detailed and comprehensive, or the opinion expressed in terms more definite and unequivocal or more responsive to the original instructions, or to correct or supply some other error or defect. The inquiry not being a trial but an investigation merely, the court may properly be required, upon revision, to re-examine witnesses or to take entirely new testimony, or it may do so of its own motion without orders in connection with the revision. (Winthrop, p. 819.)

472. Publication of Proceedings. The reviewing authority, having taken final action upon the report or opinion, may publish in orders, in whole or in part, or in substance, the report of the court upon the subject of the inquiry, with the opinion, if any, and the determination had or action taken thereon. Upon considerations, however, of policy or justice, the President or commander may, in his discretion, delay the publication, or omit altogether the publication of, the report, etc., or may publish the result alone, as, for example, that it is determined that no further proceedings are called for in the case.

SECTION VI.

RECORD.

473. How Authenticated. Each court of inquiry shall keep a record of its proceedings, which shall be authenticated by the signature of the president and the recorder thereof. In case the record can not be authenticated by the recorder, by reason of his death, disability, or absence, it shall be signed by the president and by one other member of the court. (A. W. 103.)

474. Disposition Of. The record shall be forwarded to the reviewing authority. (A. W. 103.) Should the court be appointed by the President the proceedings will be sent direct to the Judge Advocate General of the Army. To his office will be forwarded the original proceedings of all courts of inquiry with the decisions and orders of the reviewing authority made thereon, accompanied by five copies of the order publishing the case, if there be any, also a copy of every subsequent order affecting the case. When more than one case is embraced in a single order, a sufficient number of copies will be forwarded to enable one to be filed with each record. (A. R. 917.)

475. Admissible in Evidence. The record of the proceedings of a court of

inquiry may be read in evidence before any court-martial or military commission in any case not capital nor extending to the dismissal of an officer, and may also be read in evidence in any proceeding before a court of inquiry or a military board: Provided, That such evidence may be adduced by the defense in capital cases or cases extending to the dismissal of an officer. (A. W. 27. See par. 272.)

CHAPTER XIX. HABEAS CORPUS.

SECTION I.

PURPOSE OF WRIT.

476. To Determine Legality of Restraint. The purpose of the writ of habeas corpus is to bring the person seeking the benefit of it before the court or judge to determine whether or not he is illegally restrained of his liberty. It is a summary remedy for unlawful restraint of liberty and it can not be made use of to perform the function of a writ of error or an appeal. Where it is decided that the restraint is unlawful he is ordered released, but if the restraint is lawful the writ is dismissed. If the restraint be by virtue of legal process, the validity and present force of such process are the only subjects of investigation.

SECTION II.

WHERE RESTRAINT IS BY THE UNITED STATES.

477. State Court Without Authority. A State court is without authority to inquire into the legality of the restraint where it appears that the custody is by virtue "of the authority of the United States," the principle being that no State can authorize one of its judges or courts to exercise judicial power, by habeas corpus, within the jurisdiction of another and independent government. No State judge or court, after they are judicially informed that the party is held under the authority of the United States, has any right to interfere with him or to require him to be brought before them. (*Robb v. Connolly*, 111 U. S., 624, 632; *Ableman v. Booth*, 21 How., 506, 514; *Tarble's case*, 13 Wall., 397, 409.) If a party thus held be illegally imprisoned, it is for the courts or judicial officers of the United States, and those courts or officers alone, to grant him release. (*Tarble's case*, 13 Wall., 397, 411.)

SECTION III.

RETURN TO WRIT ISSUED BY STATE COURT.

478. To Show Authority for Restraint. The return should be sufficient in its detail of facts to show distinctly that the imprisonment is under the authority, or claim and color of the authority, of the United States and to exclude the suspicion of imposition or oppression on the part of the officer making the return. The process or orders under which the petitioner is held should be produced with the return and submitted to inspection in order that the court or the judge issuing the writ may see that the officer is acting in good faith, under the authority or claim and color of authority of the United States, and not under the mere pretense of having such authority. (*Tarble's case*, 13 Wall., 397, 409; *Covell v. Heyman*, 111 U. S., 176, 183.)

(a) **Witness Held Under Warrant of Attachment.** Where the petitioner is a civilian who has been apprehended under a warrant of attachment to be taken before a court-martial to testify as a witness, the officer making the return to

the writ issued by a State court or judge will not produce the body, but will, by his return, set forth fully the authority by which he holds the person and allege that the State court, or judge, issuing the writ is without jurisdiction to issue the same and ask to have it dismissed. He will exhibit to the court or judge issuing the writ of habeas corpus the warrant of attachment and the subpoena (and the proof of service of the subpoena) on which the warrant of attachment was based, and also a certified copy of the order convening the court-martial before which the witness was subpoenaed to testify, together with a copy of the charges and specifications in the case in which he was subpoenaed to testify, and an affidavit showing that the witness has failed to appear in response to such subpoena.

[Note: See A. R. 997. For form of return, see Form B, Appendix 15.]

(b) **Enlisted Man or General Prisoner.** The return to a writ of habeas corpus issued by a State court or judge to produce an enlisted man or a general prisoner and show cause for his detention will show in writing that the subject of the writ is a duly enlisted soldier of the United States or a general prisoner, as the case may be, and set forth fully the cause of his detention, but the officer making the return will decline to produce in court the body of the prisoner named in the writ, giving as a reason for such refusal the fact that the Supreme Court of the United States has decided that a State court or judge has no jurisdiction in such a case.

[Note: See A. R. 998. For form of return, see Form D, Appendix 15. A deserter apprehended by a civil officer authorized by a statute of the United States to apprehend deserters is in the custody of the United States. See U. S. v. Reeves, 126 Fed. Rep., 127.]

SECTION IV.

RETURN TO WRIT ISSUED BY A UNITED STATES COURT.

479. Contents. A writ of habeas corpus issued by a United States court or judge will be promptly obeyed. The person alleged to be illegally restrained of his liberty will be taken before the court from which the writ has issued and a return made, setting forth the reasons for his restraint. The officer upon whom such writ is served will at once report the fact of such service by telegraph direct to The Adjutant General of the Army and the commanding general of the department, stating briefly the grounds on which the release of the party is sought.

[Note: See A. R. 999. For form where a civilian witness is held under warrant of attachment, see Form A, Appendix 15. For form where an enlisted man or general prisoner is held, see Form C, Appendix 15. For brief of authorities when writ is applied for on grounds of age, see Appendix 15.]

SECTION V.

WRIT ISSUED IN THE PHILIPPINE ISLANDS.

480. When Return Conclusive. It shall be a conclusive answer to a writ of habeas corpus against a military officer or soldier and a sufficient excuse for not producing the prisoner if the commanding general or any general officer in command of the department or district shall certify that the prisoner is held by him either—

- (a) As a prisoner of war; or
- (b) As a member of the Army, civilian employee thereof, or a camp follower and subject to its discipline; or
- (c) As a prisoner guilty of violation of the laws of war committed in any

unpacified province or territory and who has escaped into provinces officially declared to be under civil control and has been there captured by military authorities and is held for trial for such violations of the laws of war.

[Note: Sec. 1, Act. No. 272, Philippine Commission, Oct. 21, 1901, and sec. 4, Act. No. 421, id., June 23, 1902. Respectful return in writing will be made in the case of prisoners who may be exempted from jurisdiction by the provisions of these acts stating the facts of the case, but the body of the prisoner will not be produced. In all other cases the return will be made and the body produced before the proper tribunal.]

CHAPTER XX.

MISCELLANEOUS AND TRANSITORY PROVISIONS.

SECTION I.

MISCELLANEOUS PROVISIONS.

481. Injuries to Persons or Property—Redress. Article 105 imposes upon a commanding officer, upon receipt of a complaint that damage has been done to the property of any person, or that his property has been wrongfully taken, by any person subject to military law, the duty to convene a board of officers consisting of any number from one to three to investigate the complaint. The article provides the administrative machinery by which money reparation for acts of waste, spoil, destruction, or depredation, denounced in A. W. 89 as offenses, shall be made effective. The complaint will more properly be made in writing by the injured party or his representative, and should set forth the details of the injury and be sustained by evidence showing it to be meritorious and well founded; and this evidence may also properly be required to be exhibited in the form of affidavits or written statements. It is competent, however, for a commanding officer, apprised by the report of any person in the military service, or by the oral complaint of the party injured, of any such damage, to proceed with the investigation as here outlined in case of written complaint submitted by or in behalf of the party injured and supported by affidavits or written statement. The board will be convened with the least practicable delay, is empowered to summon witnesses, examine them under oath or affirmation, receive depositions or other documentary evidence, and assess the damages against the person or persons determined to be responsible for the damage or wrongful taking. The board's assessment of damages is subject to the approval of the commanding officer and an assessment thus approved will be stopped against the pay of the offender. The order of the commanding officer directing stoppages authorized by the article is conclusive on any disbursing officer for the payment by him to the injured party of the stoppages.

The occasions for resorting to the procedure under this article are more frequent in a period pending or immediately succeeding a time of war, or during field operations and maneuvers. As the absolute identity of the guilty parties can not always be determined, the article further provides that in such a case, and when the organization or detachment to which they belong is known, stoppages to the amount of damages inflicted may be made and assessed in such proportion as may be deemed just upon the individual members thereof who are shown to have been present with such organization or detachment at the time the damages complained of were inflicted, as determined by the approved findings of the board.

The guilty parties may be tried and punished for the military offense involved

in his and their act under A. W. 89, quite irrespectively of any proceeding for the reparation of the parties injured had under this article. A trial, however, will preferably be first ordered, since, if reparation be subsequently sought to be made, the commander and the board will have the benefit of any material facts developed upon the original investigation. So, if the accused be acquitted, such acquittal will furnish persuasive but not necessarily conclusive ground for not favorably entertaining the complaint or for reducing the amount to be assessed.

482. Effects of Deceased Persons—Disposition. In case of the death of any person subject to military law, the commanding officer of the place or command will permit the legal representative or widow of the deceased, if present, to take possession of all his effects then in camp or quarters, and if no legal representative or widow be present the commanding officer shall direct a summary court to secure all such effects; and said summary court shall have authority to convert such effects into cash, by public or private sale, not earlier than 30 days after the death of the deceased, and to collect and receive any debts due decedent's estate by local debtors; and as soon as practicable after converting such effects into cash said summary court shall deposit with the proper officer, to be designated in regulations, any cash belonging to decedent's estate, and shall transmit a receipt for such deposit, accompanied by any will or other papers of value belonging to the deceased, an inventory of the effects secured by said summary court, and a full account of his transactions to the War Department for action as authorized by law in the settlement of the accounts of deceased officers or enlisted men of the Army; but if in the meantime the legal representative, or widow, shall present himself or herself to take possession of decedent's estate, the said summary court shall turn over to him or her all effects not sold and cash belonging to said estate, together with an inventory and account, and make to the War Department a full report of his transactions.

The provisions of this article shall be applicable to inmates of the United States Soldiers' Home who die in any United States military hospital outside of the District of Columbia where sent from the home for treatment. (A. W. 112.)

483. Inquests. Article 113 imposes upon the summary court-martial the principal duties of the office of coroner at common law, viz., to investigate the cause of sudden, violent, and unnatural deaths. When a person is found dead at a place described in the article, and there is reasonable belief that his death has occurred from violence or other unlawful means, the commanding officer will immediately designate and direct a summary court-martial to investigate the circumstances of the death, to the end that the cause thereof may be determined and the persons criminally responsible therefor may be brought to justice. The summary court-martial will with the least practicable delay view the body of the deceased and summon and examine, under oath or affirmation, such witnesses as may have knowledge of the cause and circumstances of the death. The summary court-martial should warn every person testifying at the inquest who is accused or suspected that he is not required to give evidence incriminating himself, and that any statement or evidence he gives may be used against him in the event of any further proceedings being instituted. If expert medical testimony is necessary, the commanding officer will, at the request of the summary court-martial, direct a medical officer to make such examination of the body of the deceased as may be necessary and to appear as a witness at the inquest. The testimony of each witness will be reduced to writing, and will, except when stenographically reported, be subscribed by him, and will be appended to the report of the inquest.

If the body of the deceased shows wounds or bruises such as to indicate or

create suspicion that he came to his death by violent means, it shall be the duty of the summary court-martial to ascertain with as much exactness as possible the precise nature of the wounds or blows and the character of the instrument by which the wounds were inflicted; the person or persons by whom the fatal blow or blows were dealt; if there were any aiders or abettors; and such other particulars as may afford the means of drawing up, with the precision required by law, the necessary charges and specifications against the person or persons accused of the homicide.

The summary court officer will render a written report of his investigation to the commanding officer, which report will state his finding as to the cause of the death and the names of the persons criminally responsible therefor, if in his opinion there be any such. Such persons, though not subject to military law, may, if found at any post over which the United States has exclusive jurisdiction, be confined by the commanding officer for such time as may be necessary for their delivery to the civil authorities. If such persons are subject to military law and appear to be guilty of an offense not triable by court-martial, they will be confined by the commanding officer, who will immediately furnish the proper United States district attorney with a copy of the findings of the summary court officer.

If the person over whose body the inquest is held is not identified as an officer or soldier, the report of the summary court-martial shall give a description of the deceased, which shall specify the name, if known, the apparent age, the sex, the color of the eyes and hair, and all marks or other particulars which may assist in the identification of the person.

[Note: For form of report of inquest see Appendix 19.]

484. Removal of Civil Suits. When any civil suit or criminal prosecution is commenced in any court of a State against any officer, soldier, or other person in the military service of the United States on account of any act done under color of his office or status, or in respect to which he claims any right, title, or authority under any law of the United States respecting the military forces thereof, or under the law of war, such suit or prosecution may at any time before the trial or final hearing thereof be removed for trial into the district court of the United States in the district where the same is pending in the manner prescribed in section 33 of the act entitled "An Act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911 (36 Stat., 1097), and the cause shall thereupon be entered on the docket of said district court and shall proceed therein as if the cause had been originally commenced in said district court and the same proceedings had been taken in such suit or prosecution in said district court as shall have been had therein in said State court prior to its removal, and said district court shall have full power to hear and determine said cause. (A. W. 117.)

485. Complaints of Wrongs. Any officer or soldier who believes himself wronged by his commanding officer, and, upon due application to such commander, is refused redress, may complain to the general commanding in the locality where the officer against whom the complaint is made is stationed. The general shall examine into said complaint and take proper measures for redressing the wrong complained of; and he shall, as soon as possible, transmit to the Department of War a true statement of such complaint, with the proceedings had thereon. (A. W. 121.)

486. Articles of War—When Effective. Section 3 of the Act of Congress entitled "An Act making appropriations for the support of the Army for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916 (39 Stat., 650-670), amends section 1342, Revised Statutes of the United States, and contains the Articles of War. It is provided by section 4 of the act

cited that the Articles of War will be in force and effect on and after March 1, 1917, except that articles 4, 13, 14, 15, 29, 47, 49, and 92 became effective upon the approval of the act, August 29, 1916.

SECTION II. TRANSITORY PROVISION.

487. Prior Offenses Subject to Previous Laws. It is provided by section 5 of the act of Congress entitled "An Act making appropriations for the support of the Army for the fiscal year ending June 30, 1917, and for other purposes," approved August 29, 1916 (39 Stat., 670), that all offenses committed and all penalties, forfeitures, fines, or liabilities incurred prior to the taking effect of that act under any law embraced in or modified, changed, or repealed by that act may be prosecuted, punished, and enforced in the same manner and with the same effect as if that act had not been passed.

APPENDIX I. THE ARTICLES OF WAR.

TABLE SHOWING NUMBERS OF OLD ARTICLES AND OF
CORRESPONDING NEW ARTICLES.

OLD AND NEW CODES.

| Old number. | New number. | Old number. | New number. | Old number. | New number. | Old number. | New number. |

¹Old articles 72, 73, 75, 81, 82, and 83 were replaced by the act of March 2, 1913 (37 Stat., 723), effective July 1, 1913.

[Note: Except as otherwise specified herein this code becomes effective on March 1, 1917.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

* * * * *

Sec. 3. That section thirteen hundred and forty-two of the Revised Statutes of the United States be, and the same is hereby, amended to read as follows:

"Sec. 1342. The articles included in this section shall be known as the Articles of War and shall at all times and in all places govern the armies of the United States.

"I. PRELIMINARY PROVISIONS.

"Article 1. Definitions. The following words when used in these articles shall be construed in the sense indicated in this Article, unless the context shows that a different sense is intended, namely:

"(a) The word 'officer' shall be construed to refer to a commissioned officer;

"(b) The word 'soldier' shall be construed as including a noncommissioned officer, a private, or any other enlisted man;

"(c) The word 'company' shall be understood as including a troop or battery; and

"(d) The word 'battalion' shall be understood as including a squadron.

"Art. 2. Persons Subject to Military Law. The following persons are subject to these articles and shall be understood as included in the term 'any person subject to military law,' or 'persons subject to military law,' whenever used in these articles: Provided, That nothing contained in this Act, except as specifically provided in Article two, subparagraph (c), shall be construed to apply to any person under the United States naval jurisdiction, unless otherwise specifically provided by law.

"(a) All officers and soldiers belonging to the Regular Army of the United States; all volunteers, from the dates of their muster or acceptance into the military service of the United States; and all other persons lawfully called, drafted or ordered into, or to duty or for training in, the said service, from the dates they are required by the terms of the call, draft or order to obey the same;

"(b) Cadets;

"(c) Officers and soldiers of the Marine Corps when detached for service with the armies of the United States by order of the President: Provided, That an officer or soldier of the Marine Corps when so detached may be tried by military court-martial for an offense committed against the laws for the government of the naval service prior to his detachment, and for an offense committed against these articles he may be tried by a naval court-martial after such detachment ceases;

"(d) All retainers to the camp and all persons accompanying or serving with the armies of the United States without the territorial jurisdiction of the United States, and in time of war all such retainers and persons accompanying or serving with the armies of the United States in the field, both within and without the territorial jurisdiction of the United States, though not otherwise subject to these articles;

"(e) All persons under sentence adjudged by courts-martial;

"(f) All persons admitted into the Regular Army Soldiers' Home at Washington, District of Columbia.

"II. COURTS-MARTIAL.

"Art. 3. Courts-martial Classified. Courts-martial shall be of three kinds, namely:

"First, general courts-martial;

"Second, special courts-martial; and

"Third, summary courts-martial.

"A. COMPOSITION.

"Art. 4. Who May Serve on Courts-martial. All officers in the military service of the United States, and officers of the Marine Corps when detached for service with the Army by order of the President, shall be competent to serve on courts-martial for the trial of any persons who may lawfully be brought before such courts for trial.

[Note: This article became effective on August 29, 1916.]

"Art. 5. General Courts-martial. General courts-martial may consist of any number of officers from five to thirteen, inclusive; but they shall not consist of less than thirteen, when that number can be convened without manifest injury to the service.

"Art. 6. Special Courts-martial. Special courts-martial may consist of any number of officers from three to five, inclusive.

"Art. 7. Summary Courts-martial. A summary court-martial shall consist of one officer.

"B. BY WHOM APPOINTED.

"Art. 8. General Courts-martial. The President of the United States, the commanding officer of a territorial division or department, the Superintendent of the Military Academy, the commanding officer of an army, an army corps, a division, or a separate brigade, and, when empowered by the President, the commanding officer of any district or of any force or body of troops may appoint general courts-martial; but when any such commander is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior competent authority, and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

"Art. 9. Special Courts-martial. The commanding officer of a district, garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a brigade, regiment, detached battalion, or other detached command may appoint special courts-martial; but when any such commanding officer is the accuser or the prosecutor of the person or persons to be tried, the court shall be appointed by superior authority, and may in any case be appointed by superior authority when by the latter deemed desirable; and no officer shall be eligible to sit as a member of such court when he is the accuser or a witness for the prosecution.

"Art. 10. Summary Courts-martial. The commanding officer of a garrison, fort, camp, or other place where troops are on duty, and the commanding officer of a regiment, detached battalion, detached company, or other detachment may appoint summary courts-martial; but such summary courts-martial may in any case be appointed by superior authority when by the latter deemed desirable: Provided, That when but one officer is present with a command he shall be the summary court-martial of that command and shall hear and determine cases brought before him.

"Art. 11. Appointment of Judge Advocates. For each general or special court-martial the authority appointing the court shall appoint a judge advocate, and for each general court-martial one or more assistant judge advocates when necessary.

"C. JURISDICTION.

"Art. 12. General Courts-martial. General courts-martial shall have power to try any person subject to military law for any crime or offense made punishable by these articles and any other person who by the law of war is subject to trial by military tribunals: Provided, That no officer shall be brought

to trial before a general court-martial appointed by the Superintendent of the Military Academy.

"Art. 13. Special Courts-martial. Special courts-martial shall have power to try any person subject to military law, except an officer, for any crime or offense not capital made punishable by these articles: Provided, That the President may, by regulations, which he may modify from time to time, except from the jurisdiction of special courts-martial any class or classes of persons subject to military law.

"Special courts-martial shall not have power to adjudge dishonorable discharge, nor confinement in excess of six months, nor to adjudge forfeiture of more than six months' pay.

[Note: This article became effective on August 29, 1916.]

"Art. 14. Summary Courts-martial. Summary courts-martial shall have power to try any person subject to military law, except an officer, a cadet, or a soldier holding the privileges of a certificate of eligibility to promotion, for any crime or offense not capital made punishable by these articles: Provided, That noncommissioned officers shall not, if they object thereto, be brought to trial before a summary court-martial without the authority of the officer competent to bring them to trial before a general court-martial: Provided further, That the President may, by regulations, which he may modify from time to time, except from the jurisdiction of summary courts-martial any class or classes of persons subject to military law.

"Summary courts-martial shall not have power to adjudge confinement in excess of three months, nor to adjudge the forfeiture of more than three months' pay: Provided, That when the summary court officer is also the commanding officer no sentence of such summary court-martial adjudging confinement at hard labor or forfeiture of pay, or both, for a period in excess of one month shall be carried into execution until the same shall have been approved by superior authority.

[Note: This article became effective on August 29, 1916.]

"Art. 15. Not Exclusive. The provisions of these articles conferring jurisdiction upon courts-martial shall not be construed as depriving military commissions, provost courts, or other military tribunals of concurrent jurisdiction in respect of offenders or offenses that by the law of war may be lawfully triable by such military commissions, provost courts, or other military tribunals.

[Note: This article became effective on August 29, 1916.]

"Art. 16. Officers; How Triable. Officers shall be triable only by general courts-martial, and in no case shall an officer, when it can be avoided, be tried by officers inferior to him in rank.

"D. PROCEDURE.

"Art. 17. Judge Advocate to Prosecute. The judge advocate of a general or special court-martial shall prosecute in the name of the United States, and shall, under the direction of the court, prepare the record of its proceedings. The accused shall have the right to be represented before the court by counsel of his own selection for his defense, if such counsel be reasonably available, but should he, for any reason, be unrepresented by counsel, the judge advocate shall from time to time throughout the proceedings advise the accused of his legal rights.

"Art. 18. Challenges. Members of a general or special court-martial may be challenged by the accused, but only for cause stated to the court. The court shall determine the relevancy and validity thereof, and shall not receive a challenge to more than one member at a time.

"Art. 19. Oaths. The judge advocate of a general or special court-martial shall administer to the members of the court, before they proceed upon any trial, the following oath or affirmation: 'You, A. B., do swear (or affirm) that you will well and truly try and determine, according to the evidence, the matter now before you, between the United States of America and the person to be tried, and that you will duly administer justice, without partiality, favor, or affection, according to the provisions of the rules and articles for the government of the armies of the United States, and if any doubt should arise, not explained by said articles, then according to your conscience, the best of your understanding, and the custom of war in like cases; and you do further swear (or affirm) that you will not divulge the findings or sentence of the court until they shall be published by the proper authority, except to the judge advocate and assistant judge advocate; neither will you disclose or discover the vote or opinion of any particular member of the court-martial, unless required to give evidence thereof as a witness by a court of justice in due course of law. So help you God.'

"When the oath or affirmation has been administered to the members of a general or special court-martial, the president of the court shall administer to the judge advocate and to each assistant judge advocate, if any, an oath or affirmation in the following form: 'You, A. B., do swear (or affirm) that you will not divulge the findings or sentence of the court to any but the proper authority until they shall be duly disclosed by the same. So help you God.'

"All persons who give evidence before a court-martial shall be examined on oath or affirmation in the following form: 'You swear (or affirm) that the evidence you shall give in the case now in hearing shall be the truth, the whole truth, and nothing but the truth. So help you God.'

"Every reporter of the proceedings of a court-martial shall, before entering upon his duties, make oath or affirmation in the following form: 'You swear (or affirm) that you will faithfully perform the duties of reporter to this court. So help you God.'

"Every interpreter in the trial of any case before a court-martial shall, before entering upon his duties, make oath or affirmation in the following form: 'You swear (or affirm) that you will truly interpret in the case now in hearing. So help you God.'

"In case of affirmation the closing sentence of adjuration will be omitted.

"Art. 20. Continuances. A court-martial may, for reasonable cause, grant a continuance to either party for such time and as often as may appear to be just.

"Art. 21. Refusal to Plead. When the accused, arraigned before a court-martial, from obstinacy and deliberate design stands mute or answers foreign to the purpose, the court may proceed to trial and judgment as if he had pleaded not guilty.

"Art. 22. Process to Obtain Witnesses. Every judge advocate of a general or special court-martial and every summary court-martial shall have power to issue the like process to compel witnesses to appear and testify which courts of the United States, having criminal jurisdiction, may lawfully issue; but such process shall run to any part of the United States, its Territories, and possessions.

"Art. 23. Refusal to Appear or Testify. Every person not subject to military law who, being duly subpoenaed to appear as a witness before any military court, commission, court of inquiry, or board, or before any officer, military or civil, designated to take a deposition to be read in evidence before such court, commission, court of inquiry, or board, willfully neglects or refuses to appear, or refuses to qualify as a witness, or to testify, or produce documentary evidence which such person may have been legally subpoenaed to produce,

shall be deemed guilty of a misdemeanor, for which such person shall be punished on information in the district court of the United States or in a court of original criminal jurisdiction in any of the territorial possessions of the United States, jurisdiction being hereby conferred upon such courts for such purpose; and it shall be the duty of the United States district attorney or the officer prosecuting for the Government in any such court of original criminal jurisdiction, on the certification of the facts to him by the military court, commission, court of inquiry, or board, to file an information against and prosecute the person so offending, and the punishment of such person, on conviction, shall be a fine of not more than \$500 or imprisonment not to exceed six months, or both, at the discretion of the court: Provided, That the fees of such witness and his mileage, at the rates allowed to witnesses attending the courts of the United States, shall be duly paid or tendered said witness, such amounts to be paid out of the appropriation for the compensation of witnesses.

"Art. 24. Compulsory Self-incrimination Prohibited. No witness before a military court, commission, court of inquiry, or board, or before any officer, military or civil, designated to take a deposition to be read in evidence before a military court, commission, court of inquiry, or board, shall be compelled to incriminate himself or to answer any questions which may tend to incriminate or degrade him.

"Art. 25. Depositions—When Admissible. A duly authenticated deposition taken upon reasonable notice to the opposite party may be read in evidence before any military court or commission in any case not capital, or in any proceeding before a court of inquiry or a military board, if such deposition be taken when the witness resides, is found, or is about to go beyond the State, Territory, or District in which the court, commission, or board is ordered to sit, or beyond the distance of one hundred miles from the place of trial or hearing, or when it appears to the satisfaction of the court, commission, board, or appointing authority that the witness, by reason of age, sickness, bodily infirmity, imprisonment, or other reasonable cause, is unable to appear and testify in person at the place of trial or hearing: Provided, That testimony by deposition may be adduced for the defense in capital cases.

"Art. 26. Depositions—Before Whom Taken. Depositions to be read in evidence before military courts, commissions, courts of inquiry, or military boards, or for other use in military administration, may be taken before and authenticated by any officer, military or civil, authorized by the laws of the United States or by the laws of the place where the deposition is taken to administer oaths.

"Art. 27. Courts of Inquiry—Records of When Admissible. The record of the proceedings of a court of inquiry may be read in evidence before any court-martial or military commission in any case not capital nor extending to the dismissal of an officer, and may also be read in evidence in any proceeding before a court of inquiry or a military board: Provided, That such evidence may be adduced by the defense in capital cases or cases extending to the dismissal of an officer.

"Art. 28. Resignation Without Acceptance Does Not Release Officer. Any officer who, having tendered his resignation and prior to due notice of the acceptance of the same, quits his post or proper duties without leave and with intent to absent himself permanently therefrom shall be deemed a deserter.

"Art. 29. Enlistment Without Discharge. Any soldier who, without having first received a regular discharge, again enlists in the Army, or in the militia when in the service of the United States, or in the Navy or Marine Corps of the United States, or in any foreign army, shall be deemed to have deserted the

service of the United States; and, where the enlistment is in one of the forces of the United States mentioned above, to have fraudulently enlisted therein.

[Note: This article became effective on August 29, 1916.]

"Art. 30. Closed Sessions. Whenever a general or special court-martial shall sit in closed session, the judge advocate and the assistant judge advocate, if any, shall withdraw; and when their legal advice or their assistance in referring to the recorded evidence is required, it shall be obtained in open court and in the presence of the accused and of his counsel if there be any.

"Art. 31. Order of Voting. Members of a general or special court-martial, in giving their votes, shall begin with the junior in rank.

"Art. 32. Contempts. A court-martial may punish at discretion, subject to the limitations contained in article fourteen, any person who uses any menacing words, signs, or gestures in its presence, or who disturbs its proceedings by any riot or disorder.

"Art. 33. Records—General Courts-martial. Each general court-martial shall keep a separate record of its proceedings in the trial of each case brought before it, and such record shall be authenticated by the signature of the president and the judge advocate; but in case the record can not be authenticated by the judge advocate, by reason of his death, disability, or absence, it shall be signed by the president and an assistant judge advocate, if any; and if there be no assistant judge advocate, or in case of his death, disability, or absence, then by the president and one other member of the court.

"Art. 34. Records—Special and Summary Courts-martial. Each special court-martial and each summary court-martial shall keep a record of its proceedings, separate for each case, which record shall contain such matter and be authenticated in such manner as may be required by regulations which the President may from time to time prescribe.

"Art. 35. Disposition of Records—General Courts-martial. The judge advocate of each general court-martial shall, with such expedition as circumstances may permit, forward to the appointing authority or to his successor in command the original record of the proceedings of such court in the trial of each case. All records of such proceedings shall, after having been finally acted upon, be transmitted to the Judge Advocate General of the Army.

"Art. 36. Disposition of Records—Special and Summary Courts-martial. After having been acted upon by the officer appointing the court, or by the officer commanding for the time being, the record of each trial by special court-martial and a report of each trial by summary court-martial shall be transmitted to such general headquarters as the President may designate in regulations, there to be filed in the office of the judge advocate. When no longer of use, records of special and summary courts-martial may be destroyed.

"Art. 37. Irregularities—Effect of. The proceedings of a court-martial shall not be held invalid, nor the findings or sentence disapproved, in any case on the ground of improper admission or rejection of evidence or for any error as to any matter of pleading or procedure unless in the opinion of the reviewing or confirming authority, after an examination of the entire proceedings, it shall appear that the error complained of has injuriously affected the substantial rights of an accused: Provided, That the act or omission upon which the accused has been tried constitutes an offense denounced and made punishable by one or more of these articles: Provided, further, That the omission of the words 'hard labor' in any sentence of a court-martial adjudging imprisonment or confinement shall not be construed as depriving the authorities executing such sentence of imprisonment or confinement of the power to require hard labor as a part of the punishment in any case where it is authorized by the Executive order prescribing maximum punishments.

"Art. 38. President May Prescribe Rules. The President may by regula-

tions, which he may modify from time to time, prescribe the procedure, including modes of proof, in cases before courts-martial, courts of inquiry, military commissions, and other military tribunals: Provided, That nothing contrary to or inconsistent with these articles shall be so prescribed: Provided further, That all rules made in pursuance of this article shall be laid before the Congress annually.

"E. LIMITATIONS UPON PROSECUTIONS.

"Art. 39. As to Time. Except for desertion committed in time of war, or for mutiny or murder, no person subject to military law shall be liable to be tried or punished by a court-martial for any crime or offense committed more than two years before the arraignment of such person: Provided, That for desertion in time of peace or for any crime or offense punishable under articles ninety-three and ninety-four of this code the period of limitations upon trial and punishment by court-martial shall be three years: Provided further, That the period of any absence of the accused from the jurisdiction of the United States, and also any period during which by reason of some manifest impediment the accused shall not have been amenable to military justice, shall be excluded in computing the aforesaid periods of limitation: And provided further, That this article shall not have the effect to authorize the trial or punishment for any crime or offense barred by the provisions of existing law.

"Art. 40. As to Number. No person shall be tried a second time for the same offense.

"F. PUNISHMENTS.

"Art. 41. Certain Kinds Prohibited. Punishment by flogging, or by branding, marking, or tattooing on the body is prohibited.

"Art. 42. Places of Confinement—When Lawful. Except for desertion in time of war, repeated desertion in time of peace, and mutiny, no person shall under the sentence of a court-martial be punished by confinement in a penitentiary unless an act or omission of which he is convicted is recognized as an offense of a civil nature by some statute of the United States, or at the common law as the same exists in the District of Columbia, or by way of commutation of a death sentence, and unless, also, the period of confinement authorized and adjudged by such court-martial is one year or more: Provided, That when a sentence of confinement is adjudged by a court-martial upon conviction of two or more acts or omissions any one of which is punishable under these articles by confinement in a penitentiary, the entire sentence of confinement may be executed in a penitentiary: Provided further, That penitentiary confinement hereby authorized may be served in any penitentiary directly or indirectly under the jurisdiction of the United States: Provided further, That persons sentenced to dishonorable discharge and to confinement not in a penitentiary shall be confined in the United States Disciplinary Barracks or elsewhere as the Secretary of War or the reviewing authority may direct, but not in a penitentiary.

"Art. 43. Death Sentence—When Lawful. No person shall, by general court-martial, be convicted of an offense for which the death penalty is made mandatory by law, nor sentenced to suffer death, except by the concurrence of two-thirds of the members of said court-martial and for an offense in these articles expressly made punishable by death. All other convictions and sentences, whether by general or special court-martial, may be determined by a majority of the members present.

"Art. 44. Cowardice; Fraud—Accessory Penalty. When an officer is dismissed from the service for cowardice or fraud, the crime, punishment, name, and place of abode of the delinquent shall be published in the newspapers in

and about the camp and in the State from which the offender came or where he usually resides; and after such publication it shall be scandalous for an officer to associate with him.

"Art. 45. Maximum Limits. Whenever the punishment for a crime or offense made punishable by these articles is left to the discretion of the court-martial, the punishment shall not, in time of peace, exceed such limit or limits as the President may from time to time prescribe.

"G. ACTION BY APPOINTING OR SUPERIOR AUTHORITY.

"Art. 46. Approval and Execution of Sentence. No sentence of a court-martial shall be carried into execution until the same shall have been approved by the officer appointing the court or by the officer commanding for the time being.

"Art. 47. Powers Incident to Power to Approve. The power to approve the sentence of a court-martial shall be held to include:

"(a) The power to approve or disapprove a finding and to approve only so much of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to approve, the evidence of record requires a finding of only the lesser degree of guilt; and

"(b) The power to approve or disapprove the whole or any part of the sentence.

[Note: This article became effective on August 29, 1916.]

"Art. 48. Confirmation—When Required. In addition to the approval required by article forty-six, confirmation by the President is required in the following cases before the sentence of a court-martial is carried into execution, namely:

"(a) Any sentence respecting a general officer;

"(b) Any sentence extending to the dismissal of an officer, except that in time of war a sentence extending to the dismissal of an officer below the grade of brigadier general may be carried into execution upon confirmation by the commanding general of the Army in the field or by the commanding general of the territorial department or division;

"(c) Any sentence extending to the suspension or dismissal of a cadet; and

"(d) Any sentence of death, except in the cases of persons convicted in time of war of murder, rape, mutiny, desertion, or as spies; and in such excepted cases a sentence of death may be carried into execution upon confirmation by the commanding general of the Army in the field or by the commanding general of the territorial department or division.

"When the authority competent to confirm the sentence has already acted as the approving authority no additional confirmation by him is necessary.

"Art. 49. Powers Incident to Power to Confirm. The power to confirm the sentence of a court-martial shall be held to include:

"(a) The power to confirm or disapprove a finding, and to confirm so much only of a finding of guilty of a particular offense as involves a finding of guilty of a lesser included offense when, in the opinion of the authority having power to confirm, the evidence of record requires a finding of only the lesser degree of guilt; and

"(b) The power to confirm or disapprove the whole or any part of the sentence.

[Note: This article became effective on August 29, 1916.]

"Art. 50. Mitigation or Remission of Sentences. The power to order the execution of the sentence adjudged by a court-martial shall be held to include, inter alia, the power to mitigate or remit the whole or any part of the sentence,

but no sentence of dismissal of an officer and no sentence of death shall be mitigated or remitted by any authority inferior to the President.

"Any unexecuted portion of a sentence adjudged by a court-martial may be mitigated or remitted by the military authority competent to appoint, for the command, exclusive of penitentiaries and the United States Disciplinary Barracks, in which the person under sentence is held, a court of the kind that imposed the sentence, and the same power may be exercised by superior military authority; but no sentence extending to the dismissal of an officer or loss of files, no sentence of death, and no sentence approved or confirmed by the President shall be remitted or mitigated by any other authority.

"The power of remission and mitigation shall extend to all uncollected forfeitures adjudged by sentence of a court-martial.

"Art. 51. Suspension of Sentences of Dismissal or Death. The authority competent to order the execution of a sentence of dismissal of an officer or a sentence of death may suspend such sentence until the pleasure of the President be known, and in case of such suspension a copy of the order of suspension, together with a copy of the record of trial, shall immediately be transmitted to the President.

"Art. 52. Suspension of Sentences of Dishonorable Discharge. The authority competent to order the execution of a sentence, including dishonorable discharge, may suspend the execution of the dishonorable discharge until the soldier's release from confinement; but the order of suspension may be vacated at any time and the execution of the dishonorable discharge directed by the officer having general court-martial jurisdiction over the command, exclusive of penitentiaries and the United States Disciplinary Barracks, in which the soldier is held or by the Secretary of War.

"Art. 53. Suspension of Sentences of Forfeiture or Confinement. The authority competent to order the execution of a sentence adjudged by a court-martial may, if the sentence involve neither dismissal nor dishonorable discharge, suspend the execution of the sentence in so far as it relates to the forfeiture of pay or to confinement, or to both; and the person under sentence may be restored to duty during the suspension of confinement. At any time within one year after the date of the order of suspension such order may, for sufficient cause, be vacated and the execution of the sentence directed by the military authority competent to order the execution of like sentences in the command, exclusive of penitentiaries and the United States Disciplinary Barracks, to which the person under sentence belongs or in which he may be found; but if the order of suspension be not vacated within one year after the date thereof the suspended sentence shall be held to have been remitted.

"III. PUNITIVE ARTICLES.

"A. ENLISTMENT; MUSTER; RETURNS.

"Art. 54. Fraudulent Enlistment. Any person who shall procure himself to be enlisted in the military service of the United States by means of willful misrepresentation or concealment as to his qualifications for enlistment, and shall receive pay or allowances under such enlistment, shall be punished as a court-martial may direct.

"Art. 55. Officer Making Unlawful Enlistment. Any officer who knowingly enlists or musters into the military service any person whose enlistment or muster in is prohibited by law, regulations, or orders shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

"Art. 56. Muster Rolls—False Muster. At every muster of a regiment, troop, battery, or company the commanding officer thereof shall give to the mustering officer certificates, signed by himself, stating how long absent officers

have been absent and the reasons of their absence. And the commanding officer of every troop, battery, or company shall give like certificates, stating how long absent noncommissioned officers and private soldiers have been absent and the reasons of their absence. Such reasons and time of absence shall be inserted in the muster rolls opposite the names of the respective absent officers and soldiers, and the certificates, together with the muster rolls, shall be transmitted by the mustering officer to the Department of War as speedily as the distance of the place and muster will admit. Any officer who knowingly makes a false muster of man or animal, or who signs or directs or allows the signing of any muster roll knowing the same to contain a false muster or false statement as to the absence or pay of an officer or soldier, or who wrongfully takes money or other consideration on mustering in a regiment, company, or other organization, or on signing muster rolls, or who knowingly musters as an officer or soldier a person who is not such officer or soldier, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

"Art. 57. False Returns—Omission to Render Returns. Every officer commanding a regiment, an independent troop, battery, or company, or a garrison, shall, in the beginning of every month, transmit through the proper channels, to the Department of War, an exact return of the same, specifying the names of the officers then absent from their posts, with the reasons for and the time of their absence. Every officer whose duty it is to render to the War Department or other superior authority a return of the state of the troops under his command, or of the arms, ammunitions, clothing, funds, or other property thereunto belonging, who knowingly makes a false return thereof shall be dismissed from the service and suffer such other punishment as a court-martial may direct. And any officer who, through neglect or design, omits to render such return shall be punished as a court-martial may direct.

"B. DESERTION; DESERTING; ABSENCE WITHOUT LEAVE.

"Art. 58. Desertion. Any person subject to military law who deserts or attempts to desert the service of the United States shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

"Art. 59. Advising or Aiding Another to Desert. Any person subject to military law who advises or persuades or knowingly assists another to desert the service of the United States shall, if the offense be committed in time of war, suffer death, or such other punishment as a court-martial may direct, and, if the offense be committed at any other time, any punishment, excepting death, that a court-martial may direct.

"Art. 60. Entertaining a Deserter. Any officer who, after having discovered that a soldier in his command is a deserter from the military or naval service or from the Marine Corps, retains such deserter in his command without informing superior authority or the commander of the organization to which the deserter belongs, shall be punished as a court-martial may direct.

"Art. 61. Absence Without Leave. Any person subject to military law who fails to repair at the fixed time to the properly appointed place of duty, or goes from the same without proper leave, or absents himself from his command, guard, quarters, station, or camp without proper leave, shall be punished as a court-martial may direct.

"C. DISRESPECT; INSUBORDINATION; MUTINY.

"Art. 62. Disrespect Toward the President, Vice President, Congress, Secretary of War, Governors, Legislatures. Any officer who uses contemptuous or disrespectful words against the President, Vice President, the Congress of

the United States, the Secretary of War, or the governor or legislature of any State, Territory, or other possession of the United States in which he is quartered shall be dismissed from the service or suffer such other punishment as a court-martial may direct. Any other person subject to military law who so offends shall be punished as a court-martial may direct.

"Art. 63. Disrespect Toward Superior Officer. Any person subject to military law who behaves himself with disrespect toward his superior officer shall be punished as a court-martial may direct.

"Art. 64. Assaulting or Willfully Disobeying Superior Officer. Any person subject to military law who, on any pretense whatsoever, strikes his superior officer or draws or lifts up any weapon or offers any violence against him, being in the execution of his office, or willfully disobeys any lawful command of his superior officer, shall suffer death or such other punishment as a court-martial may direct.

"Art. 65. Insubordinate Conduct Toward Noncommissioned Officer. Any soldier who strikes or assaults, or who attempts or threatens to strike or assault, or willfully disobeys the lawful order of a noncommissioned officer while in the execution of his office, or uses threatening or insulting language, or behaves in an insubordinate or disrespectful manner toward a noncommissioned officer while in the execution of his office, shall be punished as a court-martial may direct.

"Art. 66. Mutiny or Sedition. Any person subject to military law who attempts to create or who begins, excites, causes, or joins in any mutiny or sedition in any company, party, post, camp, detachment, guard, or other command shall suffer death or such other punishment as a court-martial may direct.

"Art. 67. Failure to Suppress Mutiny or Sedition. Any officer or soldier who, being present at any mutiny or sedition, does not use his utmost endeavor to suppress the same, or knowing or having reason to believe that a mutiny or sedition is to take place, does not without delay give information thereof to his commanding officer shall suffer death or such other punishment as a court-martial may direct.

"Art. 68. Quarrels; Frays; Disorders. All officers and noncommissioned officers have power to part and quell all quarrels, frays, and disorders among persons subject to military law and to order officers who take part in the same into arrest, and other persons subject to military law who take part in the same into arrest or confinement, as circumstances may require, until their proper superior officer is acquainted therewith. And whosoever, being so ordered, refuses to obey such officer or noncommissioned officer or draws a weapon upon or otherwise threatens or does violence to him shall be punished as a court-martial may direct.

"D. ARREST; CONFINEMENT.

"Art. 69. Arrest or Confinement of Accused Persons. An officer charged with crime or with a serious offense under these articles shall be placed in arrest by the commanding officer, and in exceptional cases an officer so charged may be placed in confinement by the same authority. A soldier charged with crime or with a serious offense under these articles shall be placed in confinement, and when charged with a minor offense he may be placed in arrest. Any other person subject to military law charged with crime or with a serious offense under these articles shall be placed in confinement or in arrest, as circumstances may require; and when charged with a minor offense such person may be placed in arrest. Any person placed in arrest under the provisions of this article shall thereby be restricted to his barracks, quarters, or tent, unless such limits shall be enlarged by proper authority. Any officer

who breaks his arrest or who escapes from confinement before he is set at liberty by proper authority shall be dismissed from the service or suffer such other punishment as a court-martial may direct; and any other person subject to military law who escapes from confinement or who breaks his arrest before he is set at liberty by proper authority shall be punished as a court-martial may direct.

"Art. 70. Investigation of and Action Upon Charges. No person put in arrest shall be continued in confinement more than eight days, or until such time as a court-martial can be assembled. When any person is put in arrest for the purpose of trial, except at remote military posts or stations, the officer by whose order he is arrested shall see that a copy of the charges on which he is to be tried is served upon him within eight days after his arrest, and that he is brought to trial within ten days thereafter, unless the necessities of the service prevent such trial; and then he shall be brought to trial within thirty days after the expiration of said ten days. If a copy of the charges be not served, or the arrested person be not brought to trial, as herein required, the arrest shall cease. But persons released from arrest, under the provisions of this article, may be tried, whenever the exigencies of the service shall permit, within twelve months after such release from arrest: Provided, That in time of peace no person shall, against his objections, be brought to trial before a general court-martial within a period of five days subsequent to the service of charges upon him.

"Art. 71. Refusal to Receive and Keep Prisoners. No provost marshal or commander of a guard shall refuse to receive or keep any prisoner committed to his charge by an officer belonging to the forces of the United States, provided the officer committing shall, at the time, deliver an account in writing, signed by himself, of the crime or offense charged against the prisoner. Any officer or soldier so refusing shall be punished as a court-martial may direct.

"Art. 72. Report of Prisoners Received. Every commander of a guard to whose charge a prisoner is committed shall, within twenty-four hours after such confinement, or as soon as he is relieved from his guard, report in writing to the commanding officer the name of such prisoner, the offense charged against him, and the name of the officer committing him; and if he fails to make such report he shall be punished as a court-martial may direct.

"Art. 73. Releasing Prisoner Without Proper Authority. Any person subject to military law who, without proper authority, releases any prisoner duly committed to his charge, or who through neglect or design suffers any prisoner so committed to escape, shall be punished as a court-martial may direct.

"Art. 74. Delivery of Offenders to Civil Authorities. When any person subject to military law, except one who is held by the military authorities to answer, or who is awaiting trial or result of trial, or who is undergoing sentence for a crime or offense punishable under these articles, is accused of a crime or offense committed within the geographical limits of the States of the Union and the District of Columbia, and punishable by the laws of the land, the commanding officer is required, except in time of war, upon application duly made, to use his utmost endeavor to deliver over such accused person to the civil authorities, or to aid the officers of justice in apprehending and securing him, in order that he may be brought to trial. Any commanding officer who upon such application refuses or willfully neglects, except in time of war, to deliver over such accused person to the civil authorities or to aid the officers of justice in apprehending and securing him shall be dismissed from the service or suffer such other punishment as a court-martial may direct.

"When, under the provisions of this article, delivery is made to the civil authorities of an offender undergoing sentence of a court-martial, such delivery,

if followed by conviction, shall be held to interrupt the execution of the sentence of the court-martial, and the offender shall be returned to military custody, after having answered to the civil authorities for his offense, for the completion of the said court-martial sentence.

"E. WAR OFFENSES.

"Art. 75. Misbehavior Before the Enemy. Any officer or soldier who misbehaves himself before the enemy, runs away, or shamefully abandons or delivers up any fort, post, camp, guard, or other command which it is his duty to defend, or speaks words inducing others to do the like, or casts away his arms or ammunition, or quits his post or colors to plunder or pillage, or by any means whatsoever occasions false alarms in camp, garrison, or quarters, shall suffer death or such other punishment as a court-martial may direct.

"Art. 76. Subordinates Compelling Commander to Surrender. If any commander of any garrison, fort, post, camp, guard, or other command is compelled, by the officers or soldiers under his command, to give it up to the enemy or to abandon it, the officers or soldiers so offending shall suffer death or such other punishment as a court-martial may direct.

"Art. 77. Improper Use of Countersign. Any person subject to military law who makes known the parole or countersign to any person not entitled to receive it according to the rules and discipline of war, or gives a parole or countersign different from that which he receives, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct.

"Art. 78. Forcing a Safeguard. Any person subject to military law who, in time of war, forces a safeguard shall suffer death or such other punishment as a court-martial may direct.

"Art. 79. Captured Property to be Secured for Public Service. All public property taken from the enemy is the property of the United States and shall be secured for the service of the United States, and any person subject to military law who neglects to secure such property or is guilty of wrongful appropriation thereof shall be punished as a court-martial may direct.

"Art. 80. Dealing in Captured or Abandoned Property. Any person subject to military law who buys, sells, trades, or in any way deals in or disposes of captured or abandoned property, whereby he shall receive or expect any profit, benefit, or advantage to himself or to any other person directly or indirectly connected with himself, or who fails whenever such property comes into his possession or custody or within his control to give notice thereof to the proper authority and to turn over such property to the proper authority without delay, shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial, military commission, or other military tribunal may adjudge, or by any or all of said penalties.

"Art. 81. Relieving, Corresponding With, or Aiding the Enemy. Whosoever relieves the enemy with arms, ammunition, supplies, money, or other thing, or knowingly harbors or protects or holds correspondence with or gives intelligence to the enemy, either directly or indirectly, shall suffer death, or such other punishment as a court-martial or military commission may direct.

"Art. 82. Spies. Any person who in time of war shall be found lurking or acting as a spy in or about any of the fortifications, posts, quarters, or encampments of any of the armies of the United States, or elsewhere, shall be tried by a general court-martial or by a military commission, and shall, on conviction thereof, suffer death.

"F. MISCELLANEOUS CRIMES AND OFFENSES.

"Art. 83. Military Property—Willful or Negligent Loss, Damage, or Wrongful Disposition. Any person subject to military law who willfully, or through neglect, suffers to be lost, spoiled, damaged, or wrongfully disposed of, any

military property belonging to the United States shall make good the loss or damage and suffer such punishment as a court-martial may direct.

"Art. 84. Waste or Unlawful Disposition of Military Property Issued to Soldiers. Any soldier who sells or wrongfully disposes of or willfully or through neglect injures or loses any horse, arms, ammunition, accouterments, equipment, clothing, or other property issued for use in the military service, shall be punished as a court-martial may direct.

"Art. 85. Drunk on Duty. Any officer who is found drunk on duty shall, if the offense be committed in time of war, be dismissed from the service and suffer such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall be punished as a court-martial may direct. Any person subject to military law, except an officer, who is found drunk on duty shall be punished as a court-martial may direct.

"Art. 86. Misbehavior of Sentinel. Any sentinel who is found drunk or sleeping upon his post, or who leaves it before he is regularly relieved, shall, if the offense be committed in time of war, suffer death or such other punishment as a court-martial may direct; and if the offense be committed in time of peace, he shall suffer any punishment, except death, that a court-martial may direct.

"Art. 87. Personal Interest in Sale of Provisions. Any officer commanding in any garrison, fort, barracks, camp, or other place where troops of the United States may be serving who, for his private advantage, lays any duty or imposition upon or is interested in the sale of any victuals or other necessities of life brought into such garrison, fort, barracks, camp, or other place for the use of the troops, shall be dismissed from the service and suffer such other punishment as a court-martial may direct.

"Art. 88. Intimidation of Persons Bringing Provisions. Any person subject to military law who abuses, intimidates, does violence to, or wrongfully interferes with any person bringing provisions, supplies, or other necessities to the camp, garrison or quarters of the forces of the United States shall suffer such punishment as a court-martial may direct.

"Art. 89. Good Order to be Maintained and Wrongs Redressed. All persons subject to military law are to behave themselves orderly in quarters, garrison, camp, and on the march; and any person subject to military law who commits any waste or spoil, or willfully destroys any property whatsoever (unless by order of his commanding officer), or commits any kind of depredation or riot, shall be punished as a court-martial may direct. Any commanding officer who, upon complaint made to him, refuses or omits to see reparation made to the party injured, in so far as the offender's pay shall go toward such reparation, as provided for in article one hundred and five, shall be dismissed from the service, or otherwise punished, as a court-martial may direct.

"Art. 90. Provoking Speeches or Gestures. No person subject to military law shall use any reproachful or provoking speeches or gestures to another; and any person subject to military law who offends against the provisions of this article shall be punished as a court-martial may direct.

"Art. 91. Dueling. Any person subject to military law who fights or promotes or is concerned in or connives at fighting a duel, or who having knowledge of a challenge sent or about to be sent fails to report the fact promptly to the proper authority shall, if an officer, be dismissed from the service or suffer such other punishment as a court-martial may direct; and if any other person subject to military law, shall suffer such punishment as a court-martial may direct.

"Art. 92. Murder—Rape. Any person subject to military law who commits

murder or rape shall suffer death or imprisonment for life, as a court-martial may direct; but no person shall be tried by court-martial for murder or rape committed within the geographical limits of the States of the Union and the District of Columbia in time of peace.

[Note: This article became effective on August 29, 1916.]

"Art. 93. Various Crimes. Any person subject to military law who commits manslaughter, mayhem, arson, burglary, robbery, larceny, embezzlement, perjury, assault with intent to commit any felony, or assault with intent to do bodily harm, shall be punished as a court-martial may direct.

"Art. 94. Frauds Against the Government. Any person subject to military law who makes or causes to be made any claim against the United States or any officer thereof, knowing such claim to be false or fraudulent; or

"Who presents or causes to be presented to any person in the civil or military service thereof, for approval or payment, any claim against the United States, or any officer thereof, knowing such claim to be false or fraudulent; or

"Who enters into any agreement or conspiracy to defraud the United States by obtaining, or aiding others to obtain, the allowance or payment of any false or fraudulent claim; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or against any officer thereof, makes or uses, or procures, or advises the making or use of, any writing or other paper knowing the same to contain any false or fraudulent statements; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, makes, or procures, or advises the making of, any oath to any fact or to any writing or other paper knowing such oath to be false; or

"Who, for the purpose of obtaining, or aiding others to obtain, the approval, allowance, or payment of any claim against the United States or any officer thereof, forges or counterfeits, or procures, or advises the forging or counterfeiting of any signature upon any writing or other paper, or uses, or procures, or advises the use of any such signature, knowing the same to be forged or counterfeited; or

"Who, having charge, possession, custody, or control of any money or other property of the United States, furnished or intended for the military service thereof, knowingly delivers, or causes to be delivered, to any person having authority to receive the same, any amount thereof less than that for which he receives a certificate or receipt; or

"Who, being authorized to make or deliver any paper certifying the receipt of any property of the United States furnished or intended for the military service thereof, makes or delivers to any person such writing, without having full knowledge of the truth of the statements therein contained and with intent to defraud the United States; or

"Who steals, embezzles, knowingly and willfully misappropriates, applies to his own use or benefit, or wrongfully or knowingly sells or disposes of any ordnance, arms, equipments, ammunition, clothing, subsistence stores, money, or other property of the United States furnished or intended for the military service thereof; or

"Who knowingly purchases or receives in pledge for any obligation or indebtedness from any soldier, officer, or other person who is a part of or employed in said forces or service, any ordnance, arms, equipment, ammunition, clothing, subsistence stores, or other property of the United States. such soldier, officer, or other person not having lawful right to sell or pledge the same;

" Shall, on conviction thereof, be punished by fine or imprisonment, or by such other punishment as a court-martial may adjudge, or by any or all of said penalties. And if any person, being guilty of any of the offenses aforesaid while in the military service of the United States, receives his discharge or is dismissed from the service, he shall continue to be liable to be arrested and held for trial and sentence by a court-martial in the same manner and to the same extent as if he had not received such discharge nor been dismissed.

"Art. 95. Conduct Unbecoming an Officer and Gentleman. Any officer or cadet who is convicted of conduct unbecoming an officer and a gentleman shall be dismissed from the service.

"Art. 96. General Article. Though not mentioned in these articles, all disorders and neglects to the prejudice of good order and military discipline, all conduct of a nature to bring discredit upon the military service, and all crimes or offenses not capital, of which persons subject to military law may be guilty, shall be taken cognizance of by a general or special or summary court-martial, according to the nature and degree of the offense, and punished at the discretion of such court.

" IV. COURTS OF INQUIRY.

"Art. 97. When and by Whom Ordered. A court of inquiry to examine into the nature of any transaction of or accusation or imputation against any officer or soldier may be ordered by the President or by any commanding officer; but a court of inquiry shall not be ordered by any commanding officer except upon the request of the officer or soldier whose conduct is to be inquired into.

"Art. 98. Composition. A court of inquiry shall consist of three or more officers. For each court of inquiry the authority appointing the court shall appoint a recorder.

"Art. 99. Challenges. Members of a court of inquiry may be challenged by the party whose conduct is to be inquired into, but only for cause stated to the court. The court shall determine the relevancy and validity of any challenge, and shall not receive a challenge to more than one member at a time. The party whose conduct is being inquired into shall have the right to be represented before the court by counsel of his own selection, if such counsel be reasonably available.

"Art. 100. Oath of Members and Recorders. The recorder of a court of inquiry shall administer to the members the following oath: 'You, A. B., do swear (or affirm) that you will well and truly examine and inquire, according to the evidence, into the matter now before you, without partiality, favor, affection, prejudice, or hope of reward. So help you God.' After which the president of the court shall administer to the recorder the following oath: 'You, A. B., do swear (or affirm) that you will, according to your best abilities, accurately and impartially record the proceedings of the court and the evidence to be given in the case in hearing. So help you God.'

" In case of affirmation the closing sentence of adjuration will be omitted.

"Art. 101. Powers; Procedure. A court of inquiry and the recorder thereof shall have the same power to summon and examine witnesses as is given to courts-martial and the judge advocate thereof. Such witnesses shall take the same oath or affirmation that is taken by witnesses before courts-martial. A reporter or an interpreter for a court of inquiry shall, before entering upon his duties, take the oath or affirmation required of a reporter or an interpreter for a court-martial. The party whose conduct is being inquired into or his counsel, if any, shall be permitted to examine and cross-examine witnesses so as fully to investigate the circumstances in question.

"Art. 102. Opinion on Merits of Case. A court of inquiry shall not give an opinion on the merits of the case inquired into unless specially ordered to do so.

"Art. 103. Record of Proceedings—How Authenticated. Each court of inquiry shall keep a record of its proceedings, which shall be authenticated by the signature of the president and the recorder thereof, and be forwarded to the convening authority. In case the record can not be authenticated by the recorder, by reason of his death, disability, or absence, it shall be signed by the president and by one other member of the court.

"V. MISCELLANEOUS PROVISIONS.

"Art. 104. Disciplinary Powers of Commanding Officers. Under such regulations as the President may prescribe, and which he may from time to time revoke, alter, or add to, the commanding officer of any detachment, company, or higher command may, for minor offenses not denied by the accused, impose disciplinary punishments upon persons of his command without the intervention of a court-martial, unless the accused demands trial by court-martial.

"The disciplinary punishments authorized by this article may include admonition, reprimand, withholding of privileges, extra fatigue, and restriction to certain specified limits, but shall not include forfeiture of pay or confinement under guard. A person punished under authority of this article, who deems his punishment unjust or disproportionate to the offense, may, through the proper channel, appeal to the next superior authority, but may in the meantime be required to undergo the punishment adjudged. The commanding officer who imposes the punishment, his successor in command, and superior authority shall have power to mitigate or remit any unexecuted portion of the punishment. The imposition and enforcement of disciplinary punishment under authority of this article for any act or omission shall not be a bar to trial by court-martial for a crime or offense growing out of the same act or omission; but the fact that a disciplinary punishment has been enforced may be shown by the accused upon trial, and when so shown shall be considered in determining the measure of punishment to be adjudged in the event of a finding of guilty.

"Art. 105. Injuries to Person or Property—Redress of. Whenever complaint is made to any commanding officer that damage has been done to the property of any person or that his property has been wrongfully taken by persons subject to military law, such complaint shall be investigated by a board consisting of any number of officers from one to three, which board shall be convened by the commanding officer and shall have, for the purpose of such investigation, power to summon witnesses and examine them upon oath or affirmation, to receive depositions or other documentary evidence, and to assess the damages sustained against the responsible parties. The assessment of damages made by such board shall be subject to the approval of the commanding officer, and in the amount approved by him shall be stopped against the pay of the offenders. And the order of such commanding officer directing stoppages herein authorized shall be conclusive on any disbursing officer for the payment by him to the injured parties of the stoppages so ordered.

"Where the offenders can not be ascertained, but the organization or detachment to which they belong is known, stoppages to the amount of damages inflicted may be made and assessed in such proportion as may be deemed just upon the individual members thereof who are shown to have been present with such organization or detachment at the time the damages complained of were inflicted as determined by the approved findings of the board.

"Art. 106. Arrest of Deserters by Civil Officials. It shall be lawful for any civil officer having authority under the laws of the United States, or of any State, Territory, District, or possession of the United States, to arrest offenders, summarily to arrest a deserter from the military service of the United States and deliver him into the custody of the military authorities of the United States.

"Art. 107. Soldiers to Make Good Time Lost. Every soldier who in an existing or subsequent enlistment deserts the service of the United States or without proper authority absents himself from his organization, station, or duty for more than one day, or who is confined for more than one day under sentence, or while awaiting trial and disposition of his case, if the trial results in conviction, or through the intemperate use of drugs or alcoholic liquor, or through disease or injury the result of his own misconduct, renders himself unable for more than one day to perform duty, shall be liable to serve, after his return to a full-duty status, for such period as shall, with the time he may have served prior to such desertion, unauthorized absence, confinement, or inability to perform duty, amount to the full term of that part of his enlistment period which he is required to serve with his organization before being furloughed to the Army reserve.

"Art. 108. Soldiers—Separation from the Service. No enlisted man, lawfully inducted into the military service of the United States, shall be discharged from said service without a certificate of discharge, signed by a field officer of the regiment or other organization to which the enlisted man belongs or by the commanding officer when no such field officer is present; and no enlisted man shall be discharged from said service before his term of service has expired, except by order of the President, the Secretary of War, the commanding officer of a department, or by sentence of a general court-martial.

"Art. 109. Oath of Enlistment. At the time of his enlistment every soldier shall take the following oath or affirmation: 'I, ———, do solemnly swear (or affirm) that I will bear true faith and allegiance to the United States of America; that I will serve them honestly and faithfully against all their enemies whomsoever; and that I will obey the orders of the President of the United States and the orders of the officers appointed over me, according to the Rules and Articles of War.' This oath or affirmation may be taken before any officer.

"Art. 110. Certain Articles to be Read and Explained. Articles one, two, and twenty-nine, fifty-four to ninety-six, inclusive, and one hundred and four to one hundred and nine, inclusive, shall be read and explained to every soldier at the time of his enlistment or muster in, or within six days thereafter, and shall be read and explained once every six months to the soldiers of every garrison, regiment, or company in the service of the United States.

"Art. 111. Copy of Record of Trial. Every person tried by a general court-martial shall, on demand therefor, made by himself or by any person in his behalf, be entitled to a copy of the record of the trial.

"Art. 112. Effects of Deceased Persons—Disposition of. In case of the death of any person subject to military law, the commanding officer of the place of command will permit the legal representative or widow of the deceased, if present, to take possession of all his effects then in camp or quarters, and if no legal representative or widow be present, the commanding officer shall direct a summary court to secure all such effects; and said summary court shall have authority to convert such effects into cash, by public or private sale, not earlier than thirty days after the death of the deceased, and to collect and receive any debts due decedent's estate by local debtors; and as soon as practicable after converting such effects into cash said summary court shall

deposit with the proper officer, to be designated in regulations, any cash belonging to decedent's estate, and shall transmit a receipt for such deposit, accompanied by any will or other papers of value belonging to the deceased, an inventory of the effects secured by said summary court, and a full account of his transactions to the War Department for transmission to the Auditor for the War Department for action as authorized by law in the settlement of the accounts of deceased officers or enlisted men of the Army; but if in the meantime the legal representative, or widow, shall present himself or herself to take possession of decedent's estate, the said summary court shall turn over to him or her all effects not sold and cash belonging to said estate, together with an inventory and account, and make to the War Department a full report of his transactions.

"The provisions of this article shall be applicable to inmates of the United States Soldiers' Home who die in any United States military hospital outside of the District of Columbia where sent from the home for treatment.

"Art. 113. Inquests. When at any post, fort, camp, or other place garrisoned by the military forces of the United States and under the exclusive jurisdiction of the United States, any person shall have been found dead under circumstances which appear to require investigation, the commanding officer will designate and direct a summary court-martial to investigate the circumstances attending the death; and, for this purpose, such summary court-martial shall have power to summon witnesses and examine them upon oath or affirmation. He shall promptly transmit to the post or other commander a report of his investigation and of his findings as to the cause of the death.

"Art. 114. Authority to Administer Oaths. Any judge advocate or acting judge advocate, the president of a general or special court-martial, any summary court-martial, the judge advocate or any assistant judge advocate of a general or special court-martial, the president or the recorder of a court of inquiry or of a military board, any officer designated to take a deposition, any officer detailed to conduct an investigation, and the adjutant of any command shall have power to administer oaths for the purposes of the administration of military justice and for other purposes of military administration; and in foreign places where the Army may be serving shall have the general powers of a notary public or of a consul of the United States in the administration of oaths, the execution and acknowledgment of legal instruments, the attestation of documents, and all other forms of notarial acts to be executed by persons subject to military law.

"Art. 115. Appointment of Reporters and Interpreters. Under such regulations as the Secretary of War may from time to time prescribe, the president of a court-martial or military commission, or a court of inquiry shall have power to appoint a reporter, who shall record the proceedings of and testimony taken before such court or commission and may set down the same, in the first instance, in shorthand. Under like regulations the president of a court-martial or military commission, or court of inquiry, or a summary court, may appoint an interpreter, who shall interpret for the court or commission.

"Art. 116. Powers of Assistant Judge Advocates. An assistant judge advocate of a general court-martial shall be competent to perform any duty devolved by law, regulation, or the custom of the service upon the judge advocate of the court.

"Art. 117. Removal of Civil Suits. When any civil or criminal prosecution is commenced in any court of a State against any officer, soldier, or other person in the military service of the United States on account of any act done under color of his office or status, or in respect to which he claims any right, title, or authority under any law of the United States respecting the military

forces thereof, or under the law of war, such suit or prosecution may at any time before the trial or final hearing thereof be removed for trial into the district court of the United States in the district where the same is pending in the manner prescribed in section thirty-three of the Act entitled 'An Act to codify, revise, and amend the laws relating to the judiciary,' approved March three, nineteen hundred and eleven, and the cause shall thereupon be entered on the docket of said district court and shall proceed therein as if the cause had been originally commenced in said district court and the same proceedings had been taken in such suit or prosecution in said district court as shall have been had therein in said State court prior to its removal, and said district court shall have full power to hear and determine said cause.

"Art. 118. Officers, Separation from Service. No officer shall be discharged or dismissed from the service except by order of the President or by sentence of a general court-martial; and in time of peace no officer shall be dismissed except in pursuance of the sentence of a court-martial or in mitigation thereof; but the President may at any time drop from the rolls of the Army any officer who has been absent from duty three months without leave or who has been absent in confinement in a prison or penitentiary for three months after final conviction by a court of competent jurisdiction.

"Art. 119. Rank and Precedence Among Regulars, Militia, and Volunteers. That in time of war or public danger, when two or more officers of the same grade are on duty in the same field, department, or command, or of organizations thereof, the President may assign the command of the forces of such field, department, or command, or of any organization thereof, without regard to seniority of rank in the same grade. In the absence of such assignment by the President, officers of the same grade shall rank and have precedence in the following order, without regard to date of rank or commission as between officers of different classes, namely: First, officers of the Regular Army and officers of the Marine Corps detached for service with the Army by order of the President; second, officers of forces drafted or called into the service of the United States; and, third, officers of the volunteer forces: Provided, That officers of the Regular Army holding commissions in forces drafted or called into the service of the United States or in the volunteer forces shall rank and have precedence under said commissions as if they were commissions in the Regular Army; the rank of officers of the Regular Army under commissions in the National Guard as such shall not, for the purposes of this article, be held to antedate the acceptance of such officers into the service of the United States under said commissions.

"Art. 120. Command When Different Corps or Commands Happen to Join. When different corps or commands of the military forces of the United States happen to join or do duty together the officer highest in rank of the line of the Regular Army, Marine Corps, forces drafted or called into the service of the United States, or Volunteers, there on duty, shall, subject to the provisions of the last preceding article, command the whole and give orders for what is needful in the service, unless otherwise directed by the President.

"Art. 121. Complaints of Wrongs. Any officer or soldier who believes himself wronged by his commanding officer, and, upon due application to such commander, is refused redress, may complain to the general commanding in the locality where the officer against whom the complaint is made is stationed. The general shall examine into said complaint and take proper measures for redressing the wrong complained of; and he shall, as soon as possible, transmit to the Department of War a true statement of such complaint, with the proceedings had thereon."

Sec. 4. The provisions of section three of this Act shall take effect and be

in force on and after the first day of March, nineteen hundred and seventeen: Provided, That articles four, thirteen, fourteen, fifteen, twenty-nine, forty-seven, forty-nine, and ninety-two shall take effect immediately upon the approval of this Act.

Sec. 5. That all offenses committed and all penalties, forfeitures, fines, or liabilities incurred prior to the taking effect of this Act, under any law embraced in or modified, changed, or repealed by this Act, may be prosecuted, punished, and enforced in the same manner and with the same effect as if this Act had not been passed.

Sec. 6. All laws and parts of laws in so far as they are inconsistent with this Act are hereby repealed.

Act of August 29, 1916 (39 Stat., 650-670).

APPENDIX 2.

SYSTEM OF COURTS-MARTIAL FOR NATIONAL GUARD NOT IN THE SERVICE OF THE UNITED STATES.

Sec. 102. Except in organizations in the service of the United States, courts-martial in the National Guard shall be of three kinds, namely, general courts-martial, special courts-martial, and summary courts-martial. They shall be constituted like, and have cognizance of the same subjects, and possess like powers, except as to punishments, as similar courts provided for by the laws and regulations governing the Army of the United States, and the proceedings of courts-martial of the National Guard shall follow the forms and modes of procedure prescribed for said similar courts.

Sec. 103. General courts-martial of the National Guard not in the service of the United States may be convened by orders of the President, or of the governors of the respective States and Territories, or by the commanding general of the National Guard of the District of Columbia, and such courts shall have the power to impose fines not exceeding \$200; to sentence to forfeiture of pay and allowances; to a reprimand; to dismissal or dishonorable discharge from the service; to reduction of noncommissioned officers to the ranks; or any two or more of such punishments may be combined in the sentences imposed by such courts.

Sec. 104. In the National Guard, not in the service of the United States, the commanding officer of each garrison, fort, post, camp, or other place, brigade, regiment, detached battalion, or other detached command, may appoint special courts-martial for his command; but such special courts-martial may in any case be appointed by superior authority when by the latter deemed desirable. Special courts-martial shall have power to try any person subject to military law, except a commissioned officer, for any crime or offense made punishable by the military laws of the United States, and such special courts-martial shall have the same powers of punishment as do general courts-martial, except that fines imposed by such courts shall not exceed \$100.

Sec. 105. In the National Guard, not in the service of the United States, the commanding officer of each garrison, fort, post, or other place, regiment or corps, detached battalion, company, or other detachment of the National Guard may appoint for such place or command a summary court to consist of one officer, who shall have power to administer oaths and to try the enlisted men of such place or command for breaches of discipline and violations of laws governing such organizations; and said court, when satisfied of the guilt of such soldier, may impose fines not exceeding \$25 for any single

offense; may sentence noncommissioned officers to reduction to the ranks; may sentence to forfeiture of pay and allowances. The proceedings of such court shall be informal, and the minutes thereof shall be the same as prescribed for summary courts of the Army of the United States.

Sec. 106. All courts-martial of the National Guard, not in the service of the United States, including summary courts, shall have power to sentence to confinement in lieu of fines authorized to be imposed: Provided, That such sentences of confinement shall not exceed one day for each dollar of fine authorized.

Sec. 107. No sentence of dismissal from the service or dishonorable discharge, imposed by a National Guard court-martial, not in the service of the United States, shall be executed until approved by the governor of the State or Territory concerned, or by the commanding general of the National Guard of the District of Columbia.

Sec. 108. In the National Guard, not in the service of the United States, presidents of courts-martial and summary court officers shall have power to issue warrants to arrest accused persons and to bring them before the court for trial whenever such persons shall have disobeyed an order in writing from the convening authority to appear before such court, a copy of the charge or charges having been delivered to the accused with such order, and to issue subpoenas and subpoenas duces tecum and to enforce by attachment attendance of witnesses and the production of books and papers, and to sentence for a refusal to be sworn or to answer as provided in actions before civil courts.

All processes and sentences of said courts shall be executed by such civil officers as may be prescribed by the laws of the several States and Territories, and in any State where no provision shall have been made for such action, and in the Territories and the District of Columbia, such processes and sentences shall be executed by a United States marshal or his duly appointed deputy, and it shall be the duty of any United States marshal to execute all such processes and sentences and make return thereof to the officer issuing or imposing the same. (Act of June 3, 1916, 39 Stat., 208, 209.)

INSTRUCTIONS.

(M. C. M., pars. 75, 76, 79, 306.)

1. Submission of Charges. All charges for trial by court-martial will be prepared in triplicate, using the prescribed charge sheet as a first sheet and using such additional sheets of ordinary paper as are required. They will be accompanied—

(a) Except when trial is to be had by summary court, by a brief statement of the substance of all material testimony expected from each material witness, both those for the prosecution and those for the defense, together with all available and necessary information as to any other actual or probable testimony or evidence in the case; and

(b) In the case of a soldier, by properly authenticated evidence of convictions, if any, of an offense or offenses committed by him during his current enlistment and within one year next preceding the date of the alleged commission by him of any offense set forth in the charges.

They will be forwarded by the officer preferring them to the officer immediately exercising summary court-martial jurisdiction over the command to which the accused belongs, and will by him and by each superior commander into whose hands they may come either be referred to a court-martial within his jurisdiction for trial, forwarded to the next superior authority exercising court-martial jurisdiction over the command to which the accused belongs or pertains, or otherwise disposed of as circumstances may appear to require.

2. Investigation of Charges. If the officer immediately exercising summary court-martial jurisdiction over the command to which the accused belongs or pertains decides to forward the charges to superior authority, he will, before so doing, either carefully investigate them himself or will cause an officer other than the officer preferring the charges carefully to investigate them and to report to him, orally or otherwise, the result of such investigation. The officer investigating the charges will afford to the accused an opportunity to make any statement, offer any evidence, or present any matter in extenuation that he may desire to have considered in connection with the accusations against him. If the accused desires to submit nothing, the indorsement will so state. In his indorsement forwarding the charges to superior authority he will include:

(a) The name of the officer who investigated the charges;

(b) The opinion of both such officer and himself as to whether the several charges can be sustained;

(c) The substance of such material statement, if any, as the accused may have voluntarily made in connection with the case during the investigation thereof;

(d) A summary of the extenuating circumstances, if any, connected with the case; and

(e) His recommendation of action to be taken.

3. Disposition of Copies of Charges. (a) When trial is had by summary court the charges will be completed as the record of trial, a copy thereof will be completed as a copy of the summary court record for the company or other commander, and the other copy will, with the least practicable delay after action has been taken on the sentence, be completed and transmitted as the required report of trial to the officer exercising general court-martial jurisdiction over the command, there to be filed in the office of the judge advocate for a period of two years, at the end of which time it may be destroyed; and

(b) When trial is to be had by special or general court-martial the charges and one copy thereof will be referred to the trial judge advocate, the copy to be furnished by him to the accused or his counsel, and the other copy will be used for record purposes in the office of the officer appointing the trial court, the top fold of the copy of the charge sheet, in case of trial by general court-martial, being detached at the proper time and forwarded with the record of trial to the Judge Advocate General of the Army.

4. Disposition of Evidence of Previous Convictions. (a) The evidence of a previous conviction referred to a summary court or to the judge advocate of a special court will, after trial, be returned by him to the appointing authority and will, after action by the latter on the case, be returned to the company or detachment to which it pertains;

(b) The evidence of a previous conviction referred to the judge advocate of a general court-martial will, if a company record, after trial be returned by him direct to the company or detachment to which it pertains, and a certified copy thereof will be attached to the record of trial.

[Note: This form supersedes the blank form for record of trial by summary court (Form No. 99, A. G. O.), the blank form for report of trial by summary court (Form No. 59, A. G. O.), and the blank form for statement of service (Form No. 15, A. G. O.).]

APPENDIX 4.

FORMS FOR CHARGES AND SPECIFICATIONS.

INSTRUCTIONS.

The forms for charges and specifications set forth below constitute a general guide for use in the drafting of charges and specifications under the several articles of war, not only for offenses specifically provided for in the forms but also for like offenses not specifically mentioned therein. In preparing charges the following general rules should be observed:

(a) When there is more than one charge the charges will be numbered, using the Roman numerals, viz., I, II, etc.

(b) When there is more than one specification under a charge the specifications under that charge will be numbered, using the Arabic numerals, viz., 1, 2, etc.

(c) The form provided for the charge will not in any case be abbreviated, added to, or deviated from.

(d) The several forms provided for specifications will be added to or deviated from when circumstances require such addition or deviation, and in charging minor offenses with a view to trial by summary court they may in proper cases be abbreviated.

(e) The words inclosed in parentheses or brackets, or both, in the forms for specifications may or may not be used, as circumstances require.

(f) The blanks inclosed in parentheses in the forms for specifications indicate that a proper substitute may be used.

(g) The name of the accused as entered in the specification should, except in a case in which the jurisdiction of the court over the person is not dependent upon his being a person subject to military law (e. g., see A. W., 81 and 82), be accompanied by such descriptive language as will show that he is a person subject to military law and therefore subject to the jurisdiction of the court, as "Pvt. John Doe, Company ———, ——— Infantry"; "Pvt. John Doe, ——— ——— United States Marine Corps, detached for service with the Army, by order of the President"; "John Doe, a retainer to the camp"; "John Doe, a person accompanying the Army of the United States without the territorial jurisdiction of the United States"; "John Doe, a person serving with the Army of the United States in the field"; "John Doe, a general prisoner"; "John Doe, a person under a sentence adjudged by a court-martial."

(h) The place and date of the commission of the alleged offense will ordinarily be stated in the body of the specification and not in a separate line at the end thereof.

(i) The words "officer preferring charge," or words of similar import, will not be used in connection with the signature of the officer who subscribes the charges.

SPECIMEN CHARGES.

[To be placed on charge sheet, Appendix 3.]

Charge I: Violation of the 54th Article of War.

Specification: In that Pvt. Richard Roe, Company A, Second Infantry, alias Pvt. John Doe, Company F, Twenty-ninth Infantry, did, without a discharge from said Company A, Second Infantry, procure himself to be enlisted in the military service of the United States at Fort Jay, N. Y., on the 24th day of July, 1917, under the name of John Doe, by willfully concealing from Capt. William White, Medical Corps, a recruiting officer, the fact of his prior enlistment in said Company A, Second Infantry, and has at Fort Jay, N. Y., since said date, received allowances under said enlistment.

Charge II: Violation of the 58th Article of War.

Specification: In that Pvt. Richard Roe, Company A, Second Infantry, alias Pvt. John Doe, Company F, Twenty-ninth Infantry, did, at Fort Jay, N. Y., on or about the 6th day of March, 1917, desert the service of the United States, and did remain absent in desertion until he was apprehended at Fort Jay, N. Y., on or about July 24, 1917.

Charge III: Violation of the 96th Article of War.

Specification 1: In that Pvt. Richard Roe, Company A, Second Infantry, alias Pvt. John Doe, Company F, Twenty-ninth Infantry, did, at Fort Jay, N. Y., on or about March 6, 1917, strike in the face with his fist Pvt. John W. Davis, Third Company, Fort Hamilton, then a sentinel in the execution of his duty.

Specification 2: In that Pvt. Richard Roe, Company A, Second Infantry, alias Pvt. John Doe, Company F, Twenty-ninth Infantry, having at Fort Jay, N. Y., on or about the 6th day of March, 1917, received a lawful order to halt from Pvt. John W. Davis, Third Company, Fort Hamilton, then a sentinel in the execution of his duty, did willfully disobey the same.

JOHN JONES,

Captain, C. A. C.

FORMS.

Charge: Violation of the 54th Article of War.

1. Specification: In that Pvt. —, Company —, — Infantry, alias Pvt. —, Company —, — Infantry, did, without a discharge from said — Infantry, procure himself to be enlisted in the military service of the United States, at —, on the — day of —, 19—, under the name of —, (by willfully and falsely representing to —, a recruiting officer, that he had never been enlisted in the service of the United States and) by willfully concealing from (—, a) (said) recruit officer (,) the fact of his prior enlistment in said — Infantry; and has, at — and since said date, received (pay) (allowances) (pay and allowances) under said enlistment.

2. Specification: In that — did procure himself to be enlisted in the military service of the United States, at —, on the — day of —, 19—, (by willfully and falsely representing to —, a recruiting officer, that he had never been discharged from the service of the United States and) by willfully concealing from (—, a) (said) recruiting officer the fact that (, under the name of —,) he had been discharged [(dishonorably from —, on —, pursuant to sentence of court-martial) (from —, on —, by reason of —)] [convicted of a felony, to wit, —] [—]; and has, at — and since said enlistment, received (pay) (allowance) (pay and allowances) thereunder.

3. Specification: In that — did procure himself to be enlisted in the military service of the United States, at —, on the — day of —, 19—, [by willfully and falsely representing to —, a recruiting officer, that he had never been imprisoned in any (jail) (reformatory) (penitentiary) and] by willfully concealing from (—, a) (said) recruiting officer (,) the fact that (, under the name of —,) he had been imprisoned in a (reformatory) (jail) (penitentiary) under a sentence of a civil court; and has, at — and since said enlistment, received (pay) (allowances) (pay and allowances) thereunder.

4. Specification: In that — did procure himself to be enlisted in the military service of the United States, at —, on the — day of —, 19—, (by willfully and falsely representing to —, a recruiting officer, that he was — years of age and) by willfully concealing from (—, a) (said) recruiting officer (,) the fact that he was then (under the age of eighteen years) (a married man) (—); and has, at — and since said enlistment, received (pay) (allowances) (pay and allowances) thereunder.

Charge: Violation of the 55th Article of War.

5. Specification: In that — did at —, on —, unlawfully (enlist) (muster) into the military service of the United States one —, who, as he, the said —, then well knew, was (a) (an) (insane) (intoxicated) (—) person (who had been convicted of a felony) (under the age of 16 years) (—).

Charge: Violation of the 56th Article of War.

6. Specification: In that — did, at —, on the — day of —, 19—, (sign) (allow — to sign) (direct — to sign) the muster roll of —, for the period — to —, 19—, he, the said —, then well knowing that the said muster roll contained the name of — as soldier and a member of said company and as present for duty therewith, and that the said — was (not a soldier) (not a member of said company) (not present

for duty) but (a civilian) (a member of company —) (wholly absent from military duty).

7. Specification: In that — did, at —, on the — day of —, 19—, (sign) (allow — to sign) (direct — to sign) the muster roll of —, for the period — to —, 19—, he, the said —, then well knowing that said muster roll contained a statement that —, a private of said —, was present and mustered, and that said statement was false in that said — was then absent without leave.

8. Specification: In that — did, at —, on the — day of —, 19—, falsely muster as (present) (—) —, when he well knew that said — was not (present) (—), but (absent with leave) (—).

9. Specification: In that — did, at —, on the — day of —, 19—, falsely muster as a — of Company —, — the Infantry, one —, who, as he, the said —, then well knew, was not a soldier, but (a civilian) (—).

10. Specification: In that — did, at —, on the — day of —, 19—, sign the muster roll of —, for the period — to —, 19—, knowing at the time that said muster roll contained a statement that — was (present) (—), and knowing at the time that said — was not (present) (—), but (absent with leave) (—).

11. Specification: In that — did, at —, on or about the — day of —, 19—, wrongfully take from — (the sum of \$—) (—), as a consideration to him —, for knowingly permitting the muster-in roll of — on the mustering in of that — to falsely show as (mustered in) (—), —, who, as he, the said —, then well knew, was (were) not (mustered in) (—).

12. Specification: In that — did, at —, on or about the — day of —, 19—, wrongfully take from — the sum of \$—, as a consideration to him —, for allowing the muster roll of —, for the period of — to —, 19—, to show — as (present and mustered) (—), when, as he, the said —, then well knew, he (they) was (were) not present and mustered as shown on said muster roll.

Charge: Violation of the 57th Article of War.

13. Specification: In that —, being in command of —, and it being his duty to render to the — a return of the state of (the troops under his command) (the — thereto belonging) for the period — to —, did, at —, on the — day of —, 19—, make a return of — for said period, which he then knew to be false in that it showed — as (absent with leave) (—), whereas the said — was, as he, the said —, then well knew, (absent without leave) (—).

14. Specification: In that —, being in command of —, and it being his duty to render to the — a return of the state of (the troops under his command) (the — thereto belonging) for the period — to —, did (on and after the — day of —, 19—) (from — until —), through (neglect) (design), omit to render such return.

Charge: Violation of the 58th Article of War.

15. Specification: In that — did, at —, on or about the — day of —, 19—, attempt to desert the service of the United States by seeking passage to — on the steamship —.

16. Specification: In that — did, at —, on or about the — day of —, 19—, in the (execution of a conspiracy to desert the service of the United States previously entered into with — and —) (presence of —, which the forces of which he was a member were then opposing) attempt to desert the service of the United States.

17. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, desert the service of the United States, and did remain absent in desertion until he (was apprehended) (surrendered himself) at ——— on or about the ——— day of ———, 19—.

18. Specification: In that ——— did, at ——— on or about the ——— day of ———, 19—, in the (execution of a conspiracy to desert the service of the United States previously entered into with ——— and ———) (presence of ———, which the forces of which the accused was a member were then opposing), desert the service of the United States and did remain absent in desertion until he (was apprehended) (surrendered himself) at ——— on or about the ——— day of ———, 19—.

19. Specification: In that ——— and ——— did, at ———, on or about the ——— day of ———, 19—, acting jointly, in pursuance of a common intent and in the execution of a conspiracy to desert the service of the United States previously entered into by them (and in the presence of ———, which the forces of which they were members were then opposing), desert the service of the United States and did remain absent in desertion until they (were apprehended) (surrendered themselves) at ——— on or about the ——— day of ———, 19—.

Charge: Violation of the 59th Article of War.

20. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, (advise) (persuade) ——— to desert the service of the United States by (saying to him ——— ——— ———, or words to that effect) (offering him a position as ——— at ———).

21. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, knowingly assist ——— to desert the service of the United States (by supplying him with a railroad ticket from ——— to ———) (———), he, the said ———, then well knowing that the said ——— intended to use the (railroad ticket) (———) so supplied him in furtherance of his plans to desert.

Charge: Violation of the 60th Article of War.

22. Specification: In that ———, having discovered that ———, a soldier in his command, was a deserter from the (military service) (naval service) (Marine Corps) did, at ———, from about the ——— day of ———, to about the ——— day of ———, 19—, retain said deserter in his command without informing superior authority or the commander of the organization to which the deserter belonged of the presence of said deserter in his command.

Charge: Violation of the 61st Article of War.

23. Specification: In that ———, did, at ———, without proper leave, absent himself from his ——— from about ———, 19—, to about ———, 19—.

24. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, fail to repair at the fixed time to the properly appointed place (of assembly) for ———.

25. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, without proper leave, go from the properly appointed place (of assembly) for ———, after having repaired thereto for the performance of said duty.

Charge: Violation of the 62d Article of War.

26. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, use (orally and publicly) (———) the following (contemptuous) (disrespectful) (contemptuous and disrespectful) words against the ——— of the (United States) (——— in which he was then quartered), to wit: ——— ——— ———, or words to that effect.

Charge: Violation of the 63d Article of War.

27. Specification: In that ——— did, at ———, on or about the ——— day

of —, 19—, behave himself with disrespect toward —, his superior officer, by (saying to him —, or words to that effect) (contemptuously turning from and leaving him while he was talking to him the said —) (—).

Charge: Violation of the 64th Article of War.

28. Specification: In that —, having received a lawful command from —, his superior officer, to —, did at —, on or about the — day of —, 19—, willfully disobey the same.

29. Specification: In that — did, at —, on or about the — day of —, 19—, willfully (draw) (lift up) a — against —, his superior officer, who was then in the execution of his office.

30. Specification: In that — did, at —, on or about the — day of —, 19—, willfully strike —, his superior officer, who was then in the execution of his office, (in) (on) the —, with (a) (his) —.

[Note: For assaults upon officers amounting to felonies see A. W. 93.]

Charge: Violation of the 65th Article of War.

31. Specification: In that —, having received a lawful order from —, who was then in the execution of his office, to —, did at —, on or about the — day of —, 19—, willfully disobey the same.

32. Specification: In that — did, at —, on or about the — day of —, 19—, (attempt) (threaten) to (strike) (—) — [(in) (on) the —] with (a) (his) —, while said — was in the execution of his office.

33. Specification: In that — did, at —, on or about the — day of —, 19—, behave in an (insubordinate) (disrespectful) (insubordinate and disrespectful) manner toward —, who was then in the execution of his office, by (saying to him —, or words to that effect) (—).

34. Specification: In that — did, at —, on or about the — day of —, 19—, willfully (strike) (assault) —, who was then in the execution of his office, by — him (in) (on) the — with (a) (his) —.

[Note: For assaults upon noncommissioned officers amounting to felonies see A. W. 93.]

Charge: Violation of the 66th Article of War.

35. Specification: In that — did, at —, on or about the — day of —, 19—, attempt to create a mutiny in — by urging the members of said — to refuse to obey the order of —, their (commanding) (superior) officer, to —.

36. Specification: In that — did, at —, on or about the — day of —, 19—, cause a mutiny in — by unlawfully assuming control over about — soldiers of said command, and in the execution of such control causing said soldiers to disregard and defy the lawful orders of —, their (commanding) (superior) officer, to (assemble for drill) (—).

37. Specification: In that — did, at —, on or about the — day of —, 19—, voluntarily join in a mutiny which had been begun in — against the authority of —, the commanding officer thereof, and did, in combination with sundry other members of said — assembled on the (parade ground) (—), refuse to (disperse) (do any further duty) (assemble for drill) (—).

Charge: Violation of the 67th Article of War.

38. Specification: In that —, being at — and knowing on the — day of —, 19—, that certain members of — proposed and intended to begin and join in a mutiny against the commanding officer of that —, at — o'clock (a.) (p.) m. on the following day, did fail (wholly) to give

information of said intended mutiny to his commanding officer (until the hour of — on the — day of —, 19—).

39. Specification: In that — did, at —, on or about the — day of —, 19—, join with other members of the — and sundry citizens in an attempt to break into a jail and release a prisoner, did assault and beat the police officers and other civil authorities, and did commit other disorders until overpowered and restrained by a detachment of — sent from the post of — and compelled to return to his quarters.

40. Specifications: In that —, being present at a mutiny among the soldiers of — against the authority of —, the commanding officer thereof, did fail to use his utmost endeavor to suppress the same, in that, having commanded the men of his own company to return to their quarters, he took no means to compel their obedience or reduce them to discipline upon their refusal to obey said command.

Charge: Violation of the 68th Article of War.

41. Specification: In that —, being engaged in a (quarrel) (fray) (disorder) and having been ordered into (arrest) (confinement) by —, did, at —, on or about the — day of —, 19—, [(refuse to obey) (draw a — upon) the said —] [threaten the said — by (saying to him —, or words to that effect) (—)].

Charge: Violation of the 69th Article of War.

42. Specification: In that —, having been placed in (arrest) (confinement) by his (commanding officer) (—) on account of being charged with a (crime) (offense), did at —, on or about the — day of —, 19—, (break his arrest) (escape from said confinement) before he was set at liberty by proper authority.

Charge: Violation of the 71st Article of War.

43. Specification: In that —, being on duty as — at — on or about the — day of —, 19—, did refuse to (receive) (keep) one —, a prisoner duly committed to his charge by —, who, at the time of committing said prisoner, delivered to the said — an account in writing, signed by himself, of the (crime) (offense) charged against said prisoner.

Charge: Violation of the 72d Article of War.

44. Specification: In that —, (having been) (being) on duty as commander of the guard at —, did, on or about the — day of —, 19—, fail to report in writing to the commanding officer of that — (as soon as relieved from his guard) (within 24 hours after the confinement of said prisoner) the name of —, a prisoner committed to his charge, the offense charged against him, and the name of the officer committing him.

Charge: Violation of the 73d Article of War.

45. Specification: In that — did, at —, on or about the — day of —, 19—, [without proper authority release] [through (design) (neglect) (suffer)] —, a prisoner duly committed to his charge to escape.

Charge: Violation of the 74th Article of War.

46. Specification: In that —, being at the time the commanding officer at —, and an application having been duly made to him by the — of — for the (delivery) (apprehension and securing) of —, a (soldier) (officer) under his command, who was accused of a (crime) (offense) committed against the laws of —, did, at —, on the — day of —, 19—, refuse to (deliver said — to said — of —) (aid the said — of — in apprehending and securing the said —).

Charge: Violation of the 75th Article of War.

47. Specification: In that — did, at —, on or about the — day of —, 19—, in disregard of his duty and shamefully (abandon) (deliver up

to the enemy) —, which (it was his duty) (he had been ordered by —, his proper superior officer), to defend.

48. Specification: In that —, while on duty before the enemy, did at —, on the — day of —, 19—, cast away his (rifle) (ammunition) (—).

49. Specification: In that —, being (present with) (in command of) his — while it was engaged with the enemy, did at —, on or about the — day of —, 19—, abandon the said — and (seek safety in the rear) (—), and did fail to rejoin it until (the engagement was concluded) (—).

50. Specification: In that — did, while on duty before the enemy, cause a false alarm in the (camp) (garrison) (quarters) (—) at —, on or about the — day of —, 19—, by needlessly and without authority causing the call to arms to be sounded.

51. Specification: In that — did, while on duty before the enemy, quit his (company) (post) (—), at —, on the — day of —, 19—, for the purpose of (pillaging) (plundering) (pillaging and plundering), and did commit plunder and pillage on the property of one —, a citizen, by forcibly entering the house of said —, against his will, and taking therefrom and appropriating money and effects of the said — of the value of \$—.

52. Specification: In that — did, at —, on or about the — day of —, 19—, run away from his (company) (—), which was then engaged with the enemy, and did not return thereto until (after the engagement had been concluded) (—).

53. Specification: In that —, being an (officer) (soldier) of a force charged with the duty of defending — against an enemy then before it, did at —, on or about the — day of —, 19—, (induce) (seek to (induce) (soldiers) (soldiers and officers) of that force to shamefully (abandon) (deliver up) to the enemy that —, which it was their duty to defend, by saying to said (soldiers) (soldiers and officers) —, or words to that effect.

54. Specification: In that — did, at —, on or about the — day of —, 19—, say to —, who was then, with his company, engaged with the enemy, —, or words to that effect, thereby (inducing) (seeking to induce) said — to [(run away from) (shamefully abandon) his (post)] (—).

55. Specification: In that — did, at —, on or about the — day of —, 19—, say to —, who was then on outpost duty before the enemy, —, or words to that effect, thereby (inducing) (seeking to induce) the said — to [(run away from) (abandon) his (post)] (—).

Charge: Violation of the 76th Article of War.

56. Specification: In that —, being an (officer) (soldier) under the command of —, commanding the (fort) (post) (camp) (guard) (—) of —, which was then threatened by the enemy, did at —, on or about the — day of —, 19—, in combination with other (officers) (soldiers) (officers and soldiers) of said command, by — compel said — to (surrender) (abandon) said (fort) (post) (camp) (guard) (—) of — to the enemy.

57. Specification: In that —, —, and —, being (officers) (soldiers) (officers and soldiers) under the command of —, who was then commanding the (fort) (post) (camp) (guard) (—) of —, which was then threatened by the enemy, did, at —, on or about the — day of —, 19—, acting jointly and in concert, refuse to perform further duty in defense of said (fort) (post) (camp) (guard) (—) of —, and thereby compel the said — to (abandon it) (give it up) to the enemy.

Charge: Violation of the 77th Article of War.

58. Specification: In that —, having received as the proper (countersign) (parole) the word —, did at —, on or about the — day of —, 19—, give to —, a person to whom he knew it was his duty to give the proper (countersign) (parole), the different word — as the proper (countersign) (parole).

59. Specification: In that — did, at —, on or about the — day of —, 19—, make known the (countersign) (parole), to wit, —, to —, known by him, —, to be a person not entitled to receive it.

Charge: Violation of the 78th Article of War.

60. Specification: In that — did, at —, on or about the — day of —, 19—, violate a safeguard, known by him to have been placed over the premises occupied by —, at —, by (overwhelming the guard posted for the protection of the same and violently entering said premises and committing waste and plunder therein) (—).

Charge: Violation of the 79th Article of War.

61. Specification: In that — did, at —, on or about the — day of —, 19—, wrongfully appropriate to (his own use) (—) the following public property taken from the enemy, viz.: — of the value of about \$— and — of the value of about \$—, and all of the total value of about \$—.

62. Specification: In that — did, at —, on or about the — day of —, 19—, neglect to secure for the service of the United States the following property which had been taken from the enemy, viz.: — of the value of about \$— and — of the value of about \$—, and all of the total value of about \$—.

Charge: Violation of the 80th Article of War.

63. Specification: In that — did, at —, on or about the — day of —, 19—, unlawfully (buy) (sell) (—) the following articles of (captured) (abandoned) property, namely: — of the value of about \$— and — of the value of about \$—, and all of the total value of about \$—, thereby [(accepting) (receiving) (accepting and receiving)] [(profit) (benefit) (advantage) (profit, benefit and advantage)] to (himself) [—, his (brother) (—)].

64. Specification: In that — did, at —, on or about the — day of —, 19—, fail to give notice to proper authority that the following (captured) (abandoned) property had come into his (possession) (custody) (control), namely: — of the value of about \$— and — of the value of about \$—, and all of the total value of about \$—.

65. Specification: In that — did, at —, on or about the — day of —, 19—, fail to turn over to the proper authority without delay the following (captured) (abandoned) property which had come into his (possession) (custody) (control), namely: — of the value of about \$— and — of the value of about \$—, and all of the total value of about \$—.

Charge: Violation of the 81st Article of War.

66. Specification: In that — did, at —, on or about the — day of —, 19—, inform a patrol of the enemy's forces of the whereabouts of a military patrol of the United States forces.

67. Specification: In that — did, at —, on or about the — day of —, 19—, knowingly (harbor) (protect) (harbor and protect) —, a person whom he, the said —, then knew to be a member of the enemy's forces, and who was then being sought by a patrol of the United States forces, by (concealing the said member of the enemy's forces in his house) (—).

68. Specification: In that — did, at —, on or about the — day

of —, 19—, directly (hold correspondence with) (give intelligence to) (hold correspondence with and give intelligence to) the enemy by writing and transmitting secretly through the lines to one —, whom he, the said —, then knew to be an (officer) (—) of the enemy's army, a communication (in words and figures as follows) (substantially as follows), to wit.

69. Specification: In that — did, at —, on or about the — day of —, 19—, furnish and deliver to certain members of the enemy's army —, of the value of about \$—, and —, of the value of about \$—, all of the total value of \$—, he then well knowing that the persons to whom said goods were furnished and delivered were enemies of the United States.

Charge: Violation of the 82d Article of War.

70. Specification: In that — did, at —, on or about the — day of —, 19—, (lurk) (act) (lurk and act) as a spy in and about —, the (fortification) (post) (quarters) (encampment) of the Army of the United States there situated, and did there (collect) (attempt to collect) material information in regard to the (numbers) (resources) (operations) (—) of the military forces of the United States, with intent to impart the same to the enemy.

Charge: Violation of the 83d Article of War.

71. Specification: In that — did, at —, on or about the — day of —, 19—, (through neglect) (willfully) suffer —, of the value of \$—, military property belonging to the United States, to be (lost) (spoiled by —) (damaged by —) [wrongfully disposed of by (sale to —) (—)].

Charge: Violation of the 84th Article of War.

72. Specification: In that — did, at —, on or about the — day of —, 19— [(through neglect) (willfully) injure by —] (lose) —, of the value of \$—, issued for use in the military service of the United States.

73. Specification: In that — did at —, on or about the — day of —, 19—, (unlawfully sell to —) (wrongfully dispose of by —) — of the value of \$—, issued for use in the military service of the United States.

Charge: Violation of the 85th Article of War.

74. Specification: In that — was, (in time of war), found drunk while on duty as —, at —, on or about the — day of —, 19—.

Charge: Violation of the 86th Article of War.

75. Specification: In that —, being on guard and posted as a sentinel (in time of war), at —, on or about the — day of —, 19—, was found sleeping on his post.

76. Specification: In that —, being on guard and posted as a sentinel (in time of war), at —, on or about the — day of —, 19—, left his post before he was regularly relieved.

Charge: Violation of the 87th Article of War.

77. Specification: In that —, who was then commanding —, did on or about the — day of —, 19—, become financially interested in the sale of —, brought into said — for the use of the troops thereat by —, by (receiving) (entering into an agreement to receive) from the said — (— per cent of the profits on said sales) (the sum of \$—) as a consideration for the privilege (of —) extended by him to said —.

78. Specification: In that —, who was then commanding —, did, on or about the — day of —, 19—, lay a (duty) (imposition) (duty and imposition) of (— per cent) (—) on the proceeds of all sales of — brought into said —, and did appropriate the moneys collected on account

of said (duty) (imposition) (duty and imposition) to (his own use and benefit) (——).

Charge: Violation of the 88th Article of War.

79. Specification: In that —— did, on or about the —— day of ——, 19——, do violence to ——, an inhabitant of the country, who was bringing (supplies) (provisions) (——) to the (camp) (garrison) (quarters) of the forces of the United States there situated, by striking and beating the said ——.

80. Specification: In that ——, and ——, acting jointly and in concert, did, on or about the —— day of ——, 19——, interfere with ——, an inhabitant of the country, who was bringing (provisions) (supplies) (——) to the (camp) (garrison) (quarters) of the forces of the United States there situated by preventing the said —— from passing over a road leading into said ——, (——).

81. Specification: In that —— did, on or about the —— day of ——, 19——, intimidate ——, an inhabitant of the country, who was bringing (provisions) (supplies) (——) into the (camp) (garrison) (quarters) of the forces of the United States there situated, by [threatening to kill the said —— if he continued to bring (provisions) (supplies) (——) into said (camp) (garrison) (quarters)] (——).

Charge: Violation of the 89th Article of War.

82. Specification: In that —— did at ——, on or about the —— day of ——, 19——, commit a depredation upon (an) (a) (orchard) (——) belonging to —— and situated near the said ——, by [entering the same against the will of the said —— and (removing growing fruit from trees, the property of ——) (——)].

83. Specification: In that —— and —— did at ——, on or about the —— day of ——, 19——, commit a riot in the public streets of said —— by (resisting and fighting against the peace officers of that ——) (——).

84. Specification: In that —— did at ——, on or about the —— day of ——, 19——, willfully destroy a growing crop of oats in a field belonging to —— by (permitting the horses of his troop to graze in said field) (——).

85. Specification: In that —— did at ——, on or about the —— day of ——, 19——, without the authority of his commanding officer (destroy a building belonging to ——) (——).

86. Specification: In that ——, who was then commanding ——, at ——, did, on the —— day of ——, 19——, complaint being made to him that ——, a —— of his command, had (damaged) (destroyed) (damaged and destroyed) (——) ——, the property of ——, refuse to see reparation made to the said —— so far as said ——'s pay would go toward such reparation and as provided for in the 105th Article of War.

Charge: Violation of the 90th Article of War.

87. Specification: In that —— did at ——, on or about the —— day of ——, 19——, use a (reproachful) (provoking) (reproachful and provoking) speech against ——, to wit: ——, or words to that effect, and did accompany said speech with a provoking gesture, to wit (shaking his closed fist in the face of the said ——) (——).

Charge: Violation of the 91st Article of War.

88. Specification: In that ——, being officer of the day at —— and having knowledge that —— and —— intended and were about to engage in a duel near that ——, did on or about the —— day of ——, 19——, connive at the fighting of said duel by knowingly permitting ——, one of the parties to said proposed duel, to leave the post and go toward the place appointed for said duel and at the time and at the hour which he, ——, then knew had been appointed therefor.

89. Specification: In that —, being officer of the day at —, and having knowledge on or about the — day of —, 19—, that a challenge to fight a duel had been sent by — to —, did fail to report the fact promptly to the proper authority.

90. Specification: In that — and — did at —, on or about the — day of —, 19—, fight a duel, using, as weapons therefor, (swords) (pistols) (—).

91. Specification: In that — did at —, on or about the — day of —, 19—, promote a duel between — and — by knowingly acting as a messenger for — and knowingly carrying from said — to said — a challenge to fight a duel.

Charge: Violation of the 92d Article of War.

92. Specification: In that — did, at —, on or about the — day of —, 19—, with malice aforethought, willfully, deliberately, feloniously, unlawfully, and with premeditation kill one —, a human being by (shooting him with a rifle) (—).

93. Specification: In that — did, at —, on or about the — day of —, 19—, forcibly and feloniously against her will, have carnal knowledge of —.

Charge: Violation of the 93d Article of War.

94. Specification: In that — did, at —, on or about the — day of —, 19—, willfully, maliciously, and feloniously burn the (dwelling house) (—) of —.

95. Specification: In that — did, at —, on or about the — day of —, 19—, with intent to (do him bodily harm), (commit a felony, viz., —) feloniously (strike) (—) (in) (on) the — with a —.

96. Specification: In that — did, at —, on or about the — day of —, 19—, in the nighttime break into and enter the (dwelling house) (—) of —, with intent to commit a felony, viz., —.

97. Specification: In that — did, at —, on or about the — day of —, 19—, fraudulently convert to his own use and benefit —, value about \$—, the property of —, intrusted to him (by the said —) (for — by —).

98. Specification: In that — did, at —, on or about the — day of —, 19—, feloniously take, steal, and carry away —, value about \$—, the property of —.

99. Specification: In that — did, at —, on or about the — day of —, 19—, willfully, feloniously, and unlawfully kill —, by — him (in) (on) the — with a —.

100. Specification: In that — did, at —, on or about the — day of —, 19—, unlawfully, willfully, and feloniously cut off the (hand) (arm) (—) of —. (For the offense of maiming, see Specification No. 173.)

101. Specification: In that — (having) (did, on the — day of —, 19—) in a (trial by court-martial of —) (deposition for use in a trial by court-martial of —) (—) (taken) (take) an oath, before a competent (tribunal) (officer) (person) that [he would (testify) (declare) (depose) (certify) truly] [a (declaration) (deposition) (certificate) (—) subscribed by him was true] [did at — on or about the — day of —, 19—, willfully and contrary to such oath, (state) (subscribe a statement) in substance that —] which (statement) (declaration) (deposition) (certificate) was a material matter and which statement he did not then believe to be true.

102. Specification: In that — did, at —, on or about the — day of —, 19—, by (force and violence) (putting him in fear) feloniously take from the (person) (presence) of —, —, value about \$—.

Charge: Violation of the 94th Article of War.

103. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, (make) (cause to be made by ———) a claim against the (United States) (Quartermaster at ———) (——) in the amount of \$——, for (private property alleged to have been (lost) (destroyed) in the military service) (——), which claim was (false) (fraudulent) (false and fraudulent) in that ——— and was then known by the said ——— to be (false) (fraudulent) (false and fraudulent).

104. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, (present) (cause to be presented by ———) for (approval) (payment) (approval and payment) a claim against the (United States) (Quartermaster at ———) (——) in the amount of \$——, for (services alleged to have been rendered to the United States by ———) (——), which claim was (false) (fraudulent) (false and fraudulent) in that ——— and was then known by the said ——— to be (false) (fraudulent) (false and fraudulent).

105. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, enter into an (agreement) (conspiracy) (agreement and conspiracy) with ———, to defraud the United States by (obtaining) (aiding ——— to obtain) the (allowance) (payment) (allowance and payment) of a (false) (fraudulent) (false and fraudulent) claim against the United States in the amount of \$——, for (supplies) (——) alleged to have been furnished to the United States by ———, which claim was (false) (fraudulent) (false and fraudulent) in that ——— and was then known by the said ——— to be (false) (fraudulent) (false and fraudulent).

106. Specification: In that ———, for the purpose of (obtaining) (aiding others to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at ———) (——), did, at ———, on or about the ——— day of ———, 19—, (make) (use) (make and use) a ———, which said ———, as he, ———, then knew contained a statement that ———, which statement was (false) (fraudulent) (false and fraudulent) in that ——— and was then known by the said ——— to be (false) (fraudulent) (false and fraudulent).

107. Specification: In that ———, for the purpose of (obtaining) (aiding others to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at ———) (——), did, at ———, on or about the ——— day of ———, 19—, (advise) (procure) (advise and procure) the (making) (use) (making and use) of a ——— by ———, which said ———, as he then knew, contained a statement that ———, which statement was (false) (fraudulent) (false and fraudulent) in that ———, and was then known by the said ——— to be (false) (fraudulent) (false and fraudulent).

108. Specification: In that ———, for the purpose of (obtaining) (aiding others to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at ———) (——), did, at ———, on or about the ——— day of ———, 19—, (make) (procure the making of) (advise the making of) (advise and procure the making of) an oath by ——— that ———, which said oath was false in that ———, and was then known by the said ——— to be false.

109. Specification: In that ———, for the purpose of (obtaining) (aiding others to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at ———) (——), did, at ———, on or about the ——— day of ———, 19—, (forge) (——) (forge and counterfeit) (the signature of ——— upon a ——— words and figure

110. Specification: In that —, for the purpose of (obtaining) (aiding — to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at —) (—), did, at —, on or about the — day of —, 19—, (advise) (procure) (advise and procure) the (forging) (counterfeiting) (forging and counterfeiting) by — of (the signature of — upon a —) (a —) in words and figures as follows: —.

111. Specification: In that —, for the purpose of (obtaining) (aiding others to obtain) the (approval) (allowance) (payment) (approval, allowance, and payment) of a claim against the (United States) (Quartermaster at —) (—), did, at —, on or about the — day of —, 19—, (use) (advise the use of) (procure the use of) a — in words and figures as follows: — (the same) (the signature thereon) being (forged) (counterfeited) (forged and counterfeited), and then known by the said — to be (forged) (counterfeited) (forged and counterfeited).

112. Specification: In that —, having (charge) (possession) (custody) (control) of (money) (—) of the United States, (furnished) (intended) (furnished and intended) for the military service thereof, did, at —, on or about the — day of —, 19—, knowingly (deliver) (cause to be delivered) to —, the said —, having authority to receive the same, (an) (a) (amount) (number) (quantity) which, as he, —, then knew was (— dollars — cents) (—) less than the (amount) (number) (quantity) for which he received a (certificate) (receipt), from the said —.

113. Specification: In that —, being authorized to (make) (deliver) (make and deliver) a paper certifying the receipt of property of the United States (furnished) (intended) (furnished and intended) for the military service thereof, did, at —, on or about the — day of —, 19—, (make) (deliver) (make and deliver) to — a writing in words and figures as follows: —, without having full knowledge of the truth of the statements therein contained and with the intent to defraud the United States.

114. Specification: In that — did, at —, on or about the — day of —, 19— (feloniously take, steal, and carry away) (embezzle) (knowingly and willfully misappropriate) (apply to his own use) (apply to his own benefit) (apply to his own use and benefit) (wrongfully sell) (knowingly and without proper authority sell) (wrongfully and knowingly sell), — of the value of about \$—, property of the United States (furnished) (intended) (furnished and intended) for the military service thereof.

115. Specification: In that — did, at —, on or about the — day of —, 19—, knowingly (purchase) (receive in pledge) from —, (in) (employed in) the military service of the United States for an (obligation) (indebtedness) —, of the value of about \$—, property of the United States, the said — not having the lawful right to (sell) (pledge) the same.

Charge: Violation of the 95th Article of War.

116. Specification: In that —, being indebted to various creditors in the sum of about \$— and being without either means or probable means with which to liquidate within a reasonable time said indebtedness, did, at —, on or about the — day of —, 19—, unnecessarily contract with — a further indebtedness of about \$—.

117. Specification: In that — was, at —, on or about the — day of —, 19—, so (drunk) (disorderly) (drunk and disorderly) while in uniform, in the presence and hearing of several persons, as to disgrace the military service.

118. Specification: In that —, having assigned to — his claim (against

the United States) for pay in full for the month of —, 19—, did, at —, on or about the — day of —, 19—, assign to — a second claim against the United States for pay in full for the said month of —, 19—, which second claim was by him known to be false and fraudulent.

119. Specification: In that —, being indebted to — in the sum of \$— for —, which amount became due and payable (on) (about) (on or about) —, did, at —, on or about the — day of —, 19—, without due cause fail and neglect to pay said debt, notwithstanding the fact that he had been repeatedly requested by the said — to pay the amount thereof, thereby bringing discredit upon the military service.

120. Specification: In that —, having on or about the — day of 19— become indebted to — in the sum of about \$— for —, and having failed without due cause to liquidate said indebtedness, and having on or about the — day of —, 19—, promised in writing to said — that he would on or about the — day of —, 19—, (settle such indebtedness in full) (pay on such indebtedness the sum of \$—), did, without due cause, at —, on or about the — day of 19—, to the disgrace of the military service, fail to keep said promise.

121. Specification: In that —, having made and executed in due form his voucher for pay as — for the month of —, 19—, and having duly assigned the said voucher to —, did at — on or about the — day of —, 19—, while the said voucher and the assignment thereof remained in force and effect, falsely certify with his official signature to the correctness of another voucher for pay for the said month of —, 19—, duly made, executed, and assigned to —, which said certificate was in words as follows: —.

122. Specification: In that — did, at —, on or about the — day of —, 19—, with intent to deceive —, officially (report) (state) to the said —, that —, which (report) (statement) was (known by the said — to be untrue) (believed by the said — to be untrue) (made by the said — with disregard of a knowledge of the facts) (made by the said — as true when he did not know it to be true) in that —.

123. Specification: In that —, with intent to defraud —, did, at —, on or about the — day of —, 19—, unlawfully pretend to — that —, well knowing that said pretenses were false, and by means thereof did fraudulently obtain from the said — (the sum of \$—) (merchandise of the value \$—) (—).

124. Specification: In that —, having at —, on or about the — day of —, 19—, voluntarily given his pledge in words and figures as follows: —, which pledge was accepted by his commanding officer —, did, at —, on or about the — day of —, 19—, in disregard of his honor violate said pledge by —.

Charge: Violation of the 96th Article of War.

125. Specification: In that —, being on guard as a —, did, at —, on or about the — day of —, 19—, abandon his guard.

[Note: This form will be used only in case where absence from guard is coupled with an intent not to return during the tour of duty. Ordinary absence from guard duty will be charged under A. W. 61.]

126. Specification: In that — did, at —, on or about the — day of —, 19—, [kick a public (horse) (—) in the belly] (—).

127. Specification: In that —, a (sentinel) (overseer) (—), being in charge of prisoners, did, at —, on or about the — day of —, 19—, allow —, a prisoner under his charge, to (go to) (enter) (go to and enter) an unauthorized place, to wit: —.

128. Specification: In that —, a (sentinel) (overseer) (—), being in charge of prisoners, did, at —, on or about the — day of —, 19—, allow —, a prisoner under his charge, to (hold unauthorized conversation with —) (loiter) (neglect his task by —) (obtain —) (—).

129. Specification: In that —, a (sentinel) (overseer) (—), being in charge of prisoners and having received a lawful order from —, to require a prisoner under his charge to —, did, at —, on or about the — day of —, 19—, fail to obey the same.

130. Specification: In that — did, at —, on or about the — day of —, 19—, without authority, appear in civilian clothing.

131. Specification: In that — did, at —, on or about the — day of —, 19—, appear (at) (on) — (without his —) (with his — not buttoned) (in an unclean —) (—).

132. Specification: In that — did, at —, on or about the — day of —, 19—, attempt to (strike) (—) — (in) (on) the — with —.

[Note: For assaults upon officers and noncommissioned officers amounting to felonies see A. W. 93.]

133. Specification: In that — did, at —, on or about the — day of —, 19—, (strike) (—) — (in) (on) the — with —.

[Note: See note under Specification 132.]

134. Specification: In that — did, at — (on or about the — day of —, 19—), (between — and —), with the intention of evading his (duty) (—) as a (soldier) (—), feign (illness), (disability), (insanity), (—).

135. Specification: In that — did, at —, on or about the — day of —, 19— (attempt to), (threaten to) (strike) (—) —, a sentinel in the execution of his duty, [(in) (on) the —] with —.

136. Specification: In that — did, at —, on or about the — day of —, 19—, strike (—) —, a sentinel in the execution of his duty, (in) (on) the — with —.

137. Specification: In that —, a prisoner in confinement serving sentence in the post guard house, (—), did, at —, on or about the — day of —, 19—, (escape) (attempt to escape) from such confinement.

138. Specification: In that —, a prisoner, did, at —, on or about the — day of —, 19—, use the following disrespectful language to —, a sentinel in the execution of his duty: “—,” or words to that effect.

139. Specification: In that —, having been restricted to the limits of —, did, at —, on or about the — day of —, 19—, break the same by going to —.

140. Specification: In that — did, at —, on or about the — day of —, 19—, unlawfully carry a concealed weapon, viz., a —.

141. Specification: In that —, did, at —, on or about the — day of —, 19—, (urinate) (defecate) (—) (on the floor of the squad room) (—).

142. Specification: In that — did, at —, on or about the — day of —, 19—, willfully and unlawfully [(conceal) (remove) (mutilate) (obliterate) (destroy)] [attempt to (conceal) (remove) (mutilate) (obliterate) (destroy)] [take and carry away with intent to (conceal) (remove) (mutilate) (obliterate) (destroy) (steal)] a public record, to wit: (the descriptive list of —) (—).

143. Specification: In that —, a prisoner in confinement in the post guard house, (—), did, at —, on or about the — day of —,

19—, conspire with ——— and ——— to escape from such confinement. (For joint charge see par. 69.)

144. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, willfully destroy ———, value about \$———, property of the United States.

145. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, through carelessness, discharge a (service rifle) (———) in his (squad room) (in his tent) (———).

146. Specification: In that ———, having received a lawful order from ———, a sentinel in the execution of his duty, to ———, did, at ———, on or about the ——— day of ———, 19—, (fail to obey) (willfully disobey) the same.

147. Specification: In that ——— was, at ———, on or about the ——— day of ———, 19—, (drunk) (disorderly) (drunk and disorderly) in (camp) (post) (quarters) (———).

148. Specification: In that ——— was, at ———, on or about the ——— day of ———, 19—, (drunk) (disorderly) (drunk and disorderly) in uniform and did thereby bring discredit upon the military service.

149. Specification: In that ———, a sentinel (———) in charge of prisoners, did, at ———, on or about the ——— day of ———, 19—, drink intoxicating liquor with ———, a prisoner under his charge.

150. Specification: In that ———, a prisoner, was, at ———, on or about the ——— day of ———, 19—, found drunk.

151. Specification: In that ———, having received a lawful order from ——— to ———, the said ——— being in the execution of his office, did, at ———, on or about the ——— day of ———, 19—, fail to obey the same.

152. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, violate (standing orders) (regulations) of ——— by ———.

153. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, wrongfully use ———, a narcotic drug.

154. Specification: In that ———, being indebted to ——— in the sum of \$———, which amount became due and payable (on) (about) ———, did, at ———, on or about the ——— day of ———, 19—, without due cause, fail and neglect to pay said debt, notwithstanding the fact that he had been repeatedly requested by the said ——— to pay the amount thereof, thereby bringing discredit upon the military service.

155. Specification: In that ———, having been directed to report for prophylactic treatment at (the post hospital) (———) did, at ———, on or about the ——— day of ———, 19—, fail to report as directed.

156. Specification: In that ——— did, at ———, on or about the ——— day of ———, 19—, with intent to deceive ———, officially (report) (state) to the said ———, that ———, which (report) (statement) was (known by the said ——— to be untrue) (believed by the said ——— to be untrue) (made by the said ——— with disregard of a knowledge of the facts) (made by the said ——— as true when he did not know it to be true) in that ———.

157. Specification: In that ———, (having) (did on the ——— day of ———, 19—,) in a (trial by court-martial of ———) (deposition for use in a trial by court-martial of ———) (———) (taken) (take) an oath, before a competent (tribunal) (officer) (person) that [(he would testify) (declare) (depose) (certify) (truly)] [a (declaration) (deposition) (certificate) (———) subscribed by him was true] did, at ———, on or about the ——— day of ———, 19—, willfully and contrary to such oath, (state) (subscribe a statement) in substance that ———, which (statement) (declaration) (deposition) (certificate) (———) he did not then believe to be true.

{Note: For charging perjury see Specification No. 101.]

158. Specification: In that — did, at —, on or about the — day of —, 19—, with intent to defraud, feloniously forge (in its entirety) [by (altering —) (erasing —) (adding —)] a certain (check) (—) in the following words and figures —.

159. Specification: In that (Sergeant) (Corporal) — did, at —, on or about the — day of —, 19—, gamble with Privates — and —.

160. Specification: In that — did, at —, on or about the — day of —, 19—, gamble in quarters, in violation of orders.

161. Specification: In that — did, at —, on or about the — day of —, 19—, while (at a barrack window) (—) indecently expose to public view his (—).

162. Specification: In that — (for and in behalf of one —) did, at —, on or about the — day of —, 19—, loan to — \$—, under an agreement whereby he, the said —, was to receive for the use of said money for — (months) (days) interest at the rate of — per cent per (annum) (month) (the sum of \$—), thereby (demanding) (receiving) (demanding and receiving) an usurious rate of interest for said loan.

163. Specification: In that —, while posted as a sentinel, did, at —, on or about the — day of —, 19—, loiter on his post.

164. Specification: In that —, with intent to defraud, did, at —, on or about the — day of —, 19—, unlawfully pretend to — that —, well knowing that said pretenses were false and by means thereof did fraudulently obtain from the said — (the sum of \$—) (merchandise of the value of \$—) (—).

165. Specification: In that —, while suffering (with) (from) —, did, at —, on or about the — day of —, 19—, refuse to submit to the (dental or medical treatment) (surgical operation) prescribed by —, the attending (dental) surgeon for the (disease) (injury), the said (treatment) (operation) consisting in —, being necessary and being without appreciable risk to his life.

166. Specification: In that — did, at —, on or about the — day of —, 19—, willfully maim himself in the — by (shooting himself with —) (—), thereby unfitting himself for the full performance of military service.

167. Specification: In that —, while posted as a sentinel, did, at —, on or about the — day of —, 19—, sit down on his post.

168. Specification: In that — did, at —, on or about the — day of —, 19—, commit sodomy upon the person of one —.

[Note: If the acts alleged do not amount to sodomy as defined in par. 443, the acts committed will be accurately described in the specification.]

169. Specification: In that — did, at —, on or about the — day of —, 19—, while accompanying his organization on (a practice march) (maneuvers) straggle.

170. Specification: In that — did, at —, on or about the — day of —, 19—, procure one — to commit perjury, by inducing him, —, to take an oath before a competent (tribunal) (officer) (person) in a (trial by court-martial of —) (deposition for use in a trial by court-martial of —) (—) that he, the said —, would (testify) (declare) (depose) (certify) truly [a (declaration) (deposition) (certificate) (—) subscribed by him was true], willfully and contrary to such oath, and, by testifying (stating, etc.) as follows: —, which testimony (declaration, etc.) was (material) (a material matter) and which he, —, did not then believe to be true.

171. Specification: In that — did, at —, on —, with intent to

defraud, feloniously utter to — as true a certain (written instrument) (—), in the following words and figures, “—,” the said — well knowing that the said (instrument) (—) was forged.

172. Specification: In that —, a prisoner on parole, did, at —, on or about the — day of —, 19—, break his parole by —.

173. Specification: In that — did, at —, on or about the — day of —, 19—, with intent to (maim) (disfigure) —, willfully and feloniously [(cut) (bite) (—) the (nose) (ear) (—) of] [(throw) (pour) corrosive acid (—) upon] the said —. (For mayhem, see Specification No. 100.)

APPENDIX 5.

SUGGESTIONS FOR TRIAL JUDGE ADVOCATES.

The judge advocate of a general or special court-martial shall prosecute in the name of the United States, and shall, under the direction of the court, prepare the record of its proceedings. (A. W. 17.)

The following notes, indicating more or less in proper sequence certain action usually proper to be taken by a trial judge advocate, may be found useful:

1. UPON RECEIPT BY AN OFFICER OF AN ORDER APPOINTING HIM JUDGE ADVOCATE OF A COURT-MARTIAL.

(a) Examine the order carefully and take appropriate action to cause the correction of any substantial irregularity therein.

(b) Examine and study such portions of the Manual for Courts-Martial, Digest of Opinions of the Judge Advocates General, Army Regulations, and War Department or other orders affecting courts-martial as may appear desirable. He should, in this connection, give particular attention to the duties of trial judge advocates, to the procedure of courts-martial, and to the matter of evidence.

2. UPON RECEIPT OF CHARGES IN A CASE.

(a) Prepare an envelope to contain the papers pertaining thereto.

(b) Examine the charges and all papers received to see that none appear to be missing, that the charges appear to be correctly drawn, that the evidence of previous convictions is complete and correct, especially as to dates, authentication, proper signatures, etc.

(c) Make authorized necessary changes in charges and take proper action in connection with defects, if any, found in evidence of previous convictions.

(d) Report to the appointing authority necessary or desirable changes which the judge advocate is not authorized to make.

(e) Furnish the accused, if he so desires, a copy of the charges; and, if he desires to state, ascertain from him how he intends to plead.

(f) Ascertain whether accused desires counsel; and if so, ascertain whether he wishes a particular person; and if so, whom.

(g) Arrange for counsel, if desired to do so.

(h) Prepare case for trial, investigating it thoroughly, and determining upon plan of prosecution.

- (i) Arrange with president date and time of meeting of court.
- (j) Arrange for court-martial room, see that it is in order, provided with necessary tables, chairs, stationery, and room to be heated, if necessary.
- (k) Notify all members of date and time of meeting and arrange for presence of other necessary persons, including the accused and his counsel, reporter, interpreter, if required, and witnesses.
- (l) Arrange to have at trial such books, etc., as may be required. The following are frequently found necessary or useful:
 - Manual for Courts-Martial.
 - Digest of Opinions, Judge Advocates General.
 - Standard Text on Military Law.
 - Ordnance Price List.
 - Clothing Price List.
- (m) Determine maximum punishment, if any, imposable upon conviction of each of the several offenses charged, and note same on slip for use of court in the event of a conviction.

3. UPON THE ASSEMBLING OF THE COURT.

- (a) Note officers present and absent.
- (b) When court appears to be ready to proceed, announce the readiness of the prosecution to proceed with trial of ———, who desires to introduce ——— as counsel, or does not desire to introduce counsel.
- (c) Swear reporter, if any.
- (d) If a general court-martial, ask accused if he desires a copy of the record of his trial. If he does not, do not have copy made; if he wishes copy, direct reporter to prepare one.
- (e) Read aloud to accused the order appointing the court and each modifying order.
- (f) Ask accused if he objects to being tried by any member present named in the order or orders.
- (g) After action on challenge, if any made, has been had, again ask the accused whether he objects as above. Continue this until accused has no further objection.
- (h) Swear members of court.
- (i) Be sworn by president.
- (j) Read charges and specifications aloud slowly to the accused, and, having done so, ask him how he pleads to the first specification, first charge—if necessary rereading to him the specification; then how he pleads to the second specification, first charge, etc.; then to the first charge, etc.
- (k) If there be a plea of guilty, the president makes to accused the required explanations and asks him the required questions.
- (l) Read to court from chapter on punitive articles the gist of each of the several offenses charged.
- (m) Introduce and swear witnesses for the prosecution. In some cases it may be desirable to acquaint the court with the particular specification with which the testimony of a particular witness is connected.
- (n) In all cases attempt to establish by evidence each of the several specifications, except such elements as may be the subjects of judicial notice or as are admitted.
- (o) Examine each witness, having careful regard for the rules of evidence.

- (p) Offer opportunity to cross-examine.
- (q) Re-examine, if desirable.
- (r) Ask court if there are any questions by the court.
- (s) If any witness is recalled, remind him that he is still under oath.
- (t) When the prosecution has nothing further to offer for the time, announce that the prosecution rests.
- (u) Swear witnesses for defense, in succession, and cross-examine so far as desirable.
- (v) After defense rests, swear and examine witnesses, if any, in rebuttal for prosecution.
- (w) If the accused neither testifies nor makes a statement, the president makes to him the required explanation and asks him the required questions.
- (x) Offer accused opportunity to make a statement.
- (y) Make closing statement, if any.

4. ADJOURNMENT DURING TRIAL.

- (a) Note time of adjournment.
- (b) Arrange, if practicable, to have completed record of proceedings to date ready before next assembling of court.
- (c) Subscribe the record of proceedings for the day.

5. FINDINGS.

(a) After both prosecution and defense have concluded, the court closes for findings, and in the case of a person not a soldier to award sentence upon conviction.

(b) Upon conviction of a soldier, the court opens for the purpose of receiving evidence of previous convictions, if there be any.

(1) Read aloud duly authenticated evidence of previous convictions referred to the court by the appointing authority.

(2) Invite attention of court to any apparent irregularity in the evidence of previous convictions.

(3) Ask the accused whether the evidence of the several previous convictions and the statement of service as shown on the charge sheet are correct.

(4) Invite the attention of the court to any apparent irregularity in the findings.

6. SENTENCE.

(a) The court will then close to determine upon and award the sentence.

(b) After awarding sentence the court notifies the judge advocate of the same.

(c) Invite the attention of the court to any apparent irregularity in the sentence.

7. ADJOURNMENT AT CLOSE OF TRIAL.

(a) After sentence has been awarded the court either proceeds to other business or adjourns.

(b) Note time of proceeding to other business or of adjournment.

8. AFTER TRIAL.

(a) Complete vouchers for civilian witnesses and deliver same, if practicable, before the witness leaves.

(b) Take proper measures to insure the security of the findings and sentence, if recorded, and that they are not disclosed to any but the proper authority.

(c) When record is received back from reporter:

(1) Examine carefully to see that it is in proper form, complete, and correct as to both form and substance.

(2) Make proper notation on index sheet as to copy of record.

(3) See that copies of evidence of previous convictions are correct, certify same, and return originals to organizations.

(4) If not so attached, attach index sheet and all exhibits.

(5) See that record is securely bound.

(d) Enter findings and sentence.

(e) If findings and sentence are typewritten, add proper certificate.

(f) Authenticate record.

(g) Have president authenticate record.

(h) Certify original voucher and send it to reporter or to a near disbursing quartermaster, and inclose copy with record.

(i) Verify completeness and correctness of record by seeing that, so far as necessary in the particular case, each requirement stated in Chapter XV, Section I, paragraph 357 (b) has been complied with.

(j) Indorse and forward charges, accompanied by record of trial and all other papers received with the case, to the appointing authority.

9. WEEKLY REPORT.

Each Saturday report through the president of the court and the commanding officer all charges which have not been returned to the appointing authority, showing date of receipt of each and reasons for delay in trial.

10. RECORD WHICH MAY BE KEPT.

It is suggested that when deemed desirable at least the following record be kept by the trial judge advocate in each case. This record may be conveniently kept on an envelope to be used as a container for the charges and various papers:

Date of receipt by him of charges or other papers.

Date of preliminary consultation by him with the accused.

How accused intends to plead, if stated by him.

Counsel:

Desired?

If so, name.

If so, date on which commanding officer so informed.

Date on which judge advocate informed of appointment of counsel.

Result of examination in preparing for trial, and dates and other necessary facts pertaining to each other incident connected with the case, such as mailing interrogatories, subpoenaing witnesses, etc.

Date of trial.

Date and hour record received back from reporter.

Date and hour record forwarded to appointing authority.

Date of return to commanding officer of evidence of previous convictions, if any, to be so returned.

Carbon copy of the record { not desired by accused.²
furnished the accused.

¹ See "Courts-martial, Records of trial, Chap. XV." The record will be clear and legible and, if practicable, without erasure or interlineation.

Erasures or interlineations will be authenticated by the initials of the judge advocate or of the president, or, in a proper case, of the assistant judge advocate.

The pages of the record will be numbered at the bottom, and margins of 1 inch will be left at the top, bottom, and left side of each page.

² Line out inappropriate words.

Proceedings of a general court-martial which convened at ———, ———, pursuant to the following order:

(Here insert a literal copy of the order appointing the court and, following it, copies of any orders modifying the detail.)

Fort ———, ———,
—————, 19—.

The court met pursuant to the foregoing order at ——— o'clock —. m.

PRESENT.³

Maj. ———, 5th Cavalry.

Capt. ———, Medical Corps.

First Lieut. ———, 10th Infantry.

First Lieut. ———, 5th Cavalry.

Second Lieut. ———, Coast Artillery Corps.

First Lieut. ———, 5th Cavalry, judge advocate.

Second Lieut. ———, 29th Infantry, assistant judge advocate.

ABSENT.⁴

Capt. ———, Coast Artillery Corps (detached service).

Second Lieut. ———, 10th Infantry (leave of absence).

The court proceeded to the trial of Private ———, Company ———, ——— Infantry, who, on appearing before the court, stated that he did not desire counsel or introduced ——— as counsel.

————— was sworn as reporter.

Capt. ——— announced that he was the accuser and was excused and withdrew.

(If an interpreter is to be used he should be sworn when his services are required.)⁵

The order appointing the court (and the order or orders modifying the detail, if any) was (or were) read to the accused, and he was asked if he objected to being tried by any member present named therein; to which he replied in the negative; or

Defense: (Insert statement.)⁶

Captain ———:

(Insert the statement of the challenged member, who ordinarily should respond to the challenge by briefly admitting or denying the grounds of the challenge. Should the accused, after the statement, desire to call upon the member to testify as to his competency, the record should continue:)⁷

³ In the record of the proceedings of a court-martial at its organization for the trial of a case the officers detailed as members, judge advocate, and assistant judge advocate will be noted by name as present or absent. In the record of the proceedings of subsequent sessions in the same case (except in proceedings in revision) the following form of words will be used, subject to such modification as the facts may require: "Present, all the members of the court, the judge advocate, and the assistant judge advocate." When the absence of an officer who has not qualified or who has been relieved or excused as a member has been accounted for, no further note will be made of it.

⁴ A member of a court-martial who knows, or has reason to believe, that he will, for proper reason, be absent from a session of the court, will inform the judge advocate accordingly. When a member of a court-martial is absent from a session thereof, the judge advocate will cause that fact, together with the reason for such absence, if known to him, to be shown in the record of the proceedings. If the reason for such absence is not known to the judge advocate, he will cause the record to show the member as absent, cause unknown.

⁵ Not to be copied into the record.

The accused having requested that the challenged member be sworn as to his competency to act as a member of the court, ——— was sworn by the judge advocate and testified as follows:

The court was closed, and on being opened the president announced in the presence of the accused and his counsel that the challenge was not sustained or that the challenge was sustained.

If the challenge is sustained: ——— then withdrew.

The accused was asked if he objected to any other member present, to which he replied in the negative, or

Defense:

(Insert objection in full, record, and continue as before until accused replies in the negative.)^a

The members of the court, the judge advocate, and the assistant judge advocate were then sworn.

(If delay is desired, request should now be made and the proceedings recorded. If no continuance is requested, the record should continue:)^a

The accused was then arraigned upon the following charges and specifications:^a

Charge I: Violation of the ——— article of war.

Specification: In that, etc.

Charge II: Violation of the ——— article of war.

Specification 1: In that, etc.

Specification 2: In that, etc.

———, Capt. ——— Infantry.

To which the accused pleaded:^a

To the specification, Charge I: Guilty or Not guilty.

To Charge I: Guilty or Not guilty.

To Specification 1, Charge II: Guilty or Not guilty.

To Specification 2, Charge II: Guilty or Not guilty.

To Charge II: Guilty or Not guilty.

The paragraphs of the Manual for Courts-martial that set out the gist of each of the several offenses were read to the court by the judge advocate.

Sergt. John Jones, Company ———, ——— Infantry, a witness for the prosecution, was sworn and testified as follows:

Questions by prosecution:

Q. Do you know the accused? If so, state who he is.

A. I do; Pvt. ———, Company ———, ——— Infantry.

(The succeeding questions of the prosecution and their answers should follow in order.)^a

^a All words that precede the charge proper are not parts of the charges and will not be copied into the record, but the name, rank, and organization of the officer subscribing the charges will be copied into the record after the charges and specifications.

^a In case the accused pleads guilty in whole or in part to any charge or specification, the record will show the explanation of the president and the reply of the accused required by par. 154 (d).

^a The record should set forth fully all the testimony introduced upon the trial, the oral portion as nearly as practicable in the precise words of the witness. If the court should decide to strike out any part, it will not be literally stricken out or omitted from the record, but will not be thereafter considered as part of the evidence.

Questions by defense:

Q. _____?

A. _____.

(If the defense declines to cross-examine the witness, the record should state:)*

The defense declined to cross-examine the witness.

Questions by prosecution:

Q. _____?

A. _____.

Questions by defense:

Q. _____?

A. _____.

Questions by court:

Q. _____?

A. _____.

Prosecution: (Insert objection.)*

Member: (Insert reply, etc.)*

(If the accused or another member object, the record would proceed in a corresponding way.)*

The court was closed, and on being opened the president announced in the presence of the accused and his counsel that the objection was sustained or was not sustained.

(In the latter case the record should continue:)*

The question was then repeated:

A. _____.

(If the court considers it necessary to hear the testimony of the witness read or the witness desires to have any part of his testimony read for correction, the record will show the fact and the corrections, if any.)*

(After the proper foundation for the introduction of a writing has been laid the record will continue.)*

Prosecution: "I offer in evidence the" (Describe the writing or other proposed exhibit.)*

Defense: (Insert his reply. If there is no objection the record will continue.)*

The paper (or other proposed exhibit*) was then received in evidence and is appended marked—* (insert the number of the exhibit*).

(If there is objection the record will continue by stating any further remarks of the prosecution.)*

The court was closed, and on being opened the president announced in the presence of the accused and his counsel that the objection was sustained (or was not sustained).

(If the objection is not sustained the record will continue as in the case where there is no objection. If the objection is sustained there will be no further entry.)*

(If it is the defense that seeks to introduce the writing, the record would proceed in a corresponding manner.)*

(At the close of the prosecution the record should continue.)*

* All documents and papers made part of the proceedings, or copies of them, will be securely fastened (but not pasted) to the record, in the order of their introduction, after the space left for the remarks of the reviewing authority, and marked "1," "2," "3," etc., so as to afford easy reference. Documents or other writings, or matter excluded by the court will not ordinarily be appended to the record, but the record should simply specify the character of the writings and the grounds upon which they were ruled out.

Prosecution: The prosecution rests.

(If the court adjourns to meet another day the record should continue.)⁷

The court then, at — o'clock —. m., adjourned to meet at — o'clock —. m. on —.

_____,
First Lieutenant, 5th Cavalry, Judge Advocate.
Fort _____, _____, 19—.

The court met, pursuant to adjournment, at — o'clock —. m.

Present:

All the members of the court, the judge advocate, and the assistant judge advocate.⁸

The accused, his counsel, and the reporter were also present.

(If the proceedings of the previous day are required to be read, the fact will be recorded in the following form:)⁹

The proceedings of _____ were read and approved, or corrected, as follows:

(In the latter case enumerate corrections, giving page and line on which they occur.)⁹

Corpl. John Smith, Company _____, _____ Infantry, a witness for the defense, was sworn and testified as follows:

Questions by prosecution:

(When considered desirable, the first question may be as to the identity of the witness.)⁹

Q. Do you know the accused? If so, state who he is.

A. _____.

Questions by defense:

Q. _____?

A. _____.

(Should the accused testify in his own behalf, the record will continue.)⁹

The accused, at his own request, was sworn and testified as follows:

Questions by defense:

Q. _____?

A. _____.

(If the defense offers no other witness, the record should continue.)⁹

The defense had no further testimony to offer and no statement to make, or, having no further testimony to offer, made the following verbal statement.

Or, having no further testimony to offer, submitted a written statement which was read to the court, and is hereto appended and marked —.¹¹

Or, requested until — o'clock —. m. to prepare his defense.

(If the court takes a recess during the time asked for, the record will continue.)⁹

The court then took a recess until — o'clock —. m., at which hour the members of the court, the judge advocate, the assistant judge advocate, the accused, his counsel, and the reporter, resumed their seats.

(Or, if the court has other business before it, the record may continue.)⁹

The court then proceeded to other business, and at — o'clock —. m. resumed the trial of this case, at which hour, etc.

Defense: (Insert statement).⁹

Or, The defense read to the court a statement, which is hereto appended and marked —.¹¹

¹⁰ If any member is absent, if not already accounted for, add "Except—" (giving cause of absence, if known).

¹¹ The statement of the accused, or argument in his defense, and all pleas to the jurisdiction in bar of trial or in abatement, when in writing, should be signed by the accused himself, referred to in proceedings as having been submitted by him, and appended to the record.

The prosecution: (Insert statement).

Or, The prosecution read to the court a statement, which is hereto appended and marked —.

The court was closed, and finds the accused:

Of the specification, Charge I: Guilty or Not guilty.

Of Charge I: Guilty or Not guilty.

Of Specification 1, Charge II: Guilty, except the words "——," substituting therefor the words "——"; of the excepted words, "Not guilty" and of the substituted words "Guilty."

Of Specification 2, Charge II: Guilty or Not guilty.

Of Charge II: Guilty or Not guilty, or Not guilty, but guilty of ——.

(If a soldier is found guilty, the record should continue.)^b

The court was opened and the judge advocate stated, in the presence of the accused and his counsel, that he had no evidence of previous convictions to submit.

Or, read the evidence of —— previous convictions,^c copies of which are hereto appended and marked "4," "5," etc.

(If the defense has any statement to make in regard to the previous convictions or statement of service, it will be recorded.)^d

The court was closed, and sentences the accused to ——.

(No previous convictions, or accused acquitted.)^e

The court sentences the accused, Private ——, —— Infantry, to ——, etc., or acquits the accused.

The court, at — m., was opened and proceeded to other business.

Or, adjourned until — m., the —— instant.

Or, adjourned to meet at the call of the president.

_____,
Major, 5th Cavalry, President.

_____,
First Lieutenant, 5th Cavalry, Judge Advocate. ——.^f

(At least two blank sheets will be inserted after the adjournment and before the exhibits for the decision and orders of the reviewing authority.)^g

BINDING AND BRIEF.

(The papers forming the complete record will be securely bound together at the top (easily removed clips or paper fasteners will not be used) and the record folded in four folds and briefed on the first fold, as follows:)^h

Private, Company ——, —— Infantry.

Trial by general court-martial.

.....
^h When the proof produced is the copy furnished to the company or other commander it will be returned to him and a copy of it attached to the record, if the trial be by general court-martial. The copy should be bound with the record as an exhibit.

ⁱ In case of the death, disability, or absence of the judge advocate, see A. W. 33. When the judge advocate records the findings and sentence by the use of a typewriting medium he will certify immediately after the authentication of the record as follows: "I certify that I recorded the findings and sentence of the court." When the record is completed the judge advocate will forward it without delay to the appointing authority as an inclosure to the indorsement of the judge advocate, returning the original charges.

FORM FOR REVISION OF RECORD.¹⁴Fort _____,
_____, 19__.

The court reconvened at _____ o'clock —. m., pursuant to the following indorsement:

(Insert copy of indorsement.)⁸

PRESENT.¹⁵

Maj. _____, 5th Cavalry.

Capt. _____, Medical Corps.

First Lieut. _____, 10th Infantry.

First Lieut. _____, 5th Cavalry.

Second Lieut. _____, Coast Artillery Corps.

First Lieut. _____, 5th Cavalry, judge advocate.

Second Lieut. _____, 29th Infantry, assistant judge advocate.

ABSENT.

(Insert names of absentees and state cause of absence, if known.)⁶

The judge advocate read to the court the foregoing indorsement of the convening authority.¹⁶

The court was closed and revokes its former findings and sentence, and finds the accused, etc.

Or, revokes its former sentence and sentences the accused, etc.

Or, respectfully adheres to its former findings and sentence.

Or, amends the record by, etc.¹⁷

The judge advocate was then recalled and the court at _____, —. m., etc.

Major, 5th Cavalry, President.

_____,
First Lieutenant, 5th Cavalry, Judge Advocate.

(The record of revision will be appended to the original proceedings, following them immediately, before the exhibits, and will be forwarded by indorsement on the charges to the appointing authority.)⁹

APPENDIX 7.

FORM FOR RECORD OF TRIAL BY A SPECIAL COURT-MARTIAL.

Fort _____,
_____, 19__.

The special court-martial appointed by paragraph _____, Special Orders, No. _____, Headquarters _____, _____, 19__,¹ as modified by paragraph _____, Special Orders, No. _____, Headquarters _____, met at _____, —. m.

¹⁰See "Record of revision," par. 357, ante. The court is usually reconvened by indorsement on the charges returning them to the president of the court with the directions of the appointing authority.

¹¹The record should show the name of each member of the court present during the proceedings in revision.

¹²The judge advocate will also read any other indorsements that may be connected with the proceedings in revision.

¹³See par. 364.

¹⁴The number, source, and date of the order appointing the court and of each order modifying the detail will be stated.

PRESENT.

ABSENT.³

The court proceeded to the trial of Private —, Company —, — Infantry, who, on appearing before the court³ (stated that he did not desire counsel) (introduced — as counsel).

(— was sworn as reporter.)⁴

(Capt. —, because ineligible, was excused and withdrew.)

(First Lieuts. — and — were, upon challenge, excused and withdrew.)

The accused stated that he had no objection to trial by any member (remaining) present.

The members of the court and the judge advocate were sworn.

The accused was arraigned upon the following charges and specifications:

Charge I: Violation of the — article of war.

Specification: In that, etc.

Charge II: Violation of the — article of war.

Specification 1: In that, etc.

Specification 2: In that, etc.

—, —,
Captain, — Infantry.

PLEAS.⁵

To all specifications and charges: —.⁶

To the Specification, Charge I: —.⁷

To Charge I: —.

To Specification 1, Charge II: —.

To Specification 2, Charge II: —.

To Charge II: —.

The following-named persons were sworn and testified:

Sergt. —, — Infantry.

Corpl. —, — Infantry.

Pvt. —, — Infantry.

The defense was given full opportunity to examine each witness.

(The depositions of the following-named persons were received in evidence and are hereto appended marked —, —, —.)

The accused (at his own request was sworn and testified) (made a statement to the court).

The accused stated that he had nothing further to offer.

The court was closed and finds the accused:

³ Statement of neither reason nor authority for the absence is required.

⁴ Words inclosed in parentheses will in a proper case be omitted.

⁵ A judge advocate of a special court may, when authorized by the appointing authority, employ a stenographic reporter, to be paid at the rates fixed in paragraph —.

⁶ If a special plea is made, the record will set out in full the proceedings had thereon, including all testimony taken thereon and statements made relative thereto, as well as the disposition thereof made by the court.

⁷ This or similar language will be used when the pleas to all the specifications and charges are the same.

⁸ For action when the accused pleads guilty in whole or in part and evidence is recorded, see par. 154 (d).

Of all specifications and charges: ____.*

Of the Specification, Charge I: ____.

Of Charge I: ____.

Of Specification 1, Charge II: ____.

Of Specification 2, Charge II: ____.

Of Charge II: ____.

(The court therefore acquits him.)

The court was opened and the judge advocate, in the presence of the accused (and his counsel) (stated that he had no evidence of previous convictions to submit) (read the evidence of ____ previous convictions).

(The court was closed and sentences the accused to ____.)

The court was opened and (proceeded to other business) (adjourned).*

_____, Major, ____ Infantry, President.

First Lieutenant, ____ Infantry, Judge Advocate.

Approved, _____, 191—

_____, Colonel, ____ Infantry, Commanding.

APPENDIX 9.

FORMS FOR SENTENCES.

(For forms for action by reviewing authority on sentences by courts-martial, see Appendix 10.)

A sentence adjudged by a court-martial will, in a proper case, be expressed substantially in one or another of the forms following. When desirable, in a proper case, two or more of the forms may be combined.

1. To have his pay for ——— days detained.
2. To have two-thirds (or other fraction) of his pay per month for ——— months detained.
3. To forfeit ——— days' pay.
4. To forfeit two-thirds (or other fraction) of his pay per month for ——— months.
5. To perform hard labor for ——— days (or months).
6. To be confined at hard labor for ——— days (or months).
7. To be confined at hard labor, at such place as the reviewing authority may direct, for ——— days (or months or years).
8. To be confined at hard labor, at such place as the reviewing authority may direct, for ——— months and to forfeit two-thirds (or other fraction) of his pay per month for a like period.
9. To be dishonorably discharged the service and to forfeit all pay and allowances due or to become due.
10. To be dishonorably discharged the service, to forfeit all pay and allowances due or to become due while in confinement under this sentence, and to be confined at hard labor, at such place as the reviewing authority may direct, for ——— days (or months or years).
11. To be reduced to the ranks.
12. To vacate all rights and privileges arising from his certificate of eligibility.
13. To be admonished.
14. To be reprimanded.
15. To be restricted to the limits of his post (or other place) for ——— months.
16. To be suspended from duty for ——— months.
17. To be suspended from command for ——— months.
18. To be suspended from rank for ——— months.
19. To be reduced in rank ——— files.
20. To be reduced in rank so that his name shall appear in the lineal list of officers of his arm next below that of ———.
21. To be dismissed the service.
22. To pay to the United States a fine of ——— dollars and to be confined at hard labor, at such place as the reviewing authority may direct, until said fine is so paid, but for not more than ——— months (or years).
23. To pay to the United States a fine of ——— dollars, to be confined at

hard labor, at such place as the reviewing authority may direct, for ——— months (or years), and to be further confined at hard labor until said fine is so paid, but for not more than ——— months (or years), in addition to the ——— months (or years) hereinbefore adjudged.

24. To be confined at hard labor, at such place as the reviewing authority may direct, for the term of his natural life.

25. To be shot to death with musketry.

26. To be hanged by the neck until dead.

APPENDIX 10.

FORMS FOR ACTION BY REVIEWING AUTHORITY.

(For forms for sentences see Appendix 9.)

The following forms will serve as a general guide for reviewing authorities in recording, in cases in which such forms are appropriate, their action on sentences imposed by courts-martial. In a proper case the substance of two or more of the forms may be combined. Likewise, the action as recorded may contain proper matter additional to that set out in any of the several forms.

A. FORMS FOR ORIGINAL ACTION.

1 Approved (or disapproved) ———, 191—.

—————,
Colonel, ——— Infantry, Commanding.

2
Approved (or disapproved).
Headquarters ———, ———, 191—.

—————,
Colonel, ——— Infantry, Commanding.
3 Approved and suspended ———, 191—.

—————,
Colonel, ——— Infantry, Commanding.
4 Approved and forfeiture (or confinement) suspended, ———, 191—.

—————,
Colonel, ——— Infantry, Commanding.
5
Headquarters ———, ———, 191—.
In the foregoing case of ———, the sentence is approved and will be duly executed (or is disapproved).

—————,
Colonel, ——— Infantry, Commanding.
6
Headquarters ———, ———, 191—.
In the foregoing case of ——— the sentence is approved, but owing to the length of time the accused has been in confinement ——— days (or months) of the confinement imposed are remitted. As thus modified the sentence will be duly executed.

—————,
Colonel, ——— Infantry, Commanding.
7
Headquarters ———, ———, 191—.
In the foregoing case of ——— the findings of Specifications 1 and 2, Charge II, are disapproved. The sentence is approved and will be duly executed.

Colonel, ——— Infantry, Commanding.

8 Headquarters ———, ———, 191—.

In the foregoing case of ——— only so much of the findings of guilty of the specification of Charge I and of Charge I as involves a finding of guilty of absence without leave from ——— to ———, terminated by apprehension (or surrender) is approved. Only so much of the sentence as provides for ——— is approved and will be duly executed.

Colonel, ——— Infantry, Commanding.

9 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is approved, but the execution thereof is suspended.

Colonel, ——— Infantry, Commanding.

10 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is approved, but the execution thereof, in so far as it relates to forfeiture of pay (or to confinement) is suspended.

Colonel, ——— Infantry, Commanding.

11 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is approved and will be duly executed, but the execution of that portion thereof adjudging dishonorable discharge is suspended until the soldier's release from confinement. ——— is designated as the place of confinement.

Colonel, ——— Infantry, Commanding.

12 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is approved and will be duly executed. ——— is designated as the place of confinement.

Colonel, ——— Infantry, Commanding.

13 Headquarters ———, ———, 191—.

In the foregoing case of ——— it appears from the record of trial that the officer who had subscribed the charges participated as a member of the court in the findings and sentence. As such officer is prima facie the accuser in the case, and as the record of trial contains nothing to indicate that the court upon investigation arrived at a finding that he was not in fact such accuser, the proceedings are, in view of the provisions of the ——— article of war, invalid.

Colonel, ——— Infantry, Commanding.

14 Headquarters ———, ———, 191—.

In the foregoing case of ——— it appears from the record of trial that an officer who testified as a witness for the prosecution participated as a member of the court in the findings and sentence. In view of the provisions of the ——— article of war the proceedings are invalid.

Colonel, ——— Infantry, Commanding.

15 Headquarters ———, ———, 191—. To ———.

In the foregoing case of ——— the sentence is approved and the record of trial is forwarded for action under the forty-eighth article of war.

Colonel, ——— Infantry, Commanding.

16 Headquarters ———, ———, 191—. To the Judge Advocate General of the Army.

In the foregoing case of ——— the sentence is approved, but the execution thereof is suspended until the pleasure of the President be known, and the record of trial is forwarded for action under the fifty-first article of war.

Colonel, ——— Infantry, Commanding.

17 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is approved and will be duly executed at ——— on ———, 191—, under the direction of the commanding ———.

Colonel, ——— Infantry, Commanding.

18 Headquarters ———, ———, 191—.

In the foregoing case of ——— the sentence is confirmed and will be duly executed at ——— on ———, 191—, under the direction of the commanding ———.

Colonel, ——— Infantry, Commanding.

B. FORMS FOR ORDERS VACATING SUSPENSIONS.

Headquarters ———, ———, 191—.

1 So much of the order published in ——— Court-Martial Order No. —, ———, 191—, these headquarters, ———, 191— (or found in a record of trial by summary court approved ———, 191—), as suspends execution of sentence in the case of ——— is vacated and said sentence will be carried into execution.

By order of Col. ———,
———, Adjutant.

Headquarters ———, ———, 191—.

2 So much of the order published in ——— Court-Martial Order No. —, ———, 191—, these headquarters, ———, 191— (or found in a record of trial by summary court approved ———, 191—), as suspends execution of sentence to confinement (or forfeiture of pay) in the case of ——— is vacated and that part of said sentence will be carried into execution.

By order of Col. ———,
———, Adjutant.

Headquarters ———, ———, 191—.

3 So much of the order published in General Court-Martial Order No. —, ———, 191—, these headquarters, as suspends execution of sentence to dishonorable discharge of the case of ——— is vacated and that part of said sentence will be carried into execution.

By order of Col. ———,
———, Adjutant.

APPENDIX 11.

COURT-MARTIAL ORDERS.

A. FORM FOR GENERAL COURT-MARTIAL ORDER.

General Court-Martial
Order, No. 447.

Headquarters Eastern Department,
Governors Island, N. Y., July 27, 1919.

Before a general court-martial which convened at Fort Hamilton, N. Y., pursuant to paragraph 6, Special Orders, No. 93, Headquarters Eastern Department, April 24, 1919,¹ as modified by paragraph 7, Special Orders, No. 101, Headquarters Eastern Department, May 26, 1919, was arraigned and tried:

Private John Doe, Company F, 29th Infantry.

Charge I: Violation of the 58th Article of War.

Specification: In that Private John Doe, Company F, 29th Infantry, did at Fort Jay, N. Y., on or about March 27, 1917, desert the service of the United States and did remain absent in desertion until he was apprehended at Brooklyn, N. Y., on or about June 30, 1919.

Charge II: Violation of the 84th Article of War.

Specification: In that Private John Doe, Company F, 29th Infantry, did at Fort Jay, N. Y., on or about March 27, 1917, through neglect, lose one overcoat, olive drab, value \$14.84, and one blanket, light weight, value \$3.79, issued for use in the military service.

PLEAS.

To the specification, Charge I: "Not guilty."

To Charge I: "Not guilty."

To the specification, Charge II: "Not guilty."

To Charge II: "Not guilty."

Or

To all the specifications and charges: "Not guilty."²

FINDINGS.

Of the specification, Charge I: "Guilty."³

Of Charge I: "Guilty."

Of the specification, Charge II: "Guilty."

Of Charge II: "Guilty."

Or

Of all the specifications and charges: "Guilty."⁴

¹ The orders appointing the court and all orders modifying the convening order will be cited.

² Where the accused pleads guilty or not guilty to all the specifications, or is found guilty or not guilty of all, the form may be abbreviated as indicated.

³ If a special plea has been made and sustained by the court, the wording will be: "Plea in ——— (——) sustained by the court."

⁴ Where the accused pleads guilty or not guilty to all the specifications or is found guilty or not guilty of all, the form may be abbreviated as indicated.

SENTENCE.

To be dishonorably discharged the service; to forfeit all pay and allowances due, or to become due while in confinement under this sentence; and to be confined at hard labor at such place as the reviewing authority may direct for two years. (Four previous convictions considered.)

The sentence is approved and will be duly executed. The United States Disciplinary Barracks is designated as the place of confinement.

By command of _____,

_____,
Colonel, General Staff, Chief of Staff.

Official:

_____,
Adjutant General, Adjutant.

B. FORM FOR SPECIAL COURT-MARTIAL ORDER.

Special Court-Martial
Order No. 43.

Headquarters Fort Jay, N. Y., July 27, 1919.

Before a special court-martial which convened at Fort Jay, N. Y., pursuant to paragraph 6, Special Orders, No. 93, these headquarters, April 24, 1919, as modified by paragraph 7, Special Orders, No. 101, these headquarters, May 26, 1919, was arraigned and tried:

Private John Doe, Company F, 29th Infantry.

Charge I: Violation of the 58th Article of War.

Specification: In that Private John Doe, Company F, 29th Infantry, did at Fort Jay, N. Y., on or about March 27, 1917, desert the service of the United States and did remain absent in desertion until he was apprehended at Brooklyn, N. Y., on or about June 30, 1919.

Charge II: Violation of the 84th Article of War.

Specification: In that Private John Doe, Company F, 29th Infantry, did at Fort Jay, N. Y., on or about March 27, 1917, through neglect, lose one overcoat, olive drab, value \$14.84, and one blanket, light weight, value \$3.29, issued for use in the military service.

PLEAS.

To the specification, Charge I: "Not guilty."

To Charge I: "Not guilty."

To the specification, Charge II: "Not guilty."

To Charge II: "Not guilty."

Or

To all the specifications and charges: "Not guilty."

FINDINGS.

Of the specification, Charge I: "Guilty."*

Of Charge I: "Guilty."

Of the specification, Charge II: "Guilty."

* If a special plea has been made and sustained by the court, the wording will be: "Plea in _____ (_____) sustained by the court."

* If a special plea has been made and sustained by the court, the wording will be: "Plea in _____ (_____) sustained by the court."

Of Charge II: "Guilty."

Or

Of all the specifications and charges: "Guilty."¹

SENTENCE.

To be confined at hard labor for six months and to forfeit two-thirds of his pay per month for a like period. (Two previous convictions considered.)

The sentence is approved.

By order of _____,

Official: _____,

Adjutant.

_____,
Adjutant.

APPENDIX 12.

INTERROGATORIES AND DEPOSITION.

To be read in evidence before a ¹ _____, United States Army, appointed to meet at _____, by paragraph —, Special Orders, No. —, Headquarters _____, _____, 191—, in the case of (in the matter of)² _____.

_____, 191—. To _____:

Please cause to be taken on the interrogatories herein contained the deposition of _____, to be found at _____.

Headquarters _____, 191—. To _____, who will take or cause to be taken ⁴ the deposition of the person named above on the interrogatories herein contained.⁵

By _____ of _____:

_____, Adjutant.

First interrogatory: Are you in the military service of the United States? If so, what is your full name, rank, organization and station? If not, what is your full name, occupation and residence?

Answer: ⁶

Second interrogatory: _____.

Answer: _____.

¹ Where the accused pleads guilty or not guilty to all the specifications or is found guilty or not guilty of all, the form may be abbreviated as indicated.

² General (or special or summary) court-martial, or military commission, or court of inquiry, or military board.

³ Name, rank, and organization of the accused, or other proper words identifying the particular matter in which the deposition is desired to be used.

⁴ To be subscribed by the trial judge advocate or other proper person with his name, rank, organization, and official title, as "judge advocate," "summary court," "recorder," etc.

⁵ Strike out word or words not used.

⁶ If it is desired to give special instructions, or if a travel order is necessary, the remaining space will be used for the purpose.

⁷ If the spaces for answers are not sufficient, extra sheets may be inserted by the officer taking the deposition. In such case he will rewrite the interrogatories, writing the answers immediately below the respective interrogatories.

First cross-interrogatory: _____.

Answer: _____.

First interrogatory by the _____:

Answer: _____.

(Witness sign here) _____.

I certify that the above deposition was duly taken by me, and that the above-named witness, having been first duly sworn by me, gave the foregoing answers to the several interrogatories, and that he subscribed the foregoing deposition in my presence at _____, this _____ day of _____, 191—.

(Name) _____,

(Rank and organization) _____.

(Official character, as "summary court," "officer designated to take the deposition," "notary public," etc.) _____.

[BACK.]

INSTRUCTIONS.

1. Interrogatories, How Submitted. (a) The party desiring the deposition submits to the opposite party the interrogatories which he wishes propounded to the person whose deposition he desires, and the opposite party then submits to him such cross-interrogatories, if any, as he may desire. Such additional direct and cross-interrogatories may be submitted as desired; or

(b) The party desiring the deposition submits to the court, military commission, or board the interrogatories which he wishes propounded to the person whose deposition he desires. The opposite party then submits to the court, military commission, or board such cross-interrogatories, if any, as he may desire. The court, military commission, or board then submits such additional interrogatories as they may deem proper and desirable, and such additional direct and cross-interrogatories may be submitted as are desired; or

(c) Where the court, military commission, or board desires that the deposition of a particular person be obtained it will cause interrogatories to be prepared accordingly. The prosecution and defense (or other party or parties in interest) then submit such interrogatories as they may desire. Such additional interrogatories may be included as are desired by the court, military commission, or board, or by a party in interest. (M. C. M., par. 176.)

2. Procedure to Obtain Deposition. (a) All the interrogatories to be propounded to the person are entered upon the form for interrogatories and deposition, and the trial judge advocate, summary court, or recorder will take appropriate steps to cause the desired deposition to be taken with the least practicable delay. In the ordinary case he will either send the interrogatories to the commanding officer of the post, recruiting station, or other military command at or nearest which the person whose deposition is desired is stationed, resides, or is understood to be, or will send them to some other responsible person, preferably a person competent to administer oaths, at or near the place at which the person whose deposition is desired is understood to be. In a proper case the interrogatories may be sent to the department or other superior commander, or to the witness himself, and in any case they will, when necessary, be accompanied by a proper explanatory letter.

(b) When interrogatories are received by a commanding officer he will either take or cause to be taken the deposition thereon. He may send an intelligent enlisted man—preferably a noncommissioned officer, if available—to the neces-

sary place for the purpose of obtaining the deposition, or he may properly arrange by mail or otherwise that the deposition be taken. The deposition will be taken with the least practicable delay, and when taken will be sent at once direct to the judge advocate of the court-martial trying the case, or other proper person.

(c) If the witness whose deposition is desired is a civilian, the judge advocate, or other proper person sending interrogatories as above, will inclose with them a prepared voucher for the fees and mileage of the witness, leaving blank such spaces provided therein as it may be necessary to leave blank, accompanied by the required number of copies of the orders appointing the court, military commission, or board. The judge advocate, summary court, or recorder will also send with the interrogatories a duplicate subpoena requiring the witness to appear in person at a time and place to be fixed by the officer, military or civil, who is to take the deposition. If the name of this officer is not known, the space provided for it will be left blank. If a military officer takes the deposition, he will complete the witness voucher, certify it, and transmit it to the nearest disbursing quartermaster for payment. When the deposition is to be taken by a civil officer, he will be asked to obtain and furnish to the military officer requested or designated to cause the deposition to be taken the necessary data for the completion of the witness voucher, and the latter will complete the voucher, certify it, and transmit it to the nearest disbursing quartermaster for payment. In the case of a military witness, a subpoena will not accompany the interrogatories, but the officer before whom the deposition is to be taken will take the necessary steps to have the witness appear at the proper time and place. (M. C. M., par. 177.)

3. Payment of Civilian Witnesses, Etc. (a) A civilian, not in Government employ, duly summoned to appear as a witness before a military court, commission or board, or at a place where his deposition is to be taken for use before such military court, commission or board, will receive \$1.50 for each day of his actual attendance before such military court, commission or board, or for the purpose of having his deposition taken, and 5 cents a mile for going from his place of residence to the place of trial or of the taking of his deposition, and 5 cents a mile for returning, except as follows:

(1) In Porto Rico and Cuba he will receive \$1.50 a day while in attendance as above stated, and 15 cents for each mile necessarily traveled over stage line or by private conveyance, and 10 cents for each mile over any railway or steamship line.

(2) In Alaska, east of the one hundred and forty-first degree of west longitude, he will receive \$2 a day while in attendance as above stated, and 10 cents a mile; and west of said degree \$4 a day and 15 cents a mile.

(3) In the States of Wyoming, Montana, Washington, Oregon, California, Nevada, Idaho, Colorado, Utah, New Mexico, and Arizona he will receive \$3 a day for the time of actual attendance as above stated, and for the time necessarily occupied in going to and returning from the same, and 15 cents for each mile necessarily traveled over any stage line or by private conveyance, and 5 cents for each mile by any railway or steamship. (M. C. M., par. 185.)

(b) Civil officers before whom depositions are taken for use in the military service will be paid the fees allowed by the law of the place where the depositions are taken. (M. C. M., par. 181.)

4. Articles of War.

Art. 26. Depositions—Before Whom Taken. Depositions to be read in evidence before military courts, commissions, courts of inquiry, or military boards, or for other use in military administration, may be taken before and authenti-

cated by any officer, military or civil, authorized by the laws of the United States or by the laws of the place where the deposition is taken to administer oaths.

Art. 114. Authority to Administer Oaths. Any judge advocate or acting judge advocate, the president of a general or special court-martial, any summary court-martial, the judge advocate or any assistant judge advocate of a general or special court-martial, the president or the recorder of a court of inquiry or of a military board, any officer designated to take a deposition, any officer detailed to conduct an investigation, and the adjutant of any command shall have power to administer oaths for the purposes of the administration of military justice and for other purposes of military administration; and in foreign places where the Army may be serving shall have the general powers of a notary public or of a consul of the United States in the administration of oaths, the execution and acknowledgment of legal instruments, the attestation of documents, and all other forms of notarial acts to be executed by persons subject to military law.

5. Taking Depositions in Foreign Country. If the evidence desired from a witness residing in a foreign country is necessary and material and is desired to be read before a court-martial, military commission, court of inquiry, or military board sitting within any of the States of the Union or the District of Columbia, interrogatories (accompanied by the necessary vouchers for fees and mileage) will ordinarily be forwarded through military channels to the Adjutant General of the Army. They will then be transmitted by the Secretary of War to the Secretary of State with the request that they be sent to the proper consul of the United States and the deposition of the witness taken. In the case of troops serving along the international boundaries outside of the United States proper, or in foreign countries, the officer exercising general court-martial jurisdiction may, in his discretion, detail an officer to take the deposition of a civilian witness or he may send the interrogatories direct to the consul of the United States nearest the place of residence of the witness with the request that the deposition be taken. In the latter case the interrogatories will be accompanied by the proper vouchers for the fees and mileage of the witness. (M. C. M., par. 182.)

APPENDIX, 13.

SUBPOENA FOR CIVILIAN WITNESS.

The President of the United States to ———, greeting:

You are hereby summoned and required to be and appear in person on the ——— day of ———, 191—, at ——— o'clock — m.,¹ before ———,² a ———,³ designated to take your deposition to be read in evidence before a '—— of the United States, at ———, appointed to meet by paragraph ———, Special Orders, No. ———, Headquarters ———, dated ———, 191—, then and there to testify and give evidence as a witness for the ——— in the case of⁴ ———,

¹ Line out when inappropriate "before ———, a ——— designated to take your deposition to be read in evidence."

² When used, enter name, rank, and organization, if any.

³ When used, enter official character, if any, such as judge advocate, summary court, notary public, etc.

⁴ General (or special, or summary) court-martial, etc.

⁵ Enter name, etc., of accused or other subject of investigation.

*and you are hereby required to bring with you, to be used in evidence in said case, the following described documents, to wit: ———.

And have you then and there this precept.

Dated at ——— this ——— day of ———, 19——.

—————
(To be subscribed by judge
advocate, recorder, etc.)

The witness is requested to subscribe on one copy of the subpoena the following and to return to the person serving the subpoena the copy thereof so subscribed.

I hereby accept service of the above subpoena.

Form No. 76, A. G. O.

—————
(Signature of witness.)

[BACK.]

Personally appeared before me the undersigned authority, ———, who, being first duly sworn according to law, deposes and says that at ——— on ———, 191——, he personally delivered to ——— in person a duplicate of the within subpoena.

Subscribed and sworn to before me at ——— this ——— day of ———, 191——.

—————
(Rank, organization, and official character.)

INSTRUCTIONS.

1. Article of War. (a) Process to obtain witnesses. Every judge advocate of a general or special court-martial and every summary court-martial shall have power to issue the like process to compel witnesses to appear and testify which courts of the United States, having criminal jurisdiction, may lawfully issue; but such process shall run to any part of the United States, its Territories, and possessions. (A. W. 22.)

(b) Refusal to Appear or Testify. Every person not subject to military law who, being duly subpoenaed to appear as a witness before any military court, commission, court of inquiry, or board, or before any officer, military or civil, designated to take a deposition to be read in evidence before such court, commission, court of inquiry, or board, willfully neglects or refuses to appear, or refuses to qualify as a witness, or to testify, or produce documentary evidence which such person may have been legally subpoenaed to produce, shall be deemed guilty of a misdemeanor, for which such person shall be punished on information in the district court of the United States or in a court of original criminal jurisdiction in any of the territorial possessions of the United States, jurisdiction being hereby conferred upon such courts for such purpose; and it shall be the duty of the United States district attorney or the officer prosecuting for the Government in any such court of original criminal jurisdiction, on the certification of the facts to him by the military court, commission, court of inquiry, or board, to file an information against and prosecute the person so offending, and the punishment of such person, on conviction, shall

*Line out when inappropriate "and you are hereby required to bring with you, to be read in evidence in said case, the following described documents, to wit."

be a fine of not more than \$500 or imprisonment not to exceed six months, or both, at the discretion of the court: Provided, That the fees of such witness and his mileage, at the rates allowed to witnesses attending the courts of the United States, shall be duly paid or tendered said witness, such amounts to be paid out of the appropriation for the compensation of witnesses. (A. W. 23.)

2. Tender of Fees Preliminary to Prosecution. In case a civilian witness is duly subpoenaed under the authority of A. W. 22 and willfully neglects or refuses to appear or refuses to qualify as a witness, or to testify or produce documentary evidence, which he may have been legally subpoenaed to produce, he will at once be tendered or paid by the nearest quartermaster one day's fees and mileage for the journeys to and from the court, and will thereupon be again called upon to comply with the requirements of the law. Upon failing the second time to comply with the requirements of the law, a complete report of the case will be made to the officer exercising general court-martial jurisdiction over the command with a view to presenting the facts to the Department of Justice for the punitive action contemplated in A. W. 23. (M. C. M. 172.)

3. Civilians Not in Government Employ. A civilian not in Government employ, duly summoned to appear as a witness before a military court, commission, or board, or at a place where his deposition is to be taken for use before such court, commission, or board, will receive \$1.50 for each day of his actual attendance before such court, commission, or board, or for the purpose of having his deposition taken, and 5 cents a mile for going from his place of residence to the place of trial or of the taking of his deposition, and 5 cents a mile for returning, except as follows:

(a) In Porto Rico and Cuba he will receive \$1.50 a day while in attendance, as above stated, and 15 cents for each mile necessarily traveled over stage line or by private conveyance, and 10 cents for each mile over any railway or steamship line.

(b) In Alaska east of the one hundred and forty-first degree of west longitude he will receive \$2 a day while in attendance as above stated and 10 cents a mile, and west of said degree \$4 a day and 15 cents a mile.

(c) In the States of Wyoming, Montana, Washington, Oregon, California, Nevada, Idaho, Colorado, Utah, New Mexico, and Arizona, will receive \$3 a day for the time of actual attendance as above stated and for the time necessarily occupied in going to and return from the same, and 15 cents for each mile necessarily traveled over any stage line or by private conveyance, and 5 cents for each mile by any railway or steamship. (M. C. M., par. 185.)

[Note: 1. Travel must be estimated by the shortest usually traveled route—by established lines of railroad, stage, or steamer—the time occupied to be determined by the official schedules, reasonable allowance being made for unavoidable detention.

2. These rates apply to the Philippine Islands. (See Cir. 45, A. G. O., 1902.)

3. A civilian not in Government employ, when furnished transportation on transport or other Government conveyance, is entitled to 57.142 per cent of 5 cents per mile (equal to 2.857 cents per mile). (Comp. Dec., Aug. 20, 1902, published in Cir. 45, A. G. O., 1902.)]

4. Civilians in Government Employ. Civilians in the employ of the Government when traveling upon summons as witnesses before military courts are entitled to transportation in kind from their place of residence to the place where the court is in session and return. If no transportation be furnished, they are entitled to reimbursement of the cost of travel actually performed by the shortest usually traveled route, including transfers to and from railway stations at rates not exceeding 50 cents for each transfer, and the cost of sleeping-car accommodations to which entitled or steamer berth when an extra

charge is made therefor. They are also entitled to reimbursement of the actual cost of meals and rooms at a rate not exceeding \$3 per day for each day actually and unavoidably consumed in travel or in attendance upon the court under the order or summons. No allowance will be made to them when attendance upon court does not require them to leave their stations. (M. C. M., par. 184.)

APPENDIX 14.

WARRANT OF ATTACHMENT.

United States
vs.
_____ }

The President of the United States to _____, greeting:

WHEREAS _____, of _____, was on the _____ day of _____ 191—, at _____, duly subpoenaed to appear and attend at _____, on the _____ day of _____, 191—, at _____ o'clock — m., before a _____ court-martial duly appointed by paragraph —, Special Orders, No. —, dated Headquarters _____, _____, 191—, to testify on the part of the _____ in the above-entitled case; and whereas he has failed to appear and attend before said _____ court-martial to testify, as by said subpoena required, and whereas he is a necessary and material witness in behalf of the _____ in the above-entitled case:

NOW, THEREFORE, by virtue of the power vested in me, the undersigned, as judge advocate of¹ said _____ court-martial, by article 22 of section 1342 of the Revised Statutes of the United States (39 Stat., 650), you are hereby commanded and empowered to apprehend and attach the said _____ wherever he may be found within the United States, its Territories, or possessions and forthwith bring him before the said _____ court-martial at _____ to testify as required by said subpoena.

Judge Advocate of said _____ Court-Martial.²

Dated _____,
_____, 191—.

Form No. 272, A. G. O.

APPENDIX 15.

FORM A.

HABEAS CORPUS BY UNITED STATES COURT (WHERE A WITNESS IS HELD UNDER A WARRANT OF ATTACHMENT).

RETURN TO WRIT.

In re _____ (name of party held).

(Writ of habeas corpus—Return of respondent.)

To the _____ (court or judge):

The respondent, Maj. _____, United States Infantry, upon whom has been served a writ of habeas corpus for the production of _____, respectfully makes return and states that he holds the said _____ by authority of the United States, pursuant to a warrant of attachment issued under section 3, act of August 29, 1916, twenty-second Article of War, by a

¹ If a summary court-martial, line out the words "judge advocate of."

² If a summary court-martial, line out and substitute the necessary words.

judge advocate or a lawfully convened general (or "special") court-martial (or "by a summary court-martial") and duly directed to him, the said respondent, for execution; that he is diligently and in good faith engaged in executing said warrant of attachment, and that he respectfully submits the same for the inspection of the court, together with the original subpoena and proof of service of the same, a copy¹ of the order appointing the court-martial, sworn to as such, before which the said _____ has been subpoenaed to testify, a copy of the charges and specifications in the case, sworn to as such, in which said _____ is a witness, and an affidavit of _____ showing that said _____ is a material witness in the case; that he has failed to appear and has offered no valid excuse for such failure.

In obedience, however, to the said writ of habeas corpus the respondent herewith produces before the court the body of the said _____; and for the reasons set forth in this return prays this honorable court to dismiss the said writ.

_____,
Major, _____ United States Infantry.

Dated, _____,
_____, 191—.

FORM B.

HABEAS CORPUS BY STATE COURT (WHERE WITNESS IS HELD UNDER A WARRANT OF ATTACHMENT).

RETURN TO WRIT.

(Make return as in case of writ by a United States court, except as to last paragraph, for which substitute as follows:)

And said respondent further makes return that he has not produced the body of the said _____, because he holds him by authority of the United States as above set forth, and that this court (or "your honor," as the case may be) is without jurisdiction in the premises, and he respectfully refers to the decisions of the Supreme Court of the United States in *Ableman v. Booth*, 21 Howard, 506, and *Tarble's case*, 13 Wallace, 397, as authority for his action, and prays this court (or "your honor") to dismiss the writ.

_____,
Major, _____ United States Infantry.

Dated _____,
_____, 191—.

FORM C.

HABEAS CORPUS BY UNITED STATES COURT (WHERE PRISONER IS HELD FOR TRIAL OR UNDER SENTENCE.)

RETURN TO WRIT.

In re _____ (name of party held).

(Writ of habeas corpus—Return of respondent.)

To the _____ (court or judge):

The respondent, Maj. _____, United States Infantry, upon whom has been served a writ of habeas corpus for the production of _____, respectfully makes return and states that he holds the said _____ by authority of the United States as a soldier in the United States Army (or "as

¹ The copy of the order appointing the court and of the charges will be sworn to by the judge advocate (or summary court-martial) before an officer authorized to administer oaths.

a general prisoner under sentence of general court-martial") under the following circumstances:

That the said _____ was duly enlisted as a soldier in the service of the United States at _____, on _____, 191—, for a term of _____ years. (If the offense is fraudulent enlistment, this recital should be omitted.)

(Here state the offense. If it is fraudulent enlistment by representing himself to be of the required age, it may be stated as follows:)

That on the _____ day of _____, 191—, at _____ the said _____, being under 18 years of age, did fraudulently enlist in the military service of the United States for the term of _____ years, by falsely representing himself to be over 18 years of age, to wit, _____ years and _____ months; and has, since said enlistment, received pay and allowances (or either) thereunder.

(If the offense is desertion, it may be stated substantially as follows:)

That the said _____ deserted said service at _____, on _____, 191—, and remained absent in desertion until he was apprehended at _____, _____, on _____, 191—, by _____, and was thereupon committed to the custody of the respondent as commanding officer of the post of _____.

The said _____ has been placed in confinement (or "arrest," as the case may be), and formal charges have been preferred against him for said offense, a copy of which, duly certified and verified,¹ is hereto annexed; and that he will be brought to trial thereon as soon as practicable before a court-martial, to be convened by the commanding general of the _____ Department (or "convened by Special Orders, No. —, dated Headquarters _____ Department, 191—, a copy of which, duly certified and verified,¹ is herein annexed").

(If the party held is a general prisoner, the following paragraph should be substituted for the preceding paragraph:)

That the said _____ was duly arraigned for said offense before a general court-martial, convened by Special Orders, No. _____, dated Headquarters _____ Department, 191—, was convicted thereof by said court, and was sentenced to be _____, which sentence was duly approved on the _____ day of _____, 191—, by the officer ordering the court (or "by the officer commanding said _____ Department for the time being") as required by the _____ article of war. A copy of the order promulgating said sentence, duly certified and verified,¹ is hereto attached.

In obedience, however, to the said writ of habeas corpus the respondent herewith produces before the court the body of the said _____, respectfully refers to the decisions cited in the annexed brief (if the case does not involve

¹ The copy of the charges will be certified by the adjutant and sworn to before an officer authorized to administer oaths for military administration, in the following form:

I hereby certify that the foregoing is a full and true copy of the original charges preferred against _____, and that the same are in the usual form of military charges and conform to the rules regulating military procedure.

_____, Adjutant.
Sworn to and subscribed before me this _____ day of _____, 191—.

_____,
Judge Advocate of Court-Martial
(Or "Summary Court-Martial").

The copy of the order convening the court or publishing the sentence will be certified and verified in a similar manner.

a minor under the required age the words "respectfully refers to the decisions cited in the annexed brief" will be omitted), and for the reasons set forth in this return prays this honorable court to dismiss the said writ.

Major, ——— United States Infantry.

Dated ———, ———,
————, 191—.

FORM D.

HABEAS CORPUS BY STATE COURT (WHERE PRISONER IS HELD FOR TRIAL OR UNDER SENTENCE).

RETURN TO WRIT.

(Make return as in case a writ by a United States court, except as to last paragraph, for which substitute the paragraph set out in Form B, Appendix 15.)
INSTRUCTIONS AS TO RETURNS TO WRITS OF HABEAS CORPUS.

The following instructions in regard to returns under A. R. 998 and 999, in the cases of soldiers who have committed military offenses and are held for trial or punishment therefor, and of general prisoners, are for the information and guidance of all concerned:

1. The return under A. R. 999 will be made in accordance with Form C (Appendix 15), and if the person whose release is sought has committed the offense of fraudulent enlistment by representing himself to be of the required age, will refer, as in last paragraph of that form, to the brief of authorities which follows these instructions, and a copy of that brief will be annexed to the return. Should the court order the discharge of the party, the officer making the return, or counsel, should note an appeal pending instructions from the War Department, and he will report to the Adjutant General of the Army the action taken by the court and forward a copy of the opinion of the court as soon as it can be obtained.

2. The return under A. R. 998 will be made in accordance with Form D (Appendix 15), but a copy of the brief of authorities is not intended to be attached to the returns to writs of habeas corpus issuing from a State court.

BRIEF TO BE FILED WITH A RETURN TO A WRIT OF HABEAS CORPUS ISSUED BY A UNITED STATES COURT IN THE CASE OF A SOLDIER WHOSE DISCHARGE IS SOUGHT ON THE GROUND OF MINORITY.

The right to avoid the contract of enlistment of a soldier on the ground of minority will be considered under the following heads: I. Under the common law; II. Under the statutes; III. Where the minor is held for punishment.

I.

UNDER THE COMMON LAW.

The enlistment of a minor is not avoidable by the minor nor by his parent or guardian at common law, but is only avoidable where the right to avoid it is conferred by statute.

This proposition is clearly established by the decision of the Supreme Court (In re Morrissey, 137 U. S. 157, 159), where the court said:

An enlistment is not a contract only, but effects a change of status. (Grimley's case, 137 U. S., 147.) It is not, therefore, like an ordinary

contract, voidable by the infant. At common law an enlistment was not voidable either by the infant or by his parents or guardians.

The court cites, in support of these statements, *Rex v. Rotherfield Greys* (1 Barn. & Cress., 345, 350; 8 Eng. C. L., 149); *Rex v. Lytchet Matraverse* (7 Barn. & Cress., 226, 231; 14 Eng. C. L., 107); *Commonwealth v. Gamble* (11 Serg. & Rawle (Pa. R.), 93); *U. S. v. Blakeney* (3 Grattan, 387, 405).

In *Rex v. Rotherfield Greys*, *supra*, it was said by Best, J.:

By the general policy of the law of England the parental authority continues until the child attains the age of twenty-one years; but the same policy also requires that a minor shall be at liberty to contract an engagement to serve the State. When such an engagement is contracted it becomes inconsistent with the duty which he owes to the public that the parental authority should continue. The parental authority, however, is suspended, but not destroyed. When the reason for its suspension ceases the parental authority returns.

In *Rex v. Lytchet Matraverse*, *supra*, Bayley, J., after quoting these views of Best, J., says:

Lawrence, J., in *Rex v. Roach* (6 T. R., 254), seems to take the same view of the subject and to consider the authority of the State paramount to that of the parent so long as the minor continues in the public service, but as soon as he leaves it then the parental authority is restored.

It is clear from these authorities and others which could be cited that at common law the enlistment of a minor of sufficient capacity to bear arms was valid regardless of age. The right of the State to the services of such minors is forcefully laid down in *Lanahan v. Birge* (30 Conn., 438). See also *Cooley's Constitutional Law*, page 99, where on the authority of *Ex parte Brown* (5 Cranch, C. C., 554), and *United States v. Bainbridge* (1 Mason, 71), it is said:

Minors may be enlisted without the consent of their parents or guardians when the law fails to require such consent.

II.

UNDER THE STATUTES.

The pertinent statutes are the following:

Sec. 1116, R. S. Recruits enlisting in the Army must be effective and able-bodied men, and between the ages of sixteen and thirty-five years at the time of their enlistment. This limitation as to age shall not apply to soldiers reenlisted.

This section was modified by the act of March 2, 1899 (30 Stat., 978), which provides:

That the limits of age for original enlistments in the Army shall be eighteen and thirty-five years.

Sec. 1117, R. S. No person under the age of twenty-one years shall be enlisted or mustered into the military service of the United States without the written consent of his parents or guardians: Provided, That such minor has such parents or guardians entitled to his custody and control.

This section is replaced by the provision of section 27, National-Defense Act of June 3, 1916 (39 Stat., 186), which reenacts it in the same words, substituting the age of 18 years for the age of 21.

Sec. 1118, R. S. No minor under the age of sixteen years, no insane or intoxicated person, no deserter from the military service of the United States, and no person who has been convicted of a felony shall be enlisted or mustered into the military service.

1. The statutes confer no right upon the minor to avoid his enlistment, cer-

tainly not if he be 16 years of age or over. No case has been found directly in point holding that a minor under 16 years of age, if of sufficient capacity to bear arms, may avoid his enlistment.

Section 1116, R. S., as amended, prescribing the age limits of original enlistment, was made for the benefit of the Government and not the minor. (In *re* Morrissey, 137 U. S., 157; In *re* Grimley, 137 U. S., 147; In *re* Wall, 8 Fed. Rep., 85; In *re* Davison, 21 Fed. Rep., 618; In *re* Zimmerman, 30 Fed. Rep., 176; In *re* Spencer, 40 Fed. Rep., 149; In *re* Lawler, 40 Fed. Rep., 233; *Solomon v. Davenport*, 87 Fed. Rep., 318; *Wagner v. Gibbon*, 24 Fed. Rep., 135.)

Section 1117, R. S., as amended, while recognizing the right of the parent to the services of the minor, confers no right in the minor to avoid his enlistment. See the cases cited above.

In the *Morrissey* case the Supreme Court of the United States said that the provision of section 1116, R. S.,

is for the benefit of the parent or guardian * * * but it gives no privilege to the minor * * * an enlistment is not a contract only, but effects a change of status. It is not, therefore, like an ordinary contract, voidable by the infant * * *. The contract of enlistment was good, so far as the petitioner is concerned. He was not only *de facto* but *de jure* a soldier—amenable to military jurisdiction.

Whether the designation of the age limit of 16 years in section 1118, R. S., is such as to make the enlistment of the minor under 16 years of age void or voidable by the minor has not been decided. On principle, the minor, if of sufficient capacity to render military service, should not be permitted to avoid his enlistment obtained through his fraudulent statements as to his age. However this may be, if the minor continued to serve and receive pay after passing that age he—

acquires the status of a soldier like one who was enlisted when over 16 years without the consent of his parents, and a court-martial has jurisdiction to try and sentence him to punishment for desertion, from which sentence he can not be discharged on habeas corpus on petition of himself or his parents. (*Ex parte Hubbard*, 182 Fed. Rep., 76.)

2. The statutes requiring the consent of the parent or guardian of a minor to his enlistment (section 1117, R. S., amended by section 27, act of June 3, 1916) impliedly confer upon the parent or guardian the right to avoid an enlistment entered into by a minor under the prescribed age without the required consent, where the minor is not held for trial or punishment for a military offense.

In support of this proposition see the cases cited under II, proposition 1.

3. A parent or guardian with knowledge of the enlistment of a minor under the prescribed age and acquiescing therein for a considerable period, may be held to be estopped from asserting the right to avoid the enlistment.

In support of this proposition see *Ex parte Dunakin* (202 Fed. Rep., 290), where it was held, quoting from the syllabi:

Where a minor enlisted without the consent of his parent or guardian, and his mother, who was his surviving parent, on learning of his enlistment shortly thereafter, did nothing to repudiate the same or to secure his release, and testified that she would have been reconciled to it, had he remained in the Army and not deserted, but that after his desertion she wanted to keep him out of the Army, her acts constituted an implied consent to his enlistment.

4. A minor fraudulently enlisting and remaining in the service after attaining the legal age of enlistment, or the age beyond which parental consent is not required, thereby validates his enlistment.

In support of this proposition see the case of *Ex parte Hubbard* (182 Fed. Rep., 76), where the court held, quoting the syllabus:

A minor enlisted in the Army when under the age of 16, who has continued to serve and receive pay after passing that age, acquires the status of a soldier like one who was enlisted when over 16 without the consent of his parents, and a court-martial has jurisdiction to try and sentence him to punishment for desertion, from which sentence he can not be discharged on habeas corpus on petition of himself or his parents.

III.

WHERE THE MINOR IS HELD FOR PUNISHMENT.

Neither the minor nor his parent nor guardian may avoid the enlistment where the soldier is held for trial or under sentence for a military offense.

In support of this proposition see the cases cited above under II, proposition 1, and also the following: *In re Kaufman* (41 Fed. Rep., 876); *In re Dohrendorf* (40 Fed. Rep., 148); *In re Cosenow* (37 Fed. Rep., 668); *In re Dowd* (90 Fed. Rep., 718); *In re Miller* (114 Fed. Rep., 838); *United States v. Reaves* (126 Fed. Rep., 127); *In re Lessard* (134 Fed. Rep., 305); *Ex parte Anderson* (16 Iowa, 595); *McConologue's Case* (107 Mass., 154, 170); *In re Carver* (142 Fed. Rep., 623); *In re Scott* (144 Fed. Rep., 79); *Dillingham v. Booker* (163 Fed. Rep., 696); *Ex parte Rock* (171 Fed. Rep., 240); *Ex parte Hubbard* (182 Fed. Rep., 76); *Ex parte Lewkowitz* (163 Fed. Rep., 646); *United States v. Williford* (220 Fed. Rep., 291).

The reasons given for these decisions are that the enlistment of a minor in the Army without the consent of his parent or guardian required by section 1117, R. S., "is not void, but voidable only"; that the soldier being not only *de facto* but *de jure* a soldier, he is subject to the Articles of War and may commit a military offense; and that if held for trial or punishment for a military offense, the interests of the public in the administration of justice are paramount to the right of the parent or guardian, and require that the soldier abide the consequences of his offense before the question of his discharge will be considered by the court. In the *Miller* case (114 Fed. Rep., 842), the court supported its holding by the analogy of a minor held for punishment for a civil offense, saying:

The common law, unaided by statute, fully recognizes the parents' right to the custody and services of their minor child; but it has never been held that they could, by the writ of habeas corpus or otherwise, obtain his custody and his immunity when he was held by an officer of a civil court of competent jurisdiction to answer a charge of crime. His enlistment having made the prisoner a soldier notwithstanding his minority, he is amenable to the military law just as the citizen who is a minor is amenable to the civil law. The parents can not prevent the law's enforcement in either case * * *.

The views here cited were approved in the *Reaves* case (126 Fed. Rep., 127), where upon full consideration of the authorities the Circuit Court of Appeals remanded *Reaves*, a minor, who had deserted from the Navy, to custody of the naval authorities as represented by the chief of police who had apprehended him. In the *Carver* case (142 Fed. Rep., 623), the syllabus is as follows:

A minor under the age of 18 years who unlawfully enlisted in the Army without the consent of his father can not be discharged from the service on a writ of habeas corpus sued out by his father so long as he is under arrest for desertion nor until he has been discharged from such custody or has served the sentence imposed on him by the military tribunal.

In the Lewkowitz case (163 Fed. Rep., 646), the syllabus reads:

A minor who by misrepresenting his age has fraudulently enlisted in the Army without the consent of his parents and thereby subjected himself to punishment under military law will not be relieved from such punishment by the civil courts by discharging him on a writ of habeas corpus on the application of his parents, even though the military prosecution is not instituted until after the writ was issued.

This was followed by the unanimous opinion in the Circuit Court of Appeals in the Love case (United States v. Williford, 220 Fed. Rep., 291), in which the court expressly approved the views stated in the Lewkowitz case, quoting section 761, R. S., relating to procedure under writs of habeas corpus, which reads as follows:

The court, or justice, or judge shall proceed in a summary way to determine the facts of the case by hearing the testimony and arguments and thereupon to dispose of the party as law and justice require.

The court added:

Law and justice do not, in our opinion, require Love to be withdrawn from the military authorities and relieved of liability for his offense in favor of his mother's right to his custody.

By act of July 27, 1892 (27 Stat., 278), "fraudulent enlistment and the receipt of pay or allowance thereunder" was made a military offense, punishable under the sixty-second article of war. The offense is now defined in article 54, revised Articles of War, approved August 29, 1916 (39 Stat., 659), which provides that the offense "shall be punished as a court-martial may direct." A minor who procures his enlistment by willful misrepresentation or concealment as to his qualifications for enlistment commits this offense, and the statute authorizes his punishment therefor. In general, it may be stated that where a minor has committed a military offense the interests of the public in the administration of justice are paramount to the right of the parent and require that the soldier shall abide the consequences of his offense before the right to his discharge be passed upon. The soldier should not be allowed to escape punishment for his offense, even though his parents assert their right to his services. A minor in civil life is liable to punishment for a crime or misdemeanor, even though his confinement may interfere with the rights of his parents; and the above authorities clearly apply the same rule to a minor held for trial or punishment for a military offense.

REPORT OF INQUEST.

From: _____ summary court-martial.

To: Commanding officer.

Subject: Report of inquest over body of _____, deceased.

1. Pursuant to your letter (or, your oral instructions) of _____, I viewed on the _____ day of _____, the body of _____, found dead at this post, and have examined the following witnesses, whose testimony is appended to this report:

2. From a view of the body and from the evidence before me I find that at or about _____ m., on the _____ of _____ (or, on or about the _____ day of _____), _____, a _____ day of _____, _____ Regiment of _____ (or, a civilian), died a natural death (or, committed suicide; or, was accidentally killed in manner and circumstances as follows; or, was killed by _____ or by some person or persons unknown, in manner and circumstances as follows: (or otherwise, as the case may be).

WAR DEPARTMENT, OFFICE OF CHIEF OF STAFF.

FIELD SERVICE REGULATIONS

UNITED STATES ARMY

1914

**CORRECTED TO JULY 1, 1914
TO INCLUDE CHANGES 5, DEC. 20, 1916.**

War Department,
Office of the Chief of Staff,
Washington, March 19, 1914.

The following Field Service Regulations, revised by the General Staff of the Army, are approved and published for the information and government of the Regular Army and the Organized Militia, and in time of war, the Volunteer forces.

Success in war can be achieved only by all branches and arms of the service mutually helping and supporting one another in the common effort to attain the desired end.

The basic principles of the combat tactics of the different arms are set forth in the drill regulations of those arms for units as high as brigades. It is the function of higher troop leading to so combine and coördinate the combat tactics of all the arms as to develop in the combined forces the teamwork essential to success.

While the fundamental principles of war are neither very numerous nor complex, their application may be difficult and must not be limited by set rules. Departure from prescribed methods is at times necessary. A thorough knowledge of the principles of war and their application enables the leader to decide when such departure should be made and to determine what methods should bring success.

Officers and men of all ranks and grades are given a certain independence in the execution of the tasks to which they are assigned and are expected to show initiative in meeting the different situations as they arise. Every individual, from the highest commander to the lowest private, must always remember that inaction and neglect of opportunities will warrant more severe censure than an error in the choice of the means.

By order of the Secretary of War:

LEONARD WOOD,
Major General, Chief of Staff.

FIELD SERVICE REGULATIONS

UNITED STATES ARMY

PART I.

ORGANIZATION.

ARTICLE I.

LAND FORCES OF THE UNITED STATES.

1. The land forces of the United States consist of the regular army, the organized land militia when called into the service of the United States, and such volunteer forces as Congress may authorize.

In peace the Army of the United States consists, ordinarily, of the regular army; but whenever the United States is invaded or in danger of invasion from any foreign nation, or of rebellion against the authority of the Government of the United States, or the President is unable with the regular forces at his command to execute the laws of the Union, he may call into the military service of the United States all or any part of the militia organized as a land force.

In war, or when war is imminent, the Army of the United States, after the whole or part of the organized land militia has been called into service, may be further augmented by the employment of volunteers. When the raising of a volunteer force has been authorized by Congress, and after the organized land militia of any arm or class has been called into the military service of the United States, volunteers of that particular arm or class may be raised and accepted into said service regardless of the extent to which other arms or classes of militia may have been called into service.

2. The land forces are grouped under two general heads, i.e.:

1. The Mobile Army.

2. The Coast Artillery.

3. **The Mobile Army.** The mobile army is primarily organized for offensive operations against an enemy, and on this account requires the maximum degree of mobility.

The basis of organization for the mobile army is the division. A division is a self-contained unit made up of all necessary arms and services, and complete in itself with every requirement for independent action incident to its ordinary operations.

When several divisions are acting together they may be grouped into field armies. To the field army there are attached certain organizations of an auxiliary character, called field army troops.

When the number of field army troops attached to a field army make it necessary, they are organized into a separate brigade for purposes of supply and administration, and a commander is designated and the necessary staff is assigned to him. Infantry, cavalry, or military police may be attached to this separate brigade for defensive purposes on the march. The number of

troops so assigned depends on the condition of the service and the number of field army troops in the brigade. Troops for the protection of field army troops are preferably furnished from troops assigned to the line of communications.

If the conditions of the particular service require it, divisions operating independently may be furnished with the necessary field army troops. A brigade operating independently, when so designated by competent authority, is known as a separate brigade, and when so operating may be supplied with the necessary special and field army troops.

When several field armies are operating in the same theater of war and if conditions so require it, they may be organized into armies.

4. A line of communications is established for each important force about to engage in field operations of an extensive character and supplied from a separate base.

5. **The Coast Artillery.** The coast artillery is charged with the care and use of the fixed and movable elements of land and coast fortifications, including submarine mine and torpedo defense.

COAST DEFENSE.¹

6. The military preparations for the defense of a coast line include:

(1) The construction of permanent fortifications and the provision of submarine defenses for defense against naval attack. Such defenses are manned and operated by coast artillery troops.

(2) The construction of semipermanent fortifications and field works for the protection of the permanent fortifications against capture by small raiding parties landing from ships, or, in the case of an island, in boats from the adjacent shore. Troops assigned to this duty are known as coast artillery supports. They may be troops of the coast artillery or troops of the mobile army. (C. F. S. R., No. 3, June 22, 1915.)

(3) Divisions and field armies concentrated and held at strategic centers of value with reference to the coast line. (C. F. S. R., No. 1, Mar. 20, 1915.)

OVERSEA DEPARTMENTS.

7. The commander of an oversea department is charged with its defense, and directs the operations of both the troops of the mobile army and those of the Coast Artillery serving therein. (See also paragraph 258.) (C. F. S. R., No. 2, Apr. 24, 1915.)

TABLES OF ORGANIZATION.

8. The details of organization, the amounts and kinds of transportation, and the factors on which the allowance of transportation is based, are fixed in the Tables of Organization, United States Army.

¹ See paragraph 252, subparagraph 5.

PART II.

OPERATIONS.

ARTICLE I.

INFORMATION.

GENERAL PRINCIPLES.

9. Military Information. Military information may be considered under two general heads, namely, (1) that collected by the General Staff in time of peace; (2) that obtained by troops in the field after the outbreak of hostilities. The former relates to the geography, resources, and military strength of the various nations, and enables the War Department to decide upon the size of an army or expedition, the proportion of the different arms, character of clothing, equipment, etc., that may be necessary in the event of war. The latter relates to the theater of operations and to the position, strength, intentions, etc., of the enemy in the field, and is absolutely essential to enable a commander properly to estimate the situation.

Information in the field is obtained from various sources—higher commanders, adjoining troops, inhabitants, newspapers, letters, telegraph files, prisoners, deserters, spies, maps, and reconnaissances. Knowledge of the terrain, always essential to a correct understanding of the situation, is obtained from a careful study of available maps, supplemented by thorough reconnaissance.

All information of the enemy and of the theater of operations is sent to the intelligence section of the general staff group of headquarters of units larger than a brigade (par. 261). This section weighs and classifies the information brought in and supervises the preparation of the necessary field maps.

An efficient secret service is organized as soon as practicable.

10. In hostile territory influential persons, especially those supposed to be active in the enemy's cause, may be seized and their persons and houses searched. Letters and newspapers in post offices and files in telegraph offices are carefully examined and anything of importance sent to higher authority. Matter not of importance is replaced, if time permits; if not, the whole is sent to headquarters. Local maps of recent date may be of great value.

When reliable information of the enemy can not be obtained, it is assumed that he will act with good judgment.

Information received by any person in the military service, and the action taken thereon, must be promptly reported to the proper military superior.

Unless instructions have been given to spread false information, all persons connected with the military service are forbidden to discuss the military situation, plans, movements, etc., with, or in the presence of, civilians of any age, sex, or nationality.

RECONNAISSANCE.

11. Reconnaissance is the military term used to designate the work of troops or individuals when gathering information in the field. Reconnaissance begins as soon as the theater of possible operations is entered and continues through-

out the campaign. No matter what other sources of information of the enemy may be available, reconnaissance must be depended upon to obtain the information upon which all tactical movements of troops should be based.

12. By Aero Squadron. In forces of the strength of a division, or larger, the aero squadron will operate in advance of the independent cavalry in order to locate the enemy and to keep track of his movements. Contact with the enemy once gained will be maintained thereafter continuously.

13. By the Cavalry. Reconnaissance in the theater of operations is best made by the cavalry, which from the beginning of the campaign seeks to determine the enemy's strength and dispositions. It protects its own army against surprise, screens its movements, and insures the safety and success of the troops of other arms. The defeat of the hostile cavalry and its expulsion from the field are usually the best means to this end. As the opposing armies draw near each other, the cavalry endeavors to secure control of the ground between and bends every effort to that close and continuous reconnaissance of the enemy's forces that is vital to the success of the entire campaign.

As a rule, only general instructions are given to a leader of independent cavalry. It is usually sufficient to indicate the country to be reconnoitered, invite attention to specially important localities, and point out the extent of the daily advance of the field force. He is generally in telegraphic communication with the supreme commander, and keeps him constantly informed of the situation at the front. In the absence of telegraphic facilities, he reports according to the circumstances, sending his messages by the divisional cavalry when practicable.

14. By Independent Cavalry. Reconnaissance by the independent cavalry will give, in a general way, the enemy's location for several hours, or even days, preceding contact of the main bodies. If this cavalry is strong enough to defeat the enemy's cavalry, it will be enabled to locate the hostile infantry and artillery and to determine their approximate strength. If weaker than the enemy's cavalry, it must rely upon the work of strategical and tactical patrols to obtain detailed information of the enemy, or it must be assisted by the other arms. In the latter case the advance guard of the main body will afford this assistance by stopping the advance of the enemy's cavalry and compelling him to deploy his infantry and artillery, in part at least.

On very wide fronts an army is generally covered by two or more bodies of independent cavalry; each is informed of the extent of ground it is to cover and keeps in touch with the neighboring cavalry.

15. By Divisional Cavalry. The cavalry attached to an infantry division is called divisional cavalry. When the division is operating independently, the divisional cavalry acts also as independent cavalry; when the division forms part of a field army, the divisional cavalry is known as advance cavalry. It usually enters into the composition of advance, flank, rear, and outpost guards, and when so employed is known as advance guard, flank guard, rear guard, and outpost cavalry, as the case may be, and performs such reconnaissance as the situation demands.

Reconnaissance by the advance cavalry is such as will afford security to the main body. It prevents surprise to any part of the force. If stronger than the cavalry opposing it, the advance cavalry will obtain valuable information of the enemy before the infantry and artillery of the advance guard become engaged. But where the cavalry, for any reason, fails in this purpose, the work must be done by the other arms, without, however, so dispersing battle units that they will be outside of supporting distance of each other.

Though its reconnaissance is more restricted than that of the independent cavalry, advance cavalry goes more into detail and gathers information as to

the resources of the country, roads, camping places, etc. As combat becomes imminent and the independent cavalry is drawn off to a flank, the advance cavalry must be especially active to guard against surprise, gain information of the enemy's movements, and prevent incursions of his patrols.

When there is independent cavalry in front, the divisional cavalry maintains connection therewith; when not, it reconnoiters far to the front and gains touch with the enemy if possible, operating in a manner similar to that of independent cavalry of larger units.

16. By Infantry. The extent of the infantry reconnaissance will not be so great where the aero squadron and the cavalry are able to perform this service efficiently, as it must be in the absence of efficient reconnaissance by the other arms. In no case, however, can infantry reconnaissance, preceding or during combat, be dispensed with. Infantry and artillery can not rely wholly upon cavalry or aero reconnaissance, but must conduct such close-in reconnaissance as is necessary for security and to determine their immediate dispositions.

In the absence of cavalry, reconnaissance at a distance is made by infantry or scouts specially detailed for that purpose.

If a command is weak in cavalry, or the country is rough and broken, it may be advisable to use reconnoitering detachments composed of both infantry and cavalry.

17. Reconnaissance Immediately Preceding Combat. Reconnaissance preceding deployment for action is of vital importance. On the information of the enemy and of the terrain obtained through proper reconnaissance combat orders are based. How complete such reconnaissance may be will depend upon the time that can be spared for the purpose without losing the initiative in action, upon the character of information desired, and upon the efficiency of the measures taken by the enemy to conceal his dispositions.

18. The strength of the force employed in this reconnaissance is determined by the character of the information desired and by the nature of the hostile screen. In every instance it must be strong enough to penetrate the enemy's screen, and where detailed information of the enemy's position is desired, to cause the deployment of the enemy's infantry and the opening of fire by part, at least, of his artillery. In the latter case the combat reconnaissance may develop into the opening phase of the attack, and care must be taken that enough troops are kept in hand to change completely the course of the attack, if the information obtained calls for such action.

19. In any advance toward the enemy the advance guard must be relied upon for such reconnaissance as is necessary, either to supplement the reconnaissance of other troops or to replace it when other reconnaissance is wholly wanting. It is important that the advance guard force the enemy to disclose his position and strength as early as possible. A strong force of artillery is most useful for this purpose, as it clears up the situation in a way that can not be done by other troops, except by incurring heavy losses.

In encountering the enemy in a position that is to be developed the advance guard must continue, by means of the advance cavalry, the reconnaissance begun by the independent cavalry or by other troops. The enemy will not disclose his position, particularly that of his artillery, until forced to do so by a determined reconnaissance which may call for the use of infantry and artillery in force before it can accomplish its purpose. The advance of the infantry will finally force back all advanced detachments of the enemy and bare his main position. The artillery will assist in this advance by opening fire on any targets of importance that the infantry advance uncovers. Finally, the enemy's artillery will be obliged to disclose its position by opening fire, either to stop the advance of the opposing infantry or to keep down the

opposing artillery fire. The information thus gained of the enemy's position and strength will enable the leader to form his plan of attack.

In the *rencontre* efficient measures for security on the march must be relied upon to take the place of the more complete reconnaissance which the necessity of obtaining the initiative in deployment forbids. In an attack on a position that the enemy has had time to take up deliberately and to strengthen, time is not so important an element, and the reconnaissance preceding deployment must be as complete as may be necessary to determine the enemy's strength and dispositions.

20. Reconnaissance During Combat. The infantry will keep up during combat such reconnaissance as will enable it to keep contact with the enemy, acquaint itself with the terrain in its front, and especially to protect its flanks and rear. The field artillery continues the reconnaissance called for by its tactical employment.

21. During combat the aero squadron will operate around the flanks and over and to the rear of the enemy's position, for the purpose of reporting his dispositions, the approach of reinforcements, or the beginning of his withdrawal from action.

22. During combat the cavalry will conduct an extended reconnaissance around the flanks and to the rear of the enemy's position, but such reconnaissance must be conducted by small detachments in order that the main body of the cavalry may be kept close at hand to aid in obtaining success in the main battle.

23. Reconnoitering Patrols.¹ The chief duty of reconnoitering patrols is to gather information. They habitually seek safety in concealment or flight, fighting only when their mission demands it. The most skillful patrolling is where patrols accomplish their mission and return without being discovered by the enemy.

24. The commander determines the number and strength of patrols and when they are to be sent out. It is a cardinal principle to send out only such patrols as insure effective reconnaissance. Patrols vary in strength from two or three men to a company. Small patrols have great mobility, are easily concealed, and do not draw heavily on the fighting strength. In hostile territory, or when resistance is expected, stronger detachments are required. These cover themselves with small patrols of two to four men, the remainder acting as support.

The officer sending out a patrol verifies the detail, designates a second in command and gives the necessary instructions. Horses of conspicuous color and those that neigh when alone should not be sent. Precautions are taken to avoid the glitter and rattle of weapons and equipments.

The orders or instructions for a patrol, or for any detachment going on reconnaissance, must state clearly where the enemy is or is supposed to be, what information is desired, what features are of special importance, the general direction to be followed, whether friendly patrols are likely to be encountered, and where messages are to be sent or the patrol is to report. Important and comprehensive instructions should be in writing, but precautions against capture of papers must be taken. An officer sending out a patrol must be certain that his orders are understood. Detailed instructions are, as a rule, avoided. When necessary the time of return is stated.

¹The term patrols is used to designate small detachments employed for a variety of purposes, the name of the detachment indicating its duty, as visiting, connecting, combat, exploring, reconnoitering, flanking, harassing, pursuing patrols, etc.

25. Patrol Leaders. Skillful patrolling is the basis of efficient reconnaissance. Patrol leaders are selected with care, officers being detailed for important missions. Patrol leaders should combine the qualities of good health, vigorous physique, keen eyesight, presence of mind and courage, with good judgment, military training, and experience. They should be able to read maps, make sketches, and send clear and concise messages. Officers on such duty often find themselves in positions where the situation must be viewed from the standpoint of a higher commander, and should be able to reason accordingly.

26. Conduct. Patrols exercise the greatest vigilance to prevent discovery.

No normal formation for patrol is or should be prescribed. Under the leader's guidance it moves so as to guard against surprise, usually with point and flankers. To extend the sphere of its observation, still smaller patrols (one or two men) may be sent out for short distances, communication with the leader being maintained by signals. Whatever the formation adopted, it should favor the escape of at least one man in case of surprise.

In questioning civilians caution is observed not to disclose information that may be of value to the enemy. Strangers are not allowed to precede the patrol. Patrol leaders are authorized to seize telegrams and mail matter, and to arrest individuals, reporting the facts as soon as possible.

27. Indications of the Enemy. Nothing should escape the observation of the patrol. The slightest indication of the enemy should be reported to the leader at once. On roads and in abandoned camps, signs are often found which indicate the number, character, and condition of the enemy, and the direction in which he is marching. Abandoned clothing or equipage may bear marks indicating organizations.

A thick and low cloud of dust indicates infantry; a high and thin cloud, cavalry; a broken cloud, artillery or wagon trains. The size of the command and direction of march may be roughly estimated by the dust, but the effect of wind must be considered.

The strength of a body of troops may be estimated from the length of time it takes to pass a given point. Assuming that infantry in column of squads occupies half a yard per man, cavalry in column of fours 1 yard per trooper, and artillery in single column 20 yards per gun or caisson, a given point would be passed in one minute by about—

175 infantry.

110 cavalry, at walk.

200 cavalry, at trot.

5 guns or caissons.

For troops in column of twos, take one-half of the above estimates.

28. When it is certain that the enemy has been discovered, that fact is promptly reported.

The exact location of the enemy—whether deployed, marching, or in camp—his strength, and the arms of service are next ascertained and reported. It is often difficult to decide whether the troops discovered are the main body or merely the advance guard or outposts. The rule is to observe the main body; therefore it may be necessary to obtain a view from a position in rear of the covering troops. This is done by going around or by breaking through, returning over different ground to avoid ambuscade.

29. Signals. In addition to the usual signals prescribed in drill regulations, the following should be clearly understood by members of a patrol:

Enemy in sight in small numbers, hold the rifle above the head horizontally; enemy in force, same as preceding, raising and lowering the rifle several times; take cover, a downward motion of the hand.

Other signals may be agreed upon before starting, but they must be familiar to the men; complicated signals are avoided.

30. Employment of Air Craft. Military air craft of all kinds will be employed under the direction of the commander of the forces to which they are assigned and the immediate control of the officer commanding the aero organization.

Balloons are classed as free, captive, and dirigible. Free balloons may be used to convey information from besieged places, the return message being sent by radiotelegraphy, carrier pigeons, or otherwise. Free balloons are of little use for any other service, and are not very dependable on account of their uncertainty of movement. Captive balloons may be used for tactical reconnaissance, for observation of artillery fire, and for signaling. Communication from a captive balloon to the ground should be by telephone.

Large dirigible balloons are of practical value for strategical reconnaissance and to travel great distances; they are also suitable for carrying a number of observers, radio equipment, machine guns, and considerable weight of explosives. Aeroplanes are more dependable for field service with a mobile army than dirigible balloons, as the latter require substantial shelter from winds while on the ground.

31. Reconnaissance by aeroplane includes strategical and tactical reconnaissance and the observation of artillery fire. Aeroplanes are also used to prevent hostile aerial reconnaissance.

Strategical reconnaissance by aeroplane is effective within a radius of 150 miles from the starting point, and is for the purpose of determining the position, strength, and direction of advance of the large elements of an enemy's forces, and also the character of the roads, railroads, streams, and the general military topography of the theater of operations.

Tactical reconnaissance by aeroplane is used both in attack and defense. It is extended in its nature and does not involve minute examinations of very small localities or detachments. It is designed to discover turning and enveloping movements, the position and strength of the enemy's general reserve, artillery positions and movements of cavalry; also, from the movement of combat or field trains behind an enemy's position information may be gained as to whether certain parts of the line are being weakened or strengthened, or whether a retreat is contemplated.

For observation of fire of field artillery, aeroplanes are usually assigned to the artillery commander. They are especially useful against targets which are invisible from the position of the artillery officer conducting the fire.

Aeroplanes are safe from hostile fire at altitudes of 4,000 feet or more.

The results of reconnaissance are reported by radiotelegraphy, signals, and the dropping of messages.

MESSAGES, REPORTS, MAPS, AND WAR DIARIES.

32. In the field the term "message" is generally applied to written information sent by messenger or wire. Such messages should be brief and clear, resembling telegrams. The source of the information contained in messages is always given, the writer carefully separating what he has actually seen himself from that received secondhand. Most of the rules adopted to secure clearness in orders apply equally to messages.

33. A report is a more or less formal account of some enterprise, undertaking, or event, such as a march, reconnaissance, battle, etc. A report is usually drawn up at comparative leisure, is often the supplement and expansion of short messages, and thus possesses the value of greater detail.

34. In the field the maps available for general use are on a small scale.

Those of our own country are prepared by the Geological Survey on a scale of 1:62500 (approximately 1 inch to the mile), with 20-foot contours. These maps are supplemented by field maps or sketches prepared from day to day. For facility in reading, military maps are made according to a uniform system of scales and contour intervals, as follows: One inch to 1 mile, V. I. 60 feet; 3 inches to 1 mile, V. I. 20 feet; 6 inches to 1 mile, V. I. 10 feet; 12 inches to 1 mile, V. I. 5 feet.

As a rule, road sketches are made on a scale of 3 inches to 1 mile, V. I. 20 feet; position and outpost sketches, 6 inches to 1 mile, V. I. 10 feet. The 1-inch map is used for extended operations; the 12-inch map for the war game or for the discussion of operations at maneuvers, and in siege operations.

As sketches must be made rapidly, often on horseback, unnecessary conventional signs are omitted. Sketches are useful to supplement messages and to elucidate reports of campaigns and battles.

35. A war diary is a record of events kept in campaign by each battalion and higher organization, each ammunition, supply, engineer, and sanitary train. Entries are made daily and should form a concise history of the military operations. A day comprises 24 hours covered by the date.

Each day's record will commence with a march table, or statement of the operations or location of the organization, including an account of weather, roads, camp, health of troops, etc., and a statement of the supply of ammunition, rations, and forage. This will be followed by a chronological record of events, including time and place of issue and receipt of orders and messages, with a copy or a synopsis of contents.

It is of special importance that the exact hour and place at which movements are begun and ended, and orders or important messages sent or received, be noted. After an engagement, the war diary will contain a report of losses and captures and will be accompanied by a sketch showing the positions of the command at the most important phases.

Each day's record will be attested by the commander or by the adjutant; and, with attached copies of orders and messages sent and received, will be forwarded daily to the next higher commander, who, as soon as practicable after the receipt thereof, will forward the war diary direct to the War Department.

Commanders of armies, or of units not components of a higher command, will forward their war diaries direct to the War Department.

TRANSMISSION OF INFORMATION.

36. Information is transmitted as follows:

1. By wire (telegraph, buzzer, telephone).
2. By visual signaling (flag, helio, night lamp).
3. By radiotelegraph.
4. By messenger (foot, mounted, cycle, motor car, flying machine).

Information over considerable distances is usually transmitted by wire or radiotelegraph. For short distances,² and when other means are not available, information is carried by messenger. When messages are sent by wire or radiotelegraph they are always handed the operator in writing. The telephone is not as accurate as the telegraph, and when used the parties concerned do the talking, if practicable. All available means are utilized to facili-

² For instance, at urgent speed and for distances up to about half a mile, a mounted messenger can deliver a message of 10 words in less time than the same can be delivered by wire.

tate the transmission of information, and it is the duty of all officers to assist in the transmission of orders and messages.

It is frequently advisable to send information not only to the proper superior, but to neighboring troops as well. When copies of messages are so sent the fact is noted upon each. In large commands information as to the situation of neighboring troops is often of great importance. In such cases "information officers" with messengers are sent to accompany such troops. These officers send to their own commanders all information of military importance to them.

Messages carried by messenger are usually inclosed in envelopes properly addressed. The envelope when not marked "confidential" is left unsealed, so that commanders along the line of march may read the contents. Upon the envelope is written the name of the messenger, his time of departure, and rate of speed. The latter is indicated as follows: Ordinary, rapid, or urgent. Ordinary means about 5 miles an hour for a mounted man; rapid, about 7 or 8 miles an hour; and urgent, the highest speed consistent with certainty of arrival at destination. The recipient notes the time of receipt upon the envelope and returns the latter to bearer.

When there is danger of falling into the hands of the enemy, messages are sent in cipher.

Important information is sent by two or more messengers, depending upon the dangers of the road. It may be advisable to send duplicate messages by different routes. Messengers are informed before starting of the purport of the message, and where they are to report after it is delivered.

When the usual means of communication can not be established, or fail to work, relay lines of mounted men may become necessary. When such lines are established, connecting posts are generally placed on the roads at well-marked points, such as crossroads, bridges, etc. The distance between posts depends upon the rapidity of transmission desired, the number of men available, and the location of suitable stations. The usual distance is from 5 to 10 miles. The strength of such posts varies from six men and a noncommissioned officer to half a troop. A record is kept at each post of all communications received and transmitted.

ARTICLE II.

SECURITY.

GENERAL PRINCIPLES.

37. Security embraces all those measures taken by a command to protect itself from observation, annoyance, or surprise by the enemy.

Ordinarily this security is provided in part by the independent cavalry, which, operating far to the front, checks the opposing cavalry and sends in timely information of the movements of the enemy. But as a command is not always preceded by independent cavalry, and as this cavalry can not always prevent sudden incursions of the enemy or discover his patrols, additional security becomes necessary. This is obtained by covering the immediate front of the command with detachments.

On the march these detachments are called advance, flank, or rear guards; in camp or bivouac they are called outposts.

The object of the former is to facilitate the movement of the main body and to protect it from surprise and observation; the object of the latter is to secure the camp or bivouac against surprise and to prevent an attack upon it before the troops can prepare to resist.

On the march these detachments facilitate the advance of the main body by promptly driving off small bodies of the enemy who seek to harass or delay it; by removing obstacles from the line of advance; by repairing roads, bridges, etc., thus enabling the main body to advance uninterruptedly in convenient marching formations.

They protect the main body by preventing the enemy from firing into it when in close formation; by holding the enemy and enabling the main body to deploy before coming under effective fire; by preventing its size and condition from being observed by the enemy; and, in retreat, by gaining time for it to make its escape or to reorganize its forces.

As the principal duty of these bodies is the same, viz., that of protecting the main body, there is a general similarity in the formations assumed by them. There is (1) the cavalry covering the front; next (2) a group, or line of groups, in observation; then (3) the support, or line of supports, whose duty is to furnish the observation groups, and check the enemy pending the arrival of reinforcements; still farther in rear is (4) the reserve.

38. The march order of the whole command should explain the situation, and among other things, detail the commander and troops for each covering detachment. It should specify the route to be taken and the distance to be maintained between the main body and its covering detachments. It should order such reconnaissance as the commander specially desires to have made.

The order of the commander of a covering detachment should clearly explain the situation to subordinates, assign the troops to the subdivisions, prescribe their distances, and order such special reconnaissance as may be deemed necessary in the beginning.

39. An advance or flank guard commander marches well to the front and, from time to time, orders such additional reconnaissance or makes such changes in his dispositions as the circumstances of the case demand.

In large commands troops from all arms are generally detailed, the proportion from each being determined by the tactical situation; but commanders detail no more troops than the situation actually requires, as an excessive amount of such duty rapidly impairs the efficiency of a command. As a general rule troops detailed on the service of security vary in strength from one-twentieth to one-third of the entire command, but seldom exceed the latter. When practicable, the integrity of tactical units is preserved.

In mixed commands infantry usually forms the greater part of the troops detailed to the service of security. Cavalry is assigned to that duty whenever advantage can be taken of its superior mobility. The kind and amount of artillery are determined by circumstances.

Engineer, signal, and sanitary troops are detailed when required.

The field trains of troops on this duty generally remain with the field train of the command, but if conditions permit they may join their organizations.

Troops on the service of security pay no compliments; individuals salute when they address, or are addressed by, a superior officer.

ADVANCE GUARDS.

40. An advance guard is a detachment of the main body which precedes and covers it on the march.

Its duties are:

1. To guard against surprise and furnish information by reconnoitering to the front and flanks.

2. To push back small parties of the enemy and prevent their observing, firing upon, or delaying the main body.

3. To check the enemy's advance in force long enough to permit the main body to prepare for action.

4. When the enemy is encountered on the defensive, to seize a good position and locate his lines, care being taken not to bring on a general engagement unless the advance-guard commander is empowered to do so.

5. To remove obstacles, repair the road, and favor in every way possible the steady march of the column.

41. Strength and Composition. Subject to variation according to the situation, one-twentieth to one-third of a command may be assumed as a suitable strength for the advance guard. The larger the force, the larger in proportion is the advance guard, for a large command takes relatively longer to prepare for action than a small one. In large commands it is usually composed of all arms, the proportions depending on the nature of the work, character of the country, etc. In open country it should be strong in cavalry and field artillery, but artillery is seldom assigned to the advance guard of a command not larger than a brigade. In such cases, however, when there is artillery with a command, an officer of that arm usually accompanies the advance guard for purposes of artillery reconnaissance. In swampy country or jungle it may be formed of infantry alone. When not preceded by independent cavalry, the advance guard must, as a rule, be strong in cavalry; in such cases the commander determines whether to attach all of the divisional cavalry to the advance guard, or to retain a part for some special service.

Machine guns materially increase the effectiveness of an advance guard. They are useful in holding bridges, defiles, etc., until reinforcements can be brought up.

Engineers are usually attached to an advance guard to remove obstacles, repair roads, etc. Circumstances may require a bridge train to be attached.

The supreme commander generally retains control of the signal troops, and establishes such lines of information as he deems necessary. However, when the nature of the country favors communication by signaling, signal troops may be attached to the advance guard.

An ambulance company usually accompanies large advance guards.

42. Distance from Main Body. The distance at which the advance guard precedes the main body, or the main body follows the advance guard, is stated in the march order. In small commands, where there is no difficulty in keeping touch with the main body, the march order generally requires the advance guard to regulate its march on the main body; but where the advance guard is large, or moves at a considerable distance in advance of the main body, the latter regulates its march on the advance guard.

While the distance between these two bodies should be great enough to prevent needless interruptions in the march of the main body, and to give the latter time to deploy should the enemy be encountered, it should never be so great that timely support of the advance guard becomes impracticable.

43. Advance Guard Commander. On receipt of the march order the advance guard commander estimates the situation and, at the proper time, issues the advance-guard order. This order divides the advance guard into its tactical components (advance cavalry, support, etc.), and gives the necessary instructions for each.

The advance-guard commander is mounted and goes wherever he deems his presence necessary, though his habitual station is at the head of the reserve, or with the support when there is no reserve. He conducts the advance so as not to interrupt the steady march of the main body, and, when ordered to move at a certain distance in front of the latter, maintains the necessary connection therewith. He bears constantly in mind the duties of an advance

guard, and studies the ground with a view to tactical dispositions should the enemy be encountered.

44. Distribution of Troops. An advance-guard order generally prescribes the following distribution of troops:

Advance cavalry.

Support.

Reserve.

The manner in which the advance-guard cavalry is employed depends upon the situation. Its proper place is in the direction of the enemy, and generally all or the greater part is used as advance cavalry. If weak in numbers, it may be assigned to the support.

45. Advance Cavalry. The advance cavalry is that part of the advance-guard cavalry preceding the support. It reconnoiters far enough to the front and flanks to guard the column against surprise by artillery fire, and to enable timely information to be sent to the advance-guard commander. If preceded by independent cavalry, the advance cavalry maintains connection therewith, except when prevented by uncontrollable reasons; if not preceded by independent cavalry, it pushes well out and endeavors to find the enemy, performing to a limited extent the functions of independent cavalry. Its commander should be bold, energetic, and capable; he sees that his command is supplied with articles required by patrols.

46. Support. Following the advance cavalry is the support, varying in strength from one-fourth to one-half of the advance guard. In mixed commands it consists of infantry, to which engineers may be attached. If there is no advance cavalry, some cavalry should be attached to the support for reconnoitering duty.

As the support moves out it sends forward an advance party several hundred yards, the distance varying with the terrain and the size of the command.

The advance party supplements the work of the advance cavalry, reconnoitering to the front and flanks to guard the support against surprise by effective rifle fire. The patrol preceding the advance party on the line of march is called the point, and is commanded by an officer or an experienced noncommissioned officer.

With the advance cavalry in front but little reconnoitering by infantry is necessary, and the advance party is relatively small—one-eighth to one-third of the support. If there is no advance cavalry, the advance party is made stronger (about one-half of the support) and the flanks are guarded, if necessary, by additional patrols sent out from the support and even from the reserve.

The support commander ordinarily marches with the advance party, but goes wherever needed. He sees that the proper road is followed; that guides are left in towns and at crossroads; that necessary repairs are made to roads, bridges, etc., and that information of the enemy or affecting the march is promptly transmitted to the advance-guard commander. He endeavors promptly to verify information of the enemy.

47. Reserve. The reserve follows the support at several hundred yards distance. It consists of the remainder of the infantry and engineers, the artillery, and the ambulance company. The artillery usually marches near the head of the reserve, the engineers (with bridge train, if any) and special troops at the rear.

48. Reconnaissance. In conducting the reconnaissance the patrols are, as a rule, small—from two to six men. If additional protection is necessary, a flank guard covers the threatened flank. The flanking patrols, whether of the advance cavalry or advance party, are sent out to examine the country wherever the enemy might be concealed. If the nature of the terrain permits, these

patrols march across country or along roads and trails paralleling the march of the column. For cavalry patrols this is often possible; but with infantry patrols and even with those that are mounted, reconnaissance is generally best done by sending the patrols to high places along the line of march to overlook the country and examine the danger points. These patrols report or signal the results of their observations and, unless they have other instructions, join their units by the most practicable routes, other patrols being sent out as the march proceeds and as the nature of the country requires.

Deserters, suspicious characters, and bearers of flags of truce,¹ the latter blindfolded, are taken to the advance guard commander.

Civilians are not permitted to precede the advance guard.

Communication between the fractions of an advance guard and between the advance guard and main body is maintained by wire, messenger service, or signals.

ADVANCE GUARD OF A SMALL COMMAND.

49. In forming the advance guard of a command smaller than a brigade, the foregoing distribution is modified, depending upon the situation. A company or troop usually sends forward only a point, a battalion or squadron, an advance party; but a battalion or squadron at war strength should put a company or troop in the advance guard and a regiment should put a battalion or squadron, if an enemy is liable to be met. Whenever the advance guard is less than a battalion, there is no reserve.

50. **Advance Guard of a Cavalry Command.** Cavalry marching independently adopts formations for its advance guard similar to those described above, though the distances are generally greater.

ADVANCE GUARD OF A DIVISION (INDEPENDENT).

51. Assuming that the advance guard consists of one brigade of infantry, one squadron, one battalion of artillery, one company of engineers, and an ambulance company, the distribution (with independent cavalry) might be made as follows:

Independent cavalry.

(One or two marches.)

Advance guard.

Advance Cavalry. One squadron with point and flanking patrols; communication maintained with independent cavalry. (Point of advance cavalry to point of advance party at least 4 or 5 miles.)

Support. One regiment of infantry and mounted detachment of engineers. The support sends forward its advance party, one company, about 500 yards; the advance party is preceded from 300 to 500 yards by its point.

(About 1,000 yards.)

Reserve—in Order of March. One battalion infantry; one battalion artillery; two battalions of infantry; one regiment infantry; company engineers (less detachment); ambulance company. (There may be a detachment of signal troops, though the division commander generally retains control of those troops.)

(One to two miles.)

Main body.

¹ See Rules of Land Warfare, U. S. Army relative to reception of bearers of flags of truce, etc.

SECURITY FOR THE HEAD OF A RETREATING FORCE.

52. In retreat a column is preceded by a body of troops designated "leading troops," whose principal duty is to clear the road of obstacles and facilitate the withdrawal of the command. The strength and composition of such troops are determined by the situation. Engineers are generally necessary; cavalry is assigned to this duty to afford protection against guerillas or small hostile parties that may have succeeded in reaching the rear of the command. If the rear is seriously threatened, the leading troops march practically as an advance guard.

FLANK GUARDS.

53. The flanks of a column are protected in part by the advance guard, which carefully examines the ground on both sides of the line of march. It may be necessary, however, to provide additional security for a flank threatened by the enemy. This is done by sending a detachment, called a flank guard, to cover the exposed flank.

Flank guards vary in size from patrols to detachments of all arms. Their composition and formation depend upon the situation, though they are generally strong in cavalry on account of the necessity for rapid reconnaissance and communication. They may be composed exclusively of that arm, but when strong positions are to be held, or prolonged resistance to the enemy is expected, troops of all arms are necessary. Their duties are similar to those of an advance guard. They keep in constant touch with the column either by wire, signal, or messenger service.

Flank guards may be sent out by an advance guard (made strong for that purpose) or by the main body; they march in a direction generally parallel to the column, keeping abreast of the unit from which detailed, or are sent to occupy favorable positions on a threatened flank, remaining there until the whole column has passed. In the latter case they join the rear guard and return to their commands at the end of the day's march. As a flank guard usually marches a greater distance than the body from which detailed, it is generally sent out in advance.

54. **Flank Marches.** When the main body executes a flank march near the enemy, the flank guard becomes a body of great importance. If the flank march is due to a considerable change of direction in the march of the column, it is generally advisable to convert the advance guard into a flank guard, and detail a new advance guard to precede the column. If the troops making the flank march start from camp, a separate flank guard will have to be provided.

In long columns the large units, such as regiments, will provide their own flank observation.

REAR GUARDS.

55. The rear guard is charged with the important duty of covering the retreat.

When a commander decides to retreat, he issues the necessary order. During a retreat the outpost for the night usually forms the rear guard of the following day.

56. **Strength and Composition.** The strength of a rear guard depends upon the nature of the country and the strength and character of the pursuing force. It can not, like the advance guard, count on the support of the main body.

Machine guns are especially useful in the passage of defiles and in covering the crossings of rivers.

Engineers and ambulance companies are usually assigned to rear guards.

The troops of a rear guard are selected from those that have had previous local successes, or have suffered little loss and are comparatively fresh.

57. Distribution of Troops. The proximity and conduct of the enemy control, to a large extent, the formation of a rear guard. When it is not necessary to withdraw in deployed lines, the greater part of the rear guard marches on the road in column of route, taking up a formation resembling that of an advance guard faced to the rear. The distribution of troops is therefore similar to that of an advance guard, namely:

Reserve.

Support.

Rear cavalry.

The rear cavalry is that portion of the rear guard cavalry following the support. The support, as in an advance guard, is divided into two parts; that part nearest the enemy is called the rear party and marches with a rear point. Mounted engineers usually accompany the support and may be attached to the rear party. Where the cavalry is of sufficient strength and has horse artillery attached, the entire rear guard, excepting the reserve, may be composed of that arm. The reserve is composed mainly of infantry and artillery.

58. Distances. The distances of the rear guard from the main body and between the fractions of the rear guard are about the same as in the case of an advance guard. If marching at night, the rear guard draws nearer the main body.

REAR GUARD OF AN ADVANCING FORCE.

59. If there is a possibility that the rear of the column may be attacked, a rear guard of suitable strength and composition is provided. If the hostile attempts are confined to guerillas, marauders, etc., the guard should be strong in cavalry. Its conduct is practically the same as that of the rear guard of a retreating force. It generally marches in rear of the trains, those organizations following the combatant troops without distance.

OUTPOSTS.

60. The size and disposition of the outpost will depend upon many circumstances, such as the size of the whole command, the proximity of the enemy and the situation with respect to him, the nature of the terrain, etc.

A suitable strength may vary from a very small fraction to one-third of the whole force. For a single company in bivouac a few sentinels and patrols will suffice; for a large command a more elaborate outpost system must be provided. It should be no stronger than is consistent with reasonable security.

The most economical protection is furnished by keeping close contact with the enemy by means of outpost patrols, in conjunction with resisting detachments on the avenues of approach.

The outpost should be composed of complete organizations.

61. In a brigade or smaller force on the march toward the enemy, the outpost is generally formed from the advance guard, and is relieved the following day when the new advance guard crosses the line of outguards. In a retreat, the detail for outpost duty is generally made from the main body. The new outpost becomes the rear guard the following day.

When, as in large forces, an advance and rear guard performs such duty for several days, the outpost, during this period, is furnished by the advance or rear guards.

When the command is small and stationary for several days the outpost is relieved daily. In large commands, the outpost will, as a rule, be relieved at intervals of several days.

62. The positions held by the subdivisions of the outpost should generally be prepared for defense, but conditions may render this unnecessary.

Troops on outpost keep concealed as much as is consistent with the proper

performance of their duties; especially do they avoid appearing on the sky line.

63. Composition. A mixed outpost is composed principally of infantry. The infantry is charged with the duty of local observation, especially at night, and with resisting the enemy long enough for the main body to prepare for action. The cavalry is charged with the duty of reconnaissance, and is very useful in open country during the day.

If the infantry has been severely taxed by marching or fighting, a large part of the outpost may be temporarily formed of cavalry.

When an outpost is detailed from the advance guard, the advance cavalry of the advance guard becomes the advance cavalry of the outpost and continues the work of reconnaissance until recalled for the night.

Artillery is useful to outposts when its fire can sweep defiles or large open spaces and when it commands positions that might be occupied by hostile artillery. The guns are carefully concealed or protected and are usually withdrawn at night.

Machine guns are useful to command approaches and check sudden advances of the enemy.

Engineers are usually attached to an outpost to assist in constructing intrenchments, clearing the field of fire, and opening communications laterally and to the rear.

The supreme commander generally retains control of the signal troops and establishes a line of information to the reserve and from the reserve to each support and important detached post.

It is generally unnecessary to attach any portion of the sanitary train to an outpost, as the equipment of the regimental aid station carried in the sanitary combat train will as a rule be sufficient. If necessary, dressing stations may be established by ambulance companies of the sanitary train in convenient location to the rear of the outpost line.

The field trains of troops on outpost duty generally join their organizations; if an engagement is probable, they may be held in rear.

64. Distribution of Outpost Troops. The outpost will generally be divided into four parts. These, in order from the main body, are the reserve, the line of supports, the line of outguards, and the advance cavalry.

The distances separating these parts, and their distance from the main body, will depend upon the object sought, the nature of the terrain, and the size of the command. There can be no uniformity in the distance between supports and reserve, nor between outguards and supports, even in the same outpost. The avenues of approach and the important features of the terrain will largely control their exact positions.

The outpost of a small force should ordinarily hold the enemy beyond effective rifle range of the main body until the latter can deploy. For the same purpose the outpost of a large force should hold the enemy beyond artillery range.

65. The reserve constitutes the main body of the outpost and is held at some central point from which it can readily support the troops in front or hold a rallying position on which they may retire. The reserve may be omitted when the outpost consists of less than two companies.

The reserve may comprise one-fourth to two-thirds of the strength of the outpost.

66. The supports constitute a line of supporting and resisting detachments, varying in size from a half company to a battalion. They furnish the line of outguards.

The supports are numbered consecutively from right to left. They are placed at the more important points on the outpost line, usually in the line on which resistance is to be made in case of attack.

As a general rule, roads exercise the greatest influence on the location of supports, and a support will generally be placed on or near a road. The section which it is to cover should be clearly defined by means of tangible lines on the ground and should be such that the support is centrally located therein.

67. The outguards constitute the line of small detachments farthest to the front and nearest to the enemy. For convenience they are classified as pickets, sentry squads, and cossack posts. They are numbered consecutively from right to left in each support.

68. A picket is a group consisting of two or more squads, ordinarily not exceeding half a company, posted in the line of outguards to cover a given sector. It furnishes patrols and one or more sentinels, double sentinels, sentry squads, or cossack posts for observation.

Pickets are placed at the more important points in the line of outguards, such as road forks. The strength of each depends upon the number of small groups required to observe properly its sector.

69. A sentry squad is a squad posted in observation at an indicated point. It posts a double sentinel in observation, the remaining men resting near by and furnishing the reliefs of sentinels. In some cases it may be required to furnish a patrol.

70. A cossack post consists of four men. It is an observation group similar to a sentry squad, but employs a single sentinel.

At night it will sometimes be advisable to place some of the outguards or their sentinels in a position different from that which they occupy in the daytime. In such case the ground should be carefully studied before dark and the change made at dusk. However, a change in the position of the outguard will be exceptional.

71. Sentinels are generally used singly in daytime, but at night double sentinels will be required in most cases. Sentinels furnished by cossack posts or sentry squads are kept near their group. Those furnished by pickets may be as far as 100 yards away.

Every sentinel should be able to communicate readily with the body to which he belongs.

Sentinel posts are numbered consecutively from right to left in each outguard. Sentry squads and cossack posts furnished by pickets are counted as sentinel posts.

72. By day, cavalry reconnoiters in advance of the line of observation. If there is independent cavalry in front, the advance cavalry maintains connection therewith and reconnoiters only where necessary. At night, however, that the horses may have needed rest and because the work can be better done by infantry, the greater part of the cavalry is usually withdrawn in rear of the supports, generally joining the reserve, small detachments being assigned to the supports for patrolling at a distance.

With efficient cavalry in front, the work of the infantry on the line of observation is reduced to a minimum.

General instructions for the advance cavalry are given by the outpost commander, but details are left to the subordinate.

73. Instead of using outguards along the entire front of observation, part of this front may be covered by patrols only. These should be used to cover such sections of the front as can be crossed by the enemy only with difficulty and over which he is not likely to attempt a crossing after dark.

In daylight much of the local patrolling may be dispensed with if the country can be seen from the posts of the sentinels. However, patrols should frequently be pushed well to the front unless the ground in that direction is exceptionally open.

74. Patrols or sentinels must be the first troops which the enemy meets, and each body in rear must have time to prepare for the blow. These bodies cause as much delay as possible without sacrificing themselves, and gradually retire to the line where the outpost is to make its resistance.

Patrols must be used to keep up connection between the parts of the outpost except when, during daylight, certain fractions or groups are mutually visible. After dark this connection must be maintained, throughout the outpost except where the larger subdivisions are provided with wire communication.

75. In addition to ordinary outguards, the outpost commander may detail from the reserve one or more detached posts to cover roads or areas not in the general line assigned to the supports.

In like manner the commander of the whole force may order detached posts to be sent from the main body to cover important roads or localities not included in the outpost line.

The number and strength of detached posts are reduced to the absolute needs of the situation.

76. **Establishing the Outpost.** The outpost is posted as quickly as possible, so that the troops can the sooner obtain rest. Until the leading outpost troops are able to assume their duties, temporary protection, known as the march outpost, is furnished by the nearest available troops.

77. The halt order of the commander, besides giving the necessary information and assigning camp sites to the parts of the command, details the troops to constitute the outpost, assigns a commander therefor, designates the general line to be occupied, and, when practicable, points out the position to be held in case of attack.

The outpost commander, upon receipt of this order, should issue the outpost order with the least practicable delay. In large commands it may often be necessary to give the order from the map, but usually the outpost commander will have to make some preliminary reconnaissance, unless he has an accurate and detailed map.

The order gives such available information of the situation as is necessary to the complete and proper guidance of subordinates; designates the troops to constitute the support; assigns their location and the sector each is to cover; provides for the necessary detached posts; indicates any special reconnaissance that is to be made; orders the location and disposition of the reserve; disposes of the train if same is ordered to join the outpost; and informs subordinates where information will be sent.

Generally it is preferable for the outpost commander to give verbal orders to his support commanders from some locality which overlooks the terrain. The time and locality should be so selected that the support commanders may join their commands and conduct them to their positions without causing unnecessary delay to their troops. The reserve commander should, if possible, receive his orders at the same time as the support commanders. Subordinates to whom he gives orders separately should be informed of the location of other parts of the outpost.

In large outposts written orders are frequently most convenient.

After issuing the initial orders, the outpost commander inspects the outpost, orders the necessary changes or additions, and sends his superior a report of his dispositions.

78. The reserve is marched to its post by its commander, who then sends out such detachments as have been ordered and places the rest in camp or bivouac, over which at least one sentinel should be posted. Connection must be maintained with the main body, the supports, and nearby detached posts.

79. The supports march to their posts, using the necessary covering detach-

ments when in advance of the march outpost. A support commander's order should fully explain the situation to subordinates or to the entire command, if it be small. It should detail the troops for the different outguards and, when necessary, define the sector each is to cover. It should provide the necessary sentinels at the post of support, the patrols to be sent therefrom, and should arrange for the necessary intrenching. Connection should be maintained with the adjoining supports and with the outguards furnished by the support.

In posting his command the support commander must seek to cover his sector in such manner that the enemy can not reach, in dangerous numbers and unobserved, the position of the support or pass by it within the sector intrusted to the support. On the other hand, he must economize men on observation and patrol duty, for these duties are unusually fatiguing. He must practice the greatest economy of men consistent with the requirements of practical security.

As soon as the posting of the support is completed, its commander carefully inspects the dispositions and corrects defects, if any, and reports the disposition of his support, including the patrolling ordered, to the outpost commander. This report is preferably made by means of a sketch.

80. Each outguard is marched by its commander to its assigned station, and especially in the case of a picket, is covered by the necessary patrolling to prevent surprise.

Having reached the position, the commander explains the situation to his men and establishes reliefs for each sentinel, and, if possible, for each patrol to be furnished. Besides these sentinels and patrols, a picket must have a sentinel at its post.

The commander then posts the sentinels and points out to them the principal features, such as towns, roads, and streams, and gives their names. He gives the direction and location of the enemy, if known, and of adjoining parts of the outpost.

He gives to patrols the same information and the necessary orders as to their routes and the frequency with which the same shall be covered. Each patrol should go over its route once before dark.

81. Every picket should maintain connection by patrols with outguards on its right and left. Each commander will take precaution to conceal his outguard and will generally strengthen his position by intrenching.

82. **Relieving the Outpost.** Evening and shortly before dawn are hours of special danger. The enemy may attack late in the day in order to establish himself on captured ground by intrenching during the night; or he may send forward troops under cover of darkness in order to make a strong attack at early dawn. Special precaution is therefore taken at those hours by holding the outpost in readiness, and by sending patrols in advance of the line of observation. If a new outpost is to be established in the morning, it should arrive at the outpost position at daybreak, thus doubling the outpost strength at that hour.

83. **Examining Posts.**² An examining post is a small detachment, under the command of an officer or a noncommissioned officer, stationed at some convenient point, to examine strangers and to receive bearers of flags of truce brought in by the outguards or patrols.

Though the employment of examining posts is not general in field operations, there are many occasions when their use is important; for example: when the outguards do not speak the language of the country or of the enemy; when preparations are being made for a movement and strict scrutiny at the

² See Rules of Land Warfare, U. S. Army, relative to reception of bearers of flags of truce, etc.

outguards is ordered; at sieges, whether in attack or defense. When such posts are used, strangers approaching the line of observation are passed along the line to an examining post.

No one except the commander is allowed to speak to persons brought to an examining post. Prisoners and deserters are at once sent under guard to the rear.

ARTICLE III.

ORDERS.

GENERAL PRINCIPLES.

84. The art of giving proper instructions and orders to troops is one of the most important feature in the exercise of command.

The expression of the will of leaders is conveyed in letters of instruction or by written or verbal orders.

Letters of Instruction. At the beginning of operations and from time to time thereafter the plans of the superior leaders are communicated in the form of letters of instruction. These regulate movements over large areas and for considerable periods of time. (See *Combat Orders*, pp. 1616-1617.)

85. **Field Orders.** Field orders regulate the tactical and such strategical actions of troops as are not carried in letters of instruction. (See *Combat Orders*, pp. 1616-1617.)

The field orders of field army and division commanders are almost invariably written. When conditions demand the issuance of verbal orders, written orders follow. The field orders of brigade commanders are usually written. The field orders of regimental and smaller unit commanders are usually verbal.

The object of field orders is to bring about a course of action, in accordance with the intention of the leader, suited to the situation and with full coöperation between all arms and service. They are issued for marches, halts, formation of camps or bivouacs, advance, flank and rear guards, outposts, combat, etc.

In active operations, especially during engagements, numerous field orders are issued in fragmentary form—either verbally or in the form of notes, brief dispatches, messages, orders for assembly, etc.—which do not contain all the requirements of a formal written field order; but whenever detailed instructions for operations are given, whether verbally or in writing, the sequence prescribed for the body of a formal field order is preserved.

Administrative details are usually covered in "orders," but when circumstances make it more convenient they may be included in field orders.

86. To give subordinate leaders an opportunity to study the situation, field orders should reach them in ample time. As a rule, however, it is desirable to keep contemplated movements secret as long as possible, and to confine knowledge thereof to chiefs of staff departments and leaders of the larger units.

In large commands it requires some time for formal orders to reach all the lower units; this may be roughly estimated at one hour for a brigade and one hour and a half for a division.

The hour stated in the heading of an order is the hour of signature.

87. Orders not connected with the tactical or strategical action of troops, but necessary in the ordinary administration of military affairs, are called general orders, orders, and special orders, according to circumstances.

General Orders. General orders include, generally, (1) all detailed instructions necessary in carrying out certain general regulations or orders issued from a superior headquarters; (2) all standing instructions, to the end that frequent repetition may be avoided; and (3) proceedings of general and special courts-martial.

General orders are issued by commanders of armies, field armies, divisions, brigades, regiments, and separate battalions.

Orders. Orders, in contradistinction to field, general, and special orders, are used by commanders of divisions and separate brigades for regulating the movements and resupply of the field trains, fixing the position of distributing points (rations and forage), authorizing the use of reserve rations, providing for the refilling of combat trains after combat or march, providing for ambulance and hospital service in camps, and for furnishing such other similar information or instructions as it is desired to communicate to troops. They also include such instructions as may be sent to the commander of trains, relative to the movements and disposition of the trains and information with regard to the arrangements made with the line of communication relative to the positions of refilling, rendezvous, and evacuation points.

When necessary, orders are used by commanders of battalions forming parts of regiments, and smaller units and detachments, for the same class of instructions as are promulgated by higher commanders in general orders.

Special Orders. These cover only such matters relating to the movements or assignment of individuals as are not necessary to be communicated generally to the command.

88. Verbal Orders. When not communicated by the leader in person, verbal orders are carried by staff officers or messengers. Important verbal orders are recorded as soon as practicable after issue.

As there is always a possibility of controversy as to their wording, verbal orders are sent by messengers in case of necessity only, and when so sent rarely contain more than one definite mandate. For example: "The brigade will halt three hours at——." More latitude is allowed in sending verbal orders by officers.

The bearer of a verbal order or message is required to repeat it before starting.

COMPOSITION OF FORMAL FIELD ORDERS.

89. To frame a suitable field order, the leader must make an estimate of the situation, culminating in a decision upon a definite plan of action. He must then actually draft or word the orders which will carry his decision into effect.

An estimate of the situation involves a careful consideration, from the commander's viewpoint, of all the circumstances affecting the particular problem. In making this estimate he considers his mission as set forth in the orders or instructions under which he is acting, or as deduced by him from his knowledge of the situation, all available information of the enemy (strength, position, movements, probable intentions, etc.), conditions affecting his own command (strength, position, supporting troops, etc.), and the terrain in so far as it affects the particular military situation. He then compares the various plans of action open to him and decides upon the one that will best enable him to accomplish his mission.

Clear and decisive orders are the logical result of definite and sure decisions and are the means of transforming the decision into action.

In framing field orders the integrity of tactical units is preserved whenever practicable.

Field orders must be clear and definite. Expressions depending upon the viewpoint of the observer, such as right, left, in front of, behind, on this side, beyond, etc., are avoided, reference being made to points of the compass instead. The terms right and left, however, may be applied to individuals or bodies of men, or to the banks of a stream; in the latter case the observer is supposed to be facing downstream. The terms right flank and left flank are fixed designa-

tions. They apply primarily to the right and left of a command when facing the enemy and do not change when the command is retreating. The head of a column is its leading element, no matter in what direction the column is facing; the other extremity is the tail.

To minimize the possibility of error, geographical names are written or printed in ROMAN CAPITALS; when the spelling does not conform to the pronunciation, the latter is shown phonetically in parentheses, thus: Bicester (Bister), Gila (Hee'-la).

When two or more places or features on the map have the same name they are distinguished by reference to other points.

A road is designated by connecting two or more names of places on the road with dashes, thus: Leavenworth—Lowemont—Atchison road.

As a rule, an affirmative form of expression is used. Such an order as: "The supply train will not accompany the division," is defective, because the gist of the order depends upon the single word "not."

Written orders should be so distinct as to be legible even in bad light.

Field orders are brief; short sentences are easily understood; conjectures, expectations, reasons for measures adopted, and detailed instructions for a variety of possible events, do not inspire confidence, and should be avoided.

The commander should accept the entire responsibility. In framing field orders such expressions as "attempt to capture," "try to hold," "as far as possible," "as well as you can," etc., are forbidden. They tend to divide responsibility between the commander and his subordinates.

An order should not trespass upon the province of a subordinate. It should contain everything beyond the independent authority of the subordinate, but nothing more.

When the transmission of orders involves a considerable period of time, during which the situation may change, detailed instructions are avoided. The same rule holds when orders may have to be carried out under unforeseen circumstances. In such cases letters of guidance are preferable; they lay stress upon the object to be attained, and leave open the means to be employed. Orders attempting to arrange matters too far in advance may have to be recalled and others substituted; such changes impose needless hardships upon a command and injure its morale.

Details of time and place are carefully stated. Subordinate commanders and staff officers regulate their watches by the time kept at headquarters.

Orders issued by subordinates should not be mere repetitions of those from higher authority with additions of their own. New orders are generally clearer and more satisfactory.¹

FORM OF FIELD ORDERS. (See page 1681.)

90. To enable the will of the commander to be quickly understood, to secure prompt coöperation among his subordinates, and for ready reference, field orders are required to follow a general form. This form divides an order into sections or parts and assigns to each a particular class of information.

The parts of a field order are:

The heading.

The distribution of troops (in certain orders).

The body.

The ending.

¹ For details of field orders for combat see pars. 142-149, inclusive.

91. The Heading. The heading contains the title or name of the issuing officer's command, the place, date, and hour of issue, the number of the order and reference to map used.

Titles are expressed as follows:

Det. 1st Div.

Outpost, 6th Inf.

Advance Guard, 3d Div.

1st Brig. 1st Div.

3d Div.

In the above titles "Det. 1st Div." means that the command is composed of troops from the first division; "Advance Guard, 3d Div.," means that the command is the advance guard of the third division.

The title may appear in the order creating a command, thus: "The Second Brigade will constitute the advance guard."

The title with place, date, and number thus fully identifies an order.

Whether named in the title or elsewhere in the order, the abbreviated form for the designation of tactical organizations is preferable. (See Appendix 9, List of Abbreviations.)

When a fraction of an organization can not be designated by naming one or more of the subdivisions, it receives the generic title of "detachment."

A detachment is a body of troops separated from a higher command and entrusted with a special mission.

Nearly every command of any size is composed of troops from the different arms or special services, or both, and when not constituting a division, brigade, or other authorized unit, the question arises whether to call such a command a "detachment" or to give it the tactical designation of the predominating arm or special service. If there is a predominating element the title of the command is that of the predominating element, unless the proportion of auxiliary troops or special troops equals or exceeds that prescribed for a division, in which case the command is a detachment. For example: A command consisting of 1 regiment of infantry and 1 squadron is a detachment, while the title of a command consisting of 1 regiment of infantry and a troop is that of the regiment.

Dates in the heading are abbreviated thus: 4 Feb. 08, 2-45 p.m.

92. The Distribution of Troops. The distribution of troops shows the tactical components into which a command is divided (advance guard, main body, etc.) and the troops assigned to each. It is generally used in march orders and in the first field order applying to a command newly created or organized. In other cases it is usually more convenient to name the troops in the body of the order, where their duties are prescribed.

When a "distribution" is used it is headed "Troops," and in written or printed orders is placed on the left of the body, occupying about one-third of the page. The tactical components are marked with lettered subheads (a), (b), etc., the troops listed under each performing the task prescribed in the similarly marked paragraph of the body of the order.

When orders are dictated or sent by wire or signals, the distribution of troops (if used) is given immediately after paragraph 2, without number.

93. The Body. The body contains information and instructions for the command, and is arranged in numbered paragraphs as follows:

Paragraph 1 contains such information of the enemy and of our supporting troops as it is desirable that subordinates should know.

Paragraph 2 contains the general plan of the commander, or so much thereof as will insure coöperation of all parts of the command.

Paragraph 3 contains the detailed tactical dispositions adopted by the com-

mander to carry out the plan outlined in paragraph 2, including the tasks assigned to each of the several combatant fractions of the command. These tasks are given under lettered subheads (a), (b), etc., the leading fraction, or the one having the most important duty to perform, being generally considered first. For instance: In an attack order it is customary to consider the artillery first; in a march order, troops are considered according to their position in the column.

Instructions applicable to all of these fractions may be embodied in a subparagraph, lettered (x), at the end of paragraph 3.

Paragraph 4 contains instructions for the trains, and may designate the position of ammunition distributing stations, dressing stations, and stations for slightly wounded.

The last paragraph, usually paragraph 5, shows where the commander can be found or messages may be sent. In orders of subordinate commanders, this paragraph also gives the location of "lines of information," if any have been established.

If additional paragraphs are necessary, they are incorporated, properly numbered, after paragraph 4. Sometimes it is unnecessary to include instructions for the trains; but whatever the number of paragraphs the last always shows where the commander can be found, etc.

No abbreviations are used in the body of the order except a.m. and p.m. for morning and afternoon, the authorized abbreviations for tactical organizations, and those customary in designating rank. In naming a night both days should be mentioned, thus: Night 4/5 Feb. 08. To designate "noon" and "midnight," these words are written.

94. The Ending. The ending contains the authentication of the order and a statement of how it is communicated to the command. This statement is an important feature of a field order and is made by the officer signing the order, he being responsible that it is properly distributed.

95. Before orders are issued they are carefully tested to see that the entire command is accounted for.³

ARTICLE IV.

MARCHES AND CONVOYS.

GENERAL PRINCIPLES.

96. A successful march, whether in peace or war, is one that places the troops at their destination at the proper moment and in the best possible condition. In war, marches are of daily occurrence, and success depends in a great measure upon the skill with which they are conducted.

Good marching is secured by careful preparation, strict discipline, and the due observance of march sanitation.

While conforming to other requirements, marches are conducted so as to reduce to a minimum the hardships of the troops.

When possible, ample notice is given so that preparations can be made without haste.

The march is habitually at route order.

Troops are informed of the length of halts so that they can take full advantage of the same.

The men are not kept under arms longer than necessary, nor required to carry heavy burdens when transportation is available.

³For forms of orders see Appendix 3.

Special care is paid to the feet of the men and to the hoofs and backs of animals.

In prolonged marches at least one day in seven should be a day of rest.

A forced march is never undertaken unless the situation requires it.

As a rule troops on the march pay no compliments; individuals salute when they address, or are addressed by, a superior officer.

The conduct of a march (forming the column or columns, distribution of troops, the start, rate, length of march, etc.) is controlled by the situation and object to be accomplished.

CONDUCT OF MARCHES.

97. Preparation. It is the duty of the commander to see that the necessary preparations are made—that the men and animals are in fit condition and that they are properly equipped; that all trains accompanying the command are loaded as prescribed; that proper measures have been inaugurated for the replenishment of supplies, and that the necessary arrangements have been made for the care and evacuation of the sick and wounded.

98. Forming the Column. To form the column for a march, the commander issues the necessary orders (march order).

The march order states the object of the march, gives the distribution of the troops, order of march of the main body, manner of forming the column, etc. If the command consists of two or more columns, the order of the supreme commander generally indicates the march to be made by each column, and the column commanders issue corresponding march orders.

When troops are encamped or bivouacked at some distance from the road, columns are formed by the successive arrival of the fractions at an initial or starting point, which, as a rule, is located in the direction of the proposed march. The commander fixes the initial point after considering the position of the troops and the roads by which they can join the column. He also prescribes the hour at which the leading fraction or fractions clear the initial point, and, if necessary, the routes to be followed in reaching it. To prevent needless marching, he may designate special initial points for parts of the command.

As a general rule, the larger units of a command should be camped in the order in which they will march on the following day.

In drafting march orders, the road space and rate of march of the different fractions of the command and their distances from the initial point must be considered. With foot troops and cavalry marching four abreast, artillery and trains in single column of carriages, the following may be assumed for approximate calculations: Two men per yard for foot troops, one man per yard for each mounted man, 20 yards for each gun, caisson, or wagon, and 12 yards for each autotruck.

Commanders of subordinate units examine the route to be followed, calculate the time required, and start their commands accordingly. They may designate initial points for their own commands. In every case the initial point should be of easy access.

When troops are located on or near the roads to be followed, the commander prescribes the hour of starting for the larger units; the subordinate commanders issue corresponding orders for their commands.

99. Distribution of Troops. The order of march of a column is controlled mainly (1) by tactical considerations, which are paramount in the presence of the enemy, and (2) by the rule requiring the hardships of troops to be reduced to a minimum.

During an advance the order of march of a column is generally as follows, the necessary security being provided:

Combatant troops (with combat trains):

1. Cavalry and horse artillery.
2. Infantry and light or mountain artillery.
3. Engineers and signal troops.
4. Trains, etc.

During a retreat the order of march is practically the reverse of the above.

In mixed commands, large bodies of cavalry and horse artillery should not be intermingled with foot troops.

A detachment of engineers usually marches near the head of each column to repair roads, strengthen bridges, etc.

The order of brigades in divisions, regiments in brigades, battalions or squadrons in regiments, and company units in battalions or squadrons is generally changed from day to day—the leading unit one day taking its place at the tail the following, and so on.

On the march, troops, as far as practicable, keep to the right of the road, leaving the left free. When the roads are narrow, space should still be left for messengers to pass freely along the column. When roads are soft with mud or heavy with sand or very dusty, it may be advisable to divide the column longitudinally, thus permitting men and animals to pick their way, the middle of the road being left clear. Care should be taken not to permit straggling or undue lengthening of the column.

Infantry usually marches in column of squads, column of twos when necessary; cavalry, in column of fours on good roads or when compact formation is desirable, otherwise in column of twos; artillery in section column (single column of carriages), or in double section column if the width of the road permits. On trails, troops march in column of files or troopers. In marching across country, the commander adopts the most advantageous formation.

100. The Start. When practicable, marches begin in the morning, ample time being allowed for the men to breakfast, animals to feed, and the wagons or animals to be packed. The time for reveille and stables should be designated the evening before. Canteens are filled, fires put out, latrines covered, and the camp policed before departure.

The hour for the start depends upon circumstances. As a rule foot troops do not start before broad daylight; mounted troops, when practicable, about an hour after broad daylight. Both men and animals rest well in the early morning hours.

The signals for striking camp and putting the command in march, such as the general, boots and saddles, etc., are ordered by the commanders of the larger units at the proper time. After the general, one or more officers of each organization superintend the preparations of the march.

The different units of the column, including those of the train, are separated at the start by distances prescribed in regulations or by the commander. These distances are temporarily increased or diminished, according to circumstances, thus facilitating uniform progress without checks, and with a continual tendency to the gradual resumption of normal distances.

101. Rate and Length of Marches. The rate of march of a mixed command is regulated by that of the foot troops. It varies with the length of the march, size of the command, condition of the troops, and other circumstances; sandy, rough, muddy, or slippery roads, great heat and dust, strong headwinds, storms and broken country, reduce the rate. If the hills are to be climbed or swampy country is to be crossed, or defiles passed, liberal allowances are made in time calculations.

For infantry the rate prescribed for drill is 100 yards a minute or 3.4 miles an hour; on the road the maximum to be counted on is 88 yards a minute or 3 miles an hour, including halts $2\frac{1}{2}$ to $2\frac{3}{4}$ miles. The rate of infantry columns, under average conditions, may be assumed at $2\frac{1}{4}$ to $2\frac{1}{2}$ miles an hour.

The average march of infantry, and of mixed commands consisting partly of foot troops, is 15 miles a day; but in extensive operations, involving large bodies of troops, the average is about 12 miles a day. Small commands of seasoned infantry marching on good roads in cool weather can average 20 miles a day.

It is of great importance that a uniform rate of march be maintained throughout the column. When a change in the rate is to be made, warning is sent along the column.

For cavalry the rates prescribed for drill are:

The walk 4 miles, the trot 8 miles, and the gallop 12 miles an hour. The average walk of a horse is at the rate of a mile in 16 minutes or $3\frac{3}{4}$ miles an hour; the average trot, a mile in 8 minutes or $7\frac{1}{2}$ miles an hour.

In the field the usual gait is the walk of $3\frac{3}{4}$ miles an hour; including halts, $3\frac{1}{4}$ to $3\frac{1}{2}$ miles an hour.

The average march of cavalry, after men and animals are hardened, is 25 miles a day.

The daily march of field artillery is the same as that of the command of which it forms a part; if alone it covers from 15 to 20 miles. The rate of horse artillery is the same as that of the cavalry to which it is attached.

The rate of a wagon train varies with the class and condition of the draft animals, the load, length of the column, and the condition of the roads. While large mules drawing light loads on good roads can cover nearly 4 miles an hour, in long columns a rate of 2 miles, including halts, is all that can be expected even under favorable conditions; small trains may make $2\frac{1}{2}$ miles an hour. The daily march of a wagon train is about the same as that of infantry.

The average load of a pack mule is 250 pounds, and a train thus loaded can travel from 20 to 25 miles a day on ordinary roads or trails; over rough country, from 10 to 15 miles.

The rate of march, the load, and the distance that may be covered in a day with autotricks or with tractors drawing wagons are dependent on the character and condition of the roads and the carrying or pulling power of the trucks or tractors.

102. Halts. To rest the men and animals and for other purposes, a command on the march is occasionally halted. The first halt is made after marching about three-quarters of an hour, and is about 15 minutes long, to enable the men to attend to the calls of nature and to adjust their clothing, etc. Judgment should be exercised in selecting the place for the first halt; it should not be made in a village or place where one of the objects of the halt would be defeated.

After the first rest, there is for foot troops a halt of about 10 minutes every hour—that is, the troops march 50 minutes and then halt 10. In very hot weather the halts may be longer and more frequent. The men are allowed to fall out, but remain in the immediate vicinity of their places.

For cavalry the hourly halts are shorter—5 minutes; the men examine the horses' feet, adjust saddles, etc.

For artillery the hourly halts are from 5 to 10 minutes; harness is adjusted, girths are tightened, etc.

As a rule troops prefer to finish a day's march as soon as possible. In good weather, with favorable temperature, long halts are not desirable on marches

of less than 15 miles for infantry or 25 miles for cavalry. When the day's march will run well into the afternoon, a halt of about one hour near meal time is advantageous. Places for long halts should be selected with care; wood, water, grass, dry ground, and shade are desirable features. Arms are stacked and equipments removed; mounted troops dismount and loosen cinches.

In hot weather, especially in the tropics, it may be desirable to avoid the midday heat. If the march is long, the command may make an earlier start, or it may rest for three or four hours during the hottest part of the day and finish the march in the evening. As a general proposition, however, it is undesirable to arrive at a strange place after nightfall or even late in the afternoon.

Halts are not made in or near towns or villages unless to procure water or supplies, and when so made, the men remain in column, details being sent for whatever is necessary. In commands not exceeding a regiment, and in wagon trains of less than a mile in length; the units may halt simultaneously, the signal from the head being promptly repeated. This may also be accomplished in longer columns by the commanders of units setting their watches at the same hour before starting, and agreeing when the halts shall be made; the units all halt and resume the march at the moments agreed upon.

103. Crossing Bridges, Fords, and Ferries. When a cause of delay—for example, a damaged bridge—is encountered, the troops in rear are notified of the minimum length of the delay; they then conduct themselves as at regular halts.

In ascending or descending slopes, crossing streams or other obstacles, or passing through defiles requiring a reduction of front, every precaution is taken to prevent interruption of the march of the troops in rear. If the distances are not sufficient to prevent check, units are allowed to overlap; if necessary, streams are crossed at two or more places at the same time; in passing through short defiles the pace is accelerated and the exit cleared at once. If a company unit is delayed while crossing an obstacle, the head slackens the pace or halts until all of that unit has passed; it then resumes its place in the column, increasing the pace if necessary.

Before attempting to cross with bodies of troops, careful examination is made of fords, boggy places, bridges of doubtful character, ice, etc., as the case may be.

When necessary, an officer is designated to superintend the crossing; his instructions must be strictly observed, the troops crossing in formation prescribed by him. Foot troops crossing bridges march without cadence.

Whenever a military bridge is constructed with the bridge equipage, or if deemed necessary, in cases where improvised material is employed, a bridge guard under an engineer officer will be detailed for its care and maintenance during the period of its use. All orders, regulations, and instructions issued by this engineer officer relative to the care, protection, and use of the bridge will be considered as emanating from the commander of the force crossing the bridge.

When roads lead through swamps or quicksand, or across streams with treacherous bottoms, their limits are marked with stakes or bushes, or warnings are placed at dangerous points. At night lanterns are hung from the stakes, and a fire is built or a lantern hung to mark the landing.

When the current is strong and the water deep, foot troops cross on as broad a front as possible, the men marching abreast and holding hands. They should not look at the water, but at the opposite shore. If the ford is wide enough, mounted troops may cross at the same time on the upstream side, thus breaking the force of the current.

Fords that are at all difficult delay long columns unless the troops cross at several places at once. The crossing of many animals or wagons may deepen a ford and render it impassable; new places may thus become necessary.

Persons operating the ferry are interfered with as little as possible.

The men enter pontoons or barges singly at the bow or stern and gradually move toward the stern or bow; larger vessels may be entered in column of twos; the men retain the places assigned them so as not to interfere with the handling of the boat; in small boats when the water is rough they sit down; when there is danger they are directed to remove their equipments.

Horses are loaded one at a time. When there is room for a single row only they alternate heads and tails; if in two rows they face inward. If a horse falls into the water it is turned loose.

Guns, caissons, and wagons are generally loaded by hand; if practicable, the teams are sent on the same vessel.

Unloading is also from the bow, in good order, without crowding; men sitting down do not rise before their turn.

When rafts are used, special precautions are necessary. The center of the raft is first occupied and then the load uniformly distributed. Unloading is carried out in inverse order, the center of the load being last to leave.

The crossing of beef cattle on boats or rafts is dangerous. When practicable they are crossed by swimming.

104. Care of Troops. On the march, commanders of the larger units keep themselves informed of the condition of their commands and of the progress of subordinate units in rear.

Sources of water supply are examined by experts and marked good or bad. In countries infected with cholera or other harmful bacteria, this is imperative.

Precaution is taken to prevent excess in eating and drinking. The drinking of water is often a matter of habit; under ordinary conditions a canteen of water should last one man a day's march. Soldiers should be trained to be economical in the use of water, and to keep a small supply until their canteens can be replenished. If water is plentiful they may drink often, but only a small quantity at a time.

Commanders afford the men ample opportunity for replenishing their canteens, but it is done by order, not by straggling from the command. In certain cases, the advance guard may require the inhabitants to place water in vessels along the line of march for the convenient use of troops. On long marches through country deficient in water, or where the water is bad, it may be necessary to carry a supply in wagons.

The watering of cavalry horses upon the march depends largely on the facilities available. In hot weather, or if nothing is known about the water supply of the day's march, the horses are watered before leaving camp. Good opportunities for watering on the road should not be neglected. To avoid delay, as many troops as possible are watered at the same time; as the head of a command approaches a place suitable for watering, the several units are conducted, according to their position in column, to the different watering places.

Animals of the artillery and of wagon trains are watered while in camp—before departure and after arrival—or during a long halt. If time permits, they may be watered on the march from buckets, or by unhitching and riding or leading to water.

One of the greatest sources of hardship on a march, especially for infantry, is hot weather. Every precaution is taken to prevent suffering from this cause. Halting places are selected when practicable where there are shade and free circulation of air, and the men are cautioned against drinking too much water. Green leaves or a moist handkerchief in the hat affords relief

from the hot rays of the sun. If the men are overheated, care is taken to prevent them being chilled by exposure to cold winds or drafts.

105. Straggling. No man leaves the ranks without permission; it is the duty of all officers and noncommissioned officers to prevent straggling. Enlisted men found away from their organizations without authority are arrested by the military police. Military prisoners held by military police are returned to their units at the first opportunity, with a statement of the circumstances of their apprehension.

All persons found pillaging, marauding, or committing crimes are arrested and dealt with according to law.

106. Camp or Bivouac. As a command approaches the camping place the commander issues the halt order. This order provides for the outpost, if necessary, and gives instruction for the encampment of the command.

SPECIAL REGULATIONS.

107. Though of general application, the foregoing rules must be modified according to the situation.

For convenience of reference and discussion, marches are classified as follows:

1. Marches in peace:
 - (1) Marches in changing station.
 - (2) Practice marches.
2. Marches in campaign:
 - (1) Concentration marches.
 - (2) Marches in the presence of the enemy.
 - (3) Forced marches.
 - (4) Night marches.

MARCHES IN PEACE.

108. Changing Station. The march order is issued from day to day, or it may cover marches of several days. It prescribes the distribution of troops, time of starting, camping places, service calls, and such other details as the commander deems necessary.

To afford greater freedom of movement, the distances between the elements of a column may be materially increased.

In wet weather, to avoid cutting up the road in advance, mounted troops of small mixed commands may follow the infantry; in going through high vegetation or snow, they may lead to break the way.

Field trains may follow immediately in rear of their regiments, and the supply trains be placed to facilitate issues.

109. Practice Marches. The practical training of troops is divided into two phases, namely, garrison training and field training. Practice marches form a part of field training and are made with two objects in view: (1) That of hardening the men and animals and of keeping them in proper physical condition; (2) that of instructing officers and men in duties incident to a campaign—marching, camping, cooking, etc.—and the principles of tactics, including the services of information and security.

A practice march conforms to the conditions it is intended to simulate.

That the maximum benefit may be obtained, practice marches should always include instruction in field duties of some character. In maneuvers, and in exercises where the presence of the enemy is assumed, regular field orders are issued.

MARCHES IN CAMPAIGN.

110. Concentration. Marches of concentration are made for the purpose of assembling at a certain time and place bodies of troops from different localities. Such marches require an accurate computation of the time required for marching and of the road space occupied by the troops. The condition of the roads, weather, etc., must be considered.

A column of troops on the march should not be cut by another. If the heads of two columns meet at a distance from the enemy, the senior commander has the right of way; if near the enemy, the senior determines what measures are to be taken.

If a column in march overtakes another at a halt, it may pass on, provided its commander be the senior, or the other commander gives his consent.

111. Marches in the Presence of the Enemy. The order of march of these bodies is controlled by tactical considerations.

The order of march of the main body is determined by the contemplated employment of the troops. When contact with the enemy is probable, columns are closed up and march on broad fronts; communication is maintained between the columns on parallel roads, and all impedimenta not necessary in the conflict are kept in rear. If a part of a unit of infantry is assigned to the advance guard, the remainder of that unit usually marches at the head of the main body.

During the advance, the artillery, in order to expedite its entry into action, is generally near the head of the main body, sufficient infantry leading to insure proper security. Its commander usually accompanies the commander of the column. If there is danger to the flanks from small bodies of the enemy, the artillery may be broken into columns not longer than a regiment; it then marches like a convoy with infantry in front, in or opposite the center, and at the rear. This formation of necessity delays the entry into action of a part of the infantry; to reduce this delay, the artillery marches, if possible, in double column, and its combat train follows immediately in rear of the last infantry unit. When moving into action the artillery has the right of way.

Thus, in the march of a division, assuming the advance guard to consist of one brigade of infantry, all of the divisional cavalry, one battalion of artillery, one company of engineers, a detachment of signal troops, and a detachment of the sanitary train, the distribution of the main body and trains might be made as follows:

- 1 regiment infantry.
- 1 battalion artillery.
- Regiment artillery.
- 2 brigades infantry (less 1 regiment).
- Engineers.
- Signal troops.
- Artillery combat trains.
- Trains.

On marches through long defiles, or dense forests, or on night marches, it may be advisable to place the artillery near the rear of the column.

112. Trains. Military trains are at all times provided with the necessary guards. Field trains are guarded as far as practicable by men on duty with the train, by convalescents and other noneffectives, by dismounted men of the cavalry and by men from the battery reserves in the artillery. Supply, ammunition, and engineer trains are guarded by the military police. In marches into action the trains are held far enough in rear not to interfere with the movements of troops or to check withdrawal in case of defeat.

If a pontoon battalion is attached to a division and is to be used during the day's march, it is assigned a place in column as far forward as practicable.

If a wagon breaks down or is stalled, its load is transferred to other wagons and the road cleared as soon as practicable.

113. Forced Marches. The conduct of forced marches is controlled by the distance to be covered and the time in which the march is to be accomplished. As they seriously impair the fighting power of even the best troops, forced marches are undertaken only in cases of necessity. Long forced marches can not be made without injury unless the command is in good condition and the march is made with good judgment. The difficulties of the problem rapidly increase with the size of the command and length of the march, but in any case the completion of the march should find the troops in condition to accomplish the object of the march.

With foot troops forced marches are generally made by increasing the number of marching hours, the halts and periods for cooking and sleep being arranged so as to afford the maximum benefit. The rules prescribed for the average march are followed as closely as possible. For large columns of infantry, marching long distances, increase of pace is seldom of value.

A maximum day's march for infantry and trains is about 28 to 30 miles. A march of this character can not, as a rule, be prolonged more than 36 hours. If a forced march is to continue for several days, it becomes practically a succession of daily marches of more than average length.

Foot troops are favored in every way possible. They are assigned the best roads, and not intermingled with vehicles or mounted men. If transportation is available, their packs are lightened.

With mounted troops the gait, as well as the number of marching hours, may be increased.

Under favorable conditions of road and weather a rate of 50 miles in 24 hours can be maintained for three or four days. On such marches the usual hourly halts are made; in addition, a halt of 2 hours is made at the end of the first half of each day's march, during which the horses are unsaddled and permitted to roll, feed, and lie down. The rate is about 5 miles an hour, excluding halts.

Under very favorable conditions a single march of 100 miles can be made in from 24 to 30 hours. On such a march the usual hourly halts are made; in addition halts of 2 hours are made at the end of the first and second thirds of the march, during which the horses are unsaddled and permitted to roll, feed, and lie down. The rate is about $5\frac{1}{2}$ miles an hour, excluding halts.

For distances from 30 to 40 miles a rate of 6 miles an hour, excluding halts, can be maintained under favorable conditions of road and weather. If the command be small, well seasoned, and lightly equipped, the rate may be even greater. The usual halts are made.

If the distance to be covered by forced marches is about 150 miles, the march begins at a rate of not more than 50 miles a day. For distances greater than 200 miles the daily march is from 30 to 40 miles.

On forced marches where the road is level or nearly so and the footing good, the men are occasionally required to dismount and march for short distances at a fast walk or slow double time, leading their horses. They are also permitted to loosen or remove their sweaters and overcoats, if their comfort will be materially increased thereby.

114. Night Marches. Night marches are sometimes made in hot weather; generally, however, they are made as the result of a forced march to surprise the enemy or to secure a favorable position from which he may be attacked at night or at dawn.

Moonlight and good roads are favorable for night marches. A waning moon is of advantage in marches beginning early in the morning. As all-night marches rapidly impair the efficiency of a command, a few hours' rest should be taken if practicable. Special effort is necessary to maintain good march discipline.

Precaution is taken that the proper road is followed and that contact between units is maintained, men being stationed to mark changes of direction. If necessary guides are secured and charged with the duty of following the right road. When, due to unfavorable conditions, units can not be kept well closed, men will be placed at forks and crossing of roads, especially on dark nights and at times of dense fogs or storms, and always when passing through cities or towns from which roads diverge in many directions.

When the march is secret, additional precautions are necessary. Silence is maintained; mouthpieces of bugles are removed, and articles of equipment secured to prevent rattling; smoking is not permitted; villages and farm-houses are avoided on account of warning given by dogs. If the troops are compelled to leave the roads, their progress will be slow, and additional time allowance must be made.

If cavalry forms a part of the column at night, it ordinarily marches in rear of the infantry; if there is artillery, it generally follows the cavalry and has a special infantry escort.

CONVOYS.

115. On land the term "convoy" is usually applied to those trains by which supplies are forwarded to an army from depots or magazines in rear, and to trains bringing in supplies collected by requisition. The trains directly attached to a military force are generally sufficiently protected by the presence of troops and by train guards.

116. **Wagon Convoys.** As the difficulty of controlling and protecting a convoy increases rapidly with its length, it should not, as a rule, contain more than 100 wagons. Such a train occupies about 1 mile of road space.

An officer, with such assistants as may be available, is placed in charge of the transportation. He divides the train into sections of 20 to 30 wagons and places a noncommissioned officer or wagon master in charge of each section.

Military police are assigned to preserve order, protect property, render assistance in case of accidents, and take part in the defense. With hired or impressed transportation a strong guard is required.

117. A convoy marches with a distance of about 25 yards between sections, about 2 yards between wagons, and at a rate of 2 to 2½ miles and hour, including halts. The march is similar to that of a body of troops, except for breathing spells in ascending long slopes and delays to lock wheels on steep descents. Long halts are avoided. The slowest teams are placed in the lead.

Broken wagons are removed from the road, their loads being transferred to spare wagons or distributed among other wagons of the train.

118. **Security.** Security for a convoy is furnished by the escort, which, as a rule, is composed of infantry, with enough cavalry for scouting and communication, and some engineers. The proportion of cavalry varies, being greater in open than in close country.

The strength of the escort depends upon the importance and size of the train, the risk, nature of the country, length of the journey, etc. A train containing explosives requires a strong escort in order to keep the enemy from firing into it.

The senior line officer on duty with the troops commands the convoy. He consults with the officer in charge of the transportation, and, if practicable,

defers to the latter's wishes as to the hours of starting, length of marches, parking of the train, military police, etc. Officers casually with a convoy exercise no authority therein.

Distribution of Troops. When a convoy is to march, the commander assigns military police to the different sections, and distributes the remainder of the escort as follows:

Advance guard.

Main body.

Flank guard (if necessary).

Rear guard.

Advance Guard. The advance cavalry, if any, precedes the train 3 to 5 miles, scouting to the front and flanks. It is accompanied by the necessary guides and interpreters. Careful examination is made of bridges and defiles and of the country in the vicinity; temporary guards are left at such points until the support comes up.

The remainder of the advance guard marches about a mile in front of the train.

The advance guard commander examines the country with a view to selecting suitable places for halting or parking the convoy, should the enemy be encountered.

The head of the train is never permitted to enter a defile until the advance guard is in possession of the farther end.

Main Body. The main body marches at the most important point, which may be near the head, in rear, or opposite the center of the train, the latter being the usual position. If the main body marches opposite the center it is generally advisable to place a section of infantry at the head and another at the tail of the train for its immediate protection.

Rear Guard. The rear guard marches a short distance in rear of the train, with the usual rear guard formation. Its strength is ordinarily about one-sixth of the escort.

119. Camping. The place for camping is usually selected by the advance guard commander, due regard being paid to the water supply, fuel, grass, and facilities for defense. A field inclosed by wire fence is advantageous.

Herding should not be undertaken unless there is little danger from attack, or lack of forage demands it.

On going into camp or during long halts, the train is parked, the formation depending upon the proximity and character of the enemy and the amount of ground available.

When the enemy is known to be distant the train is usually parked in column of sections or half sections, with distances of about 20 yards between subdivisions, and intervals of 6 to 8 yards between wagons. A compact formation is secured by placing the wagons axle to axle and tying the animals to picket lines in front of the wagons.

For purposes of defense wagons may be placed in two lines facing each other, or in the form of a square, rectangle, oval or circle, the poles inside; the inclosure thus formed furnishes shelter for the men and animals. When there is time, wire entanglements are constructed and shelter trenches dug outside the corral.

A diamond-shaped corral is recommended for emergencies, as it can be rapidly formed and the march quickly resumed. The animals of the first two sections are unhitched and placed inside; openings are left where necessary. If the nature of the ground permits, the teams of the first two sections may countermarch before forming the corral, thus obviating the necessity of unhitching.

The camp is protected by the necessary outposts.

Defense of a Convoy. The chief duty of the escort is to keep the enemy from gaining a position permitting effective fire on the train. With efficient security a convoy can not be surprised.

The flanks of a convoy are its most vulnerable parts. If the enemy is reported near, the wagons are closed up and the march is continued in the most orderly manner possible; if practicable, the wagons are formed in double column.

The escort fights only when necessary, and does not pursue when the enemy is repulsed. If the enemy holds a commanding position or a defile on the line of march, he is either dislodged by the escort or the convoy takes another road.

The advance cavalry reports the presence of the enemy with the utmost dispatch so that the commander may change the direction of march, park the train, or, if necessary, begin a retreat.

If menaced by small parties of the enemy, a convoy continues its march under protection of the escort; if attacked by a superior force, the train is parked or a corral formed, skirmishers being thrown out to delay the enemy and gain time for the formation. The commander selects good defensive positions at some distance from the train, intrenches if possible, and prepares for a stubborn resistance. Couriers are dispatched to apprise the nearest troops of the situation. Should the enemy be repulsed, his retreat is carefully verified before the march is resumed.

If it is evident that the train can not be saved, the commander endeavors to escape with the most valuable part, the remainder being set on fire or otherwise destroyed.

Attack of a Convoy. The most favorable time for attacking a convoy is when it is passing through woods, a defile, or over a bridge; when it is going around a sharp bend in the road; when ascending or descending difficult slopes or passing over bad sections of the road; when the convoy is beginning to form a corral; when the teams are being watered; or, generally, whenever the conditions are such that the escort can not quickly prepare for defense.

The attacking force endeavors to bring the convoy to a halt, and to throw it into confusion by making an attack from an unexpected quarter. The fire of artillery and of machine guns is very effective. If a convoy is captured, the parts that can not be carried off are destroyed.

CONDUCTING PRISONERS.

120. In addition to an escort to repel attempts at rescue, a guard of about 10 foot soldiers and several mounted men is required for every 100 prisoners. The captives are formed into companies and marched in column, their officers marching separately. Prisoners are treated kindly, but must be given to understand that any attempt to escape will draw fire. If the convoy is attacked, they are ordered to lie down. At night they are placed in suitable well-lighted buildings or inclosures.

CONVOYS BY WATER.

121. On interior waterways, water transportation derives its security principally from the presence of troops in the field. For protection against guerillas and raiding parties, a shallow-draft steamboat, provided with machine guns and shelter against rifle fire, carries part of the escort and precedes the transports. Means for disembarking the escort are provided in order that hostile parties be quickly dislodged. In the case of narrow streams or canals, if the boats are crowded with troops, it may be necessary to have the escort disembark and clear the country as it advances.

At sea, on the Great Lakes, and on large rivers, inlets, and estuaries, convoy escort duty is performed by the navy in accordance with the following rules prepared by the joint board:

"1. All matters relating to the purchase, charter, fitting out, equipping, and maintenance of transports, engaging their officers and crews, and providing rules for their government, their interior discipline and administration, shall be controlled by the army.

"2. If practicable, all transports carrying troops or animals shall be supplied with distilling apparatus adequate for the supply of water required. As a reserve in case of emergency, a distilling ship, furnished by the navy, shall, if practicable, accompany each convoy.

"3. a. All matters relating to the loading of the transports with troops, animals, or stores, and the quota or cargo to be assigned each vessel, will be under the charge of the army.

"b. The discharge of troops, animals, and stores from the transports into the boats and their transfer in boats to the shore will be in charge of the navy, and will be carried out as such time and in such order as the army commander may decide.

"4. a. An expedition oversea which requires naval convoy being decided upon, as soon as the transports begin to assemble at the rendezvous a naval officer of suitable rank shall be appointed as convoy commander and be supplied with information concerning the strength of the expedition and its proposed objective.

"b. The army authorities shall furnish him with facilities for inspecting the transports as they assemble, for the purpose of ascertaining whether they are properly fitted with ground tackle, boats, lines, and all equipment necessary for the proper management and control of the convoy while in transit and while disembarking men and animals under the conditions which will probably be met. Defects in this direction shall be by him called to the attention of the proper army authority, who shall use every effort to remedy such defects, in accordance with the judgment of the naval convoy commander. The naval convoy commander shall render all possible assistance with the resources at his disposal. In the event that it is found impracticable to remedy defects which, in the opinion of the naval convoy commander, will threaten the safety of the convoy or jeopardize the success of the expedition, such defects shall be reported immediately to their respective departments by the army and navy convoy commanders.

"5. A naval lieutenant and a junior or warrant officer and four quartermasters or signalmen for each transport and supply vessel under convoy shall be supplied by the Navy Department and shall be detailed by the naval convoy commander to the vessels when they are ready to proceed to the anchorage determined upon as the final rendezvous for departure. Means of making flag, hand semaphore, and wigwag signals by day and night shall also be provided by the Navy Department.

"6. a. The orders as to the destination of convoy and time of sailing shall be issued by the army commanding officer under the authority of the War Department and communicated to the naval convoy commander. Should circumstances arise after sailing which render a change in plan or destination necessary or desirable, which change it is not practicable to refer to higher authority, the army commander shall, after consultation with the naval convoy commander, decide as to such change.

"b. The naval convoy commander shall have control of all movements of the convoy and shall establish all orders of sailing and formation. He shall make provision for emergencies, such as an attack by an enemy or dispersion of the convoy by weather or other circumstances.

"c. He will make his subordinates, placed on the transports and supply vessels, familiar with his dispositions and plans.

"d. Should the transports be separated from the convoying vessels by accident or design, the senior naval officer present and on duty will take charge of the convoy and control its movements in accordance with the plans of the convoy commander.

"7. a. The senior naval officer attached to a transport or supply vessel shall, under the authority of the naval convoy commander and in obedience to his orders and signals, control entirely movements of the vessel in which he is embarked, including her anchorage.

"b. He shall have no other authority on board. The master and officers of the vessel shall perform their navigation duties affecting her speed and movement under his direction, and should there be any opposition to or interference with his authority in any way he shall call upon the commanding officer of troops on board, who shall take such steps with the force under his command as may be necessary to enforce the authority of the naval officer attached to the vessel.

"8. The time, place, and order of landing will be decided upon by the army officer commanding, who will consult with the naval convoy commander as to naval assistance, such as the covering and protection of the landing by the artillery of the men-of-war and use of naval boats. This assistance the naval convoy commander will render to the utmost extent practicable and with the sole object in view of assisting to the utmost the plan of campaign of the army commanding officer. After the order of landing is made known to him, the naval convoy commander, in accordance therewith, will control the placing of the transports and supply vessels for disembarking the troops, animals, munitions, and stores, and will control the loading and unloading of boats and have control over such area of the beach as may be necessary for the proper execution of the above. The naval convoy commander will also control the withdrawal of transports, when discharged, to the harbor and anchorage selected. In case of reëmbarkation under naval convoy the same general procedure will govern.

"9. It is deemed desirable that the army commanding officer, if convenient, shall be embarked in the flagship of the naval convoy commander. If not convenient, the army commanding officer's transport should be out of the formation and near the flagship of the naval convoy commander, in order that communication between them may be readily had at any time, and in this case the senior naval officer assigned to transports should be embarked in the same transport as the army commanding officer.

"10. Any existing regulations or orders in conflict or at variance with any of the foregoing rules are rescinded or modified to the extent of such conflict or variance."

ARTICLE V.

COMBAT.

122. Combat is divided into two general classes, the offensive and the defensive. The defensive is divided into the purely passive defense and the temporary defense, which has for its object the assumption of the offensive at the first favorable opportunity.

Decisive results are obtained only by the offensive. Aggressiveness wins battles. The purely passive defense is adopted only when the mission can be fully accomplished by this method of warfare. In all other cases, if a force be

obliged by uncontrollable circumstances to adopt the defensive, it must be considered as a temporary expedient, and a change to the offensive with all or part of the forces will be made as soon as conditions warrant such change.

COMBAT PRINCIPLES.

The following principles apply to both offensive and defensive combat:

Fire superiority insures success.

Unity of command is essential to success. The regiment united in combat has greater force and fighting power than have three separate battalions. A battalion acting as a unit is stronger than are four companies acting independently. All the troops assigned to the execution of a distinct tactical task must be placed under one command.

The task assigned any unit must not involve a complicated maneuver. Simple and direct plans and methods are productive of the best results in warfare.

All the troops that are necessary to execute a definite task must be assigned to it from the beginning. Avoid putting troops into action in dribblets.

Detachments during combat are justifiable only when the execution of the tasks assigned them contributes directly to success in the main battle or when they keep a force of the enemy larger than themselves out of the main battle. When combat is imminent all troops must be called to the probable field of battle. A force is never so strong that it can needlessly dispense with the support of any of its parts during combat.

Too many troops must not, however, be committed to the action in the early stages, no matter what be the nature of the deployment or the extent of line held. Some reserves must be kept in hand.

Use the reserve only when needed or when a favorable opportunity for its use presents itself. Keep some reserve as long as practicable, but every man that can be used to advantage must participate in the decisive stage of the combat.

Flanks must be protected either by reserve, fortifications, or the terrain.

Flank protection is the duty of the commanders of all flank units down to the lowest, whether specifically enjoined in orders or not. This applies to units on both sides of gaps that may exist in the combat lines.

Reconnaissance continues throughout the action.

USE OF THE COMBINED ARMS.

123. Infantry. The infantry is the principal and most important arm, which is charged with the main work on the field of battle and decides the final issue of combat. The rôle of the infantry, whether offensive or defensive, is the rôle of the entire force, and the utilization of that arm gives the entire battle its character. The success of the infantry is essential to the success of the combined arms.

124. Artillery. The artillery is the close supporting arm of the infantry and its duties are inseparably connected with those of the infantry. Its targets are those units of the enemy which, from the infantry point of view, are most dangerous to its infantry or that hinder infantry success. The greater the difficulties of the infantry the more powerful must be the artillery support.

In order to insure close coöperation of the artillery with the infantry in combat, the leader of each infantry unit to which artillery support has been assigned will, in both the attack and defense, make known to the artillery commander his plans and their expected development and will, throughout

the action, keep the artillery representative accompanying him fully informed of the needs of the infantry in the matter of artillery support.

The security of the artillery in combat must be provided for either by the distribution of the other arms or specifically in orders. But when such is not the case the necessary protection must be afforded by the nearest unit of infantry or cavalry whose mission will permit it to give such protection.

125. Cavalry. The cavalry, preceding contact of the opposing troops of the other arms, is engaged in reconnaissance of the enemy and of the terrain and in accomplishing such mission may be assigned it. During combat it directs its activities to the support of the other arms and particularly toward insuring the success of the infantry as soon as that arm is fully committed to action. It must not be given a task, nor voluntarily assume one, that will prevent its fullest coöperation with the other arms in the decisive action. The cavalry leader will be given wide initiative in the tactical employment of his command during the decisive combat.

The cavalry of a field army is divided into two classes, that attached to the infantry divisions and called divisional cavalry, and that forming a separate strategical unit called the cavalry division.

The divisional cavalry is an auxiliary arm of the infantry division and is used as the division commander directs, either as independent cavalry or as advance cavalry.

The cavalry division is pushed, as independent cavalry, far to the front, often several days' march in advance of the remainder of the field army, to drive back the covering forces of the enemy and to gain accurate information of his dispositions, strength, and movements. This is the most valuable use of the cavalry division in the opening stages of a campaign. The use of the cavalry division as a screen is justified only in exceptional cases, as it is seldom effective in absolutely preventing hostile reconnaissance. Better results can be obtained by using the cavalry as a mass to engage and defeat the enemy's cavalry. The troop leading of the cavalry division is prescribed in the drill regulations for that arm.

A field army commander may find it necessary to strengthen the independent cavalry of the field army by the temporary assignment to it of all or part of the divisional cavalry.

An army commander may combine two or more cavalry divisions under one leader.

126. Special Troops. The engineer troops, when not engaged in the special duties of their arm, may be used as infantry, but only in exceptional cases, as part of the attacking line. On the offensive, when used as infantry they form part of the reserve, part of a holding force, or are used for flank protection. On the defensive, they may be used as infantry wherever the development of the action warrants such use.

The duties of all other special troops or units that form part of the division are laid down in the different tactical manuals.

127. Heavy Field Artillery. The limited mobility of heavy field artillery renders its use inadvisable in any position from which the conditions of combat may require its hasty withdrawal. For that reason it has no place in an advance guard; in an outpost, unless occupying a position in which the action is to be fought to a decision; in advanced positions or posts; in the *rencontre*; or in delaying actions, unless its loss is justifiable.

128. On the offensive, heavy field artillery finds its function in firing upon supporting points in the hostile line; upon covered positions occupied by large bodies of the enemy, particularly his reserves; in the destruction of

material objects, as buildings, bridges, etc.; and, in general, against a position that has been deliberately taken up and strengthened by the enemy.

129. On the defensive, heavy field artillery finds its use in compelling the deployment of the enemy's columns at long distances from the defensive line, against any large formed bodies of the enemy, and against those parts of his matériel or material objects within lines that offer an important target.

Due to its long range, it is profitably used in both offensive and defensive combat in restricting the field of activity of the enemy's shorter range artillery. It can also be used to advantage in the destruction of the enemy's field artillery matériel.

130. The use of the heavier types of field artillery presupposes an offensive, where reconnaissance of the enemy's position has been thorough and where the attack has been carefully planned; or a defensive, where there has been time to deliberately select and strengthen a position. Until the use of the heavier field artillery under the conditions given can be clearly foreseen, its position is well to the rear of all the combatant units.

FIRE SUPERIORITY.

131. Fire superiority must be obtained in the early stages of combat and maintained to the end. Without it, success can not be expected either on the offensive or the defensive. It affords the best protection that can be given troops advancing to the attack, as also the best means of diminishing losses. The artillery must coöperate with the infantry in obtaining and maintaining fire superiority. Deficiency in the volume of fire on the defensive should be offset by the selection of a position naturally strong, or that can be made strong, in the time available for that purpose.

FRONTAGE OF UNITS IN COMBAT.

132. Depth in formation for combat, rather than extension of front, is all important in the initial deployment, even where the position and the strength of the enemy have been fully developed. Sufficient depth makes available means to meet the contingencies of combat and the unforeseen developments in the situation as they arise. Troops once deployed and committed to action are no longer available to enable the leader to exercise a constant influence over the course of the entire combat. The progress of the combat will call for an extension of the front occupied in the initial deployment that can not be foreseen. Troops must be held available for the purpose of such extension. For that reason some reserves must be held to the last, but when the decisive moment arises every man that can be used to advantage must be put into the action.

Frontages for deployment are based upon the infantry strength of the division and higher units. Artillery has no place in the front line of the initial deployment and, at the time such deployment is made, the place of the cavalry is out in front of the line or in contact with the enemy on the flanks. The infantry strength alone, therefore, is considered in fixing the frontages for the initial deployment.

The frontages occupied by the different battle units are not in proportion to the number of their component units. The duration of the combat and the needs for the security of the flanks increase with the size of the force employed. Each higher leader must keep out a reserve. A division, therefore, makes its initial deployment on a front only twice that justified for the brigade, and a field army of three divisions, when one division is held as a reserve, is assigned for deployment a front twice that of the division.

A unit whose flanks are secured by other troops or by impassable obstacles, or one that occupies a position naturally strong, or made so by adequate preparation, may be given a frontage limited only by the requirements of fire efficiency throughout the combat. The same is true of reserves deployed to bring about a decision already prepared by other troops. A force whose flanks are exposed must protect them by a maximum distribution in depth.

Frontages of units in forces no larger than a brigade are prescribed in the drill regulations for the different arms, and the principles upon which the frontages given are based apply when such units are part of a larger force than a brigade.

Divisions and Field Armies. A division, when operating against an enemy of nearly equal training and morale, and on open and unprepared ground, can not make its initial deployment on a front greater than $1\frac{1}{2}$ to 2 miles and, at the same time, have the capacity to hold its position strongly throughout the action. In the same way a field army of three divisions would be limited in its initial deployment to the frontage of 4 to 5 miles. Where, for uncontrollable reasons, deployment over a more extended front is necessary, strong reserves are the only means available to meet the dangers to such over-extension.

INTRENCHMENTS.

133. On the defensive the artificial strengthening of the position taken up is limited only by the time and the facilities available. On the offensive intrenchments are used on all lines that are to be held for any length of time. Troops advancing to the attack must understand that the best protection against losses is afforded by an uninterrupted and vigorous advance toward the enemy's position, and by the use of such natural cover as the ground offers. In the attack intrenchments will be used only when further advance is for some time impossible, and to hold ground already gained.

USE OF MACHINE GUNS.

134. Machine guns are emergency weapons. They are best used when their fire is in the nature of a surprise to the enemy at the crises of combat. Their effective use will be for short periods of time—at most but a few minutes—until silenced by the enemy. When engaged they must be used to the limit of their effective capacity. On the offensive they find their use in assisting the attack to obtain fire superiority temporarily lost and against lines of trenches which are to be assaulted. In the defensive they are used against large targets visible for a short time only, and on advancing lines of the enemy's infantry within the close and effective ranges. The effect of the enemy's fire, particularly his artillery fire, on machine guns, is lessened by their employment in small groups.

POST OF THE LEADER.

135. On the march when there is a probability of contact with the enemy, the leader of each column is at the front, usually well forward with the advance guard. During action, in forces no larger than a brigade, the leader places himself far enough to the front to personally direct the movements of his command. In divisions, it will, at times, be possible to find a point of observation from which the division commander can personally supervise the course of the action or, at least, overlook the most important part of the field assigned to his division. In forces not larger than a division, the post of the leader dur-

ing combat is usually near the position of the reserve. In forces larger than the division, and in the division where the terrain does not permit of personal observation, it is best for the leader, during the action, to be well in rear, removed as far as possible from the sights and sounds of the battlefield, in order that his decisions may not be unduly influenced by local conditions. In this case communication with all parts of the battlefield must be direct, rapid, and continuous.

RESERVES.

136. The preponderating influence of rifle fire in deciding an action seems to call for the deployment in the early stages of all the troops that can be used on the firing line. But rifle fire, even with the maximum possible support of artillery fire, will not alone force a favorable decision. Infantry, properly trained and properly led, can not be driven from position by fire action alone. For that purpose an assault actually delivered, or one that shows a determination to close with the enemy, is necessary. The firing line prepares the way for this assault, but is not in itself sufficient for its completion. Fresh troops must be at hand to give the firing line the impetus necessary to drive it forward, and fresh troops must be at hand to actually penetrate the enemy's position, to fill in gaps that develop in the line, to cover the reorganization of troops disorganized in the assault, and to meet counter attacks. On the defensive, troops must be at hand to meet the play of the opponent who holds the initiative. In both offensive and defensive combat, flanks that are vulnerable must be secured. For all such purposes some troops must be kept out of the firing line until the very last stages of the action. Reserves are thus a necessity and they must be strong enough to answer the demands made upon them during the entire combat.

The reserve is the leader's weapon, which, on the offensive, enables him to shape the course of the action and to finally force a decision. On the defensive, it enables him to meet the developments of the action as they arise. Adequate reserves must be held for the crises of combat, but all troops will find a field for activity before or at the close of the battle.

137. The knowledge of the situation that the leader possesses must guide him in fixing the strength of the reserves. On the offensive one-fourth to one-third of the entire force is held out at first as a reserve in all units down to and including the regiment. In the passive defense, after the requirements of the firing line are fully provided for, the governing consideration in fixing the strength of the reserve is the vulnerability of the flanks. Where the flanks are secured by other means, a reserve as low as one-eighth of the entire force may suffice. In the defense seeking an opportunity to attack, the change from the defensive to the offensive, together with the requirements of flank protection, requires strong reserves. Here it may be necessary to hold out at first, for this purpose, as much as two-thirds of the entire force.

In an attack involving forces of the size of a division, or larger, the brigade reserves protect the flanks of the attacking lines, support such lines if they be repulsed, meet counter attacks, secure the captured position, thus giving the disordered attacking lines time to re-form, and initiate the pursuit of the retreating enemy. In the brigade on the outer flank of an enveloping movement the reserve may be used at the last to extend the line. In the defense, the brigade reserve is used to protect the flanks of its firing lines, to support such lines if driven back, to make local counterattacks, and to cover the retreat of its firing lines, if the latter be compelled to withdraw from action.

138. In Divisions. In divisions, the division reserve is used to meet enveloping or turning movements; to make an enveloping movement where the situa-

tion of the division permits; to fill in gaps that may develop between its own divisions and others on its flanks during the course of the action; and to make counterattacks. A decisive engagement will call for the use of all or nearly all of the reserves before a decision is reached, but if any part of the reserve remains in hand when a retreat becomes necessary, it will be used to cover the withdrawal from action and re-formation of the deployed lines.

139. In Field Armies. In field armies the general reserve may be smaller proportionally than in the division acting alone. Its function is not to reinforce divisions in action, or to be used piecemeal in any part of the field. It finds its best use as a mass of maneuver to envelop or turn the enemy's position, to meet similar moves on his part, or to change the character of the action, as from defensive to offensive.

140. Artillery. Artillery that can find active employment anywhere in an action is out of place as a reserve. When the unit of which it forms a part is held as a reserve, it remains a component part of such reserve unless detached for active use in some part of the field under the orders or directions of the superior leader.

Cavalry. The value of cavalry as a reserve lies mainly in its mobility. The cavalry division gives the leader of the field army a valuable and powerful weapon with which to meet any crises in combat which demand the employment of troops possessing the highest mobility. But to rely wholly upon cavalry for a reserve is to restrict the sphere of activity of that arm. Reserves other than those composed of cavalry must be provided for.

PLAN OF ACTION.

141. Upon the information of the enemy and of the terrain obtained by reconnaissance and, as far as time will permit, upon the study of the terrain in the field of probable operations made by the leader, the plan of action is based. After contact is gained the decision will be to attack, to take up a defensive position, to withdraw, or to change the direction of march. The offensive must be the rule, to be departed from only for uncontrollable reasons.

The following factors must be considered in arriving at the decision: The mission, relative numerical strength of the opposing force, relative efficiency of the troops on both sides, the terrain, and the probable results of victory or defeat. In doubtful cases aggressiveness and initiative will usually win. To take up a defensive position, to withdraw, or to change the direction of march so as to avoid contact with the enemy may be a conservative or prudent course to follow in doubtful cases, but such a course will not bring victory nor shorten the campaign. The mission of an army in war is to win battles. Every step taken must be with that end in view.

COMBAT ORDERS. (See Article III and Appendix 3.)

142. The initial combat orders of the division and of all units higher than the division are almost invariably written. Troops may be put in motion in the desired direction, especially in a *rencontre engagement*, by verbal orders, but such verbal orders must be followed as soon as possible by written orders. After the action has begun the greater number of the orders given by the higher commanders will be fragmentary and verbal. In units higher than the regiment all such orders will, as far as practicable, be written out by a staff officer at the time they are issued, and a copy thereof be given the officer charged with the execution of the order, if possible at the time the order is delivered, otherwise as soon thereafter as it is possible to furnish it.

Troops deployed and under fire can change front only at the risk of incurring heavy losses. When they are once committed to any line of action, change to another is costly both in men and morale. It is impossible for the higher troop leaders to directly influence the course of an action once begun in any way except through the use of such reserves as may be at hand. Modern fire effect will not permit the higher leaders to change abruptly the course of action of troops already engaged by the mere sending of orders, verbal or written, to the commanders of such troops. These principles must be borne in mind in issuing combat orders.

Combat orders are the expression of a fixed decision and must definitely state the end in view, such as "To attack," or "To take up and defend" a position. Vague or ambiguous orders indicate vacillation and the absence of any definite decision on the part of the officer responsible for them. Troops have a right to be told, in terms that are direct and unmistakable, exactly what it is their leader wants them to do.

143. Armies. In armies, combat orders will often be in the form of, or a part of, letters of instruction to the commanding generals of the field armies composing the army. But where the field armies are within supporting distance of each other and can mutually coöperate in the task assigned them, formal combat orders may be issued. Such orders are necessarily general in their character and consist of a statement of the objective sought by the army commander, and of the part he expects each field army to play in attaining this objective. The army commander, either by means of letters of instruction or by personal conferences with his field army commanders, fully acquaints them not only with the immediate end in view, but also with so much of his further plans as may be necessary to insure thorough coöperation on their parts.

144. Field Armies. In field armies, combat orders recite the decision of the commanding general and assign the tasks that each division is to perform in carrying out such decision. Details as to the movements of any part of a division, including the trains, have no proper place in combat orders of field armies.

145. Divisions. In divisions, or in forces smaller than a division but made up of two or more arms, the combat orders will recite the purpose of the commanding general, which is either the expression of his own decision, or is the task allotted him by the higher commander, and will then state definitely the task that each subordinate unit is to perform in the execution of this purpose. The order states definitely what each subordinate unit is to do. How the task allotted is to be performed is the function of the commanders of the subordinate units.

146. Personal conferences between the higher commanders and the subordinates who are to execute their orders may at times be advisable, in order that the latter may arrive at a correct understanding of the plans and intentions of their superiors and may correctly interpret the orders issued. But such conferences are not for the purpose of criticising the orders or plans of the higher commander, nor to influence the latter's action. The officer issuing the order can not share the responsibility therefor with any of his subordinates. The decision, no matter how arrived at, is his alone.

147. In assigning combat tasks, divisions in field armies and brigades in divisions are given certain well-defined parts of the enemy's line to attack, or certain sections of a line to defend, or are held as general reserves. In divisions, the special troops are assigned tasks in orders only where such tasks are not definitely prescribed in the manuals for the employment of such troops in combat. Combat orders of divisions fix the position of ammunition distributing stations, dressing stations, and stations for the slightly wounded.

If no previous arrangements have been made for the disposition of the trains, the combat order provides for grouping all trains not needed on the battle field far enough to the rear so as not to interfere with the movements of the combatant troops, should withdrawal become necessary.

148. Combat orders need not necessarily provide for the protection of flanks or maintenance of communication, nor for the keeping up of local reconnaissance, unless some special disposition is desired. Such matters are attended to by the commanders of all units involved, as a matter of course. If an omission in these respects is to be feared on the part of a subordinate, attention may be directed to them in orders, provided such subordinate can not be replaced by an officer more fitted to command.

149. Commanders of subordinate units cannot plead absence of orders or the nonreceipt of orders as an excuse for inactivity in a situation where action on their part is desirable, or where a change in the situation upon which the orders issued were based renders such orders impracticable or impossible of execution. If the subordinate commander knows what the general plan—the end in view—is, lack of initiative on his part is inexcusable.

DEVELOPMENT AND DEPLOYMENT FOR ACTION.

150. In armies, the objectives assigned to each field army are necessarily of a general character and are determined some time, often several days, preceding probable combat. The objective determines the route of march for the field army and the manner in which such march is conducted. The object is to place the field armies in preparatory positions from which development for action can be best accomplished and the divisions moved most expeditiously to their allotted tasks.

151. In the theater of possible operations, forces larger than a division will march in more than one column unless the only routes available are such as would place the different columns outside of supporting distance of each other. Divisions are within supporting distance of each other when not more than a day's practicable march apart, and when the intervals between the heads of the different columns are such as will not permit the enemy to interpose his force between them. In field armies the intervals between the divisions in march must be such as will permit simultaneous development and deployment for action, without crowding the troops or unduly extending the line.

152. When an encounter with the enemy is probable, every available means will be taken to gain information and to lessen beforehand the time that will be required in the deployment for action. Single route columns of such length that the rear elements are out of supporting distance of those in the lead, must be shortened by an extension of front, as far as security and the terrain will permit. This extension is secured by breaking the single column into two or more parallel columns, rather than by an extension of the front of such units, as for instance, marching in columns of platoons or sections—a difficult and fatiguing method of march. As the enemy draws nearer and combat becomes imminent, these columns are again broken up into smaller parallel columns, until the final development is such as to insure rapid deployment and still retain sufficient depth in formation to enable the leader to meet the after requirements of the situation.

153. Precautions must be taken, in this development for action, that each column is directed upon its probable objective, and that the different columns and parts of columns do not get out of supporting distance of each other. This development for action takes place in divisions and smaller units before the route column comes within the zone of hostile artillery fire.

154. Combats of armies or of field armies are made up of a number of local combats conducted by divisions or parts of divisions. In divisions, each brigade is given a definite objective or is held in reserve. After the combat is on, the division commander can retain but little direct control over the troops actually engaged. His control over the course of the entire action must rest in his use of the artillery and of the reserves he has at hand. The artillery is the only arm that can immediately respond to demands for support made by troops already engaged. The division commander uses this arm to meet local crises in the battle that must be met at once. The reserves are so placed and maneuvered as to meet the demands of the larger crises of the action.

155. In field armies, after the divisions are moving upon their objectives, the field army commander does not interfere in the leading of such divisions except as may be necessary to influence the entire action. His best weapon for this purpose is the general reserve.

156. After the initial deployment of the division for action the subsequent troop leading of the brigades, and of the units smaller than the brigade, follows the principles laid down in the drill regulations of the different arms.

157. With the entry into action of the infantry, the cavalry withdraws from the front. From that time on the position of the cavalry should be one of readiness for use in the crises of the combat. If inferior to the enemy's cavalry, it may be forced to conform to the movements of the latter. In such a case it will have little or no voice in the selection of the position toward which it falls back.

158. In armies the cavalry divisions will usually remain under the orders of their own field army commanders.

159. In field armies and in divisions, the selection of the flank toward which their cavalry will fall back when obliged to uncover the front is the function of the commanders of those units. The flank selected is the one most exposed, and where the active support of the cavalry may be most necessary to the infantry, or, if that factor can not be determined, the flank that affords the best field of activity for the cavalry in assisting in the main combat or in operating against the enemy's flanks or rear. Throughout the entire action contact must be maintained with the hostile cavalry, and the latter prevented from hindering the success of the infantry. To best effect this purpose the cavalry of field armies and divisions must be kept concentrated on one flank. Such a division of the cavalry in an endeavor to cover both flanks as would seriously impair its fighting capacity, is but rarely justifiable.

THE SURPRISE.

160. To be surprised is never justifiable in warfare. If, however, due to insufficient reconnaissance, troops are forced into action directly from a formation unsuitable for combat or come unexpectedly under effective fire of the enemy before development and deployment, boldness in decision and in action is usually the best line of conduct. If the enemy is still beyond close range, quick development of fire is important. Here the artillery must be put into action at once, to deliver a heavy fire upon the most threatening bodies of the enemy. If the enemy is so near that a charge is practicable, recourse to the bayonet must be unhesitating. This principle applies particularly well where troops suddenly encounter the enemy in the local phases of a battle. To attempt to retire at once when surprised is to risk annihilation.

When troops are on the march or at rest, reconnaissance by the cavalry, the omission of which is never justifiable, is the best means to guard against being surprised. In action cavalry reconnaissance is the best protection against surprise on the flanks or from the rear.

THE RENCONTRE.

161. In the rencontre, where there is no surprise, success depends mainly upon efficient troop leading. To well-trained and well-led troops the attack in the rencontre is natural, and presents fewer difficulties than under any other condition of warfare. Quick decision on the part of the leader is possible, if he has thought out beforehand and keeps constantly in mind what he will do when the enemy is encountered. On the march he must take care to change the details of his mental plan to fit the changing conditions of terrain. This principle applies to all leaders, from the superior commander down to the commander of the advance party on the march or of the outguards when in camp.

162. In rencontre combat there are but two courses open to the commander of the advance guard, viz., to attack, or to hold his position. The action of the advance guard will usually shape, and in every instance decidedly influence, that of the entire force. It must, therefore, be such as will accord with the preconceived plans and intentions of the supreme commander. The advance-guard commander must know in advance whether the general plan is aggressive or defensive, and what the ideas of his superior are as to the development of such plan. This is the only guide to action the advance-guard commander can have, but it will ordinarily suffice to determine him whether to act boldly or cautiously. The terrain of the rencontre may be the deciding factor in his decision, but, except for uncontrollable reasons, no action of the enemy should rob him of the initiative, or force him from the decision he believes to be in accord with the plans of the supreme commander.

Boldness on the part of the advance-guard commander or the prompt action of the enemy may cause an initial deployment that the development of the action shows to be faulty or on wrong lines. In such a case the action of the advance guard must, perforce, be of a holding or delaying character, in order to give time for the correct development of the main body. Until this deployment is accomplished the advance guard must hold its position. It may then be withdrawn and form the reserve.

The advanced detachments must endeavor to forestall the enemy in deployment and not only cover the advance into action of the artillery, but also disclose targets for its fire. Strong firing lines and the use of machine guns are the most important factors in successfully accomplishing this task. Important supporting points must be seized and held. This brings the enemy to a standstill, and gives the superior leader the opportunity to seize the initiative and to deploy the remainder of his troops for action, uninfluenced by the first dispositions of the enemy.

In the rencontre the early use of the artillery delays the deployment of the hostile lines or forces such deployment at long ranges and thus gains valuable time for the leader to shape his plans.

OFFENSIVE COMBAT.

THE ATTACK.

163. In combat, where the force involved is as large as or larger than a division, a simultaneous effective advance against the entire hostile front is out of the question. Modern battles are made up of a number of local combats, where success or failure in any one instance may decide the issue of the entire battle. Fronts occupied by field armies are but seldom continuous, even in comparatively flat and open country. Some parts of the line will be held much more strongly than others, and the natural defensive features of portions of the front may render part of the line naturally impregnable.

It is necessary, therefore, to select in the enemy's position limited sections, against which the decisive attacks will be made; but to insure success, the attention of the enemy must be held along his entire front. The attack thus develops into two parts; one whose task it is to actually assault the hostile position at selected points, if assault be necessary to drive the enemy out; the other whose task it is to threaten or to actually attack all other parts of the enemy's line, in order to hold the hostile troops to their position and to prevent the strengthening of the points to be assaulted.

164. As fire superiority is the first and most important requisite to success, it must be obtained at the start and maintained throughout the action. Fire superiority depends mainly upon the volume of the fire. A frontal attack alone against the hostile position may give no opportunity to obtain a greater volume of fire than that of the enemy, unless the latter's lines be unduly extended. Where that condition exists, a combination of a frontal with a flank attack promises the best results. The enemy is attacked in front by part of the force, while the remainder is directed against one of his flanks with a view to enveloping it. A successful envelopment of both flanks of the enemy, simultaneously with the frontal attack, is made possible only by a decided numerical superiority on the part of the attack. An attempt to envelop or to attack both hostile flanks, without an attack in front, entails a dispersion of force so rarely justifiable as to deserve no consideration.

165. In armies and in large field armies only the direct attack is practicable as a whole. But in the local combats of the smaller units into which the entire action is divided envelopment is usually practicable.

166. The terms "frontal" and "enveloping" attacks have no significance so far as the ultimate relative positions of the contending forces are concerned. Unless the enemy blunders or is decidedly numerically inferior, the enveloping attack finally becomes a frontal attack, so far as the brigade and smaller units involved are concerned. It must be expected, therefore, that all attacks, no matter how initiated, will ultimately be made in a direction normal to the position of the troops opposing them.

167. Preconcerted plans covering all phases of an attack are objectionable, since it is impossible to determine, until the development of the action makes it manifest, what part or parts of the enemy's line will prove the most attractive for the assault. Both frontal and enveloping attacks will be equally energetic at first, and when the time comes for the decisive attack, the part of the attacking line designated for that purpose is given, by means of the supports or reserves, the added momentum and strength that may be found necessary to a successful assault, while the remainder of the force holds the enemy in its front to his positions.

168. **Selection of Enemy's Flank to Envelop or Turn.** In the selection of the flank of the enemy against which to direct enveloping or the turning movement, the governing considerations are both tactical and strategical. Tactical considerations point to the selection of that flank of the enemy which is weakest in position or in troops, give ease in approach, affords cover to the enveloping or the turning movement, and where the defeat of the enemy will prove most disastrous to him. Strategical considerations direct the attack toward that flank of the enemy where, if successful, it will drive him away from his line of retreat and cut him off from his nearest supporting troops or the possibility of reinforcement. The possibility of defeat and the resultant position of the attacking troops must also be considered. Where tactical and strategical considerations conflict tactical considerations must govern. The gaining of the decision in combat is of primary importance.

THE ENVELOPING ATTACK.

169. The advantages of envelopment lie mainly in the longer concentric line employed, which gives a greater volume of fire, or a fire that is converging upon the enemy's position, and which may enfilade part of the enemy's line when he is compelled to form a new front or to refuse a flank of the old to meet the enveloping attack.

170. While surprise is, to a great extent, essential to the success of an enveloping attack, it can not be hoped that the enemy will so neglect the duty of reconnaissance as not to be aware of the movement in time to form a new line to meet it. The time that he has for this purpose must be reduced to a minimum by the use of cover for the enveloping force, as far as the terrain makes it possible, and by keeping at a distance the reconnoitering force of the enemy. What the enemy may be kept from knowing, if the holding and enveloping attacks be properly conducted, especially as regards coördination of time and effort, is against which part of his line the decisive attack will be finally made.

In the enveloping attack, since the enemy moves on shorter lines, he can readily extend his flank beyond that of the attack up to the limit of his strength. An attempt to meet such movement is apt to lead to overextension of troops, or to a dangerous separation of the enveloping from the holding attack. It is usually better to take advantage of the enemy's overextension and thinning of his lines by retaining a deep formation and protecting the outward flank by reserves, than to overextend in turn in an effort to outflank him.

TURNING MOVEMENT.

171. In forces larger than a division turning movements may be used in conjunction with a frontal or a frontal and enveloping attack. As a turning movement separates the entire force into two parts, each for a time outside of the immediate supporting distance of the other, both the holding and the turning force should be made up of all arms, and each force should be strong enough to maintain itself in position without calling upon the other for support. The turning movement is justifiable only when it can be made in such a manner as to permit of dividing the entire force, without giving the enemy a favorable opportunity to defeat the separated parts in detail.

THE HOLDING ATTACK.

172. This, as the name implies, is for the purpose of holding the enemy to his position by offensive action in one part of the field while a decisive blow in the nature of an assault or of an enveloping or a turning movement is struck in another quarter. The governing idea of the holding attack is to make it energetic enough to deceive the enemy, in order that he may use as many of his troops as possible in resisting it, even drawing upon his reserves for such purpose. Early development of the maximum volume of rifle and artillery fire is therefore essential, and for that reason the deployment is on extended lines. Supports and reserves are reduced to the minimum that will be needed to replace losses, secure the flanks, and strengthen those parts of the line against which the enemy might act most aggressively. Holding attacks differ from delaying actions in that the guiding principle in the former is offense and in the latter defense. The holding force may be called upon to push the attack to the point of an assault, and in the end will join in the advance on the enemy's position when the decisive attack has succeeded. Care must be taken that the holding attack does not, because of promising conditions in its front, make a premature assault on the enemy's line and be defeated before the decisive blow can be struck in another part of the field. There is danger, also,

in prematurely pushing this attack so far that its weakness or its intentions may be disclosed to the enemy and give him the opportunity to defeat the entire force in detail.

THE ASSAULT.

173. If the hostile lines are held by good infantry, properly led, and supported by good artillery, fire action alone will not bring about a decision. For this purpose the assault will be necessary.

174. In large forces assaults are local and not general. Combined assaults in forces larger than a division are not practicable, nor can the assaults of several divisions along an extended front be coördinated in time. Each battle unit to which has been assigned a distinctive mission must time its assault according to conditions in its own part of the field, but other units must keep the enemy in their front so occupied that he can not concentrate a heavy force to meet the assault or to make a counter attack.

175. While the plan of the superior leader under which the first deployment for action takes place may have in view, in a general way, an assault of certain portions of the hostile lines in the attack of an enemy position, or the forcing back of a portion of the enemy's line in the rencontre, the point of the assault can not be definitely fixed until the attack is well developed. For that reason the different parts into which the attack is divided must be so handled and the reserves must be so placed, that any portion of the line may be pushed to the assault when the proper time comes.

176. **Selection of Objective.** When the time for the assault arrives, all the firing lines will have advanced far enough toward the enemy to disclose the weak and the strong points of his lines. The selection of the objective of the assault and the time for launching it rest preferably with the superior leader in that part of the field, but conditions may arise which justify subordinate commanders in moving to the assault, or the impulse for the assault may emanate from the troops engaged and not be the result of orders. In the absence of orders, subordinate commanders are not justified in pushing to the assault, no matter how promising conditions in their front may be, if there are not reserves available in their part of the field to insure success, or if success would interfere with the general plan.

177. While the superior leader in the local combat may be so far to the rear of the firing line that it is difficult for him to perceive when the proper time to make the assault has come, he alone is in position to give it the proper direction and to clinch success by use of the reserves and by coördination of the action of the remaining troops to that of the assaulting lines. Where the assault is made by orders of subordinate commanders, or where the impulse for it emanates from a part of the firing line, there is danger that other parts of the line will have neither the power nor the inclination to move forward in support. Assaults by small bodies of troops can succeed only where conditions of terrain are such as to afford them cover and protect their flanks. Otherwise, if they are not supported by other parts of the line, the result may be the annihilation of the assaulting force. The higher commanders must keep closely in touch with the varying phases of the fire fight, and be ready to give the necessary impulse by means of the reserves or other parts of the line, when they see that the enemy's firing power is broken and there is an inclination on the part of the firing line to close with the enemy. But if they believe the time is not ripe for the assault, they must not be forced into it by the premature action of part of the line. Rather than support a premature minor assault, it is best to let such assault expend itself, even to annihilation.

178. **Support by Fire.** As soon as the decision to assault is made, all the fire that can be brought to bear by artillery, machine guns, fire of position,

and from other parts of the firing line will be directed upon that part of the enemy's lines selected for assault. The artillery must support this assault to the end, regardless of the losses it may sustain, and must continue its fire up to the moment of the charge, even at the risk of some of its projectiles striking among its own infantry.

THE PURSUIT.

179. Importance. Only by means of an energetic pursuit of the beaten enemy can the full fruits of victory and decisive results therefrom be obtained. It is not the mere defeat of the enemy's army, but its destruction, that ends the campaign. The task of the victorious army is less than half performed when it remains satisfied with the mere possession of the battle field. Pursuit must immediately follow victory, and every effort be made to continue contact with the enemy, day and night, up to the absolute limit of physical endurance of the troops.

180. Initiation. When the enemy continues the engagement until actually driven from his position by the attack, pursuit is locally initiated by regiments and battalions, whose firing lines occupy the enemy's trenches and fire on his retreating troops. Supports and reserves still in hand are held, as far as required, to meet any counterattack that the enemy may make. As the retreating enemy gets beyond the range of fire from the occupied position and the danger of a counter attack seems removed, any local reserves that remain in hand are designated by the commanders of the units to which they belong to follow the enemy in their own section of the battle field. But the need of re-forming the attacking units and of replenishing ammunition, together with the mental and physical condition of the troops that made the attack, as well as the insufficient strength of the forces immediately available, soon brings this local pursuit to an end. In order that the enemy may not be able to take advantage of this opportunity to shake himself free from his opponent, a systematic and orderly pursuit must take up the task where the local pursuit left off. The superior leader must promptly issue orders that will insure this pursuit. Where the defeat of the enemy has been decisive, pursuit by all the forces in battle formation will be the most effective in the beginning. Where, however, the attack has been of such a nature as to greatly weaken all or a part of the troops directly engaged, it is best to give such troops an opportunity to assemble and reorganize. In such a case pursuit is inaugurated by all the reserves that may remain in hand. The other troops, when reformed and reorganized, follow as a reserve.

181. When the enemy commences his withdrawal before his front lines have given way, troops committed to the attack continue in their allotted task until the enemy in their front is driven from his position, when they pass to immediate pursuit in battle formation. In the meantime, all the cavalry and horse artillery available are thrown against the flank or in front of the retreating troops, and whatever general reserves of infantry and artillery are still intact are moved against the flank or rear of the hostile holding force or at once take up the direct pursuit.

182. Conduct. No matter under what circumstances the pursuit is inaugurated, the principles under which it is conducted thereafter are the same. The task is to keep continuous contact with the enemy and to seek every opportunity to inflict losses upon him. Boldness to the point of rashness is not only justified but is demanded in the pursuit. The assumption of a dangerous offensive on the part of a retreating enemy unless he be reinforced is not to be feared so long as he is given no opportunity to free himself of his opponent.

183. Cavalry and Artillery. The cavalry takes up the pursuit of a beaten

or retreating enemy at once, without waiting for specific orders to do so. Only such mounted troops as may be necessary to keep contact with the enemy will pursue directly on the road or roads over which he is retreating. The bulk of the available mounted troops, cavalry and horse artillery, will endeavor to get on the flanks or in front of the retreating enemy, in order to bring him to a standstill, or at least delay his retreat. The task of this force is essentially independent of that of the other troops. It must endeavor to anticipate the enemy, in the possession of defiles, bridges, or other points of vantage that lie on the latter's line of retreat. Its mission is to further disorganize the enemy and, where unable in itself to break down the opposition of his larger formed bodies, to hold them to a position until the infantry and the field artillery can again come up with them. All remaining available artillery will be pushed as far in advance in the pursuit as the infantry support will permit.

Broad Front. Where the terrain permits, pursuit on a broad front is productive of the best results, as it facilitates the envelopment or turning of any position taken up by the retreating troops. If the enemy takes up a position to hold part of the pursuing line, the continued advance of the other parts will give opportunities to cut off the delaying forces of the enemy, or will compel his early withdrawal from the position taken. Where there are several pursuing columns one will thus open the way for the others. In pursuing on a broad front care must be taken that the different parts of the pursuit do not get out of supporting distance of one another.

DEFENSIVE COMBAT.

THE PASSIVE DEFENSE.

184. A force may at times fully accomplish its mission by retaining its position for a specified time with or without combat. Here the object is to avoid giving the enemy the decision, either by avoiding combat altogether or, if he attacks, by preventing him from carrying the position held by the defensive troops. The position taken up is selected, as far as the mission will permit, with reference to its natural defensive features. Since the idea of offensive combat is absent, every advantage is taken of obstacles, natural or artificial, that hinder or altogether prevent the advance of the enemy. Negative rather than positive measures are relied upon to prevent the enemy from seizing the position. In this form of defense the firing line is made as strong as possible from the first. If the flanks are not secured by other means, reserves strong enough for that purpose must be provided, but no reserves need be held for a decisive counter attack. Supports and local reserves need be only strong enough to replace losses, to strengthen or reënforce the firing line where the enemy's attack is most threatening, and to repair breaches in the line.

185. The purely passive defense is justified where the sole object is to gain time, or to hold certain positions pending the issue of events in other parts of the field. Its results, when it accomplishes its mission, can never be other than negative.

THE DEFENSE SEEKING A FAVORABLE DECISION.

186. This is the only form of the defense that can secure positive results. A force whose intentions are offensive may at times be forced to assume the defensive either voluntarily in order to gain time or to secure some advantage over the enemy; or involuntarily, as where, in the *rencontre*, the enemy gets a start in deployment for action, or where the enemy's attack is impetuous and without sufficient preparation. In either case the defensive force contents

itself with parrying the blows of the enemy, while gathering its strength and looking for the opening to strike a decisive blow.

187. The crisis of this form of the defensive comes with the counter attack, which marks the change from the defensive to the offensive. Upon the superior leader falls the responsibility of perceiving the right moment at which this change should be made and of having at hand the means necessary to effect it. The general reserve affords him the weapon necessary for his purpose. In this class of the defensive, therefore, strong supports and reserves are essential. The firing line is made as short as possible at first, in order to permit of the holding out of local supports and reserves strong enough to meet all movements of the enemy and to hold the line throughout up to the time of the decisive counter attack, and the retention until that time of a reserve strong enough to make the counter attack a success. An open field of fire for the effective and the close ranges is essential. Obstacles immediately in front of the position that might impede the counter attack are objectionable.

THE COUNTER ATTACK.

188. The part of the enemy's line at which the counter attack will be launched can not be determined definitely until the time comes to make it. The enemy's attack will usually disclose weakness in some parts of his lines, and supports and local reserves may be used to accentuate this weakness or even to develop it in that part of the enemy's line where the terrain or the position of the general reserve may give the best opportunities for the counter attack.

The counter attack may become necessary where the enemy shows the greatest strength, in order to keep him from penetrating the defensive position. The decision as to the time and the place for making the counter attack rests with the superior leader. All, or the greater part, of the general reserve is used to effect this change from the defensive to the offensive. Local counter attacks by small units are a means of defense and will often be necessary and advisable, but have no direct bearing on the main counter attack, which is controlled by the superior leader. Local counter attacks must not, therefore, be pushed to the extent of committing other than local supports or reserves to the offensive before, in the opinion of the superior leader, the time has come to strike the decisive blow.

189. The counter attack may be made by launching the reserve against the enemy's flank after he is fully committed to the attack, or straight to the front where weakness in his attacking lines is apparent. The impulse for the counter attack may at times be given by the advance of the fighting line after a repulse of the enemy and the consequent demoralization of his attacking lines.

190. When the time comes for the counter attack, all the artillery and machine-gun fire available is suddenly turned on that part of the enemy's line selected for the attack. This must not be done until the troops are ready for the attack. Otherwise, the enemy may discern the intention in time to make preparations to meet it either by reënforcing that part of his line or by pushing the assault in another part of the field.

CAVALRY IN DEFENSIVE COMBAT.

191. In all defensive combat cavalry has even a more important rôle than it holds in the offensive. It must always be ready to come immediately to the assistance of the infantry and to make any sacrifice necessary to ward off the defeat of that arm. It must be kept near at hand and ready for action, mounted or dismounted, in any part of the field. Its opportunities for mounted action to check the enemy's advancing lines, especially those that threaten the

flanks of the infantry, will probably be many. Its coöperation can not be limited to any part of the battle. It may be able to hasten by its action the time for the counter attack or to create the opportunity for such attack. The superior leader must be in immediate communication with the cavalry commander throughout the action, and the work of the cavalry must be so co-ordinated with that of the general reserves that each will be prepared to seize any opportunity created by the other. The general reserve and the cavalry, together with all the artillery not fully occupied elsewhere, are the means available to the superior leader to change from the defensive to the offensive and to make such change successfully.

DEFENSIVE POSITIONS.

192. A defensive position may be taken up and strengthened when the direction of the enemy's advance is definitely fixed, and when it will be necessary for him to carry such position in order to keep the force occupying it from accomplishing its mission. Until such condition is fulfilled the time has not come to take up a defensive position.

193. **Requisites.** The requisites to be sought in a defensive position are a clear field of fire up to the effective range of the artillery, flanks that are naturally secure or that can be made so by the use of the reserves, extent of ground suitable to the strength of the force to occupy it, effective cover and concealment for the troops, especially reserves, good communications throughout the position, and good lines of retreat. Unless the defense is to be a purely passive one, obstacles in front of the position must not be such as would impede the counter attack.

194. **Division and Occupation.** The front of the position is divided into sections and to each is assigned a unit which provides its own section reserve. The subunits provide their own supports. The entire position is prepared for defense, as far as time will permit. The governing consideration in the selection and the strengthening of the position is the needs of the infantry. Suitable artillery positions are selected and prepared, but are not occupied until the plans of the enemy are developed. In the meantime the artillery is held in readiness. Artillery firing positions must be such as will bring fire to bear at long range on attacking lines approaching from any possible direction. The artillery will serve the needs of the defense best when it can bring an effective fire to bear on the assaulting lines of the enemy and can sweep the front of the entire position.

195. **Position of General Reserve.** The position of the general reserve is such as will enable it to respond best to the most probable demands to be made upon it. If the line is such that the enemy may attempt a decisive attack along any part of it, the reserve will be held in a central position. Dividing the general reserve and holding it in two or more positions widely apart are inadvisable, except where necessary to insure the reënforcement of any part of the line in time to be effective.

196. **Advanced Positions and Posts.** The occupation by a strong force of any position in advance of the main position is objectionable, in that it involves a dispersion of strength on the part of the defense and may result in compelling the entire force to fight to a decision in the advanced position and not in the position prepared for that purpose. Where necessary to occupy advanced positions in order to secure more time before the enemy can attack the main position, or in order to keep the enemy out of them as long as possible, care must be taken that the force detailed for the purpose is not so weak that it will fall back to the main position before it accomplishes its mission, and not so strong that it will be tempted to hold out too long, with

the resultant danger of committing the remaining troops to action in advance of the main position. It is not a question of how strong a force can be spared for the purpose of occupying an advanced position, but rather how weak can this force be made and yet have strength sufficient to accomplish its mission.

The holding of strong posts in advance of the main position, either for the purpose of delaying the enemy or for observation, is not objectionable, due to the fact that the force necessary for the purpose is restricted in strength. Unlike advanced positions held in force, advanced posts may be occupied up to the last so long as any advantage is gained thereby, even to the extent of risking the total loss of the occupying detachment.

197. Supporting Points. Even on comparatively level and open ground it is rarely necessary or advisable to occupy or strengthen the defensive line to the same degree throughout its entire extent. The terrain will generally offer some points in the line that are unusually strong naturally, or that can be readily strengthened, and such points will be used as supports on which to rest the entire line. They should be selected with a view to afford each other mutual support, flanking the ground over which the enemy must attack, and compelling him to capture one or more of them before he can force a decision. Supporting points are especially desirable on the flanks of the position and where there are unavoidable salients in the line. They must form a part, and not be in advance, of the main position.

POSITIONS IN READINESS.

198. Where it is intended to resist the advance of the enemy in the immediate vicinity, and knowledge of his movements is not yet sufficiently definite to decide upon a plan of action, troops may be placed in a position in readiness for action. A position in readiness may be preliminary to taking the offensive against the enemy or, as is more often the case, to taking up and occupying a defensive position. In the former case no defensive position need be selected or prepared. The troops are developed for action in such a way as will hasten their deployment when the time comes. In the latter case defensive positions will be tentatively selected covering all the probable lines of approach of the enemy, but none of the positions so selected will be occupied or strengthened until a definite selection can be made. However, if there be a line or supporting point that is common to all the tentative positions and which must be held, no matter what may be the direction of the enemy's advance, it will be occupied at once and strengthened. The infantry necessary for its garrison will be assigned to it without delay.

199. The remainder of the infantry will be held near its most probable position in the ultimate defensive line. The artillery will be placed in readiness to command all, or at least the most probable, lines of approach of the enemy and where it can be readily moved into firing positions when required. Continued and thorough reconnaissance is most essential, and all the cavalry available will be used for that purpose, supported by other arms where such support is necessary to obtain the desired information.

200. Requisites. The requisites of a position in readiness are good means of communication to the probable positions to be occupied, or to the front where the intention is to assume the offensive, and such cover as will prevent the enemy from readily reconnoitering the position and dispositions of the troops.

WITHDRAWAL FROM ACTION.

201. No other situation in combat demands so high an order of skill in troop leading as does withdrawal from action under pressure of the enemy's attack. A leader is not justified in withdrawing from the field of battle as

long as he has reserves in hand whose active use might turn apparent defeat into victory. To hold out reserves for the sole purpose of covering a possible retreat is never justifiable as long as defeat is not a certainty. But when defeat is certain the last reserves in hand should be used to cover the withdrawal from action of the firing lines. Where all the troops have been committed to the action, and withdrawal under pressure of the enemy's attack is unavoidable, unless troops can be gotten together to cover the withdrawal of the lines that are the hardest pressed, the retreat quickly degenerates into disorderly flight. It will seldom be the case that there are not some local supports or reserves still intact somewhere along the line, or that some portions of the firing line can not be withdrawn without serious difficulty or risk. In the absence of reserves such troops are sent to occupy a position to cover the withdrawal. Cavalry and horse artillery may be used unsparingly to take the place of the infantry withdrawn, and to hold the advance of the enemy in that part of the field until the covering positions are occupied. All available artillery is used to stop the advance of the enemy.

202. Order of Withdrawal. In the withdrawal from action it is desirable to withdraw first the troops that can be most readily disengaged from the enemy. But the terrain may dictate the withdrawal first of the troops that are the hardest pressed, in order to prevent them from being cut off or forced away from the line of retreat.

COVERING POSITIONS.

203. Selection of good positions to cover the withdrawal is the most important requisite in retreat. The first covering position taken up should be far enough to the rear to prevent the troops occupying it from being directly influenced by the withdrawal from the main position, and yet near enough to such position to exert at once an influence on the action when the withdrawal begins, and to cover the retirement of the advanced lines. Defeated lines will usually be forced by the enemy's attack to retreat straight to the rear, and the covering positions selected should be located preferably to the flanks of the lines of retreat. They must afford also facilities for ready withdrawal of the occupying force. If any reserves remain at hand, they occupy the selected position and immediately make dispositions to cover the withdrawal of the advanced lines. The maximum fire effect at the long and effective ranges is desirable, and this is gained by making the firing line as strong as possible. Supports and reserves for this line are reduced to a minimum. Machine guns so placed that they can open suddenly upon the lines of the enemy are a very effective means of stopping the pursuit. A clear field of fire at the close ranges is not necessary in a covering position. The position of the artillery may be still further to the rear, but always within effective range of the main position, in order to bring fire to bear upon the enemy's pursuing lines as soon as the withdrawal from the main position is under way.

204. Successive Covering Positions. When retreat is decided upon it may be necessary to take up successively other covering positions farther to the rear before the advance of the enemy can be checked long enough to give the time necessary to properly organize the retreat, to bring the troops from the deployed battle formation into an orderly column of march, and to enable the rear guard to take up its duties in an effective manner. The principles governing the selection and the occupation of the first covering position apply to all the others. Their occupation is for the purpose of gaining time and putting as great a distance as possible between the main body of retreating troops and the pursuing enemy.

ASSEMBLY POSITIONS.

205. When compelled to withdraw, troops that have been actively engaged will usually be obliged to fall back for several miles in deployed formation before efficient reorganization and assembly is possible. It is a mistake to attempt re-formation of the disorganized units too close to the position from which withdrawal is necessary. The assembly position must be far enough to the rear to enable the deployed lines to thoroughly free themselves from all contact with the enemy and to insure sufficient time for undisturbed reorganization. Reserves must continue to cover the withdrawal of the disorganized troops until the latter have reached a safe assembly position, where complete reorganization is possible. Leaders of the smaller units, however, collect and re-form such units as fast as possible on the march.

206. As soon as the withdrawal is well under way, the superior leader goes to the rear to select the assembly position, if not already selected, and to make plans for the reorganization of his force and for its future dispositions.

THE RETREAT.

207. A step-by-step opposition to the enemy's pursuit, by taking up and holding successively covering positions to the rear of the main position, can not be continued long without involving an excessive number of troops and increasing the demoralization of the entire force. The number of covering positions taken up in the immediate vicinity of the battle field must be reduced to a minimum by organizing the retreat and forming a rear guard as soon as possible after the decision to retreat has been reached.

208. **Preparation of Plan.** The leader will bear in mind during the course of the battle the possibility of retreat, and will form at least a mental plan as to how such retreat will be inaugurated and conducted, should it become necessary. Such a plan may be considered even before combat, and the higher staff officers must be prepared to submit to the leader, when called upon, the parts of the order that concern their own departments. Lines of retreat will be selected that give the greatest strategical advantages and afford the shortest practicable routes to reinforcements or a safe position. The retreat must be on lines that lead to a concentration of the forces as soon as practicable. Measures must be thought out to keep the enemy from forcing the retreat over lines other than those selected. Covering positions are tentatively selected and the troops to occupy them are kept in mind during the shifting phases of the battle.

209. **Assignment of Roads.** In forces larger than a division, all the roads practicable for the retreat will be used and, if possible, each division assigned a separate road. In such a case, each division forms its own rear guard. When more than one division is forced to use the same road, the rear division covers the retreat.

210. **Preliminary Measures.** When the engagement has been decisive the orders for the retreat will necessarily be issued fragmentarily and in the form of successive instructions to the units involved. Under such conditions, only after the retreat is under way and the rear guard is effectively performing its duties can a combined order be issued. The trains are at once put in march in the direction of the retreat and every effort made to keep them out of the way of the combatant troops. Those troops that have been but slightly engaged with the enemy and can be readily withdrawn may be assembled, after withdrawal from action, immediately back to the firing lines, if cover be available, and at once put in order of march or used to cover the withdrawal of other troops. The troops last to withdraw, usually those that have been most heavily

engaged, may not be brought into order of march as a whole until they have fallen back to the position of assembly well to the rear.

211. Rear Guard. The formation of an effective rear guard must be the first care of the leader. The troops best adapted for a rear guard are those whose strength and morale have been least impaired in combat. All of the divisional cavalry, except reconnoitering detachments, and as much of the artillery as can be effectively used, are assigned to the rear guard. The strength of the infantry force assigned to the rear guard will usually be limited to that of the infantry immediately available, but will not exceed one-third of the entire force. The rear guard differs in composition from the advance guard in the greater proportion of artillery and cavalry. All troops doing rear-guard work should be placed under one command.

212. Conduct. The conduct of the rear guard must be governed by the consideration that the advance of the enemy must be delayed without becoming so involved in action that withdrawal is difficult or excessively costly. The rear guard that obliges all or any part of the main body to stop the retreat in order to come to its assistance, fails in its mission. The taking up of positions on a broad front on ground favorable to the use of long-range fire will oblige the enemy to make wide deployments that require much time to effect. This in itself accomplishes the mission of the rear guard. Negative measures, such as the destruction of bridges, the placing of obstructions in roads, defiles, etc., are used to the fullest extent. There need be no hesitation on the part of the commander of the rear guard in the destruction of any material objects in the path of the enemy, since such objects will undoubtedly be destroyed later by the enemy, should he, in turn, be obliged to retreat.

213. As the enemy will pursue on a broad front with a view to cutting off the delaying force on some one route or of attacking the main body in flank, the rear guard must fall back on a broad front. Flank detachments will be necessary where the terrain gives to the enemy more than one route of pursuit. The different columns into which the rear guard may be divided must be always in a position to afford mutual support, and must endeavor to keep abreast of each other. Not every good position need be taken advantage of to delay the enemy, where delay is not essential to the safety of some part of the command. The march of the main body must be expedited as far as the maintenance of order and the retention of morale will permit. Only in that way can be avoided the necessity of calling upon the rear guard for undue exertion and heavy sacrifices. Points on the line of retreat, whose possession is essential to the safety of the command, such as bridges, defiles, etc., must be secured in advance of the enemy. Strong flank positions that command the lines of retreat will be occupied by detachments from the main body and held until the rear guard comes up. Detachments of the hostile cavalry that gain a position from which they may harass the flanks of the retreating columns must be kept at a distance by the use of infantry, as all the available cavalry will find its employment in contact with the leading troops of the pursuit.

214. In the retreat the cavalry and the artillery must be called upon to make the greatest exertions and to suffer the heaviest losses, where necessary, to check the pursuit. The loss of men, horses, and matériel must be unhesitatingly faced, if there be any decided gain thereby.

215. Divisions retreating over parallel roads will endeavor to mutually support each other, and to keep their columns abreast, as far as may be possible. The cavalry division will usually find its best employment against the enemy's cavalry, or, in the absence of the latter, against a flank of the enemy's pursuit.

DELAYING ACTIONS.

216. Delaying actions are of two classes: One in which the advance of the enemy is delayed as long as is possible without imperiling the safe withdrawal of the delaying force; the other, in which this force must hold its position, regardless of the risks and losses involved, for a time that is dependent upon conditions in other parts of the field or in the theater of war.

217. In delaying actions of the first class mentioned, the firing line is made as strong as possible from the beginning. Supports and reserves are reduced to a minimum. A clear field of fire at the long and the effective ranges is most important, as the enemy must be brought under as heavy a fire as possible as soon as he comes within range. The terrain must be such as to give ease of withdrawal from the position. A clear field of fire at the close ranges is not necessary. As soon as the enemy comes within assaulting distance the position is vacated, machine guns and mounted troops delaying the advance of the enemy's lines up to the last minute that permits of safe withdrawal.

218. In delaying actions of the second class mentioned, where time must be gained even at the risk of sacrifice of the delaying force, development of effective fire at the long and effective ranges is an important element. But here the close ranges must also afford a good field of fire. Artillery and machine guns remain in action, even at the risk of total loss, as long as there is a target at which to fire.

219. Since in all delaying actions the governing idea is to gain as much time as possible before the enemy can come within assaulting distance, the position taken up must be such as will not afford cover to the attack up to the close or nearer effective ranges. Open ground to the front is desirable, in order that the enemy may be obliged to make an early and a wide deployment before advancing to the attack. A maximum extent of firing line is useful for this purpose. Supports and reserves are held well to the rear. Obstacles, natural or constructed, that impede the advance of the enemy are desirable. Defiles that can not not be readily turned offer good opportunities for delaying action.

NIGHT COMBAT.

220. With the increase in range and accuracy of fire, particularly that of the artillery, and the facilities for observation that are afforded by the use of aircraft, night operations increase in importance. Troops must often make use of darkness to minimize losses from fire and to escape observation, to prepare for an assault to be made at daybreak, or to approach a point from which a daylight assault is to be made. Night operations may be necessary also for the purpose of gaining time.

THE OFFENSIVE.

221. Even with well-trained and easily led troops, a night attack involves risks that should be assumed only for the most weighty reasons, and when the results of success are such as will justify the action. With poor troops and inefficient leaders night attacks are out of the question. As control is difficult, artillery support of the assault impossible, and confusion almost inevitable, chance is a factor that must be given maximum weight in estimating the probabilities of success.

222. A night attack may appear advisable where it is found impossible to secure the fire superiority necessary to permit of an assault by day, or where, for other reasons, it is found impracticable to push the attack to within assaulting distance of the enemy's position; to avoid the heavy losses that would be incurred in an attack over open ground against a well-prepared position:

to capture an advanced post or position, or an outpost as a preliminary to further operations; or to surprise poorly trained and poorly led troops.

223. A night attack made simultaneously, along the entire front of a division or field army, is impracticable. A force as large as a brigade may be designated for the purpose of making a night attack against one definite objective in the enemy's line, but each regiment and each battalion therein must in turn be given an objective. If a night attack is to take place along a more extended front than that assigned to a brigade, it will be made up of a number of separate attacks, and the objective assigned to each brigade must be so separated from those assigned to others that the possibility of collision between the brigades during the attack is eliminated.

224. Night attacks will be made only by order or consent of the superior leader in that part of the field. The decision to attack must be made while there is yet sufficient daylight to make all the preliminary reconnaissances and necessary preparations. A thorough knowledge of the ground and of the enemy's position is necessary for the subordinate commanders. Any coöperation on the part of the troops other than those directly assigned to the task, that may appear advisable, is provided for by the superior leader.

THE DEFENSIVE.

225. On the defensive, obstacles in front of the position occupied and strong patrols pushed well forward afford the best protection against night attacks. When the approach of the enemy is evident, the trenches are heavily manned and the supports moved close up to the firing line. Fire is not opened until the enemy is close enough to offer a profitable target, otherwise the fire will be wild and ineffective. The principal reliance in repelling attack must be placed in the bayonet. Reserves, using the bayonet only, make counter-attacks when the opportunity to do so comes, especially against the flanks of the hostile attacking lines.

NIGHT ADVANCE.

226. An advance may be made at night in order to gain ground toward the enemy's position, but without any intention of bringing on a decisive engagement with the enemy during darkness. Preliminary to such a movement patrols should be pushed toward the enemy beyond the position to be gained. If the position taken is within range of the hostile position, it must be occupied long enough before daylight to give time to strengthen it, unless it is occupied with the intention of pushing the attack at dawn.

BIVOUC ON THE BATTLEFIELD.

227. In combats between armies and even between field armies or equivalent units, several days may elapse before a decision is reached. This condition entails a severe mental and physical strain upon the troops engaged, a strain which every effort must be made to lessen as far as the requirements of the task imposed will permit. The physical wants of the troops must be provided for and every opportunity for rest given them. But shelter and comfort of the troops must be subordinated to the requirements of instant readiness for action at all times.

228. When opposing forces are in contact, night will afford the advanced troops but little opportunity for sleep. The offensive will now, more than ever before, take advantage of night to push forward and entrench new lines or strengthen ground already gained. The defensive must avail itself of darkness to strengthen its position and repair faults in its lines. Night attacks by either side are always a possibility. Regular rest for the troops occupying

the advanced lines is, therefore, out of the question, and to prevent exhaustion they must be permitted to rest at any time, day or night, when the exigencies of combat will permit.

229. It is usually impracticable, and generally inadvisable, to wholly relieve the firing lines at night by fresh troops unless a new position be taken up. While all troops bivouac at night in position, the firing lines must maintain their tactical formations and a greater readiness for action than is necessary for the other troops. To give the troops on the firing lines as much rest as possible, patrols and sentry posts, composed of the freshest troops from the supports or local reserves, are pushed to the front to keep a constant watch on the enemy and upon the foreground. Sentry posts may be entrenched and given cover from fire from both front and rear, but in such a manner as not to interfere with observation to the front. Combat patrols must look to the safety of the flanks and of the rear, where protection to the rear is not otherwise provided for. Artillery positions must be fully covered. Fires must not be lighted in any part of the position that is within range and observation of the enemy.

230. The approach of dawn is often taken advantage of by the offensive to launch an energetic attack from a position gained during the night, and by the defensive to make a counter attack and to drive back the opposing advanced lines. All troops that are necessary to meet such moves on the part of the enemy must, therefore, be held fully in readiness at that time.

MEASURES TO BE TAKEN AFTER THE BATTLE.

231. When a favorable decision on the field of battle has been gained and the enemy is in retreat, the superior leader must first give his attention to the inauguration of a systematic and orderly pursuit. The replenishment of the ammunition supply must be his next care. Other supplies necessary for the subsistence or the comfort of the troops are brought up. Orders are issued providing for the police of the battlefield, in order to prevent pillage and maltreatment of the dead and wounded, and for a thorough search for the wounded of both sides. (See also par. 349.) Field hospitals immobilized for the care of the wounded will be evacuated as rapidly as the condition of the wounded and facilities for evacuation to the rear will permit. When the decision has been adverse and a retreat is necessary, all the severely wounded and the wounded whose transport might delay or impede the retreat will be left behind with the sanitary personnel and supplies necessary to their immediate needs.

ARTICLE VI.

SHELTER.

GENERAL PRINCIPLES.

232. To maintain the efficiency of a command, the troops must have adequate shelter.

In time of peace troops in the field are generally sheltered under canvas. In local insurrections, riot or disorder, public buildings in the disturbed district may be used for sheltering the troops engaged in quelling the disturbance, when other shelter is not provided. Private buildings are not entered without the owner's consent, except in the performance of duty.

In time of war temporary use may be made of public buildings in our own country when absolutely necessary—for example, in the care of the sick and wounded; but as long as communities or individuals offer the use of buildings.

or they can be rented at reasonable rates, seizure is not resorted to unless the emergency is imperative. In enemy territory public and private buildings may be used to shelter troops and for other military purposes; but for sanitary reasons troops are seldom quartered in private buildings. When public or private buildings are to be taken for shelter, the civil authorities should be consulted and satisfactory arrangements made. Families are not removed from their dwellings if it can be avoided.

233. When troops are sheltered under canvas, they are in camp. When resting on the ground without shelter, they are in bivouac, when occupying buildings in towns or villages, or huts specially erected, they are in cantonment.

Cantonments often develop through improvement of camps—huts or temporary buildings taking the place of tents. During a prolonged suspension of hostilities, the occupation of enemy territory, and at sieges, cantonments are advantageous, especially in cold or wet weather.

234. Billeting¹ is the assignment of troops to public or private buildings for quarters.

235. The allowance of tentage to be carried on the march is fixed in Tables of Organization. The allowances at other times is fixed by the various equipment manuals.

SHELTER IN THE SERVICE OF THE INTERIOR.

236. In mobilization and concentration camps, troops are sheltered under canvas or in temporary barracks, and proper provision is made for their health, comfort, and instruction. As a rule, such camps or cantonments should fulfill the following conditions:

1. The grounds should be easily drained, naturally healthful, large enough for depots, corrals, hospitals, etc., and the encampment of the troops without crowding, and with ample space for exercise and instruction.

2. The water supply should be excellent and abundant and not liable to contamination from any source.

3. There should be ample railroad and switching facilities and suitable arrangements for loading and unloading, as the fundamental reasons for the mobilization or concentration will be defeated if ample rail or water facilities are not available to promptly receive and dispatch troops and supplies.

4. All parts of the camp should be readily accessible by good wagon roads. All arrangements for the accommodation and supply of the troops should be completed before their arrival by the permanent camp personnel sent ahead for the purpose. Camps are laid out so as to preserve the integrity of units, the headquarters of each being centrally or conveniently located with respect to its troops; tents are pitched and aligned, kitchens equipped, water and fuel supply arranged, latrines prepared, hospitals erected, and arrangements made for ample mail, telegraph, and telephone service. The general headquarters should be centrally located and connected by wire with the principal subordinate headquarters. Depots and storehouses are placed at railroad sidings and the hospitals near the railroad station. Trains are placed so as to interfere as little as possible with the comfort and cleanliness of the troops.²

No individuals, troops, or trains of organizations temporarily present should be attached to the permanent camp personnel, if it can be avoided. It is the

¹ No soldier shall, in time of peace, be quartered in any house without the consent of the owner; nor in time of war, but in a manner to be prescribed by law. (Constitution, 3d amendment.)

² See semipermanent camps, p. 1677.

function of the permanent camp personnel to operate depots, hospitals, to maintain camp telephone and telegraph lines, etc. The troops temporarily present must be in constant readiness to move.

SHELTER IN THE THEATER OF OPERATIONS.

237. Tactical considerations demand greater concentration and generally control the location of the camp.

If troops are actually engaged in field operations, their equipment, including tentage, is necessarily limited to that carried on the men, on animals, and in trains. In certain instances, after proper sanitary inspection, local buildings in the theater of operations may be used to advantage in affording additional shelter to officers, enlisted men, and animals.

If the length of a halt, during the period of operations, is of some considerable duration, when practicable additional camp equipment (baggage, tents, surplus kits, etc.) is sent up from the line of communication and temporarily placed at the disposition of organizations. In this instance every possible use is made of local buildings and temporary structures, to the end that the troops be made as comfortable as possible during the period of the halt.

238. Selection of Site. There is often little choice in the selection of camp sites in war. Troops may have to camp many nights on objectionable ground. Nevertheless, sanitary considerations are given all the weight possible consistent with the tactical requirements.

When tactical questions are not involved, and especially when the camp is to be occupied for some time, great care is exercised in selecting the site. Through no fault of their own, troops occupying an unsanitary site may suffer greater losses than in the battles of a long campaign. A medical officer assists in the selection of camp sites.

The selection of camp sites while on the march or during active operations is governed by the following conditions:

1. The ground should accommodate the command with as little crowding as possible, be easily drained, and have no stagnant water within 300 yards.
2. The water supply should be sufficient, pure, and accessible.
3. There should be good roads to the camp and good interior communication.
4. Wood, grass, forage, and supplies must be at hand or obtainable.

Closely cropped turf with sandy or gravelly subsoil is best; high banks of rivers are suitable, provided no marshes are near.

In hot summer months, the ground selected should be high, free from underbrush, and shaded with trees if possible.

In cold weather ground sloping to the south, with woods to break the north winds, is desirable.

Old camp grounds and the vicinity of cemeteries are undesirable. Marshy ground and stagnant water are objectionable on account of the damp atmosphere and the annoyance and infection from mosquitoes. Ground near the foot of a hill range generally has a damp subsoil and remains muddy for a long time. Thick forests, dense vegetation, made ground, alluvial soil, punch-bowl depressions, inclosed ravines, and dry beds of streams are unfavorable.

Camp sites should be selected so that troops of one unit need not pass through the camp grounds of another.

As a protection against epidemics, temporary camp sites in the theater of operations should be changed every two or three weeks.

239. Form and Dimensions of Camps. The forms of the camp should be such as to facilitate the prompt encampment of troops after a march and their prompt departure when camp is broken. The form of camps will depend

upon the tactical situation and the amount and nature of ground available. In certain cases, particularly in one-night halts in the presence of the enemy, camps must of necessity be contracted, while, in other cases, where a more extended halt is contemplated and where tactical reasons will permit, better camp sanitation may be secured, and a more comfortable arrangement made by the expansion of camp areas.

Appendix 1 (p. 1676) gives the general forms, dimensions, and interior arrangements of camps of troops and trains. It also shows and explains the contracted camping areas.

240. Establishing the Camp. Camp is established pursuant to the halt order. This order provides for the outpost, if necessary, and gives instructions for the encampment of the main body. When practicable, large commands are encamped by brigades.

The camping ground may be selected by the supreme commander, but in large commands is generally chosen by a staff officer sent forward for that purpose. This officer, with a representative from each brigade and regiment and a medical officer, precedes the command, selects the camping ground, assigns sections thereof to the larger fractions of the command, and causes them to be conducted to their respective sections on arrival. He also designates the place for obtaining drinking and cooking water, for watering animals, for bathing, and for washing clothing, in the order named, from upstream down.

On the arrival of the troops, guards are posted to enforce proper use of the water supply; the interior-camp guards proceed to their places, and after posting sentinels, pitch their tents. The remaining troops pitch tents and secure animals and equipment; kitchens are established and details made to procure fuel, water, forage, etc., and to prepare latrines and kitchen pits; if necessary, tents, company streets, and picket lines are ditched.

In the presence of the enemy, places of assembly for the troops are designated and directions given for their conduct in case of attack. Lines of information are established with the outpost.

241. Billeting. When troops are to be billeted a staff officer and a representative from each brigade and regiment precede the column. The staff officer confers with the civil authorities, if present, makes an equitable division of the available quarters into distinct sections, and assigns a section to each regimental representative; the latter distributes the quarters to the troops of his regiment and conducts them to their places on arrival.

Unless the force is small, shelter of this character is usually inadequate, and some of the troops must use shelter tents or bivouac. Villages and large farms often afford facilities, such as wells and cisterns, bakeries, blacksmith shops, material for repairs, fuel, and forage, which contribute to the comfort of the troops; it is therefore advantageous to camp or bivouac near them.

242. Bivouac. On marches or in the presence of the enemy troops are frequently forced to bivouac on account of lack of suitable ground or for tactical reasons. (See par. 227.) On the other hand, in fine weather, in midsummer, or in the dry season in the tropics, the troops may bivouac from choice.

From the tactical point of view, bivouacs are very convenient, but for sanitary reasons they are resorted to, as a rule, only when necessary. The general principles governing the selection of camp sites apply to bivouacs. The ground should be dry and protected against sun and wind. Light woods are nearly always good sites for infantry bivouacs, on account of the shelter and material available.

In the artillery on marches from day to day the men may be permitted to sleep under carriages or paulins covering the harness, thus obviating the necessity of pitching tents.

SHELTER DURING BATTLE.

243. During a lull in an engagement, or when hostilities are suspended for the night, the troops bivouac in line of battle on or near the position they occupy, the officers in rear of the center of their units. Reserves required to remain in instant readiness generally bivouac in column with a flank to the front. After the outposts are established, the commander of the main body decides whether the troops shall use their shelter tents or not. (See "Bivouac on the Battlefield," p. 1633.)

SHELTER DURING SIEGES.

244. On account of the long range of modern fortress artillery, the camps or cantonments of the main body of the besiegers, unless good cover is available, are generally not less than 5 miles from the enemy's works. To guard against sorties a large part of the command is continually on outpost duty, but when that duty is completed the troops return to their own camp with the main body in order to recuperate from this arduous work.

To guard against danger from epidemics in the necessarily crowded camps or cantonments of the besiegers the most careful attention is paid to the water supply and sanitation.

CARE OF TROOPS.

245. Lack of sufficient rest renders troops unfit for hard work and diminishes their power of resisting disease. Therefore commanders should secure for the troops, whenever possible, their accustomed rest.

The rules of sanitation are enforced.

Men should not lie on damp ground. In temporary camps and in bivouac they raise their beds if suitable material, such as straw, leaves, or boughs can be obtained, or use their ponchos or slickers. In cold weather and when fuel is plentiful the ground may be warmed by fires, the men making their beds after raking away the ashes.

When troops are to remain in camp for some time all underbrush is cleared away and the camp made as comfortable as possible. Watering troughs, shelter in cold weather, and shade in hot, are provided for the animals, if practicable.

In camps of some duration guard and other routine duties follow closely the custom in garrison. The watering, feeding, and grooming of animals take place at regular hours and under the supervision of officers.

The camp is policed daily after breakfast and all refuse matter burned.

Tent walls are raised and the bedding and clothing aired daily, weather permitting.

Arms and personal equipments are kept in the tents of the men. In the cavalry, horse equipments are also usually kept in the tents, but in camps of some duration they may be placed on racks outside and covered with slickers. In the artillery, horse equipments and harness are placed on the poles of the carriages and covered with paulins.

The water supply is carefully guarded. When several commands are encamped along the same stream this matter is regulated by the senior officer.

If the stream is small, the water supply may be increased by building dams. Small springs may be dug out and lined with stone, brick, or empty barrels. Surface drainage is kept off by a curb of clay.

When sterilized water is not provided, or when there is doubt as to the purity of the water, it is boiled 20 minutes, then cooled and aerated.

246. Latrines for the men are always located on the opposite side of the camp from the kitchens, generally one for each company unit and one for the officers of a battalion or squadron. They are so placed that the drainage or overflow can not pollute the water supply or camp grounds.

When the camp is for one night only, straddle trenches suffice. In camp of longer duration, and when it is not possible to provide latrine boxes, as for permanent camps, deeper trenches should be dug. These may be used as straddle trenches or a seat improvised. When open trenches are used the excrement must be kept covered at all times with a layer of earth. In more permanent camps the trenches are not over 2 feet wide, 6 feet deep, and 12 feet long, and suitably screened. Seats with lids are provided and covered to the ground to keep flies from reaching the deposits; urinal troughs discharging into the trenches are provided. Each day the latrine boxes are thoroughly cleaned, outside by scrubbing and inside by applying when necessary a coat of oil or whitewash. The pit is burned out daily with approximately 1 gallon oil and 15 pounds straw. When filled to within 2 feet of the surface, such latrines are discarded, filled with earth, and their position marked. All latrines and kitchen pits are filled in before the march is resumed. In permanent camps and cantonments, urine tubs may be placed in the company streets at night and emptied after reveille.

PART III.

ADMINISTRATION.

ARTICLE I.

GENERAL.

247. In time of war the activities of the military establishment embrace:
- (a) The service of the interior.
 - (b) The service of the theater of operations.
248. The service of the interior is carried on by:
- (a) Department commanders.
 - (b) Bureau chiefs, having for this purpose general depots of supply, general hospitals, arsenals, etc.
249. The service of the theater of operations is carried on by the commander of the field forces. The theater of operations is divided into two zones:
- (a) The zone of the line of communications.
 - (b) The zone of the advance.
- The service of the interior functions both in peace and in war; that of the theater of operations, in war only.

ARTICLE II.

THE SERVICE OF THE INTERIOR.

GENERAL.

250. The function of the service of the interior, in time of war, is to supply the commander of the field forces with the means necessary for the accomplishment of his mission.

This service is carried on by the bureau chiefs, department commanders, and in certain instances by commanders of concentration camps and of ports of embarkation. Their respective operations are directed and coördinated by the Secretary of War through the medium of the Chief of Staff.

In general the functions of the bureau chiefs and the department commander are as follows:

251. Bureau Chiefs. They are the advisers of the Secretary of War and the Chief of Staff on all matters connected with the operations of their respective departments or corps throughout the entire military establishment.

They are kept informed of the plans of the field forces and recommend the steps to be taken to insure the successful execution of these plans, as far as their respective corps or departments are concerned.

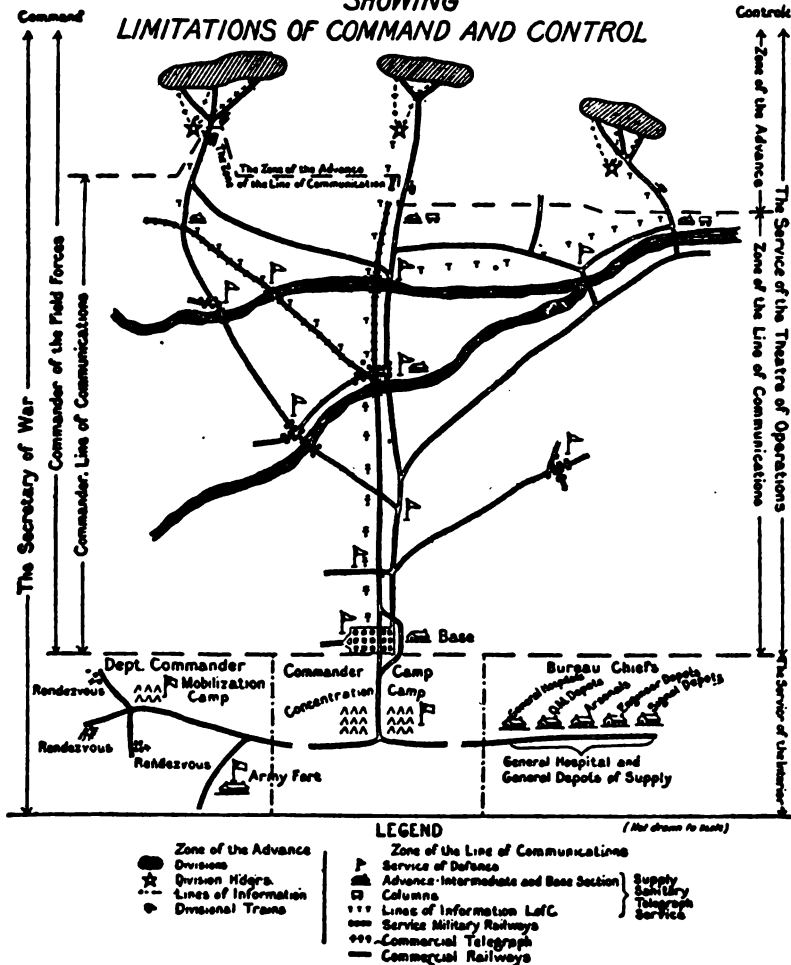

They control directly and are responsible for the efficient operation of the general depots of supply, general hospitals, arsenals, and other military establishments placed under their orders.

They are charged with the accumulation of the necessary supplies and matériel and with forwarding the same, in accordance with regulations, to the point where they come under the control of the department commander, the commander of the field forces, the commander of the port of embarkation, and in certain instances the commander of a concentration camp.

They formulate estimates for the necessary appropriations to carry on the operations of their respective departments or corps.

252. Department Commander. He is responsible for the recruitment, training, and equipment of all military forces not specially excepted within the limits of his department, and for their mobilization and dispatch to concentration camps.

OUTLINE OF THE SYSTEM OF ADMINISTRATION SHOWING LIMITATIONS OF COMMAND AND CONTROL

He is advised by the War Department where troops of his command are to be sent, the time at which they should arrive, and the commander to whom they should report. He is responsible for their movement, transportation, and supply while en route.

He is responsible that adequate records of physical examinations are prepared and that all men going forward to the theater of operations are protected by the prescribed prophylactic treatments.

He keeps the War Department informed of the state of preparedness of the troops under his command.

He is responsible for the defense of all portions of his department except where an independent commander has been assigned by War Department orders. In this latter case the responsibility of the department commander does not extend to the area of operations of the independent commander.

MOBILIZATION AND CONCENTRATION.

253. Mobilization Camps. A mobilization camp is a place, in the territory from which the troops are drawn, where they are assembled to be raised to war strength, equipped, and prepared for service.

The mobilization of the Regular Army will be effected at their permanent stations. Recruits, after being armed, equipped, and trained at the recruit depots, will be forwarded to their respective organizations.

The mobilization of the organized militia and volunteers will be effected at mobilization camps.

The general instructions relative to mobilization are published in regulations or in War Department orders.

Department commanders are responsible that all military organizations leave mobilization points: (1) with the full equipment required by existing orders; (2) with sufficient rations and grain to fully supply them while en route; and (3) with two days' rations and grain for use after their arrival at the concentration camps.

254. Concentration Camps. A concentration camp is a place near the scene of intended operations or near an embarkation point, where troops are assembled for immediate use against the enemy or for transport to an overseas theater of operations.

The command of troops at a concentration camp lies with the department commander in whose territory the camp is situated, unless these troops pertain or are assigned to a commander not under the department commander's orders prior to the concentration. The commander of the concentration camp deals directly with the War Department. In cases where it is desired to make an exception to the foregoing rule, or where doubt may exist, the authority ordering the concentration should define in orders upon whom the command falls and to whom the commander reports.

255. Concentration Camp at a Port of Embarkation. In case the concentration is ordered at a port of embarkation already provided by higher authority with a staff for receiving and forwarding troops, the responsibility for camp sites and facilities and the necessary supplies devolves upon the commanding officer of the port of embarkation. Under these circumstances the necessary staff officers will be sent in advance by the commander of the troops ordered to the camp to coöperate in making the detailed arrangements. But in case no such permanent staff is provided at the port of embarkation, the staff of the command concerned must make all provisions for receiving, camping, and supplying the troops. The necessary supplies are obtained by ordinary methods of requisition or purchase.

256. Concentration at a Point Near the Scene of Intended Operations. In case the concentration is ordered at a point near the scene of intended operations when troops are assembled for immediate use against the enemy, the necessary line of communications personnel will, if practicable, be ordered by the War Department to report to the commander of these troops and will be sent in advance by him to the camp to make all preliminary arrangements for receiving, camping, and supplying the troops. If, however, no additional personnel for the line of communications is provided by the War Department, the commander of the troops concerned designates the necessary personnel

from his own command and sends them ahead to make the preliminary arrangements.

257. Duties of the Commander of the Port of Embarkation. The duties of the commander of the port of embarkation are as follows:

- (a) To arrange camps for the troops at or near the port of embarkation.
- (b) To accumulate supplies for the maintenance of the expeditionary force while at the port of embarkation and until its arrival at the port of debarkation.
- (c) To accumulate and ship the necessary supplies for the maintenance of the troops at the overseas base pending the organization of the supply services in the theater of operations.
- (d) To make all detailed arrangements for the prompt detraining of troops and material and for their subsequent embarkation.
- (e) To see that the ships furnished him by the Quartermaster Corps are properly fitted out for use as transports.
- (f) To operate and maintain the military shipping and traffic between his port and the overseas base through a superintendent of transport service, who is a member of his staff.

(g) To command all administrative groups assigned to the port of embarkation and to be directly responsible to the War Department for the efficient and economical direction of their operations.

The commander of the port of embarkation, his staff and personnel are not subject to the orders of the commander of the troops at the concentration camp nor the latter commander to the orders of the former.

The commander of the port of embarkation prepares the schedules for the embarkation of troops, matériel and supplies on transports, and has charge of such embarkation. The commander of the camp issues the orders necessary to carry out these schedules and details a staff officer to assist the commander of the port of embarkation during the loading. Under all conditions these schedules will be made only after consultation with the superior commander of the troops to be embarked.

When a landing or disembarkation in the face of opposition is anticipated, the distribution and plan of embarkation will be made to suit the tactical requirements of the situation, and in case of a difference of opinion the final decision will rest with the commander of the troops. When no opposition to landing is expected, the final decision will rest with the commander of the port of embarkation.

Cordial coöperation between these commanders is essential to the efficient performance of their respective duties.

258. Oversea Departments. The department commander, in addition to his functions as described in "The Service of the Interior," is also charged with the defense of the oversea department, and directs all military operations within its limits. Such regulations as are applicable relating to the control and command of the commander of the field forces in the theater of operations are, in time of war, vested in the commander of an oversea department.

ARTICLE III.

THE SERVICE OF THE THEATER OF OPERATIONS.

GENERAL.

259. In the theater of operations the functions of the War Department and of the various commanders are, in general, as follows:

The War Department designates the commander of the field forces, assigns him a definite mission, prescribes the zone under his command, and supplies him with the means necessary to the accomplishment of his mission.

The commander of the field forces exercises supreme authority over all military and administrative matters within the zone assigned him, organizing the means placed at his disposal so as to insure efficiency, and directing and controlling all operations necessary to the accomplishment of his mission.

The commander of the line of communications is responsible to the commander of the field forces for the efficient operation and defense of the line of communications and directs and controls all administrative and staff services attached thereto.

HEADQUARTERS AND STAFFS.

260. All military units larger than a company have headquarters and staffs. The headquarters of squadrons, battalions, and brigades have no administrative functions. The headquarters of an independent detachment has for the time being administrative functions and during such periods is temporarily assigned an administrative staff.

The commander of an army concerns himself with only the broad questions of strategy and military policy. He assigns general missions to his subordinate commanders and leaves them to work out the necessary details. On this account he is assigned only such administrative and technical staff as he may require for these broad functions.

The staff functions of the headquarters of units larger than a brigade may be separated into two groups, i.e. (1) general staff group; and (2) a technical and administrative group—record, inspection, law, supply, sanitary, engineer, ordnance, and signal.

261. The General Staff. The Chief of Staff is the mouthpiece of his commander and should enjoy his complete confidence and a considerable degree of independence in the performance of his duties. He controls and coördinates the operations of the troops and all administrative and technical services under the orders of his commander. He is provided with such assistants as are necessary. To each such assistant is particularly assigned the work of one or more of the three general divisions of general staff work, viz.:

The first or combat section concerns itself with orders, movements, and dispositions of the forces; combats, detachments; war diaries.

The second or administrative section concerns itself with organization,

losses, reinforcements, police and discipline; questions of supplies of all kinds; signal and telegraph service; evacuation and care of sick and wounded; relations with the line of communications and all general correspondence.

The third or intelligence section concerns itself with the movements and dispositions of the enemy, including exploration, reconnaissance, and the gathering and distribution of information; interpreters, newspaper correspondents, and various agents; relations with the enemy, flags of truce, deserters, and prisoners of war; relations with the civil authorities of the occupied territory, requisitions, etc.

262. Technical and Administrative Staff. This includes the representative of the various staff corps and departments who may be assigned to the headquarters. These officers perform the duties appropriate to their office under the instructions of their commander. During the period of grand tactical operations with commands larger than a division and when a line of communication is in operation, their functions are advisory. Upon completion of the grand tactical operations and upon the discontinuance of an organized line of communications, or if no line of communications has been organized, these staff officers assume a more immediate control of their respective staff personnel, depots, hospitals, etc.

The functions of the technical and administrative staff of a division are so intimately connected with the maintenance of the division as to preclude the separation of any of its personnel for any extended period of time from its headquarters. These staff officers are the technical advisers of the division commander, and control directly the operation of such portions of their respective corps personnel as may be placed under their immediate orders.

263. The Commander of the Line of Communications. This commander reports directly to the commander of the field forces.

The mission of the tactical units and administrative groups assigned to a line of communications is to relieve the combatant field force, as far as possible, from every consideration except that of defeating the enemy.

It is necessary that the commander of the field forces be relieved from the consideration of details and thus be free to consider the broad lines of action to be followed by his command.

A line of communications is not organized when a force can safely occupy a territory without military operations of an extensive character. In this case administration and supply naturally and properly follow the same general principles as with troops in the service of the interior.

ARTICLE IV.

THE ZONE OF THE ADVANCE.

GENERAL.

264. The division is the great administrative unit and forms the model for the organization of the administrative service of smaller units operating independently. To the division alone are regularly attached ammunition, supply, sanitary, and engineer trains. Field army troops may be assigned to divisions for the purpose of supply and for the care and evacuation of their sick and wounded. In this instance the divisional trains of the division to which they are assigned must be increased. When field army troops are organized into a separate brigade their administration and supply follows the principles laid down for a division. In this instance the necessary ammunition, supply, and sanitary trains are organized and assigned to the brigade.

265. Military administration follows the fundamental principle that troops in action should not have their attention diverted from their task of defeating the enemy by anxiety concerning questions of supply or evacuation of sick or wounded. The impetus in all these matters should be given from rear to front, by the troops or services in the rear.

Normal routine requirements which can be foreseen are replaced automatically and without the preliminary of formal requisitions. This has particular application to furnishing rations, grain, ammunition, and sanitary supplies.

266. It is the function of the line of communications to extend its lines so as to make contact with the divisions in advance, and not the latter's function to extend back.

During certain periods of time the line of communications will be within a short distance of the division, whereas, during other periods, for tactical and strategical reasons, this distance may be greatly increased, and often for short periods of time all connection between the line of communications and certain units of the division may be severed.

267. In principle, the administrative services of a division must have the same degree of mobility as the division itself. They should not be charged with taking care of supplies which can not be transported in the ammunition, supply, and engineer trains. The equipment of the sanitary train provides only necessities for the sick and wounded pending their immediate evacuation to the rear.

268. It is the function of the administrative services of the line of communications or of the administrative services attached to camps, as the case may be, to relieve the division from the care of its sick and wounded, and to take care of all material which the division is not normally equipped to carry.

269. In the preparation of these regulations, divisions, field armies, and armies are considered as operating in the zone of the advance. The same general principles of administration hold with reference to these units when concentrated and operating in the service of the interior and in the zone of the line of communications.

TRANSPORTATION.

270. The function of combat, field, ammunition, supply, sanitary, and engineer trains is to keep the commands to which they are attached at all times ready for action without hampering their freedom of movement.

To meet these requirements demands not only well-thought-out orders by the superior authority, but also the highest sense of responsibility on the part of those in command of these trains.

These officers must be prepared to make any sacrifice in order that their trains shall arrive at the destinations appointed at the hours fixed.

271. Baggage and other impedimenta must be reduced to a minimum, and as far as possible, all transport and material not actually required with the combatant field forces must be left in the zone of the line of communications, whence it may be sent forward as required.

272. Commanders of organizations are responsible that no unauthorized vehicles accompany troops or trains, and that no unauthorized supplies or material are transported. Train commanders and guards permit only those who are so authorized to ride on vehicles.

273. Trains will always be halted on the right-hand side of the road, leaving the left-hand side clear for the passage of troops, ambulances, etc.

274. Trains. Transportation attached to organizations is grouped under the following heads, i. e.:

(a) The trains assigned to organizations smaller than a brigade designated combat and field trains, respectively.

(b) The trains assigned to divisions, designated ammunition, supply, sanitary, and engineer trains, respectively.

In addition to the foregoing, there are ammunition, supply, sanitary, and engineer columns which are attached to and belong to the advance section of the line of communications. (See par. 279.)

275. Combat Trains. Combat trains include all personnel, vehicles and animals attached to organizations for transporting ammunition reserve and special equipment required during combat, including the mule or cart carrying sanitary first aid equipment. To them also are attached those vehicles required for the technical service of engineers and signal troops.

Combat trains remain at all times with the unit to which attached and follow it into action. In the cavalry and field artillery it may be advisable to temporarily separate combat trains from the troops.

276. Field Trains. Field trains include all personnel, vehicles, and animals attached to organizations or headquarters for the transportation of the authorized allowance of baggage, rations, and grain, and include rolling kitchens, if supplied. Wagons of sutlers, correspondents, etc., accompanying a field force by proper authority are assigned to the field train of the organization to which their owners are attached. On the march the headquarters wagons of brigades and divisions are generally attached to some regimental field train.

Field trains are assigned to regiments and independent battalions and are habitually divided into two sections: (1) A baggage section carrying baggage; and (2) a ration section carrying rations and grain exclusively, and including rolling kitchens, if supplied.

For transportation of baggage each organization is assigned its proportionate space on the vehicles of the baggage section.

277. When an organization is operating independently, the field trains are under the direct control of the organization commander. When organizations are not operating independently, field trains are ordinarily ordered to be grouped by the division commander and the senior line officer present with the train assumes command and moves it as directed by the superior authority. When the field trains are ordered grouped with the divisional train they are, for the time being, under the orders of the commander of trains.

The field trains are not again placed at the disposition of the organization until so ordered by the division commander. During combat the division commander holds the grouped trains well to the rear, thus relieving the roads of unnecessary vehicles.

In the late afternoon, or at the end of a march or close of a combat, the division commander directs the field trains to move up immediately in rear of the troops, and informs the commanding officers of organizations that their baggage sections and one day's rations from their ration sections have been ordered to be at a designated place. The organization commander at once sends an orderly to the designated place to conduct the vehicles to the organization. As soon as practicable after the arrival in camp of the ration vehicles they are unloaded and, without delay, rejoin the grouped portions of the ration vehicles. The division commander usually returns the baggage sections to the same place early the following morning.

278. Ammunition, Supply, Sanitary, and Engineer Trains. The ammunition train includes all vehicles, animals, and personnel employed in transporting the divisional artillery and infantry ammunition reserve, or in bringing up the same from the refilling point to the combat trains of organizations. (See Ammunition Service.)

The supply train includes all vehicles, animals, and personnel employed in transporting the divisional ration and grain reserve, or in bringing up the same from the refilling point to the distributing point. To it may also be attached herds of beef cattle, remounts, vehicles carrying reserve quartermaster supplies, and reserve transportation. (See Supply Service.)

The sanitary train includes all vehicles, animals, personnel, and reserve sanitary material, not attached to organizations, employed in collecting and caring for the sick and wounded of the division pending their evacuation by the line of communication. (See Sanitary Service.)

The engineer train includes all vehicles, animals, and personnel for transporting heavy entrenching tools, explosives, and other engineer equipment and material which, under ordinary conditions, is required to accompany the division. (See Engineer Train.)

279. Ammunition, Supply, Sanitary, and Engineer Columns. These columns belong to the line of communications and are attached to the advance section of its supply, sanitary, and telegraph services. They are the means whereby transportation, equipment, supplies, evacuation, and field hospitals, and ambulance companies, not continually required with a division, may be pushed forward when needed. (See par. 377.)

280. Commander of Trains. A commander of trains is assigned for each division, together with the necessary assistants and troops. He controls the marching and camping of the combined ammunition, supply, sanitary, and engineer trains. He is also charged with all matters of general police in the rear of the division while on the march and throughout the command while it is in camp. (See Military Police.)

281. When the trains of more than one division are marching on the same road, the field army commander or other superior authority designates an officer, usually a general staff officer, to decide all questions of precedence in the movement and camping of the trains of the different divisions.

282. When combat is imminent, the ammunition, sanitary, and engineer trains are ordered released from the control of the commander of trains, and thereafter during the period of the combat operate in the manner described hereafter. (See Ammunition, Sanitary Service, and Engineer Trains.)

Upon the completion of the period of combat and when no longer required to operate independently, these trains revert to the control of the commander of trains.

283. When troops are in camp, out of the presence of the enemy, ammunition, supply, sanitary, and engineer trains may be ordered released from the control of the commander of trains and operated directly under the orders of their respective chiefs of service.

SUPPLY SERVICE.

284. The zone of activity of a division operating, for an extended period of time, in a country devoid of local resources, is limited by the extreme radius of supply of the available transportation from the line of communications.

As the amount of transportation with a division is necessarily limited, contact of such force with the line of communications can be maintained for only a short distance to the rear. This distance is dependent on the character and amount of transportation and the condition of the roads.

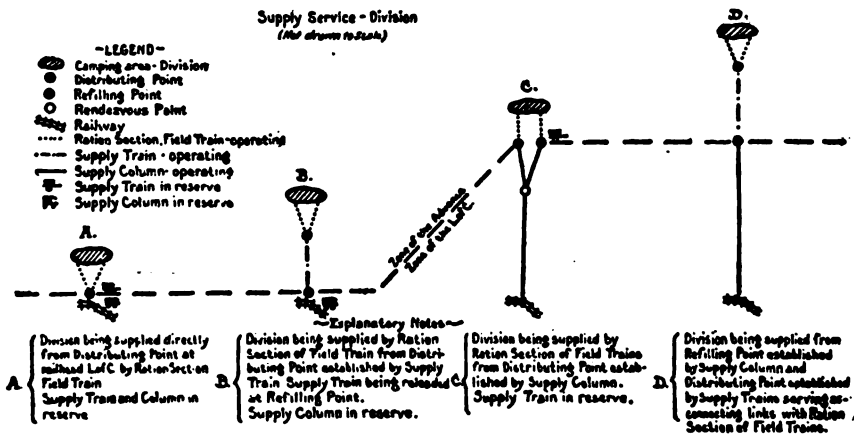

In territory not wholly devoid of local resources, the radius of supply can be increased to a greater or less extent, depending upon the use that can be made of these resources.

285. Refilling Point. A refilling point is the place where the empty vehicles

of the supply train are refilled by the line of communications. It may be a rail, automobile, tractor, wagon, or water head, and it may be at or in advance of the advance supply depot of the line of communications.

286. Distributing Point. A distributing point is the place where the ration sections of the field trains are replenished either from the supply train or the line of communications; in the latter case either directly from its depots or by means of its supply columns. When troops are advancing distributing points will usually be pushed forward close behind the troops, if possible, even up to the camping area, so that the ration vehicles may be able to refill without marching too far. In a retreat it may be advisable to deposit supplies along the probable line of retreat.

287. Rendezvous Point. A rendezvous point is a place to which line of communications supply columns (usually auto-trucks or tractors with wagons) are dispatched and where they are met by an agent of the commander of the field forces and conducted to distributing points. When it is possible to do so, rendezvous points may be fixed with advantage at the actual distributing points.

288. Distributing points are fixed by division commanders.

The commander of a force larger than a division may delegate to his division commander the duty of fixing the refilling or rendezvous points of their respective commands within certain prescribed limitations, or, on the other hand, he may himself fix these points.

In the first instance the division commander is responsible for sending timely information of the point and hour selected to the assistant chief of staff of the advance section of the line of communications. (See Par. 378.)

In the second instance the commander of the field forces notifies the division commander and the commander of the line of communications of the refilling or rendezvous point and the hour at which contact is to be made.

289. Source of Supply. For troops in campaign there are two sources of supply, namely:

1. The theater of operations.
2. The base.

It is generally necessary to utilize to the fullest extent the food, especially the forage, available in the theater of operations. This becomes practically imperative when the line of communications runs through a country devoid of railroads and waterways.

When the theater of operations is in the home country or that of an ally, supplies are obtained by purchase; when in hostile territory, by purchase or requisition. It is a fundamental principle that all supplies available in the theater of operations should be utilized to the utmost.

290. Requisitions. Requisitions are either (1) direct (foraging) or (2) by systematic collection into depots. Requisitions are resorted to only when authorized in orders of the commander of the field forces, and should be enforced by detachments commanded by a commissioned officer. Unauthorized seizure of property is punished as looting. The right to requisition food supplies in a hostile country covers the right to impress labor and means of transportation to facilitate delivery, and to make use of buildings, flour mills, bakeries, blacksmith shops, etc. Property obtained by requisition is either paid for or restored with suitable indemnification. If no reason to the contrary exists, better results are obtained when cash payment is made for supplies taken. If the supplies are not paid for upon delivery, receipts are given, copies or stubs being retained. These receipts are redeemed by the proper officer in accordance with the instructions of the commander of the field forces.

In the interests of the troops themselves, it is well, even in the enemy's country, to treat the inhabitants with the greatest consideration. At the same time, when the gravity of the situation demands it, due severity must be exercised toward hostile inhabitants. Leniency and negligence at the wrong time and place may lead to hardships for the troops.

291. Food supplies gathered by independent cavalry or advance guards in excess of their needs, are turned over to troops in the rear, and, correspondingly, those in excess of the needs of these latter troops or which can not be used for current issues or carried in the field and supply trains, are taken over by the line of communications.

292. While a well-organized system of requisitions is of great service, exclusive reliance can not be placed thereon, even in the most productive countries. As soon as the army halts, or when it advances slowly, recourse must be had to shipments brought up by the line of communications. (See Art. V.)

293. The Ration. Upon arrival of troops at mobilization and concentration camps, the ration savings privilege is suspended and entirely replaced by issues of rations in kind. This same restriction holds during the period of hostilities.

294. The garrison ration is intended to be issued in kind whenever possible. The approximate net weight of the garrison ration is 4.5 pounds.

295. The reserve ration is the simplest efficient ration and constitutes the reserve carried for field service. The approximate net weight of the reserve ration is 2 pounds.

296. The field ration is the ration prescribed in orders by the commander of the field forces. It consists of the reserve ration in whole or in part, supplemented by articles requisitioned or purchased locally or shipped from the rear, provided such supplement or substitutes correspond generally with the component articles or substitute equivalent of the garrison ration.

297. In many cases it will be possible to supply a much more varied ration to troops of the line of communications and to the advance forces, when halted in the immediate vicinity of the line of communications, than to troops at a distance from it. The allowance of transportation for field rations with the division is based on carrying a 3-pound gross weight ration. While it will ordinarily be possible to supply the full garrison ration to troops in mobilization and concentration camps, nevertheless, in the absence of orders to the contrary, these commanders have the same authority as commanders of the field force in the theater of operations with reference to prescribing the ration to be issued their commands.

298. The forage ration is prescribed in Army Regulations.

299. In the field the authorized allowances must often be reduced and supplemented by grazing and other kinds of food, such as green forage, beans, peas, rice, palay, wheat, and rye. The amount of each issued depends upon circumstances. Wheat and rye should be crushed, and fed sparingly (about one-fourth of the allowance). For unshelled corn, add about one quarter weight.

The commander of the field forces in the theater of operations may authorize in written orders the issue of increased allowances of forage for the animals of his command worn down by hard campaigning. Ordinarily this will be possible only during periods when the animals are within the immediate vicinity of the line of communications.

300. On the march grain is the only forage carried, and recourse must be had to grazing, if it is not possible to procure long forage in the country traversed.

The allowance of transportation of the forage ration with a division is based on carrying a 12-pound ration of grain for each horse and a 9-pound ration of grain for each mule.

301. **Disposition of Rations.** Organizations of all arms of a division carry on the man or animal and in field trains the same number of days' rations. The same rule applies to grain carried on animals and vehicles. They are all distributed between men and vehicles of the ration section of the field train in the same manner and, therefore, must be replenished from the supply train or column at the same time.

302. In campaign a command carries as a part of its normal equipment the following rations and forage:

(a) On each man: At least two days' reserve ration. Civil employees, etc., accompanying the combatant forces are also required to carry with them the same reserve as enlisted men.

For each draft animal: On each vehicle, a reserve of 1 day's grain ration for its draft animals.

Reserve rations are consumed only in case of extreme necessity, when no other supplies are available. They are not to be consumed or renewed without an express order from the officer in command of the troops who is responsible for the provision of supplies, namely, the division commander or other independent detachment commander.

Every officer within the limits of his command is held responsible for the enforcement of this regulation.

Reserve rations consumed must be replaced at the first opportunity.¹

In addition to the foregoing, commanders will require each man on the march to carry the unconsumed portion of the day's ration issued the night before, for the noonday meal. In the same manner, cavalry and field artillery carry on their horses a portion of their grain ration issued the night before, for a noonday feed.

(b) In the ration section of the field train: For each man two days' field,* one day's reserve, and for each animal two days' grain rations. Organizations equipped with rolling kitchens carry one day's field ration in the rolling kitchen, a corresponding reduction being made in the number of other vehicles attached to the ration section.

The one day's reserve ration is intended to provide for replacing immediately any reserve ration carried by the man which may be consumed. The two remaining days' field rations are more varied in character.

¹ This includes frequent renewal of the bacon component, which is liable to deteriorate.

² See par. 296 for composition of field ration.

(c) In Supply Train:

Of an infantry division two days' field and grain rations.

Of a cavalry division one day's field and grain rations.

Independent cavalry, when in front or on the flanks of an army, will have to depend to a great extent on the resources of the country. The rapid operations of cavalry often necessitate complete separation from slow moving field and supply trains during extended periods. Autotrucks are employed, whenever possible, in the supply of independent cavalry.

303. Operations of the Supply Service. Ordinarily rations and grain are issued to troops during the afternoon from the ration section of the field train sent forward for the purpose. These supplies provide the evening meal, the following day's breakfast, and the lunch to be carried on the man, and in addition, grain for the evening's feed, the following morning's feed, as well as the noonday feed to be carried in the nosebag. (See Par. 302.)

In the presence of the enemy the same method is used with organizations equipped with rolling kitchens, the endeavor being to furnish two hot meals evening and morning and a cold lunch to be carried on the man. When not in the presence of the enemy and on the march, the rolling kitchen usually marches with the combat train and a hot lunch is supplied.

Empty vehicles of the ration section are conducted to the designated distributing point at the hour specified (usually during the morning), refill, and rejoin the grouped field trains.

Rolling kitchens are refilled whenever empty, usually in the early morning, by the other vehicles of their ration section.

304. The supplies carried in the supply train may be held as a reserve or, on the other hand, the supply train may be so operated as to form the connecting link between the refilling point and the distributing point.

When operating as a connecting link, the supply train of a division is ordinarily divided into sections, each carrying one day's supply.

305. The service of supply is directed and controlled in orders and instructions issued by the division commander. These orders fix the distributing point or points to which the empty vehicles of the ration sections of the field trains are to be sent for resupply. The commander of trains is advised by division headquarters of the location of the refilling point to which the empty vehicles of the supply train can be sent for replenishment. The commander of trains then directs the movement forward of the necessary number of loaded vehicles of the supply train to the distributing points, and makes arrangements for their prompt return and for reloading all empty vehicles of the supply train at refilling points.

306. When supply columns are operated by the line of communications the division commander advises the assistant chief of staff of the advance section as to most convenient rendezvous point and has the supply column met at this point by a representative of the commander of trains and conducted to the distributing points.

307. The positions of the distributing points are subject to frequent changes and are ordinarily communicated to the division daily in orders. It is not necessary to inform the whole division as to the positions of refilling and rendezvous points, but information as to the points fixed must be communicated to the commander of trains.

308. The division quartermaster keeps the chief of staff informed at all times of the state of the ration and forage supply of the division, the condition of the quartermaster equipment and suggests the means for their replenishment. He controls the operation of detachments sent out for the purpose of purchasing or otherwise collecting supplies. Such supplies, transport,

or animals as may be procured are turned over to organizations or to the supply train. He daily formulates and presents to the chief of staff all orders relating to the resupply of the ration vehicles and advises as to the most suitable places for refilling, rendezvous, and distributing points.

309. The quartermaster in charge of the supply train is the subordinate of the commander of trains and operates his train as directed by the latter authority. He is responsible for the efficient operation of the supply train and commands its personnel.

310. Fresh Beef. Whenever possible, troops should be supplied with fresh beef. This supply may be effected either by driving herds of cattle with the supply train or preferably by sending up special transportation from the line of communications with frozen beef to the distributing points. In the first case the cattle are ordinarily slaughtered by the supply train personnel at appropriate times and turned over the field trains at the distributing point.

In the second case the movement of the frozen meat to the designated distributing points is effected by the supply column of the line of communications.

311. Fresh or Field Bread. Fresh or field bread is issued troops as often as possible. The bread is baked by bakery companies attached to the line of communications. Fresh bread is issued to troops in the immediate vicinity of the field bakeries. Field bread is issued and transported by supply and field trains in the same manner as other components of the ration.

312. Sales Stores. Sales stores are not supplied in advance of the line of communications. When troops have gone into permanent camp or cantonment, the advance end of the line of communications will usually be established at that point and stores sold. It may be possible at certain times for the line of communication to send forward to the combatant troops transportation loaded with this class of stores.

AMMUNITION SERVICE.

313. The system of replacing ammunition differs somewhat from that by which rations and grain are replenished. No ammunition is obtainable locally and, therefore, all the mobile ammunition reserves with the division must be replaced by the line of communications. The requirements of rations and grain are continuous, whereas the requirements of ammunition are spasmodic and neither the exact quantity nor the time of replenishment can be foreseen.

314. The organization and operation of the ammunition service is the duty of the field artillery. The commander of the ammunition train is the immediate subordinate of the divisional artillery commander after the ammunition train has been released from the control of the commander of trains.

315. Ammunition carried on the man and on the caissons of the firing batteries is replaced by that carried in organization combat trains. These latter trains are ordinarily refilled from vehicles attached to the ammunition train, though in certain instances they may be refilled directly from the line of communications or from ammunition columns.

316. It is the duty of commanders of all grades to see that due economy is exercised in the expenditure of ammunition and to make provision for its timely replenishment.

No means should remain untried for bringing up ammunition to troops in action and for keeping up the fire, on the maintenance or cessation of which the success of the action may depend.

317. It is the function of the organization commander to which a combat train is assigned to regulate the supply of ammunition from the combat train to the firing line, and to dispatch the empty vehicles of the combat train to the distributing station. Battalion commanders are charged with keeping their combat trains properly filled and equipped.

The principles under which this supply is effected are laid down in drill regulations.

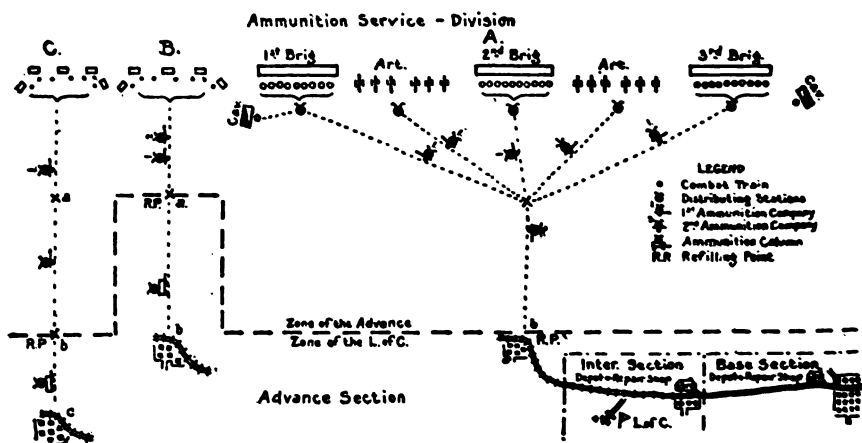

318. Ammunition Distributing Station. An ammunition distributing station is the place where combat trains are sent to be resupplied.³

Ammunition Refilling Point. An ammunition refilling point is the place where the ammunition train is refilled.

Ammunition Rendezvous Point. An ammunition rendezvous point is the place to which the ammunition columns of the line of communications are dispatched and where they are met by agents of the ammunition train and conducted to refilling points.

319. The divisional ammunition service is directed by the commander of the ammunition train, and includes the supply of both small-arms ammunition and field-artillery ammunition.

The ammunition train is organized either into two companies or into two battalions designated, respectively, the first and second ammunition companies or battalions, each battalion or company being further subdivided into infantry and artillery ammunition sections.

320. The ammunition train carries the divisional ammunition reserve from which combat trains are refilled, and is a connecting link in the chain of ammunition supply from the refilling point of the line of communications to the ammunition-distributing station. In principle, it is the function of the ammunition column to push up close to the rear of the troops and to maintain a constant supply of ammunition at the refilling point. This has the effect of shortening the haul for the ammunition train.

If no ammunition column be operated it is preferable to employ the second ammunition company or battalion in bringing up ammunition to some point designated by the ammunition-train commander, and in resupplying the first ammunition company or battalion vehicles at the same point. In the latter case the first ammunition company alone establishes and maintains distributing stations.

321. For each division the positions of the ammunition-refilling point and the rendezvous point are fixed in the same manner as are the refilling and rendezvous points of the supply service (see Par. 288), and are communicated to the commander of the ammunition train by division headquarters.

³ In the field artillery, caissons of the firing battery may also be sent directly to the distributing station.

322. In the case of a deliberate attack on the enemy in position, or when our forces occupy a defensive position, the positions of the ammunition-distributing stations are fixed in orders by the division commander and communicated to the troops. In the case of a *rencontre engagement* the ammunition train is released from the control of the commander of trains and moved forward by its commander to some suitable point from which practicable routes radiate to the different portions of the probable line of battle. This point is usually within 2 or 3 miles of the line of battle. From this point the commander of the ammunition train dispatches agents to the different brigade commanders for the purpose of arranging for the position of distributing stations and for investigating the best lines of approach to the same. If a battle has commenced, the commander of trains releases the ammunition train without waiting for orders and directs it to press forward to the field of battle.

323. Inasmuch as the expenditure of ammunition will not be the same for all portions of the line of battle, it is as a rule desirable to hold the ammunition train together during the earlier stages of the engagement. As the probable course of the engagement becomes known, different portions of the first ammunition company or battalion are pushed out and establish ammunition-distributing stations in the rear of the fighting troops. As fast as the vehicles of the first company or battalion are emptied they return and are refilled or replaced by vehicles of the second company. In the same manner empty vehicles with the second company or battalion are dispatched immediately to the refilling point, refill, and rejoin the filled vehicles.

324. The headquarters of the commander of the ammunition train during a battle is usually at the point of contact between his first and second companies or battalions. This commander sends an agent to connect division headquarters with his headquarters. The commander of each section of the ammunition train establishing a distributing station furnishes an agent to connect such station with the headquarters of the unit it supplies. Ordinarily one ammunition-distributing station is operated for each brigade; however, if required, a greater number may be operated.

325. After an engagement every effort is made to replace, without delay, all ammunition reserves with the division. The ammunition carried on the man, with the firing batteries and on the combat trains is first replaced, then that carried on the ammunition train is replaced.

326. The divisional artillery commander is kept informed at all times of the state of the ammunition supply in the ammunition train; during action by the ammunition-train agent at division headquarters, and at all other times by reports from the commander of the ammunition train.

327. Ammunition-train commanders will comply with demands for ammunition from troops of other commands, provided that their own troops are in a position to spare it. This has particular reference to supplying the needs of independent cavalry operating in the front and on the flanks of the field forces.

328. The positions of the ammunition train and its different sections when the latter are separated from the main train are marked by a red flag during the day and by a red lantern at night.

SANITARY SERVICE.

329. In general, the functions of the sanitary service are as follows:

(a) The institution of all practicable sanitary measures, to the end that the fighting forces suffer no depletion in strength due to avoidable causes.

(b). The temporary care and professional treatment of the sick and wounded

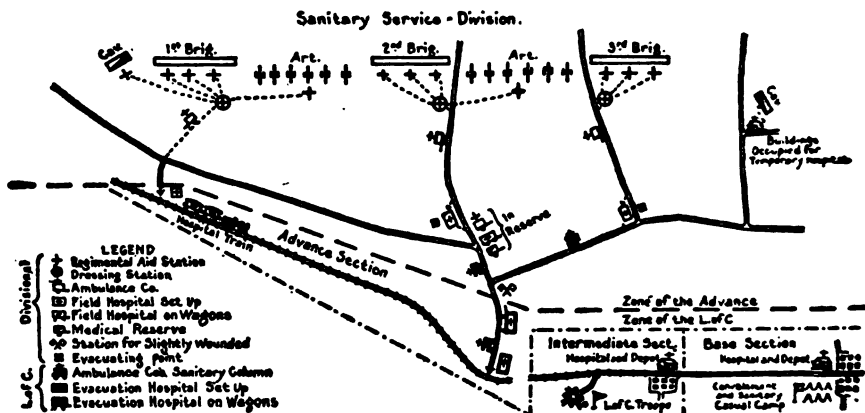

and their transportation to accessible points where they are transferred with as little delay as possible to the line of communications.

(c) The supply of the necessary sanitary equipment.

In addition, the sanitary service is charged with the preparation and preservation of individual records of sickness and injury in order that claims may be adjudicated with justice to the Government and the individual.

330. The personnel of the sanitary service in the zone of the advance may be classified into two general groups, as follows: First, that attached to organizations smaller than a brigade, which functions under the immediate orders of the organization commander and accompanies its unit into combat; second, that attached to the sanitary train, which functions under the orders of the division surgeon in accordance with such general or specific instructions as he may receive from the division commander. When necessary the sanitary personnel attached to organizations may be temporarily detached, in whole or part, and directed to operate with the sanitary train.

331. **Sanitation.** Officers and men of all arms must have a knowledge of sanitation and its importance, to the end that no depletion of the fighting force occurs through avoidable causes. The importance of adopting and carrying out proper sanitary measures cannot be overestimated.

Commanders of all grades are responsible for the sanitary condition of the quarters or localities occupied by their commands and for the enforcement of all sanitary regulations. In addition, they are responsible that all sanitary defects reported to them are promptly corrected.

A medical officer of experience, designated sanitary inspector, is charged, under direction of the division surgeon, with investigating and reporting upon the sanitation of the division to which he is attached. Sanitary inspectors report the result of their inspections to local commanders as well as to the division surgeon.

332. **First-Aid Packet.** Every man with the division carries a first-aid packet. The sanitary detachments with organizations carry pouches containing appliances for first aid and stimulants. The combat train carries litters and the necessary equipment for regimental aid station.

333. **Regimental Aid Station.** This station, established by each regiment or independent battalion during combat and when justified by the number of wounded, is the place to which all wounded of the organization are carried by its sanitary personnel, and where emergency treatment is administered. The position of the station is fixed by the organization commander and is as near

the firing line as possible. This station will often be but little more than a place for assembling the wounded, as its personnel belongs to the organization and, therefore, must be prepared to move with it. After receiving emergency treatment all wounded able to walk (except those with trivial wounds, who are sent back to the line) are directed to the station for slightly wounded; those unable to walk are delivered to the bearers sent forward from the sanitary train.

The equipment of the regimental aid station is carried on the combat train. It is operated by the sanitary personnel of the organization.

334. Dressing Stations. These stations, established during combat by ambulance companies of the sanitary train in the immediate rear of the line of regimental aid stations, are the places where all wounded unable to walk are collected from regimental aid stations by bearers of ambulance companies. If conditions so warrant, these bearers may be assisted in their work by portions of the organization sanitary personnel. From these stations the wounded are transported by ambulance companies back to field hospitals. The equipment of dressing stations is more elaborate than that of the regimental aid station. It provides light nourishment and stimulants for the wounded and affords facilities for more elaborate dressings and for emergency surgery.

The equipment for dressing stations and the necessary personnel are supplied by the ambulance companies of the sanitary train.

335. Ambulance Companies. Ambulance companies push up close to the rear of the fighting troops and as near the line of regimental aid stations as possible and establish dressing stations. In addition to their functions at the dressing stations, they are charged with the transportation of the wounded back to field hospitals and with providing the necessary equipment for infirmary service in camps. When field hospitals have not been set up and when sanitary columns or railway hospital trains of the line of communications are reasonably accessible, ambulance companies transport the wounded directly to them.

336. Field Hospital Companies. Field hospital companies form part of the sanitary train. They are set up when conditions so warrant, ordinarily some 3 or 4 miles from the battlefield and are the places to which the wounded are transported by ambulance companies. Their position must be one accessible both from the front and rear and where good water is available. Field hospitals are not set up when the sick or wounded can be turned over conveniently to elements of the sanitary column or railway hospital trains of the line of communications. Canvas is pitched only when buildings are not available or are inadequate for the purpose of housing the wounded.

The equipment of field hospitals, while more elaborate than that of dressing stations and while providing canvas for protection of the wounded from the weather and facilities for more extended surgical work, is nevertheless limited to providing necessities for the sick and wounded pending their evacuation to the rear by the line of communications. (See also Par. 268.)

337. Evacuation Points. The sanitary column of the line of communications includes ambulance companies and evacuation hospitals; there may also be available railway hospital trains and boats, any or all of which may be used as the means for the evacuation of the sick and wounded from the division. The places at which the sick and wounded are transferred from the division to the line of communications elements are termed evacuating points.

The positions of evacuating points are fixed in the same manner as is the refilling point of the supply service (see Par. 288) and communicated directly from division headquarters to the commander of the sanitary train.

338. Station for Slightly Wounded. A station for slightly wounded is established when combat is imminent to relieve dressing stations and field hospitals of the slightly wounded who can walk and require but little attention. Its position is fixed in division orders. It is operated by the personnel of the sanitary train detailed for the purpose. It is conspicuously marked so that it can be readily found.

339. The Sanitary Train. The sanitary train is composed of ambulance companies, field hospital companies, and camp infirmaries. The sanitary train is commanded by the division surgeon, or in his absence, by the senior medical officer of the attached elements, who, upon its release from the control of the commander of trains, operates it in accordance with orders or instructions received from division headquarters.

340. Service in Camps. In camps an ambulance service is furnished from the sanitary train. Infirmaries are set up at convenient points by order of the division surgeon and operated by the sanitary personnel attached to the organizations which the infirmary serves. Here cases not requiring hospital treatment are cared for, all other cases being promptly removed by the ambulance service. The senior medical officer of the units served by the infirmary assumes charge of the same and is authorized to call directly on the other organizations for their proportionate share of medical officers and sanitary personnel for the infirmary service. The sergeant, Hospital Corps, detailed with the infirmary remains with it in charge of the equipment. If necessary, field hospitals are set up for the reception of the seriously sick and wounded. (C. F. S. R., No. 3, June 22, 1915.)

341. Service on the March. When out of the presence of the enemy ambulances are ordinarily ordered distributed by the division commander throughout the column, in the rear of regiments, battalions, etc. A camp infirmary is assigned to each brigade and marches in its rear, and a field hospital should be so located in the column of march as to permit of its being available for the reception of seriously sick and injured as soon as possible after the arrival of troops in camp. (C. F. S. R., No. 3, June 22, 1915.)

342. During marches in the presence of the enemy, ambulance companies are kept intact. It may be advisable to assign one or more of these companies to a position in the column of the combatant troops, but any further dispersion is inadvisable. When combat is imminent and when so ordered by the column commander, the ambulance companies fall out of the column, and as soon as the combatant troops have passed they proceed to function as described in "Service in Combat." (See Par. 111.)

343. A man falling out from sickness or injury is sent with a pass, showing his name, company, and regiment or corps to the medical officer in the rear. The latter returns the pass, having indicated thereon the disposition made of the man.

If the man is unable to walk he is picked up by the first ambulance and cared for. If able to walk he may either be required to follow immediately behind his organization or ordered to await the arrival of the sanitary train. In the latter case, he is furnished with a tag showing the orders given him.

The arms, personal equipment, and clothing of soldiers who fall out are carried with them.

The horse, saber, and horse equipment of a mounted soldier admitted to the ambulance, or otherwise disposed of, are taken back to the troops by the non-commissioned officer that accompanied him.

344. Service in Combat. In the absence of medical assistance, the wounded apply their first-aid packets, if practicable. With this exception the care of

the wounded devolves upon the sanitary troops, and no combatant, unless duly authorized, is permitted to take or accompany the sick or injured to the rear.

345. The sanitary personnel of organizations must remain with it when advancing into action and during the whole course of an engagement. Accordingly the wounded will be treated where their wounds are received, and the sanitary personnel will pause, if the organization is moving, only so long as is necessary to give appropriate first aid. At a later stage of the combat, when the movement of the organization permits and when justified by the number of wounded, a regimental aid station is established and operated.

346. When combat is imminent, the station for slightly wounded is announced in division orders, and thereafter it is to this station that all disabled men able to walk are ordered to report. They are furnished with a tag showing the orders given them by the medical officer authorizing their proceeding to this station.

347. The evacuation of the wounded from regimental aid stations when established, and the evacuation of the wounded left by the organizations during an advance when a regimental aid station has not been established, devolves on the personnel of the sanitary train. In the case of a deliberate attack on the enemy in position, or when our forces occupy a defensive position, the positions of dressing stations are fixed in orders by the division commander, and communicated to the troops. The division commander in this case advises the commander of the sanitary train as to the position of the field hospitals.

348. In the case of a rencontre engagement, the work of establishing dressing stations, field hospitals, and of evacuating wounded during combat from the dressing station to the field hospital, or in certain cases directly to the line of communications, must be left to a great extent to the initiative and judgment of the commander of the sanitary train and his subordinates. To this end the commander of the sanitary train sends forward one or more ambulance companies to make contact in certain prescribed areas with the sanitary formations of the combatant units. When ambulance companies have been assigned positions in the column of march of combatant troops, they are ordinarily utilized in this work. The remaining ambulance companies ordinarily accompanied by one field hospital and under the immediate command of the sanitary train commander follow, and are held together in reserve at a certain prearranged position selected by the sanitary train commander and by him communicated to the commander of the ambulance companies sent ahead. The other field hospitals remain for the time being under the control of the commander of trains, to be brought forward later if required. The ambulance company commanders ordered to make contact with the combatant organizations push forward agents for the purpose of sanitary reconnaissance and for arranging for the position of the dressing stations and for determining the best lines of approach to them. When so ordered they establish dressing stations and commence collecting wounded from the different regimental aid stations, ultimately sending them back to the field hospital at the prearranged point. The commander of the sanitary train keeps himself advised by means of agents of the progress and development of the battle and the number of casualties in certain areas and from these reports and from orders received from the division surgeon he pushes forward additional ambulance companies when required, prescribing the area of their respective activity and the point to which their wounded are to be transported. At the same time he may order forward such additional field hospitals as may be required.

349. Search for Wounded. After an engagement, commanders organize a

thorough search of the battlefield in their vicinity for the wounded and assist in their protection and removal. The dead are collected by details from the line as soon as practicable after the battle and disposed of as the commander directs. (See also Par. 231.)

350. Before a command enters upon a campaign, every member thereof is provided with an identification tag by which he can be identified if killed or wounded. Such tags are not removed from the dead, but are left on the bodies when interred or otherwise disposed of. Tags found on the bodies of the enemy's dead are collected and turned over to the commander of trains, who sends them to the provost marshal at the base.

351. Retreat. In a retreat such portion of the sanitary personnel of the division as is required will remain with the sick and wounded that can not be moved, under the protection of the Red Cross flag.

352. American National Red Cross Association. The services of this association, its equipment and personnel are utilized under the immediate direction of medical officers to the greatest extent possible in the care of sick and wounded in the service of the interior and on the line of communications. Their services are not utilized in the zone of the advance.

353. Badge of Neutrality. The emblem of neutrality is a red cross on a white ground. All persons belonging to the sanitary service, including the red cross association personnel and chaplains attached to the army, wear on the left arm a brassard bearing this emblem stamped 'by competent authority. Those not uniformed carry a certificate of identity in addition to the brassard.

All sanitary formations and establishments display a red cross flag accompanied by the national flag. At night the positions of sanitary formations are marked by green lanterns.

ENGINEER TRAIN.

354. To each division is attached an engineer train which carries heavy intrenching tools, sandbags, reserve explosives, and other engineer material which may be required by the division during certain periods of combat. (See Par. 278.)

355. The organization and operation of the engineer train is the duty of the engineer corps. The engineer train is commanded by the senior engineer officer present with it, who, upon its release from the control of the commander of trains, operates it in accordance with the instructions of the senior engineer officer of the division.

356. The engineer column which is attached to the advance section of the line of communications includes in it such heavy engineer equipment as may be required, depending upon the character of operations reasonably probable, i.e., searchlights, pile drivers, map reproduction equipment, reserve of heavy intrenching tools, etc.

The engineer column may be temporarily assigned in whole or part to divisions or to operate directly under the orders of field army headquarters in the zone of the advance. When so assigned, it is for the time being removed from the control of the commander of the line of communications. If assigned directly to field army headquarters it operates under the immediate orders of the chief engineer; if assigned to a division, it forms part of the engineer train. When no longer required in the zone of the advance, it reverts to the control of the commander of the line of communications. (See Par. 279.)

⁴ For form of certificate see Rules of Land Warfare, United States Army.

ARTICLE V.

THE ZONE OF THE LINE OF COMMUNICATIONS.

GENERAL.

357. A line of communications is established for each important force about to engage in field operations involving a movement from a base.

When two or more important forces are operating from a single base, they will be under the control of a single superior commander; and only one line of communications will be operated with a single base, and with such number of advance sections as may be required.

358. A line of communications is not organized when a force can safely occupy a territory without military operations of an extensive character. In this case administration and supply naturally and properly follow the same general principles as with troops in the home country.

359. The mission of the tactical units and administrative groups assigned to a line of communications is to relieve the combatant field force as far as possible from every consideration except that of defeating the enemy.

360. The point at which the base of a line of communications is to be established is fixed in War Department orders, upon recommendation of the commander of the field forces. The personnel for the line of communications comprises groups from every branch of the army and is sent ahead by the commander of the force to secure the base, and to make all arrangements for receiving, supplying, and forwarding the troops. If no additional personnel for this purpose has been assigned to the commander by higher authority, he details the necessary officers and men from the force under his command.

361. The zone of the line of communications embraces all territory from and including the base to the point or points where contact is made with the trains of the combatant field forces. The activities of the line of communications personnel are in general limited to this zone, except that lines of information are extended to contact with the headquarters of the field force, and that ammunition, supply, sanitary, and engineer columns will be pushed forward beyond this zone when necessary.

It is the duty of the commander of the line of communications to advance this line from time to time so as to maintain contact with the trains of the field forces.

362. **Command.** All troops, military establishments, and personnel in the zone of the line of communications, are under control of its commander, except such as may be specially exempted by War Department orders. He is responsible for the defense of the line of communications and for the government of that portion of the zone placed under military control.

363. **Administration and Control.** For administration and control the line of communications is organized as follows:

- (a) A service of defense.
- (b) A supply, sanitary, and telegraph service
- (c) A service of military railways.

The senior staff officer of each group of the base section of the supply, sanitary, and telegraph service of the line of communications acts as technical adviser of the commander of the line of communications on all matters relating to the operation of his corps within the zone of the line of communications.

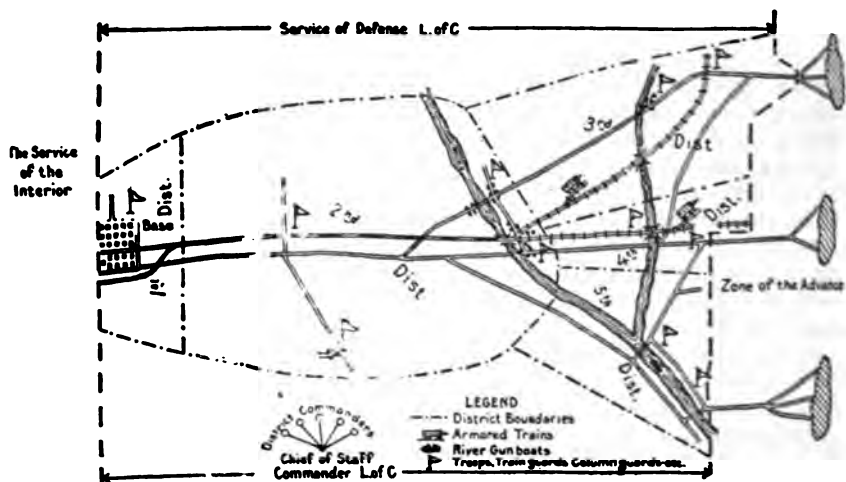

364. Staff officers belonging to organizations assigned to the service of defense have no responsibilities in connection with the operations of the

supply, sanitary, and telegraph service other than those directly connected with their organizations.

365. Upon arrival at the base all persons under the War Department orders or with authority to join the field forces come at once under the orders of the commander of the line of communications and report their arrival at headquarters.

SERVICE OF DEFENSE.

366. Suitable troops are assigned to duty under the commander of the line of communications and are charged under his orders with the defense of the line of communications and with the protection of all columns pushed out by the advance section of the supply, sanitary, and telegraph service. This territory is ordinarily divided into districts, each under a separate commander, who is responsible for the defense and military police of his own district. These commanders have no control over properly authorized movements along the line of communications, of personnel, animals, or matériel, except in case of imminent danger from the enemy. They are then responsible that traffic is stopped until, in their opinion, it may be safely resumed, or until

orders from superior authority are received. The action taken will be at once reported by telegraph to the chief of staff of the line of communications. Troops, ammunitions, or supplies going to the front are not to be diverted for the use of the line of communications troops, except by authority of the commander of the line of communications.

367. When armored trains are used their crews will form part of the line of communications troops and are under the direct orders of the commander of the district in which they are operating. Railway traffic is not to be interfered with by the use of armored trains, except in face of imminent danger from the enemy.

SUPPLY, SANITARY, AND TELEGRAPH SERVICE.

368. The commander of the line of communications is in charge of all supply and sanitary matters and of the construction and maintenance of all lines of information within the limits of his command.

He is responsible that the reserve of supplies on hand in his various depots shall be maintained between the maximum and minimum amounts fixed by

the commander of the field forces. He furnishes the War Department a copy of a list of the stores required, showing the maximum and minimum amounts to be kept on hand, and keeps the War Department informed of the amount of funds needed for the prosecution of his work. He forwards his requisitions for supplies not procurable in the theater of operations to the War Department or to such depots as the War Department may designate for furnishing particular supplies.

He prepares and enforces stringent regulations for the physical examination of officers and enlisted men, who are sick or wounded, to the end that the force in the theater of operations suffers no depletion incident to the return to the home country of malingersers, or those who within a reasonable length of time will be able to return to duty.

369. For purposes of control and coördination of the supply, sanitary, and telegraph service, a line of communications is ordinarily divided into sections, as follows: A base section and an advance section, each with an assistant chief of staff in charge competent to issue orders in the name of the commander

of the line of communications. In certain unusual cases, due to an extensive prolongation of the line of communications, an intermediate section may be required. An advance section is required at the head of each important route of supply diverging from the base.

370. The operations of a base or intermediate section extend up to, but do not include, the depots, sanitary units, and telegraph stations of the next section in advance. Each section provides for the supply of the line of communication troops within its limits. So far as possible formal accountability is terminated and replaced by a system of responsibility when supplies are turned over to troops or trains in the zone of the advance and to troops and trains of the section of defense in the zone of the line of communication. Commanders and staff officers of all grades are responsible for the proper use and disposition of supplies issued to their organizations and for supplies temporarily in their charge.

371. If no service of military railways be organized, it is the function of the base section to provide and operate the necessary means of transport or to make shipments by commercial means between the base and the section next in advance. Under similar conditions it is the function of intermediate sections,

if operated, to connect in the same manner with the section next in advance.

372. All personnel necessary to the proper functioning of the supply, sanitary, and telegraph service report at the base for assignment to duty. Here advance and intermediate sections are organized and sent forward as required.

373. **Base Section.** The assistant chief of staff with the base section is charged with coordinating the work of the quartermaster, medical, engineer, ordnance, and signal base groups.

He is informed of the probable requirements of the advance and intermediate sections, transmits this information to the officers in charge of the various groups, and issues the orders for meeting these requirements.

374. All requisitions are viséed by the assistant chief of staff of the base section before being transmitted to the point from which supplies are furnished.

375. All supplies (except those for the service of military railways) shipped into the base either for use of the field forces or for the troops of the line of communication are consigned to the "Quartermaster," "Surgeon," etc., at the base.

376. **Advance Section.** The assistant chief of staff with the advance section is charged with coordinating the work of the quartermaster, medical, engineer, ordnance, and signal advance groups. The operations of these groups extend to and include the refilling points of the division supply trains, the evacuation points for sick and wounded, and, in certain instances, to the distributing points. (See Par. 287.) The signal advance group establishes and maintains lines of information with the headquarters of the field forces.

377. To the advance section are attached ammunition, supply, sanitary, and engineer columns. The strength and composition of these columns are dependent upon the character of operations reasonably probable. (See Par. 279.)

378. The position of the advance depot is fixed from time to time by the commander of the field forces. The headquarters of the advance section is at the advance depot and it is with the assistant chief of staff at this point that the commanders in advance make all arrangements for the evacuation of sick and wounded, and for supply.

Ordinarily the advance depot will be on a line of railroad, and as near the field forces as possible. In consequence, it is more or less exposed to the enemy and, therefore, an undue accumulation of supplies at this point is undesirable.

The positions of refilling, rendezvous, and evacuation points either may be fixed by the commander of the field forces or he may delegate in orders this authority to division commanders. (See Par. 288.)

379. The allowance of transportation fixed by regulations for the divisional trains is that needed for carrying mobile reserves and for bringing up from the line of communications ammunition, rations, and grain, and for the temporary care only of sick and wounded. For all other classes of supplies, for the evacuation of the sick and wounded, and for special engineer equipment, transportation must, therefore, be provided by the different columns attached to the advance section.

SERVICE OF MILITARY RAILWAYS.

380. A service of military railways is organized when extensive military operations of a field force are dependent on a line or lines of railway for its supply in advance of the base. The construction, operation, and maintenance of these railways is a duty of the Corps of Engineers.

This service takes over from the field force all railways captured, assuming charge of their reconstruction, operation, and maintenance. It is also charged with the construction of new railway lines necessary for the supply of the field forces. It is controlled and directed by an officer detailed as director of railways, with a military controlling staff and an operating and constructing staff.

The director of railways is a member of the staff of the commander of the line of communications and is responsible to that commander for the successful operation, maintenance, and construction of the military railways. He receives his orders from that commander and takes the necessary steps to have them executed by his subordinates.

No military officer not attached to the service of military railways is allowed to give any orders to subordinates of the latter service or to interfere in any manner with the running of trains, except in the case of an impending attack. (See Par. 366.)

381. The military controlling staff is composed of such military assistants to the director of railways as the military conditions and the railway facilities require. Their duty is to represent the director of railways in the various departments or subdivisions of the railway to which they may be assigned,

to facilitate and insure the execution of the approved plans for the working of the railways, and to supply the military knowledge not possessed by the civilian officials and operators.

If two or more lines of military railway exist, a member of the military controlling staff, called an assistant director of railways, may be assigned to each line and made responsible to the director of railways for its successful operation, maintenance, and construction. The director of railways in this case is responsible for the supervision of and coöperation between the several lines.

If any single line becomes long enough to subdivide into divisions, military conditions may require that a member of the controlling staff be assigned to one or more of these divisions. In this case he is responsible to his next military railway superior for its successful operation and maintenance.

At such important railways points as may be necessary there will be assigned railway staff officers, each of whom will be responsible to his next military railway superior for facilitating and expediting the railway operations at his station.

The work of reconstruction at the railhead will ordinarily be kept separate

from the other work on the line in rear and will be done by troops, with such civilian assistance as is procurable. The officer in charge of this work will be directly under the military head of the line of railway on which he is working and is responsible for the prompt reconstruction of the line. As rapidly as practicable such reconstruction sections will be assigned to the division immediately in rear for operation and maintenance.

382. The staff of civilian assistants will consist of such railway officials, operatives, and other employees as may be available or necessary for the proper working of the military railways. As far as military conditions will permit, civilians will be used for the operation, maintenance, and construction of the military railways, officers and soldiers being used only when military conditions render it necessary. These civilians are subject to military supervision, and will be responsible in their various departments and subdivisions for executing the duties assigned to them in accordance with the plans of the director of railways.

383. The relations between the civilians of the railway service, except as modified by the director of railways, will be such as exist between those of corresponding grades on an ordinary railway. The military staff receive their orders and instructions from their next higher military railway superiors, and are subject to them only. Each member of this staff is the military adviser of the senior civilian in charge of the department or subdivision to which he is assigned. He will ordinarily leave the actual working of the road to his civil colleague, advising him of the ends desired and the military conditions involved, and will intervene in the actual working of the road only when convinced that the civilian is not taking the necessary steps to meet the requirements. The officer's decision on matters within his own department or subdivision can be overruled only by his next military railway superior.

384. The military railway supply depots are operated and maintained under the director of railways by the railway staff. All railway supplies and materials shipped into the base will be consigned to the "director of railways."

CHANNELS OF CORRESPONDENCE.

385. The commander of the line of communications must have the greatest possible freedom of action with reference to communicating with the War Department on matters of routine.

All such communications will be signed "By authority of the commander of the field forces" and will in general be confined to the following subjects, viz.:

- (a) Arrangements for maintaining the supply of stores and animals.
- (b) Matters relating to fiscal affairs or requirements.
- (c) Irregularities, defects, and deficiencies which come to his attention in the territorial or administrative zone to the rear of the base.
- (d) Arrangements for augmenting or replacing the staff and civilian personnel of the line of communications.
- (e) Arrangements for the evacuation of prisoners and of sick and wounded from the base.

After the system of supply and evacuation of sick and wounded has been fixed by the commander of the field forces, the commander of the line of communications and the assistant chief of staff of each advance section are authorized to communicate directly with the commanders whom they are ordered to supply on all detail matters relating to supply, evacuation of wounded, and maintenance of lines of information. Inversely, such commanders are authorized to communicate with the assistant chief of staff of the advance section in their immediate rear or with the commander of the line of communications on the same subjects.

ARTICLE VI.

TRANSPORTATION BY RAIL.

386. Troops may be moved by rail over commercial railways or over military railways. The former condition will obtain in all movements in time of peace, and for most concentration movements in time of war. The latter condition will always obtain in the theater of military operations, and may obtain in concentration movements in our own territory.

TRAVEL ON COMMERCIAL RAILWAYS.

387.¹ "In time of war or threatened war preference and precedence shall, upon the demand of the President of the United States, be given, over all other traffic, to the transportation of troops and matériel of war, and carriers shall adopt every means within their control to facilitate and expedite the military traffic."

388. The movement of troops and their equipment over commercial railways is the function of the Quartermaster Corps, who plan and prepare for the move in conformity with regulations and orders from competent authority.

389. Orders covering such movements should give an exact return of the command, and transportation will be furnished at the rate of 3 men to each section in tourist sleepers, or 3 men to each two seats in day coaches. When day coaches are used for journeys of over 24 hours' duration, if practicable a seat will be provided for each man.

390. Whenever organizations are moved by rail, with their animals, equipment, and matériel, it is desirable that complete units be kept together in trains divided into convenient train sections. It is preferable to have trains of moderate size with good speed rather than long trains with low speed.

If it is necessary to divide a train, some officers and men will accompany each section. The troops should not be separated from the animals if it can be avoided; but if the animals are shipped in separate sections selected detachments under officers accompany them, and such sections will precede the troops.

391. When supplies are shipped to mobilization or concentration camps, the contents of each car will be marked or placarded on the outside of the car, and the latter, when practicable, is also marked with the name of the organization to which the supplies are sent.

392. **Preparation of Cars.** Upon receipt of orders for the movement of troops by rail, the officer charged with supplying the transportation arranges with the railroad authorities for the necessary cars. He procures lists, with weights, of all property to be shipped and makes out the bills of lading, provides loading facilities and material and blocking and lashing, and constructs the necessary ramps.

Upon arrival of the cars, he inspects to see if they conform to the terms of the contract, and reports the result of his inspection to the commander.

Stock cars are inspected with especial care to see that they are in good order throughout. Projecting nails, bolts, and splinters, loose boards and rotten flooring, broken fixtures on hayracks, doors, or troughs, are sources of danger or discomfort to the animals and of loss to the Government. The cars should be clean before loading, and suitable noninflammable footing be provided.

¹ Extract from Chap. 3591, Part 1, Vol. XXXIV, Statutes at Large of the United States of America.

Passenger cars must be clean, fully supplied with water and ice, and sufficiently lighted and heated. The urinals and closets must be in good condition, well supplied with water and toilet paper, and the sleeping accommodations must be according to contract.

After the cars have been accepted, the number of men allotted to each is marked on the side or steps. The cars are then assigned to organizations and plainly marked.

393. Loading and Entraining. At the proper time loading is begun and is carried on, usually by the troops, pursuant to the orders of the commander. Heavy property may be loaded by details before the arrival of the troops.

Artillery and other carriages are made secure by lashings and by nailing blocks of wood to the flooring under the wheels.

The arrival of troops at the station should be timed so that there will be no delay in waiting for cars. When the barrack, camp, or bivouac is not more than a mile from the station, troops are not required to fall in until notice has been received that the cars are at the station and have been inspected and assigned. The command is then marched to the train and the property and animals loaded. The organizations are then marched opposite their cars and entrained. The cars are entered simultaneously, each company commander distributing his men according to the assignment. Noncommissioned officers have seats near the doors.

Troops traveling by train in time of peace seldom require their arms or all of their equipment. For instance, when sleepers are provided they generally require no equipment other than their canteens and haversacks, the mess kits and necessary toilet articles being carried in the latter. For mounted troops the saddlebags take the place of haversacks. A few revolvers or rifles suffice for the necessary guard duty. Therefore, to add to the comfort of the men train commanders may cause the arms and equipments not required en route to be properly secured and stored in a property or baggage car.

Mounted troops dismount upon arrival and remove the horse equipments, except the halter. Each man's equipment, except halter, canteen, and saddlebags, is then securely tied in a gunny sack, or other suitable receptacle, marked with the number of the man and letter of his troop, and loaded in the proper car. Each troop, except the horse holders, is then marched to its cars, where the men deposit their arms (if not otherwise disposed of), canteens, and saddlebags. It then marches back, relieves the horse holders, and loads the horses. The horse holders, unless otherwise ordered, repair to their cars carrying their arms (if left with them), canteens, and saddlebags. For short journeys the horses may be loaded saddled (stirrups crossed) and bridled or the bridles may be tied on the saddles.

In the field artillery a similar method is pursued. The harness is usually tied up in sets, plainly marked, and loaded in a box car.

Animals can be conveniently loaded through chutes of stockyards, or from freight platforms level with the car floors. In other cases portable or improvised ramps will have to be used. When it is likely that the animals will have to be unloaded at places without facilities, one or more portable ramps or the material for improvising them, should be carried on the train. The loading should proceed without noise or confusion, the animals being led quietly to the car door and turned over to the four men, two for each end, who do the loading. The animals should be packed as closely as possible, except in very hot weather. Halters are not removed. Gentle animals should be placed opposite the doors, and are therefore loaded last. Alternate animals should face in opposite directions.

394. The time required for loading each train depends upon the railroad

facilities and upon the experience of the troops. For troops leaving station to go into the field, or changing station in the field, the time required should not exceed—

One hour for infantry.

One and one-half hours for cavalry and light artillery.

Two hours for heavy artillery and for engineers with bridge train.

395. All movements of the troops in loading, entraining, and detraining, feeding and watering, and exercising men and horses are made, as a rule, in military formation and pursuant to command, thus avoiding confusion and saving time.

396. **Conduct of the Troops.** Delays caused by the troops, whether in loading and entraining or during the journey, are inexcusable. They interfere with railroad schedules and are a source of great annoyance.

The commander is the sole intermediary between the troops and the railroad personnel. In case of deficiencies and other matters requiring correction, he addresses himself to the official in charge only.

The senior noncommissioned officer in each car is responsible for cleanliness and good order. Spitting on the floors, defacing woodwork and windows, and every species of disorder must be prevented.

The commander may station sentinels at the doors of each car to prevent the entrance of unauthorized persons and to keep soldiers from riding on the steps, platforms, or tops of cars, and from leaving without permission. If it is desirable to exercise the troops, they should leave the cars in a body, under their officers.

Smoking is prohibited in cars loaded with animals or forage.

397. In movements by rail kitchen cars are provided, if practicable; otherwise, baggage cars are fitted up by the troops or arrangements are made for procuring meals, or at least liquid coffee, at stations en route.

Careful attention is paid to the messing of the men, whether in kitchen cars or in the coaches where the men ride. A mess officer supervises the preparation and serving of the meals and requires the men to keep their mess kits scrupulously clean.

398. When the stock cars provided are such that the animals can be fed and watered on the trains, it is unnecessary to unload them for exercise or recuperation unless the weather is very hot and the journey long.

399. On account of danger from fire, neither hay nor straw is carried in stock cars. A short ration of grain (about 6 pounds) is sufficient to supply animals while traveling by rail.

400. On occasions when troops have been allowed or required to leave the train for exercise or duty, the commander will cause the "assembly" to be sounded five minutes before departure.

401. **Detraining and Unloading.** The train schedule is arranged, when practicable, for arrival at destination in the morning. The troops are notified in time to prepare for detraining.

The officers and guard are the first to leave the cars. The commander meets the staff officer sent to the train, receives instructions, if any, gets his bearing and orders the troops to detrain. As soon as the passenger coaches or sleeping cars are empty, the quartermaster, or a specially designated officer, accompanied by the conductor, if practicable, makes an inspection of the cars and notes their condition; the result is reported to the commander.

The troops procure their field kits and march to camp without delay, leaving suitable details to unload and bring up the property. If the camp is distant, arms are stacked and a part or all of the command unloads the train.

In the cavalry the men are marched to the vicinity of the stock cars, where the saddlebags and canteens are placed in line on the ground, under guard. The remaining articles of the field kit and horse equipments are then unloaded and

placed with the preceding articles. The horses are then unloaded, saddled, and the troops formed.

Animals are unloaded quietly, each one being led to the opening so that his body will be athwart the car before leaving it.

The command may be marched to camp at once, if near the station; otherwise, picket lines are stretched, or the horses are held while the property is unloaded.

Artillery unloads in a manner similar to that of cavalry.

402. On account of accidents, freight blockades, or action of the enemy, it may be necessary to unload in the open country. In such cases portable or improvised ramps will have to be used. Lacking these, the train may be stopped in a low cut, and crossties, baled hay, car doors, and turf utilized for the rapid construction of ramps of sufficient height to permit unloading of animals.

TRAVEL ON MILITARY RAILWAYS.

403. **Method of Requisitioning for Railway Transportation.** Requisitions should reach the military controlling staff as early as possible and should give concise data as to the number of officers and men, animals, guns, vehicles, and supplies that will be involved in the movement. After the program for the movement has been settled, changes should be avoided as far as practicable.

404. The authority consigning animals or matériel for shipment will be responsible for loading them and for furnishing attendance and forage for the animals while en route. Ordinary shipments of supplies or matériel will be turned over to the railway authorities and will be shipped on an ordinary bill of lading. Important shipments may be accompanied by a representative of the department interested, and by a representative of the operating department.

405. The commander of the line of communications will issue regulations concerning movements of military and civil passengers over the military railways. If necessary to the enforcement of these regulations military police of the service of defense will be placed on duty on trains and at stations for this purpose.

406. **Hospital Trains.** Hospital trains will be fitted up on each line of military railway. The necessary sanitary personnel and special equipment will be supplied from the base section of the supply, sanitary, and telegraph services of the line of communications. As far as practicable such trains, or other trains carrying sick and wounded who can travel sitting up, will leave the railhead at certain fixed hours daily.

In anticipation of an engagement, rolling stock for special hospital trains will be collected and fitted up by the director of railways at suitable points to meet the probable needs. At stations where sick and wounded are to be entrained and detained, rest stations will be organized, under instructions from the commander of the line of communications, by the supply, sanitary, and telegraph services of the line of communications.

407. **Troop Movements by Rail.** In so far as may be practicable, troops will be moved on a military railway in the same manner as on a commercial railway, and the general principles given in Travel on Commercial Railway will be followed; but such conditions will not usually obtain, and troops will often have to be moved in freight equipment or packed into day coaches far in excess of the numbers given for peace movements. Rapidity of movement and economy of rolling stock will take precedence over the comfort of the troops whenever necessary.

408. Troops in the theater of operations carry with them on railway trains only such supplies, equipment, etc., as can be promptly moved away with the

troops at the detraining station, or, in other words, that which is authorized to be carried on the men and animals, and in the combat and field trains.

When large bodies of troops are moved by rail, staff officers, with representatives of the various units and departments, should precede the troops to the destination, in order to make arrangements to receive the troops, and insure their prompt movement away from the detraining point.

409. In drawing up orders for the movement of troops by rail, the following points should be clearly stated:

- (a) Date, place of entraining, destination, route to be followed.
- (b) Hours of departure of trains; time at which troops should reach the entraining place, route that they should follow.
- (c) Details in regard to feeding of troops, and watering and feeding animals en route.
- (d) Places of assembly near entraining and detraining stations.
- (e) Schedule showing assignment of troops, animals, and vehicles to different trains.

Troops will not occupy railway buildings or use the railway facilities or property without authority from the railway staff officers.

410. Duties of a Commander of a Troop Train. An officer from each unit, supplied with a copy of the order directing the movement and a field return of the troops involved, should be sent ahead to the entraining point to ascertain from the railway staff officer the arrangements for the entraining of his unit. He will communicate his information to his commander before the troops reach the station, and will then act as guide to the unit in reaching its trains. The commander of troops to be moved by rail will retain the original copy of his order.

The senior officer on every special troop train is responsible that order is maintained, and will furnish the railway operatives the necessary force to carry out the regulations. He will detail a guard on every troop train to take charge of prisoners, property, etc., and to furnish sentries, as required, at entraining and detraining points, and at stations en route. He is responsible that the regulations of the railway service are observed. Except when necessary, on account of actual or threatened attack by the enemy, he will not interfere with the working of the railway service. If an attack is anticipated, an officer should ride on the locomotive to inform the engineer when, for tactical reasons, it is desirable to stop the train.

ARTICLE VII.

MILITARY POLICE.

411. The duty of military police is to enforce all police regulations in the theater of operations and in mobilization and concentration camps. They protect the inhabitants of the country from pillage and violence and prevent excesses of all kinds; keep all roads clear; arrest all soldiers and civilian employees absent without proper authority from their organizations; arrest all marauders, and collect all stragglers and hand them over to their organizations. They keep a list and description of all camp retainers and followers and watch their conduct. They are charged with relieving organizations from the care of prisoners of war and with their safe conduct to places where they are ordered assembled.

They police all railroad stations, public houses, depots, and public buildings, protect telegraph and telephone lines and railways from damage; keep hostile inhabitants in order, carry out their disarmament, and prevent spying.

412. With the division, the commander of trains and the force under his orders exercise the functions of military police.

413. On the line of communications the commanders of defense districts exercise these functions, following up closely the advance of the division, taking over all prisoners of war, and performing the military police duties in rear of the zone policed by the commander of trains.

414. The defense commander of the area in and about the base of a line of communications is assigned as provost marshal. The functions of a provost marshal, in addition to those of general military police, are to receive and hold all classes of prisoners. He makes records of the prisoners of war, and collects and records the tags taken from the enemy's dead, as required by the laws and usages of war. The records of prisoners of war and of the enemy's dead are transmitted quarterly to the War Department.

415. In mobilization and concentration camps the powers of military police are ordinarily exercised by the commander of trains, though if conditions require, an officer may be assigned as commander of military police.

416. In cases of emergency the military police may call on any troop to assist them. All persons belonging to the military service are required to give every assistance to the military police in the execution of their duties.

417. Officers and enlisted men when actually performing the duty of military police will wear a blue brassard on the left arm half way between the elbow and shoulder bearing the letters "M. P." in white.

418. As a rule, military police on duty will not be reprimanded or placed in arrest except by the superiors under whose command they happen to be. In exceptional cases field officers and officers of higher grades are authorized to order their arrest. Members of the military police when not on duty—that is, when not wearing the blue brassard—have no special privileges.

ARTICLE VIII.

CENSORSHIP.

419. Censorship within the theater of operations is controlled by the commander of the field forces. An officer is assigned as censor and is provided with such assistants as necessary. He performs his duties under the immediate orders of the chief of staff of the commander of the field forces.

420. Censorship includes (1) censorship over private communications and (2) censorship over press publications and communications.

All private communications (post cards, letters, parcels, telegrams. etc.) of officers, soldiers, foreign attachés, newspaper correspondents, and all other individuals, dispatched from the theater of operations are liable to censorship and to such delay in transmission as may be deemed necessary by the military authorities. A censor is authorized to suppress any statement which might be of value to the enemy or prejudicial to the welfare of the forces in the field.

All newspapers or journals in the theater of operations or in localities where martial law is in force are subject to censorship and, if necessary, their publications may be suppressed.

421. The press has public functions to perform with respect to the collection and dissemination of news concerning the operations of the Army in time of war. The dissemination of falsehoods or distortion of facts, no less than the premature disclosure of movements or plans, is so fraught with dangerous consequences that the greatest care should be observed in its prevention. The press occupies a dual and delicate position, being under the necessity of truthfully disclosing to the people the facts concerning the operations of the Army

and, at the same time, of refraining from disclosing those things which, though true, would be disastrous if known to the enemy. It is perfectly apparent to everyone who considers the question that these important functions can not be trusted to irresponsible people and can only be properly performed under reasonable rules and regulations with respect thereto.

CORRESPONDENTS.

422. Conditions of Acceptance. Each applicant shall present to the Secretary of War credentials from the owner or owners, managing editor, or responsible manager of the publication or publications he represents, giving a brief account of his career, stating exactly the nature of the work he is expected to do at the front, certifying to his trustworthiness as working member of his profession, and his personal fitness to accompany the army. His employer or employers shall give a bond for his good conduct in the field, which, in case of the withdrawal of his pass for infraction of any of the regulations shall be forfeited to any charity which the Secretary of War may name. He shall take an oath of loyalty of the usual military form and shall agree to abide in letter and spirit by all the regulations laid down for his guidance. If at any time the number of correspondents becomes so large as to be an encumbrance, the Secretary of War will refuse other passes until such time as he deems expedient; when other applicants who fulfill the conditions will be received in the order of their application.

Not more than one correspondent will be received for any one publication or syndicate of publications or press associations with the same field army. Men who have evidently secured credentials with a view to adventure rather than serious work as correspondents will not be received. Their employers must show that they have been working members of their profession. In addition to the requirements for home correspondents, a foreign correspondent must have served in other campaigns, present credentials as to his character from high officers of the army to which he was attached and accompanying the letter from his employers must present a letter from his ambassador in Washington, personally vouching for him.

423. Photographs and Photographers. An official photographer will accompany each field army or other important independent field force. His films and plates will be sent promptly to Washington, where prints will be issued at a nominal cost to the press. No professional photographers and moving-picture men will be received. No news or professional photographers will be received if representing themselves either as news or mail correspondents. The regular correspondents may carry small hand film cameras. The films will be sent by the censor at the headquarters of the field force to the chief censor's office in Washington, where they will be developed and such of them as pass the censorship sent to any given address promptly.

424. Censorship of Press Matter. A commissioned officer of journalistic experience shall act as chief censor in Washington and one shall be attached as censor to the headquarters of each field army or other important independent field force. All correspondent's news, or private dispatches, mail letters for publication, private letters, drawings and photographs must be submitted to this censor and receive his stamp before being sent. After censorship he will show the correspondent what, if anything, he has elided from correspondent's MSS. He will permit the use of no code words in any private or public communication. He may request a correspondent to rewrite any portion of a dispatch that he may suspect of double meaning without accompanying his request with his reasons for it. The correspondent will not be allowed to send

information concerning the occupation or relinquishment of a position, the news of any victory or defeat, the names of organizations or commanders, the dispositions of troops, the state of supply or transport, the number of sick, the extent of losses, or any other matters of information unless the dispatch or report, containing such information, is passed on and authorized by the censor. Any relaxation in the regulations will rest with the commanding general of the field force. Nothing in these regulations is to be construed as limiting the correspondent's freedom of opinion once there ceases to be a necessity for military secrecy; the sole object of the regulations being to keep information from the enemy at a time when it might be of service to him.

425. Facilities for Work. Immediately on receiving his pass the correspondent shall proceed to the headquarters of the field force to which he is assigned and there report himself to the censor. His pass shall give him transport over all military railways, with the privileges of a commissioned officer. All correspondents will be officially attached to headquarters of field armies or other important field forces. Their transport shall have a place with that of the baggage section of the field train of the headquarters staff. No one except the censor at headquarters shall have the authority of censorship. Correspondents shall have the freedom of the lines of information of the army within such limitations as the censor may, from time to time, indicate. The official army wires shall be open to the correspondents' dispatches when not occupied by official dispatches. Correspondents' dispatches will be sent in the order of filing. The censor may limit the number of words or otherwise make an equitable adjustment of the use of the wire among the different correspondents when the wire is unequal to carrying all the dispatches submitted. Within the censor's discretion, correspondents may send messengers to carry censored dispatches to better wire facilities than those at the immediate front.

426. Messengers. Any correspondent who chooses may have a mounted messenger, who may send neither correspondence nor photographs of his own. Any infraction of the regulations by the messenger will be equivalent to an infraction by the correspondent himself. He must have credentials acceptable to the army and a pass in the correspondents' form, with the privilege of an enlisted man. A similar bond shall be required for him as for the correspondent. Except where permission is given by the headquarters censor, he must remain with the correspondents' transport.

427. Passes. Every correspondent shall be supplied with an official pass, bearing his photograph and his own signature and the signature of the Secretary of War and the commander of the field forces to which he is attached. He shall show this upon the demand of any field officer, company commander, or member of the military police, and shall respect their requests under the penalty of being sent back to army headquarters under guard.

428. Garb. Every correspondent shall provide himself with olive-drab garb for the field. He shall wear no accouterments not of a neutral tint. He shall be supplied with a white brassard $2\frac{1}{2}$ inches in width, bearing the letter C in red, to be worn on the left arm, in order that his status with the army may be known at a glance by both officers and privates. Messengers shall observe the same regulations about garb, with the exception that their brassard shall bear the letter M.

429. Discipline. No correspondent shall leave the army to which he is attached, either to go home or for any other purpose, except by permission of the War Department. A correspondent shall be suspended from all privileges for the distortion of his dispatches in the office of the publication which he represents, and also for the use of language or expressions conveying a hidden meaning which would tend to mislead or deceive the censor or permit the ap-

proval by him of otherwise objectionable dispatches or for any other infraction of these regulations in letter or in spirit. In extreme cases of offense, where the commanding general thinks it justified, the correspondent may be sent to the rear and held under arrest until such time as the War Department may restore his privileges or give him a pass to leave the army.

430. Medical Regulations. Correspondents shall submit to the army medical regulations in the field.

431. Press Regulations for Officers, Enlisted Men, and Civilian Employees of the Army. No officer, enlisted man, or civilian employee of the army shall be permitted to correspond for any publication without the consent of the Secretary of War and the majority of the correspondents attached to the field army in which he serves. No censor or censor's assistant may write anything about the campaign for publication while he holds a commission in the army.

ARTICLE IX.

FIELD POST OFFICE.

432. Arrangements are made with the Post Office Department for establishing and maintaining a postal service in the theater of operations.

This service is directed by an official of the Post Office Department who is stationed at the base of the line of communications. This official coöperates with the assistant chief of staff of the supply, sanitary, and telegraph service of the line of communications, maintaining post offices, agents, etc., with its advance section, and so far as practicable, throughout the zone of the line of communications. In addition to the foregoing a post-office agent accompanies each division, being supplied by the quartermaster corps with the necessary vehicles and animals for the prompt dispatch and distribution of mails.

The commander of trains is responsible for the protection of the postal personnel with divisions and controls their movements.

The necessary instructions relative to the distribution and receipt of mail are issued by the division commander.

APPENDICES.

USEFUL INFORMATION.

APPENDIX 1.

A. WAR STRENGTH, IN ROUND NUMBERS, ROAD SPACE, AND DIMENSIONS OF CAMPS.

| Units. | War strength, in round numbers. | | | Length of columns. | | | Contracted camping space (troops and trains). | |
|--|---------------------------------|-----------------------------|---------------------------|---|----------------------------------|--|---|------------------------------|
| | Men. | Animals (horses and mules). | Vehicles, including guns. | Organizations, including combat trains. | + Field trains without distance. | Ammunition, supply, sanitary, and engineer trains. | Yards. | Approximate number of acres. |
| Divisions: | | | | | | | | |
| Infantry..... | 22,000 | 7,500 | 900 | 10.3 mis. | 11.8 mis. | 3.6 mis. | | 180 |
| Cavalry..... | 10,000 | 12,000 | 500 | 8.0 mis. | 9.5 mis. | 1.5 mis. | | 150 |
| Brigades: | | | | | | | | |
| Infantry..... | 5,500 | 520 | 67 | 1.7 mis. | 2.0 mis. | | | 19 |
| Cavalry..... | 2,500 | 2,900 | 53 | 1.5 mis. | 1.9 mis. | | | 18 |
| Artillery..... | 2,300 | 2,300 | 257 | 2.6 mis. | 2.9 mis. | | | 30 |
| Smaller units (including attached sanitary troops): | | | | <i>Yards.</i> | <i>Yards.</i> | <i>Yards.</i> | | |
| Infantry regiment... | 1,860 | 170 | 22 | 970 | 1,150 | | 160 by 180 | 6.2 |
| Cavalry regiment.... | 1,250 | 1,430 | 26 | 1,310 | 1,640 | | 200 by 200 | 8.2 |
| Field artillery, light, regiment..... | 1,150 | 1,150 | 128 | * 2,240 | 2,500 | | 240 by 300 | 14.7 |
| Field artillery, horse, regiment..... | 1,150 | 1,560 | 131 | 2,670 | 2,970 | | 240 by 400 | 19.6 |
| Field artillery, heavy, regiment..... | 1,240 | 1,340 | 131 | 2,510 | 2,800 | | 260 by 300 | 16.0 |
| Field artillery, mountain, regiment.... | 1,100 | 1,160 | | 1,770 | 2,070 | | 80 by 380 | 6.2 |
| Engineers, pioneer battalion..... | 490 | 160 | 12 | 410 | 470 | | 50 by 200 | 2.0 |
| Engineers, pioneer battalion (mounted) | 270 | 370 | 11 | 350 | 440 | | 50 by 260 | 2.6 |
| Engineers, pontoon battalion..... | 00 | 820 | 145 | 3,360 | 3,480 | | 160 by 315 | 10.0 |
| Signal troops, field battalion..... | 160 | 200 | 15 | 310 | 370 | | 30 by 240 | 1.7 |
| Signal troops, field (cavalry) battalion | 170 | 200 | 11 | 240 | 300 | | 30 by 210 | 1.3 |
| Signal troops, aero squadron (including landing place 150 yards by 350 yards)..... | 90 | | 16 | 140 | 200 | | 175 by 350 | 12.5 |
| Trains: | | | | | | | | |
| Infantry division— | | | | | | | | |
| Ammunition..... | 260 | 750 | 162 | | | 2,440 | 75 by 380 | 5.8 |
| Supply..... | 190 | 630 | 126 | | | 2,000 | 80 by 380 | 6.2 |
| Sanitary..... | 530 | 500 | 90 | | | 1,530 | 100 by 260 | 5.3 |
| Engineer..... | 10 | 40 | 9 | | | 150 | 20 by 140 | .6 |
| Cavalry division— | | | | | | | | |
| Ammunition..... | 60 | 140 | 33 | | | 500 | 30 by 200 | 1.2 |
| Supply..... | 220 | 860 | 75 | | | 1,200 | 80 by 280 | 4.6 |
| Sanitary..... | 300 | 300 | 53 | | | 890 | 50 by 260 | 2.7 |

This table is based upon the road spaces occupied by troops at war strength, infantry in column of squads, cavalry in column of fours, artillery and trains in single column.

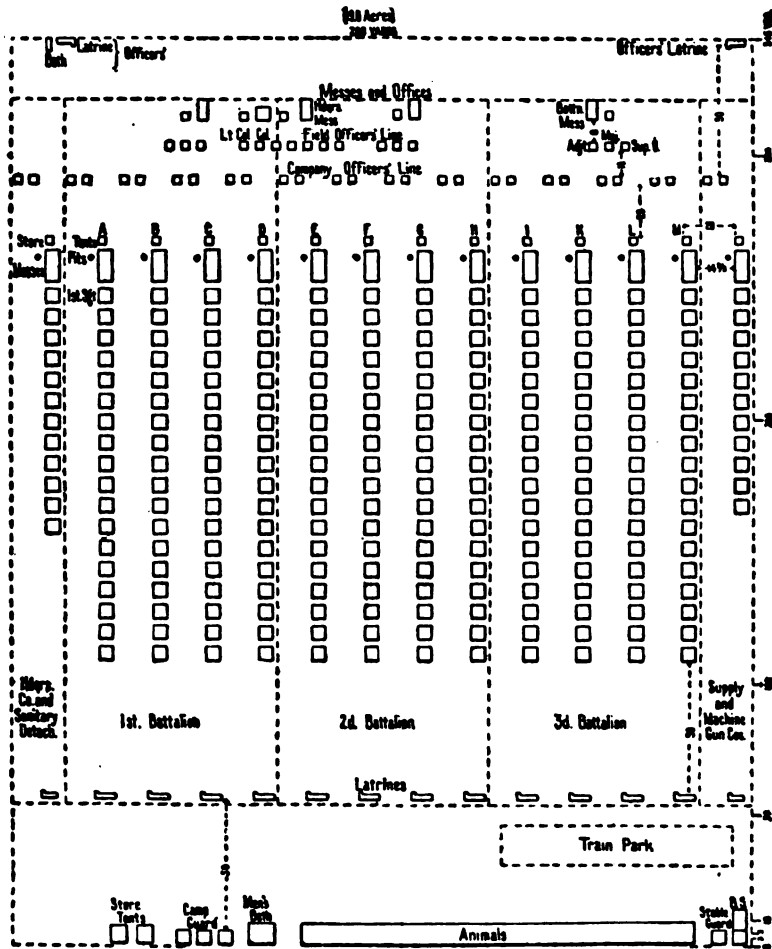

* Combat train 1 mile long.

* Combat train 840 yards long.

* Contracted camping space permits pitching the tents and operation of field hospitals.

B. SEMIPERMANENT CAMPS.

CAMP OF A REGIMENT OF INFANTRY. WAR STRENGTH.

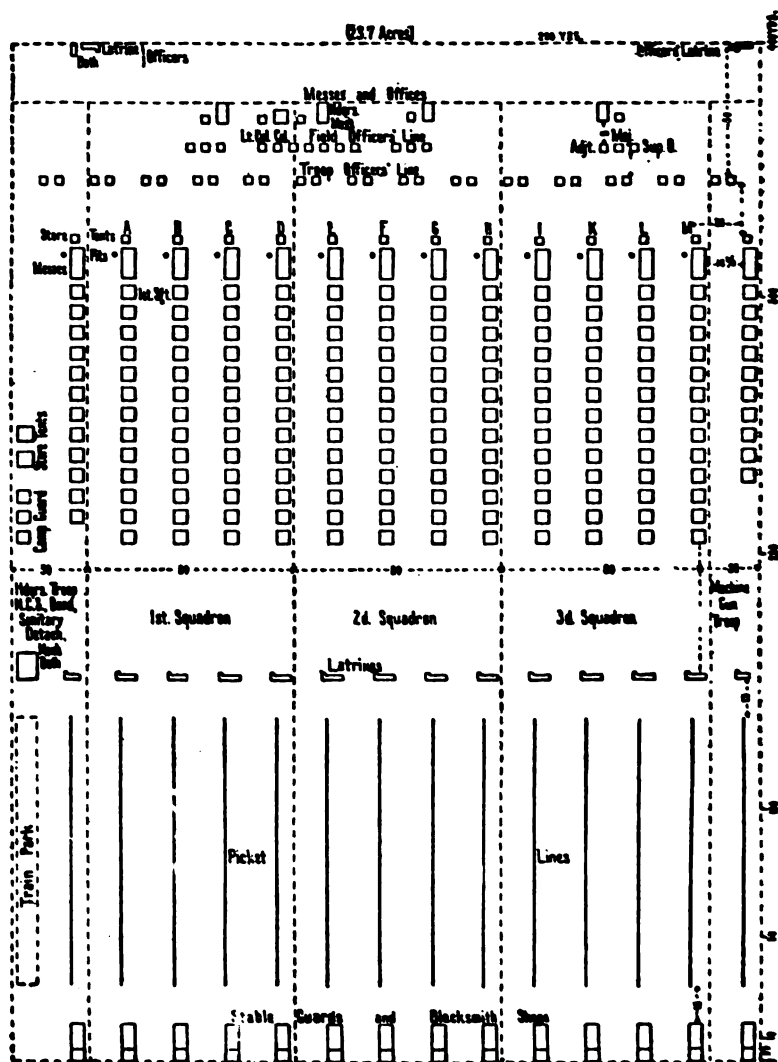

Note to table on page 1676—continued.

The spaces differ but little from the requirements of drill regulations. On the march, after a command is straightened out on the road, elongation always takes place. In calculating the length of a column further allowance must, therefore, be made in accordance with circumstances—sometimes as much as 25 per cent.

The contracted camping spaces afford sufficient room for a one-night halt. They require that the animals and vehicles of a single troop, battery, or company be placed on the same line with the men where practicable to do so within the camp lengths above given; that the men be in double shelter tents (or in double row of shelter tents), and that the lines on which adjacent companies are established be separated by distances not exceeding 11 yards for infantry and other dismounted organizations, double carriage length for field artillery (except mountain), and 12 yards for cavalry and remaining mounted organizations. Latrines are placed on the opposite side of camp from company kitchens and at a minimum distance of 50 yards from the men.

B. SEMIPERMANENT CAMP.

CAMP OF A REGIMENT OF CAVALRY. WAR STRENGTH.

While the preceding diagrams are of semipermanent camps using canvas as shelter, a similar arrangement is observed in more permanent camps, such as mobilization, in which the canvas is replaced by temporary structures. The distances and intervals given are the maximum to be used unless the topography of the camp site demands an increase. They should frequently be reduced.

Note to table on page 1676—concluded.

The camp areas given represent minimum requirements under favorable conditions of terrain and should be increased whenever practicable, particularly for sanitary reasons in those cases where a camp is to be occupied for more than one day.

For approximate calculations, assume 1,600 meters = 1 mile; 5 miles = 8 kilometers; the number of acres in a rectangular tract = the product of one-seventieth of the length in yards by one-seventieth of the width in yards.

as indicated below, to economize in guard and police duty, and in the labor of constructing camps.

Battalions and squadrons usually camp in column of companies. Between

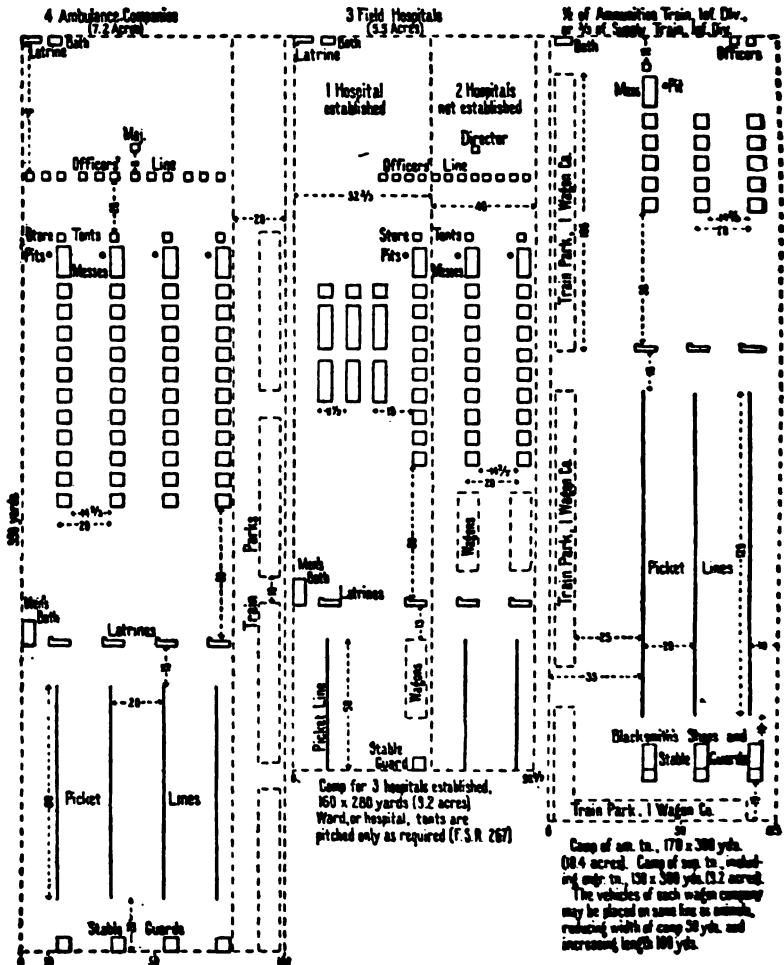

B. SEMIPERMANENT CAMP.

CAMP OF A REGIMENT OF ARTILLERY. WAR STRENGTH.

this distance may be reduced. From latrines 50 yards to nearest occupied tent; but, when a smaller camp is desired, the space between company latrines and the men's tents may be used to park carriages and animals. For picket lines and parks, allow 1 yard per animal and 4 yards per vehicle; but, for shelter for animals in a double row, $2\frac{1}{2}$ lineal feet of structure per animal will suffice. Other distances shown in diagrams may be reduced. Latrine seats are pro-

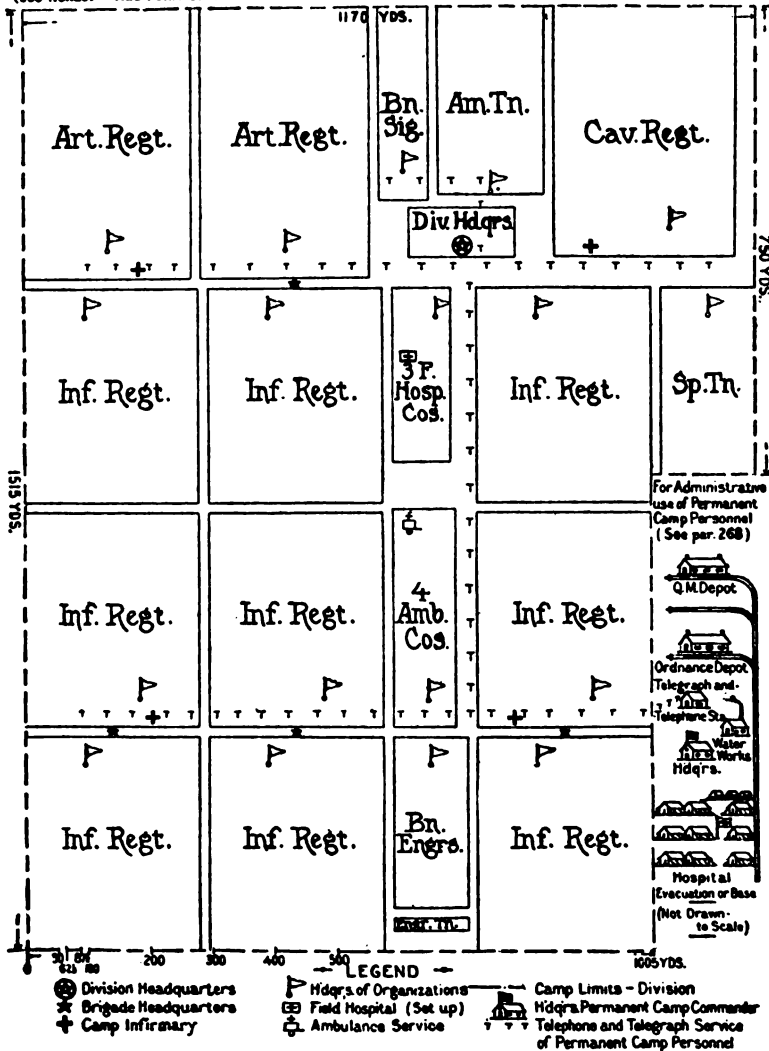

CAMPS OF TRAINS. WAR STRENGTH.

vided at the rate of 1 seat to about every 10 men; shower heads at 1 to every 50 to 100 men, depending upon water pressure; 1 bath house for officers and 1 for men (or a single bath house suitably partitioned) in each regiment or separate battalion; water spigots at the rate of 1 for each mess.

No fixed type of camp is prescribed for use in the theater of operations. In the presence of the enemy, camps and bivouacs must be modified to afford the best protection for men, animals, and trains. This will frequently necessitate the juxtaposition of shelter for the men and picket lines for the animals.

CAMP OF INFANTRY DIVISION. WAR STRENGTH.
(335 ACRES. THIS FORM OF CAMP MUST OFTEN BE MODIFIED, DEPENDING UPON THE NATURE OF THE GROUND).

APPENDIX 2—TYPES OF FIELD INTRENCHMENTS.

See Field Fortifications.

APPENDIX 3.

FORMS OF COMPLETE FIELD ORDERS.

While the following forms are given for the convenience of officers in the field, and with a view of securing uniformity in the service, it must be remembered that no two military situations are the same. The sequence in paragraph 3 is not obligatory, the commander arranging the details according to his best judgment.

5. [Place of commander or where messages may be sent, location of lines of information]

[Authentication]

[How and to whom issued]⁶

It is sometimes necessary to issue two outpost orders; the first as above, containing general instructions; the second, issued after an inspection of the line, and containing more definite instructions or involving changes.

* Where the advance guard is large the order may direct the advance guard commander to establish the outpost.

³ Omitted when the chief exercises immediate command of the camp.

⁴ May be provided for in "order" issued subsequently.

⁵ Numbered from the right.

⁶ For small outposts it may be more convenient to write this order without a marginal distribution of troops.

[Title]

[Place]

[Reference to map used]

[Date and hour]

1. [Information of enemy and of our supporting troops]
2. [Plan of commander—indicating the general plan of attack, usually to envelop a flank]
3. (a) [Instructions for artillery—position, first target, generally hostile artillery]

(b) [Instructions for holding attack¹—commander, troops, direction and objective]

(c) [Instructions for main attack—commander, troops, direction and objective]

(d) [Instructions for reserve—commander, troops, position]

(e) [Instructions for cavalry—generally to operate on one or both flanks, or to execute some special mission]

(f) [Instructions for engineers—any special mission]

(g) [Instructions for signal troops—to establish lines of information between the commander and the main and secondary attacks, artillery, reserves, etc.]

4. [Instructions for sanitary train—location of dressing stations and stations for slightly wounded when practicable]

[Instructions for ammunition train—location of ammunition distributing stations]

[Instructions for field and supply trains, if not previously covered in orders]

5. [Place of commander or where messages may be sent]

[How and to whom issued]

[Authentication]

Note: In war it is not always possible to issue a complete attack order like the above, disposing of an entire command. In unexpected encounters, for instance, orders must be given as the situation develops.

| Field orders | FOR A RETREAT. | [Title] |
|----------------------------------|--|------------------|
| No.— | | [Place] |
| [Reference to map used] | | [Date and hour] |
| Troops | 1. [Information of enemy and of our supporting troops] | |
| | 2. [Plan of commander—to retire in direction of —] | |
| (a) Leading Troops: | 3. (a) [Instructions for leading troops—place and time of departure, route, special mission] | |
| [Commander] | (b) Instructions for main body—place and time of departure, route] | |
| (b) Main Body—in order of march: | (c) [Instructions for rear guard—distance from the main body or place and time of departure, special mission] | |
| [Troops] | (d) [Instructions for flank guard—place and time of departure, special mission] | |
| (c) Rear Guard: | (e) [Instructions for signal troops—lines of information] | |
| [Commander] | (x) [Instructions for outposts—when relieved, subsequent duties—usually forming the rear guard] | |
| [Troops] | 4. [Instructions for field and divisional trains—place and time of departure, route, escort; these trains are generally some distance ahead of the column] | |
| (d) Right (left) Flank Guard: | 5. [Place of commander or where messages may be sent] | |

 3. (a) [Instructions for reserve—place and time of departure, or approximate distance from main body, reconnaissance]
 - (b) [Instructions for support—place and time of departure or distance from reserve, any special reconnaissance]
 - (c) Rear Cavalry:
 - (c) [Instructions for rear cavalry—place and time of departure, road or country to be covered, special mission]
 - (d) Right (left) Flank Guard:
 - (d) [Instructions for flank guard—place and time of departure, route, special mission]
 4. [Instructions for field train when necessary—usually to join train of main body]
 5. [Place of commander or where messages may be sent—location of lines of information]
- [How and to whom issued] [Authentication]

MARCH TABLE.

In movements of large forces on several roads, it is sometimes desirable to prescribe the daily marches of the various columns for two or more days. In such cases the order may often be simplified by appending or incorporating a march table usually in the following form, each column providing its own security.

MARCH TABLE.

—Army, from— [date], to— [date].
[Reference to map used.]

| Date. | — Division. | — Division. | Army Headquarters. |
|-------|--|--|--------------------------------------|
| | Location of main body or of advance guard at end of each day's march, and line of march, if necessary. | Location of main body or of advance guard at end of each day's march, and line of march, if necessary. | Location at end of each day's march. |

APPENDIX 4.

FIELD MAPS AND SKETCHES.

The following abbreviations and signs are authorized for use on field maps and sketches. For more elaborate map work the authorized conventional signs as given in the manual of "Conventional Signs, United States Army Maps," are used.

Abbreviations other than those given should not be used.

APPENDIX 6.

EXTRACTS FROM INTERNATIONAL CONVENTIONS AND CONFERENCES.

[See rules for Land Warfare, United States Army, for full text of conventions and conferences affecting the conduct of war, and for other rules adopted for the government of the Army of the United States in time of war. The Rules of Land Warfare give the form of certificate to be carried and the garb to be worn in certain instances by civilians authorized to accompany the Army in the theater of operations and which are necessary to the protection of the individual in the event of his capture by the enemy.]

A.

EXTRACTS FROM CONVENTIONS ADOPTED AT THE SECOND INTERNATIONAL PEACE CONFERENCE HELD AT THE HAGUE, 1907.

Each of these conventions stipulates—

(a) The provisions of the present conventions do not apply except to the contracting powers, and then only if all the belligerents are parties to the convention.

(b) Nonsignatory powers may adhere to the present convention.

CHAPTER II.—PRISONERS OF WAR.

Art. IV. Prisoners of war are in the power of the hostile Government, but not of the individuals or corps who capture them.

They must be humanely treated.

All their personal belongings, except arms, horses, and military papers, remain their property.

Art. V. Prisoners of war may be interned in a town, fortress, camp, or other place, and bound not to go beyond certain fixed limits; but they can not be confined except as an indispensable measure of safety and only while the circumstances which necessitate the measure continue to exist.

Art. VI. The State may utilize the labor of prisoners of war according to their rank and aptitude, officers excepted. The tasks shall not be excessive and shall have no connection with the operations of the war.

Prisoners may be authorized to work for the public service, for private persons, or on their own account.

Work done for the State is paid at the rates in force for work of a similar kind done by soldiers of the national army, or, if there are none in force, at a rate according to the work executed.

When the work is for other branches of the public service or for private persons the conditions are settled in agreement with the military authorities.

The wages of the prisoners shall go toward improving their position, and the balance shall be paid them on their release, after deducting the cost of their maintenance.

Art. VII. The Government into whose hands prisoners of war have fallen is charged with their maintenance.

In the absence of a special agreement between the belligerents, prisoners of war shall be treated as regards board, lodging, and clothing on the same footing as the troops of the Government who captured them.

Art. VIII. Prisoners of war shall be subject to the laws, regulations, and orders in force in the army of the State in whose power they are. Any act of insubordination justifies the adoption toward them of such measures of severity as may be considered necessary.

Escaped prisoners who are retaken before being able to rejoin their own army or before leaving the territory occupied by the army which captured them are liable to disciplinary punishment.

Prisoners who, after succeeding in escaping, are again taken prisoners, are not liable to any punishment on account of the previous flight.

Art. IX. Every prisoner of war is bound to give, if he is questioned on the subject, his true name and rank, and if he infringes this rule, he is liable to have the advantages given to prisoners of his class curtailed.

Art. X. Prisoners of war may be set at liberty on parole if the laws of their country allow, and, in such cases, they are bound, on their personal honor, scrupulously to fulfill, both toward their own Government and the Government by whom they were made prisoners, the engagements they have contracted.

In such cases their own Government is bound neither to require of nor accept from them any service incompatible with the parole given.

Art. XI. A prisoner of war can not be compelled to accept his liberty on parole; similarly the hostile Government is not obliged to accede to the request of the prisoner to be set at liberty on parole.

Art. XII. Prisoners of war liberated on parole and recaptured bearing arms against the Government to whom they had pledged their honor, or against the allies of that Government, forfeit their right to be treated as prisoners of war, and can be brought before the courts.

Art. XIII. Individuals who follow an army without directly belonging to it,

such as newspaper correspondents and reporters, sutlers and contractors, who fall into the enemy's hands and whom the latter thinks expedient to detain, are entitled to be treated as prisoners of war, provided they are in possession of a certificate from the military authorities of the army which they were accompanying.

Art. XIV. An inquiry office for prisoners of war is instituted on the commencement of hostilities in each of the belligerent States, and, when necessary, in neutral countries which have received belligerents in their territory. It is the function of this office to reply to all inquiries about the prisoners. It receives from the various services concerned full information respecting internments and transfers, releases on parole, exchanges, escapes, admissions into hospitals, deaths, as well as other information necessary to enable it to make out and keep up to date an individual return for each prisoner of war. The office must state in this return the regimental number, name and surname, age, place of origin, rank, unit, wounds, date and place of capture, internment, wounding, and death, as well as any observations of a special character. The individual return shall be sent to the Government of the other belligerent after the conclusion of peace.

It is likewise the function of the inquiry office to receive and collect all object of personal use, valuables, letters, etc., found on the field of battle or left by prisoners who have been released on parole, or exchanged, or who have escaped, or died in hospitals or ambulances, and to forward them to those concerned.

Art. XV. Relief societies for prisoners of war, which are properly constituted in accordance with the laws of their country and with the object of serving as the channel for charitable effort, shall receive from the belligerents, for themselves and their duly accredited agents, every facility for the efficient performance of their humane task within the bounds imposed by military necessities and administrative regulations. Agents of these societies may be admitted to the places of internment for the purpose of distributing relief, as also to the halting places of repatriated prisoners, if furnished with a personal permit by the military authorities, and on giving an undertaking in writing to comply with all measures of order and police which the latter may issue.

Art. XVI. Inquiry offices enjoy the privilege of free postage. Letters, money orders, and valuables, as well as parcels by post, intended for prisoners of war, or dispatched by them, shall be exempt from all postal duties in the countries of origin and destination, as well as in the countries they pass through.

Presents and relief in kind for prisoners of war shall be admitted free of all import or other duties, as well as of payments for carriage by the State railways.

Art. XVII. Officers taken prisoners shall receive the same rate of pay as officers of corresponding rank in the country where they are detained, the amount to be ultimately refunded by their own Government.

Art. XVIII. Prisoners of war shall enjoy complete liberty in the exercise of their religion, including attendance at the services of whatever church they may belong to, on the sole condition that they comply with the measures of order and police issued by the military authorities.

Art. XIX. The wills of prisoners of war are received or drawn up in the same way as for soldiers of the national army.

The same rule shall be observed regarding death certificates as well as for the burial of prisoners of war, due regard being paid to their grade and rank.

Art. XX. After the conclusion of peace, the repatriation of prisoners of war shall be carried out as quickly as possible.

CHAPTER III.—THE SICK AND WOUNDED.

Art. XXI. The obligations of belligerents with regard to the sick and wounded are governed by the Geneva Convention.

SECTION II.—HOSTILITIES.

CHAPTER I.—MEANS OF INJURING THE ENEMY, SIEGES, AND BOMBARDMENTS.

Art. XXII. The right of belligerents to adopt means of injuring the enemy is not unlimited.

Art. XXIII. In addition to the prohibitions provided by special conventions, it is especially forbidden—

- (a) To employ poison or poisoned weapons;
- (b) To kill or wound treacherously individuals belonging to the hostile nation or army;
- (c) To kill or wound an enemy who, having laid down his arms, or having no longer means of defense, has surrendered at discretion;
- (d) To declare that no quarter will be given;
- (e) To employ arms, projectiles, or material calculated to cause unnecessary suffering;
- (f) To make improper use of a flag of truce, of the national flag, or of the military insignia and uniform of the enemy, as well as the distinctive badges of the Geneva Convention;
- (g) To destroy or seize the enemy's property, unless such destruction or seizure be imperatively demanded by the necessities of war;
- (h) To declare abolished, suspended, or inadmissible in a court of law the rights and actions of the nationals of the hostile party.

A belligerent is likewise forbidden to compel the nationals of the hostile party to take part in the operations of war directed against their own country, even if they were in the belligerent's service before the commencement of the war.

Art. XXIV. Ruses of war and the employment of measures necessary for obtaining information about the enemy and the country are considered permissible.

Art. XXV. The attack or bombardment, by whatever means, of towns, villages, dwellings, or buildings which are undefended is prohibited.

Art. XXVI. The officer in command of an attacking force must, before commencing a bombardment, except in cases of assault, do all in his power to warn the authorities.

Art. XXVII. In sieges and bombardments all necessary steps must be taken to spare, as far as possible, buildings dedicated to religion, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, provided that they are not being used at the time for military purposes.

It is the duty of the besieged to indicate the presence of such buildings or places by distinctive and visible signs, which shall be notified to the enemy beforehand.

Art. XXVIII. The pillage of a town or place, even when taken by assault, is prohibited.

CHAPTER II.—SPIES.

Art. XXIX. A person can only be considered a spy when, acting clandestinely or on false pretences, he obtains or endeavors to obtain information in the zone of operations of a belligerent, with the intention of communicating it to the hostile party.

Thus, soldiers not wearing a disguise who have penetrated into the zone of operations of the hostile army, for the purpose of obtaining information,

are not considered spies. Similarly, the following are not considered spies: Soldiers and civilians, carrying out their mission openly, intrusted with the delivery of despatches intended either for their own army or for the enemy's army. To this class belong likewise persons sent in balloons for the purpose of carrying despatches and, generally, of maintaining communications between the different parts of an army or a territory.

Art. XXX. A spy taken in the act shall not be punished without previous trial.

Art. XXXI. A spy who, after rejoining the army to which he belongs, is subsequently captured by the enemy, is treated as a prisoner of war, and incurs no responsibility for his previous acts of espionage.

CHAPTER III.—FLAGS OF TRUCE.

Art. XXXII. A person is regarded as bearing a flag of truce who has been authorized by one of the belligerents to enter into communication with the other, and who advances bearing a white flag. He has a right to inviolability, as well as the trumpeter, bugler or drummer, the flag-bearer and interpreter who may accompany him.

Art. XXXIII. The commander to whom a flag of truce is sent is not in all cases obliged to receive it.

He may take all the necessary steps to prevent the envoy taking advantage of his mission to obtain information.

In case of abuse, he has the right to detain the envoy temporarily.

Art. XXXIV. The envoy loses his right of inviolability if it is proved in a clear and incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treachery.

CHAPTER IV.—CAPITULATIONS.

Art. XXXV. Capitulations agreed upon between the contracting parties must take into account the rules of military honor.

Once settled, they must be scrupulously observed by both parties.

CHAPTER V.—ARMISTICES.

Art. XXXVI. An armistice suspends military operations by mutual agreement between the belligerent parties. If its duration is not defined, the belligerent parties may resume operations at any time, provided always that the enemy is warned within the time agreed upon, in accordance with the terms of the armistice.

Art. XXXVII. An armistice may be general or local. The first suspends the military operations of the belligerent States everywhere; the second only between certain fractions of the belligerent armies and within a fixed radius.

Art. XXXVIII. An armistice must be notified officially and in good time to the competent authorities and to the troops. Hostilities are suspended immediately after the notification, or on the date fixed.

Art. XXXIX. It rests with the contracting parties to settle, in the terms of the armistice, what communications may be held in the theater of war with the inhabitants and between the inhabitants of one belligerent State and those of the other.

Art. XL. Any serious violation of the armistice by one of the parties gives the other party the right of denouncing it, and even, in cases of urgency, of recommencing hostilities immediately.

Art. XLI. A violation of the terms of the armistice by private persons acting on their own initiative only entitles the injured party to demand the punishment of the offenders or, if necessary, compensation for the losses sustained.

SECTION III.—MILITARY AUTHORITY OVER THE TERRITORY OF THE HOSTILE STATE.

Art. XLII. Territory is considered occupied when it is actually placed under the authority of the hostile army.

The occupation extends only to the territory where such authority has been established and can be exercised.

Art. XLIII. The authority of the legitimate power having in fact passed into the hands of the occupant, the latter shall take all the measures in his power to restore, and insure, as far as possible, public order and safety, while respecting, unless absolutely prevented, the laws in force in the country.

Art. XLIV. A belligerent is forbidden to force the inhabitants of territory occupied by it to furnish information about the army of the other belligerent, or about its means of defense.

Art. XLV. It is forbidden to compel the inhabitants of occupied territory to swear allegiance to the hostile power.

Art. XLVI. Family honor and rights, the lives of persons, and private property, as well as religious convictions and practice, must be respected.

Private property can not be confiscated.

Art. XLVII. Pillage is formally forbidden.

Art. XLVIII. If, in the territory occupied, the occupant collects the taxes, dues, and tolls imposed for the benefit of the State, he shall do so, as far as is possible, in accordance with the rules of assessment and incidence in force, and shall in consequence be bound to defray the expenses of the administration of the occupied territory to the same extent as the legitimate Government was so bound.

Art. XLIX. If, in addition to the taxes mentioned in the above article, the occupant levies other money contributions in the occupied territory, this shall only be for the needs of the army or of the administration of the territory in question.

Art. L. No general penalty, pecuniary or otherwise, shall be inflicted upon the population on account of the acts of individuals for which they can not be regarded as jointly and severally responsible.

Art. LI. No contribution shall be collected except under a written order, and on the responsibility of a commander-in-chief.

The collection of the said contribution shall only be effected as far as possible in accordance with the rules of assessment and incidence of the taxes in force.

For every contribution a receipt shall be given to the contributors.

Art. LII. Requisitions in kind and services shall not be demanded from municipalities or inhabitants except for the needs of the army of occupation. They shall be in proportion to the resources of the country, and of such a nature as not to involve the inhabitants in the obligation of taking part in military operations against their own country.

Such requisitions and services shall only be demanded on the authority of the commander in the locality occupied.

Contributions in kind shall as far as possible be paid for in cash; if not, a receipt shall be given and the payment of the amount due shall be made as soon as possible.

Art. LIII. An army of occupation can only take possession of cash, funds, and realizable securities which are strictly the property of the State, depots of arms, means of transport, stores and supplies, and, generally, all movable property belonging to the State which may be used for military operations. All appliances, whether on land, at sea, or in the air, adapted for the transmission of news, or for the transport of persons or things, exclusive of cases

governed by naval law, depots of arms, and, generally, all kinds of ammunition of war, may be seized, even if they belong to private individuals, but must be restored and compensation fixed when peace is made.

Art. LIV. Submarine cables connecting an occupied territory with a neutral territory shall not be seized or destroyed except in the case of absolute necessity. They must likewise be restored and compensation fixed when peace is made.

Art. LV. The occupying State shall be regarded only as administrator and usufructuary of public buildings, real estate, forests, and agricultural estates belonging to the hostile State, and situated in the occupied country. It must safeguard the capital of these properties and administer them in accordance with the rules of usufruct.

Art. LVI. The property of municipalities, that of institutions dedicated to religion, charity and education, the arts and sciences, even when State property, shall be treated as private property.

All seizure of, destruction or willful damage done to institutions of this character, historic monuments, works of art and science, is forbidden and should be made the subject of legal proceedings.

CONVENTION RESPECTING THE RIGHTS AND DUTIES OF NEUTRAL POWERS AND PERSONS IN WAR ON LAND.

* * * * *

[Translation.]

CHAPTER I.—THE RIGHTS AND DUTIES OF NEUTRAL POWERS.

Article I. The territory of neutral powers is inviolable.

Art. II. Belligerents are forbidden to move troops or convoys of either munitions of war or supplies across the territory of a neutral power.

Art. III. Belligerents are likewise forbidden to:

(a) Erect on the territory of a neutral power a wireless-telegraphy station or other apparatus for the purpose of communicating with belligerent forces on land or sea;

(b) Use any installation of this kind established by them before the war on the territory of a neutral power for purely military purposes, and which has not been opened for the service of public messages.

Art. IV. Corps of combatants can not be formed nor recruiting agencies opened on the territory of a neutral power to assist the belligerents.

Art. V. A neutral power must not allow any of the acts referred to in Articles II to IV to occur on its territory.

It is not called upon to punish acts in violation of its neutrality unless the said acts have been committed on its own territory.

Art. VI. The responsibility of a neutral power is not engaged by the fact of persons crossing the frontier separately to offer their services to one of the belligerents.

Art. VII. A neutral power is not called upon to prevent the export or transport, on behalf of one or other of the belligerents, of arms, munitions of war, or, in general, of anything which can be of use to an army or a fleet.

Art. VIII. A neutral power is not called upon to forbid or restrict the use on behalf of the belligerents of telegraph or telephone cables or of wireless telegraphy apparatus belonging to it or to companies or private individuals.

Art. IX. Every measure of restriction or prohibition taken by a neutral power in regard to the matters referred to in Articles VII and VIII must be impartially applied by it to both belligerents.

A neutral power must see to the same obligation being observed by companies or private individuals owning telegraph or telephone cables or wireless telegraphy apparatus.

Art. X. The fact of a neutral power resisting, even by force, attempts to violate its neutrality can not be regarded as a hostile act.

CHAPTER II.—BELLIGERENTS INTERNED AND WOUNDED TENDED IN NEUTRAL TERRITORY.

Art. XI. A neutral power which receives on its territory troops belonging to the belligerent armies shall intern them, as far as possible, at a distance from the theater of war.

It may keep them in camps and even confine them in fortresses or in places set apart for this purpose.

It shall decide whether officers can be left at liberty on giving their parole not to leave the neutral territory without permission.

Art. XII. In the absence of a special convention to the contrary, the neutral power shall supply the interned with food, clothing, and relief required by humanity.

At the conclusion of peace the expenses caused by the internment shall be made good.

Art. XIII. A neutral power which receives escaped prisoners of war shall leave them at liberty. If it allows them to remain in its territory it may assign them a place of residence.

The same rule applies to prisoners of war brought by troops taking refuge in the territory of a neutral power.

Art. XIV. A neutral power may authorize the passage into its territory of the sick and wounded belonging to the belligerent armies, on condition that the trains bringing them shall carry neither personnel nor war material. In such a case, the neutral power is bound to take whatever measures of safety and control are necessary for the purpose.

The sick or wounded brought under these conditions into neutral territory by one of the belligerents, and belonging to the hostile party, must be guarded by the neutral power so as to insure their not taking part again in the military operations. The same duty shall devolve on the neutral State with regard to wounded or sick of the other army who may be committed to its care.

Art. XV. The Geneva Convention applies to sick and wounded interned in neutral territory.

CHAPTER III.—NEUTRAL PERSONS.

Art. XVI. The nationals of a State which is not taking part in the war are considered as neutrals.

Art. XVII. A neutral can not avail himself of his neutrality:

(a) If he commits hostile acts against a belligerent;

(b) If he commits acts in favor of a belligerent, particularly if he voluntarily enlists in the ranks of the armed force of one of the parties.

In such a case, the neutral shall not be more severely treated by the belligerent as against whom he has abandoned his neutrality than a national of the other belligerent State could be for the same act.

Art. XVIII. The following acts shall not be considered as committed in favor of one belligerent in the sense of Article XVII, letter (b):

(a) Supplies furnished or loans made to one of the belligerents, provided that the person who furnishes the supplies or who makes the loans lives neither in the territory of the other party nor in the territory occupied by him, and that the supplies do not come from these territories;

(b) Services rendered in matters of police or civil administration.

CHAPTER IV.—RAILWAY MATERIAL.

Art. XIX. Railway material coming from the territory of neutral powers, whether it be the property of the said powers or of companies or private persons, and recognizable as such, shall not be requisitioned or utilized by a belligerent except where and to the extent that it is absolutely necessary. It shall be sent back as soon as possible to the country of origin.

A neutral power may likewise, in case of necessity, retain and utilize to an equal extent material coming from the territory of the belligerent power.

Compensation shall be paid by one party or the other in proportion to the material used, and to the period of usage.

* * * * *

CONVENTION RELATIVE TO THE LAYING OF AUTOMATIC SUBMARINE CONTACT MINES.

* * * * *

Article I. It is forbidden:

1. To lay unanchored automatic contact mines, except when they are so constructed as to become harmless one hour at most after the person who laid them ceases to control them;
2. To lay anchored automatic contact mines which do not become harmless as soon as they have broken loose from their moorings;
3. To use torpedoes which do not become harmless when they have missed their mark.

Art. II. It is forbidden to lay automatic contact mines off the coast and ports of the enemy, with the sole object of intercepting commercial shipping.

Art. III. When anchored automatic contact mines are employed, every possible precaution must be taken for the security of peaceful shipping.

The belligerents undertake to do their utmost to render these mines harmless within a limited time, and, should they cease to be under surveillance, to notify the danger zones as soon as military exigencies permit, by a notice addressed to shipowners, which must also be communicated to the Governments through the diplomatic channel.

Art. IV. Neutral powers which lay automatic contact mines off their coasts must observe the same rules and take the same precautions as are imposed on belligerents.

The neutral power must inform shipowners, by a notice issued in advance, where automatic contact mines have been laid. This notice must be communicated at once to the Governments through the diplomatic channel.

Art. V. At the close of the war, the contracting powers undertake to do their utmost to remove the mines which they had laid, each power removing its own mines.

As regards anchored automatic contact mines laid by one of the belligerents off the coast of the other, their position must be notified to the other party by the power which laid them, and each power must proceed with the least possible delay to remove the mines in its own waters.

Art. VI. The contracting powers which do not at present own perfected mines of the pattern contemplated in the present convention, and which, consequently, could not at present carry out the rules laid down in Articles I and III, undertake to convert the matériel of their mines as soon as possible, so as to bring it into conformity with the foregoing requirements.

* * * * *

**DECLARATION PROHIBITING THE DISCHARGE OF PROJECTILES AND EXPLOSIVES
FROM BALLOONS.**

* * * * *

The contracting powers agree to prohibit, for a period extending to the close of the third peace conference, the discharge of projectiles and explosives from balloons or by other new methods of a similar nature.

The present declaration is only binding on the contracting powers in case of war between two or more of them.

It shall cease to be binding from the time when, in a war between the contracting powers, one of the belligerents is joined by a noncontracting power.

* * * * *

**TABLE OF RATIFICATIONS AND ADHESIONS TO SUCH OF THE CONVENTIONS
AS ARE MENTIONED IN THE TEXT.**

[A convention may be ratified by a signatory power or adhered to by a nonsignatory power. In the table the following nomenclature is used: R= Ratified. RR= Ratified with reservations. A=Adhered to.]

| | Convention concerning the laws and customs of war on land. | Convention concerning the rights and duties of neutral powers and persons in case of war on land. | Convention relating to the laying of automatic sub- marine contact mines. | Declaration relative to prohibiting the throwing down of projectiles and explosives from balloons, aeroplanes, etc. |

B.

INTERNATIONAL RED CROSS CONVENTION.

[Revision of the Geneva Convention.]

The International Convention for the Amelioration of the Condition of the Wounded and Sick in Armies in the Field, Geneva, 1906, is as follows:

CHAPTER I.—THE WOUNDED AND SICK.

Article 1. Officers and soldiers, and other persons officially attached to armies, shall be respected and taken care of when wounded or sick, by the belligerent in whose power they may be, without distinction of nationality.

Nevertheless, a belligerent who is compelled to abandon sick or wounded to the enemy shall, as far as military exigencies permit, leave with them a portion of his medical personnel and material to contribute to the care of them.

Art. 2. Except as regards the treatment to be provided for them in virtue of the preceding article, the wounded and sick of an army who fall into the hands of the enemy are prisoners of war, and the general provisions of international law concerning prisoners are applicable to them.

Belligerents are, however, free to arrange with one another such exceptions and mitigations with reference to sick and wounded prisoners as they may judge expedient; in particular they will be at liberty to agree—

To restore to one another the wounded left on the field after a battle;

To repatriate any wounded and sick whom they do not wish to retain as prisoners, after rendering them fit for removal or after recovery;

To hand over to a neutral State, with the latter's consent, the enemy's wounded and sick to be interned by the neutral State until the end of hostilities.

Art. 3. After each engagement the commander in possession of the field shall take measures to search for the wounded, and to insure protection against pillage and maltreatment both for the wounded and for the dead.

He shall arrange that a careful examination of the bodies is made before the dead are buried or cremated.

Art. 4. As early as possible each belligerent shall send to the authorities of the country or army to which they belong the military identification marks or tokens found on the dead, and a nominal roll of the wounded or sick who have been collected by him.

The belligerents shall keep each other mutually informed of any internments and changes, as well as of admissions into hospital and deaths, among the wounded and sick in their hands. They shall collect all the articles of personal use, valuables, letters, etc., which are found on the field of battle or left by the wounded or sick who have died in the medical establishments or units, in order that such objects may be transmitted to the persons interested by the authorities of their own country.

Art. 5. The competent military authority may appeal to the charitable zeal of the inhabitants to collect and take care of, under his direction, the wounded or sick of armies, granting to those who respond to the appeal special protection and certain immunities.

CHAPTER II.—MEDICAL UNITS AND ESTABLISHMENTS.

Art. 6. Mobile medical units (that is to say, those which are intended to accompany armies into the field) and the fixed establishments of the medical service shall be respected and protected by the belligerents.

Art. 7. The protection to which medical units and establishments are entitled ceases if they are made use of to commit acts harmful to the enemy.

Art. 8. The following facts are not considered to be of a nature to deprive a medical unit or establishment of the protection guaranteed by article 6—

1. That the personnel of the unit or of the establishment is armed, and that it uses its arms for its own defense or for that of the sick and wounded under its charge.

2. That in default of armed orderlies the unit or establishment is guarded by a piquet or by sentinels furnished with an authority in due form.

3. That weapons and cartridges taken from the wounded and not yet handed over to the proper department are found in the unit or establishment.

CHAPTER III.—PERSONNEL.

Art. 9. The personnel engaged exclusively in the collection, transport, and treatment of the wounded and the sick, as well as in the administration of medical units and establishments, and the chaplains attached to armies, shall be respected and protected under all circumstances. If they fall into the hands of the enemy they shall not be treated as prisoners of war.

These provisions apply to the guard of medical units and establishments under the circumstances indicated in article 8 (2).

Art. 10. The personnel of voluntary aid societies, duly recognized and authorized by their Government, who may be employed in the medical units and establishment of armies, is placed on the same footing as the personnel referred to in the preceding article, provided always that the first-mentioned personnel shall be subject to military law and regulations.

Each State shall notify to the other, either in time of peace or at the commencement of or during the course of hostilities, but in every case before actually employing them, the names of the societies which it has authorized, under its responsibility, to render assistance to the regular medical service of its armies.

Art. 11. A recognized society of a neutral country can only afford the assistance of its medical personnel and units to a belligerent with the previous consent of its own Government and the authorization of the belligerent concerned.

A belligerent who accepts such assistance is bound to notify the fact to his adversary before making any use of it.

Art. 12. The persons designated in articles 9, 10, and 11, after they have fallen into the hands of the enemy, shall continue to carry on their duties under his direction.

When their assistance is no longer indispensable, they shall be sent back to their army or to their country at such time and by such route as may be compatible with military exigencies.

They shall then take with them such effects, instruments, arms, and horses as are their private property.

Art. 13. The enemy shall secure to the persons mentioned in article 9, while in his hands, the same allowances and the same pay as are granted to the persons holding the same rank in his own army.

CHAPTER IV.—MATERIAL.

Art. 14. If mobile medical units fall into the hands of the enemy they shall retain their material, including their teams, irrespectively of the means of transport and the drivers employed.

Nevertheless, the competent military authority shall be free to use the material for the treatment of the wounded and sick. It shall be restored under the conditions laid down for the medical personnel, and so far as possible at the same time.

Art. 15. The buildings and material of fixed establishments remain subject to the laws of war, but may not be diverted from their purpose so long as they are necessary for the wounded and the sick.

Nevertheless, the commanders of troops in the field may dispose of them, in case of urgent military necessity, provided they make previous arrangements for the welfare of the wounded and sick who are found there.

Art. 16. The material of voluntary aid societies which are admitted to the privileges of the convention under the conditions laid down therein is considered private property, and, as such, to be respected under all circumstances, saving only the right of requisition recognized for belligerents in accordance with the laws and customs of war.

CHAPTER V.—CONVOYS OF EVACUATION.

Art. 17. Convoys of evacuation shall be treated like mobile medical units, subject to the following special provisions—

1. A belligerent intercepting a convoy may break it up if military exigencies demand, provided he takes charge of the sick and wounded who are in it.

2. In this case, the obligation to send back the medical personnel, provided for in article 12, shall be extended to the whole of the military personnel detailed for the transport or the protection of the convoy, and furnished with an authority in due form to that effect.

The obligation to restore the medical material, provided for in article 14, shall apply to railway trains and boats used in internal navigation, which are especially arranged for evacuations, as well as to the material belonging to the medical service for fitting up ordinary vehicles, trains, and boats.

Military vehicles, other than those of the medical service, may be captured with their teams.

The civilian personnel and the various means of transport obtained by requisition, including railway material and boats used for convoy, shall be subject to the general rules of international law.

CHAPTER VI.—THE DISTINCTIVE EMBLEM.

Art. 18. As a compliment to Switzerland, the heraldic emblem of the red cross on a white ground, formed by reversing the Federal colors, is retained as the emblem and distinctive sign of the medical service of armies.

Art. 19. With the permission of the competent military authority this emblem shall be shown on the flags and armlets (brassards), as well as on all the material belonging to the medical service.

Art. 20. The personnel protected in pursuance of articles 9 (par. 1), 10, and 11 shall wear, fixed to the left arm, an armlet (brassard) with a red cross on a white ground delivered and stamped by the competent military authority, and accompanied by a certificate of identity in the case of persons who are attached to the medical service of armies, but who have not a military uniform.

Art. 21. The distinctive flag of the convention shall only be hoisted over those medical units and establishments which are entitled to be respected under the convention, and with the consent of the military authorities. It must be accompanied by the national flag of the belligerent to whom the unit or establishment belongs.

Nevertheless, medical units which have fallen into the hands of the enemy, so long as they are in that situation, shall not fly any other flag than that of the Red Cross.

Art. 22. The medical units belonging to neutral countries which may be authorized to afford their services under the conditions laid down in article 11 shall fly, along with the flag of the convention, the national flag of the belligerent to whose army they are attached.

The provisions of the second paragraph of the preceding article are applicable to them.

Art. 23. The emblem of the red cross on a white ground and the words "Red Cross" or "Geneva Cross" shall not be used, either in time of peace or in time of war, except to protect or to indicate the medical units and establishments and the personnel and material protected by the convention.

CHAPTER VII.—APPLICATION AND CARRYING OUT OF THE CONVENTION.

Art. 24. The provisions of the present convention are only binding upon the contracting powers in the case of war between two or more of them. These provisions shall cease to be binding from the moment when one of the belligerent powers is not a party to the convention.

Art. 25. The commanders in chief of belligerent armies shall arrange the details for carrying out the preceding articles, as well as for cases not provided for, in accordance with the instructions of their respective Governments and in conformity with the general principles of the present convention.

Art. 26. The signatory Governments will take the necessary measures to instruct their troops, especially the personnel protected, in the provisions of the present convention, and to bring them to the notice of the civil population.

CHAPTER VIII.—PREVENTION OF ABUSES AND INFRACTIONS.

Art. 27. The signatory Governments, in countries the legislation of which is not at present adequate for the purpose, undertake to adopt or to propose to their legislative bodies such measures as may be necessary to prevent at all times the employment of the emblem or the name Red Cross or Geneva Cross by private individuals or by societies other than those which are entitled to do so under the present convention, and in particular for commercial purposes as a trade-mark or trading mark.

The prohibition of the employment of the emblem or the names in question shall come into operation from the date fixed by each legislature, and at the latest five years after the present convention comes into force. From that date it shall no longer be lawful to adopt a trade-mark or trading-mark contrary to this prohibition.

Art. 28. The signatory Governments also undertake to adopt, or to propose to their legislative bodies, should their military law be insufficient for the purpose, the measures necessary for the repression in time of war of individual acts of pillage and maltreatment of the wounded and sick of armies, as well as for the punishment, as an unlawful employment of military insignia, or the improper use of the Red Cross flag and armlet (brassard) by officers and soldiers or private individuals not protected by the present convention.

They shall communicate to one another, through the Swiss Federal Council, the provisions relative to these measures of repression at the latest within five years from the ratification of the present convention.

GENERAL PROVISIONS.

Art. 29. The present convention shall be ratified as soon as possible. The ratification shall be deposited at Berne.

When each ratification is deposited a procès-verbal shall be drawn up, and a copy thereof certified as correct shall be forwarded through the diplomatic channel to all the contracting powers.

Art. 30. The present convention shall come into force for each power six months after the date of the deposit of its ratification.

Art. 31. The present convention, duly ratified, shall replace the convention of the 22d August, 1864, in relations between the contracting States.

The convention of 1864 remains in force between such of the parties who signed it who may not likewise ratify the present convention.

Art. 32. The present convention may be signed until the 31st December next by the powers represented at the conference which was opened at Geneva on the 11th June, 1906, as also by the powers, not represented at that conference, which signed the convention of 1864.

Such of the aforesaid powers as shall not have signed the present convention by the 31st December, 1906, shall remain free to accede to it subsequently. They shall notify their accession by means of a written communication addressed to the Swiss Federal Council, and communicated by the latter to all the contracting powers.

Other powers may apply to accede in the same manner, but their request shall only take effect if within a period of one year from the notification of it to the Federal Council no objection to it reaches the council from any of the contracting powers.

Art. 33. Each of the contracting powers shall be at liberty to denounce the present convention. The denunciation shall not take effect until one year after the written notification of it has reached the Swiss Federal Council. The council shall immediately communicate the notification to all the other contracting parties.

The denunciation shall only affect the power which has notified it.

The ratifications of the following States have up to the present been deposited:

| | | |
|----------------|------------------|------------|
| Great Britain. | Denmark. | Servia. |
| Siam. | Brazil. | Norway. |
| United States. | Luxemburg. | Honduras. |
| Russia. | Belgium. | Portugal. |
| Italy. | Spain. | Roumania. |
| Switzerland. | Austria-Hungary. | Sweden. |
| Congo. | Japan and Corea. | Guatemala. |
| German Empire. | Netherlands. | Bulgaria. |
| Mexico. | Chile. | |

The following accessions have been notified:

| | | |
|------------|-----------|-------------|
| Nicaragua. | Colombia. | Costa Rica. |
| Venezuela. | Cuba. | Salvador. |
| Turkey. | Paraguay. | |

Great Britain signed under reserve of articles 23, 27 and 28. Persia under reserve of article 18.

APPENDIX 7.

MISCELLANEOUS DATA.

1. Ranges. For convenience of reference ranges are classified as follows:

| Range. | Rifle, yards.. | Field artillery, yards. | Heavy artillery, yards. |
|----------------|---------------------|-------------------------|-------------------------|
| Distant..... | Over 2,000..... | Over 4,500..... | Over 6,500. |
| Long..... | 2,000 to 1,200..... | 4,500 to 3,500..... | 6,500 to 4,000. |
| Effective..... | 1,200 to 600..... | 3,500 to 2,500..... | 4,000 to 2,500. |
| Close..... | Under 600..... | Under 2,500..... | Under 2,500. |

The ground effectively covered by a shrapnel is elliptical in form and at the effective ranges does not exceed 200 yards in depth by 25 yards in width.

2. Penetration of rifle bullet:

| Material. | Inches. | | Material. | Inches. | |
|--------------------------------------|------------|------------|------------------------------|------------|------------|
| | 200 yards. | 600 yards. | | 200 yards. | 600 yards. |
| Commercial steel. | 0.30 | 0.20 | Sand, dry ¹ | 18.18 | 11.96 |
| 1 inch broken stone, gravel..... | 4.80 | 4.28 | Concrete, Port. 1-3-5 | 3.00 | 1.86 |
| Hard coal between 1-inch boards..... | 9.00 | 7.00 | Oak..... | 26.46 | 12.46 |
| Brickmasonry, cement ¹ | 2.20 | 1.16 | Sand, wet..... | 30.00 | 13.00 |
| Brick masonry, lime ¹ . | 2.40 | 1.14 | Pine..... | 25.72 | 13.00 |
| | | | Earth, loam..... | 30.00 | 16.12 |
| | | | Greasy clay..... | 60.00 | 32.00 |

¹ For single shot.² In sacks, about one-half these figures.**3. Effect of artillery fire:**

Up to 3,000 yards, the 3-inch field gun, using high explosive shell, is effective against ordinary types of overhead cover for field trenches, brick buildings, and stone walls 2 feet thick. It is ineffective against earthen parapets.

The heavier types of field guns and howitzers are effective against all kinds of field works, and protection against this kind of fire must be secured by concealment.

4. Communicating radius of Signal Corps equipment:

Field battalion signal troops (infantry division)—

1 wire company:

4 wire sets (reel carts) 20 miles (total).

1 radio company—

2 radio sets (wheel) 200 miles radius.

2 radio sets (pack) 30 miles radius.

Field battalion signal troops (cavalry division)—

1 headquarters company—

2 radio sets (wheel) 200 miles radius.

2 wire sets (reel carts) 10 miles (total).

1 radio company—

4 radio sets (pack) 30 miles radius.

5. Length of bridges:

Pontoon battalion—

1 company (light equipage) 3 bridge divisions, each 184 feet, total 552 feet.

1 company (heavy equipage) 6 bridge divisions, each 225 feet, total 1,350 feet.

6. Capacity of field hospital company and evacuation hospital:

Field hospital company, number of beds in equipment,¹ 216.

Evacuation hospital, number of beds in equipment,¹ 324.

7. Average net cargoes of vehicles, pack mules, and transportation units:

| | Pounds. |
|---|---------|
| 4-mule army wagon (except that loads on combat trains are fixed at 2,465 pounds)..... | 2,765 |
| Pack mules | 250 |
| Autotrucks | 3,000 |
| Wagon company | 75,000 |
| Autotruck company | 80,000 |
| Pack train company (no grain carried) | 12,000 |

¹ By utilizing local facilities a greater number of patients can be taken care of by personnel.

8. Average results of one man hour labor:**Excavation—**

| In easy soil— | Cubic feet.* |
|----------------------------------|--------------|
| First hour | 30 |
| Second hour | 25 |
| Third hour | 15 |
| Thereafter continuous work | 10 |

In hard soil, about half the above.

In loose earth, 60 cubic feet.

Filling sand bags, 20 bags (0.5 cubic foot each).

Revetment construction (material and tools on hand):

Rough brush wood or plank.....square feet per man hour.. 40

Bushwood hurdles, rough—

Makingdo.... 15

Placingdo.... 30

Sand bags—

Fillingdo.... 10

Placingdo.... 20

Sod—

Obtaining sod fordo.... 7

Placingdo.... 10

Obstacle construction (material and tools on hand)—

Abatis, wired (1 strong row)linear feet.. 1.5

Wire entanglement—

Highsquare feet.. 27

Lowdo.... 90

Clearing¹—

Thickets up to 1.5 inches diametersquare yards.. 25

Light clearings of soft woods, trees to 12 inches in diameter

.....square yards.. 25

Medium clearingdo.... 15

9. Water—Approximate daily requirements:

1 gallon per man on march.

5 gallons per man in camp.

6 to 10 gallons per animal on march and camp.

(The above figures apply to water taken from streams, where animals are watered at the streams, and cooking water carried. In estimating the daily supply for permanent or semipermanent camps, where water is piped to kitchens, bath houses, etc., the requirements will be 25 to 30 gallons per man and 10 to 15 gallons per animal, depending on climatic conditions.)

Estimating quantity of water in stream:

$B \times D \times V \times 10,800 =$ gallons in 24 hours. B = average width, D = average depth, V = average velocity (all in feet).

10. Practicability of slopes. Slopes from 0° to 5° are practicable for maneuvering all arms, singly or combined.

On slopes from 5° to 10° all arms can still be maneuvered, but with increasing difficulty.

On slopes from 10° to 15° all arms can be moved up or down.

Slopes from 15° to 30° are practicable for small detachments only.

On slopes from 30° to 45° foot troops can move with difficulty.

War material can be dragged up any slope.

* By working in two reliefs above figures can be increased by one-third.

¹ Removal of cuttings in both cases involves an equal amount of labor.

| Slope fractions. ¹ | Degrees. | Operations. |
|-------------------------------|------------------|--|
| $\frac{1}{50}$ | 1 | Maximum for railroads. |
| $\frac{1}{25}$ | 3 | Maximum for first-class roads. |
| $\frac{1}{12}$ | 5 | Practicable for all arms. Somewhat difficult for cavalry to charge descending. |
| $\frac{1}{6}$ | 6 | Maximum for cavalry charge in mass ascending. Infantry in close order descends with some difficulty. |
| $\frac{1}{4}$ | 7 | Cavalry can descend at a trot. |
| $\frac{1}{3}$ | 8 | Not practicable for heavily loaded vehicles. |
| $\frac{1}{2}$ | 9 $\frac{1}{2}$ | Field artillery can no longer maneuver. |
| $\frac{3}{4}$ | 14-15 | Maximum up to which all arms can move. |
| $\frac{1}{2}$ | 18 $\frac{1}{2}$ | Light vehicles can ascend. |
| $\frac{1}{2}$ | 26 | Individuals and mules can ascend or descend. |
| $\frac{1}{2}$ | 45 | Foot troops can ascend or descend aided by hands. |

11. Fords, practicable depth:

3-3.5 feet deep for infantry

4-4.5 feet deep for cavalry.

3 feet deep for artillery.

2.3 feet deep for wagons.

} Depending on current and nature of bottom.

12. Stream flow:

Velocity in miles = 0.7 of velocity in feet per second.

13. Strength of ice:

3 inches' thick will support small group of men.

4 $\frac{1}{2}$ to 7 inches thick will support cavalry and light guns.

8 to 12 inches thick will support heavy guns and wagons.

14. Estimating transport capacity of ships:

Allow 3 to 4 gross tons per man and 8 to 10 per animal for ships of more than 5,000 tons, and 4 to 5 per man and 10 to 12 per animal for smaller ship. This allowance includes rations, water, forage, etc., for the voyage and a margin for reserve supplies. The tonnage allowance for animals is sufficient to provide for vehicles, it being assumed that no vehicle will be separated from its draft animals, and that the integrity of units is preserved as far as possible. The gross tonnage of a ship is her total internal space capacity, which is completely closed in and protected from sea and weather, measured in register tons. A register ton is 100 cubic feet.

A ship's ton on which basis freight is computed is 40 cubic feet:

15. Time by compass bearing (approximate):

Take true azimuth (or bearing) of sun (T. A.); (T. A. — 180°) 4/60 = hours before or after 12 o'clock.

16. Use of watch as compass (approximate):

Direct hour hand toward sun. A bearing half way between hour hand and the 12 o'clock mark on the watch is the true south.

RULES OF LAND WARFARE

CHAPTER I.

THE LAWS OF WAR ON LAND.

INTRODUCTION.

1. How Regulated. The conduct of war is regulated by certain well-established and recognized rules that are usually designated as "the laws of war," which comprise the rules, both written and unwritten, for the carrying on of war, both on land and at sea.

THE WRITTEN RULES.

2. Conventions and Treaties. During the past 50 years many of these rules have been reduced to writing by means of conventions or treaties entered into by the principal civilized nations of the world after full discussion at The Hague, Geneva, Brussels, and St. Petersburg.

3. Those Relating to War on Land. The rules contained herein relate to war on land, and the principal written agreements relating to the conduct of war on land are the following, viz.:¹

(a) The Declaration of St. Petersburg of the 11th of December, 1868, forbidding in time of war the use of explosive projectiles under 400 grams weight.²

(b) The Declaration of The Hague of the 29th of July, 1899, forbidding the employment of projectiles which have for their only object the diffusion of asphyxiating or deleterious gases.³

(c) The Declaration of The Hague of the 29th of July, 1899, preventing the employment of bullets which expand or flatten in the human body.⁴

(d) The Geneva convention of the 6th of July, 1906, for the "Amelioration of the condition of the sick and wounded of armies in the field."⁵

(e) Convention No. III of The Hague of the 18th of October, 1907, with regard to the opening of hostilities.

(f) Convention No. IV of The Hague of the 18th of October, 1907, concerning the laws and customs of war on land.⁶

(g) Convention No. V of The Hague of the 18th of October, 1907, concerning the rights and duties of neutral powers and persons in war on land.⁷

¹ For full text of these conventions, see appendices.

² This has never been ratified by the United States, but see paragraph "e," Article XXIII, convention IV, Hague Rules, 1907, *infra*, par. 184.

³ Those States which have not acceded to or ratified the Geneva convention of 1906 but who are signatories of the Geneva convention of 1864 for "The amelioration of the condition of the wounded and sick of armies in the field" are bound by the provisions of this latter.

⁴ The Hague convention of 1899 "Concerning the laws and customs of war on land" are still binding on those signatory States who have not acceded to or ratified the convention of 1907.

⁵ Vide Ch. XI and Appendix 3.

(h) A portion of the Convention No. IX of The Hague of the 18th of October, 1907, concerning the bombardment by naval forces in time of war.*

(i) Convention No. VIII of The Hague of the 18th of October, 1907, relative to the laying of submarine mines.[†]

(j) A portion of Convention No. XI of The Hague of the 18th of October, 1907, relative to the right of capture in naval warfare.[‡]

(k) The declaration of The Hague of the 18th of October, 1907, prohibiting the discharge of projectiles and explosives from balloons.[§]

4. The foregoing do not constitute a complete code as appears from the preamble of Convention IV of October 18, 1907:

According to the views of the high contracting parties, these provisions, the preparation of which has been inspired by the desire to diminish the evils of war, as far as military requirements permit, are intended to serve as a general rule of conduct for the belligerents in their mutual relations and in their relations with the inhabitants.

It has not, however, been found possible at present to prepare regulations covering all the circumstances which may arise in practice.

On the other hand, the high contracting parties clearly do not intend that unforeseen cases should, in the absence of written undertaking, be left to the arbitrary judgment of military commanders.

Until a more complete code of the laws of war has been formulated, the high contracting parties deem it expedient to declare that, in cases not covered by the regulations adopted by them, the inhabitants and belligerents remain under the protection and the rule of the principles of the law of nations, as they result from the usages established among civilized peoples, from the laws of humanity, and the dictates of public conscience.

5. **Publication of Rules.** H. IV, Art. I. The contracting powers shall issue instructions to their armed land forces which shall be in conformity with the regulations respecting the laws and customs of war on land, annexed to the present convention.[¶]

6. **To Whom Applicable.** H. IV, Art. II. The provisions contained in the regulations referred to in article I, as well as in the present convention, do not apply except between contracting powers, and then only if all the belligerents are parties to the convention.

7. **Nature and Binding Force.** These declarations and conventions, freely signed and ratified by a very great number of the civilized powers of the world, constitute true rules of international law that are binding upon those who are parties thereto in a war in which all belligerents engaged are parties. In case one power, who is a party to the war, has not agreed to these conventions, or having been a party has denounced the same, or has made reservations as to one or more articles, then and in that case the other parties belligerent will not be bound by the convention or by the reserved articles.^{||}

† Vide infra, Ch. XII.

‡ Vide infra.

§ Vide infra, Ch. VI, Sec. I, pars. 174-175, p. 1746.

¶ Vide Bulletin No. 6; W. D., Feb. 19, 1913, and appendices.

|| "The observance by the French Army of the rules announced is implicitly subordinated to the condition of reciprocity on the part of the opposing belligerent, for if France imposes certain limitations upon her means of action against future enemies, it is naturally upon the condition that they impose upon themselves the same restrictions." (*Les Lois de La Guerre Continentale*, by Lieut. Jacomet, p. 26)

THE UNWRITTEN RULES.

8. Usage. In addition to the written rules there exist certain other well-recognized usages and customs that have developed into, and have become recognized as, rules of warfare. These usages and customs are still in process of development.

9. How Developed. The development of the laws and usages of war is determined by three principles. First, that a belligerent is justified in applying any amount and any kind of force which is necessary for the purpose of the war; that is, the complete submission of the enemy at the earliest possible moment with the least expenditure of men and money. Second, the principle of humanity, which says that all such kinds and degrees of violence as are not necessary for the purpose of war are not permitted to a belligerent. Third, the principle of chivalry, which demands a certain amount of fairness in offense and defense and a certain mutual respect between opposing forces.¹²

GENERAL PRINCIPLES.

10. The Object of War. The object of war is to bring about the complete submission of the enemy as soon as possible by means of regulated violence.¹³

11. Military Necessity. Military necessity justifies a resort to all the measures which are indispensable for securing this object and which are not forbidden by the modern laws and customs of war.

12. What Military Necessity Admits of. Military necessity admits of all direct destruction of life or limb of armed enemies, and of other persons whose destruction is incidentally unavoidable in the armed contests of war; it allows of the capturing of every armed enemy, and of every enemy of importance to the hostile government, or of peculiar danger to the captor; it allows of all destruction of property, and obstruction of ways and channels of traffic, travel, or communication, and of all withholding of sustenance or means of life from the enemy; of the appropriation of whatever the enemy's country affords that is necessary for the subsistence and safety of the army, and of such deception as does not involve the breaking of good faith, either positively pledged, regarding agreements entered into during the war, or supposed by the modern law of war to exist.¹⁴

13. What Military Necessity Does Not Admit of. Military necessity does not admit of cruelty—that is, the infliction of suffering for the sake of suffering or for revenge, nor of maiming or wounding except in fight, nor of torture to extort confessions. It does not admit of the use of poison in any way, nor

¹² Land Warfare, Opp., C. I., par. 3.

¹³ G. O. 100, 1863, art. 20. "Public war is a state of armed hostility between sovereign nations or governments. It is a law and requisite of civilized existence that men live in political, continuous societies, forming organized units called States or nations, whose constituents bear, enjoy, and suffer, advance and retrograde together, in peace and in war."

Von Moltke said: "The greatest kindness in war is to bring it to a speedy conclusion. It should be allowable, with that view, to employ all methods save those which are absolutely objectionable. I can by no means profess agreement with the Declaration of St. Petersburg, when it asserts that the weakening of the military forces of the enemy is the only lawful procedure in war. No; you must attack all the resources of the enemy's government—its finances, its railways, its stores, and even its prestige." Letter to Professor Bluntschli, Dec. 11, 1880, cited Holland, War on Land, p. 12.

¹⁴ G. O. 100, 1863, art. 15.

of the wanton devastation of a district. It admits of deception, but disclaims acts of perfidy; and, in general, military necessity does not include any act of hostility which makes the return to peace unnecessarily difficult."¹³

14. Martial Law. Martial law is simply military authority exercised in accordance with the laws and usages of war.¹⁴

In the case of *ex parte Milligan* (4 Wall., 2), Chief Justice Chase, in a dissenting opinion, which did not affect the merits of the case under consideration, drew a distinction in military jurisdiction as follows: "There are under the Constitution three kinds of military jurisdiction—one to be exercised in both peace and war; another to be exercised in time of foreign war without the boundaries of the United States, or in time of rebellion or civil war within States or districts occupied by rebels treated as belligerents; and, third, to be exercised in time of invasion or insurrection within the limits of the United States, or during rebellion within the limits of States maintaining adherence to the National Government, when the public danger requires its exercise. The first of these may be called jurisdiction under military law, and is found in acts of Congress prescribing rules and articles of war, or otherwise providing for the government of the national forces; the second may be distinguished as military government, superseding, as far as may be deemed expedient, the local law, and exercised by the military commander under the direction of the President, with the express or implied sanction of Congress; while the third may be denominated martial law proper, and is called into action by Congress, or temporarily, when the action of Congress can not be invited, and in the case of justifying or excusing peril, by the President, in times of insurrection or invasion, or of civil or foreign war, within districts or localities where ordinary law no longer adequately secures public safety and private rights." This distinction has never since been sustained by the Supreme Court, although military writers have made use of the term "military government" to designate the jurisdiction exercised over enemy territory by the military, regarding enemy territory to include that of a foreign state and also that part of the belligerent state that has been accorded recognition of belligerency, and "martial law" to designate the jurisdiction exercised by the military power over parts of the dominant state that is in rebellion or insurrection without being recognized as belligerents, or, in a word, treating "martial law" as a domestic fact. (*Vide Military Government and Martial Law*, Birkhimer, p. 21. 2d ed.)

The term "martial law" as defined in the text conforms with that given in Great Britain, where the same distinction is made between "military law," "martial law," and "martial law in the home territory." (*Vide Law of War on Land*, Holland, pp. 14-17; *vide also Jour. Mil. Ser. Inst.*, Vol. XV, article by Carbaugh.)

15. Extends to Property and Persons. Martial law extends to property and to all persons in the occupied territory, whether they are subjects of the enemy or aliens to that government.¹⁵

16. Military Jurisdiction. Military jurisdiction is of two kinds: First, that which is conferred and defined by statute; second, that which is derived from the common law of war. Military offenses under the statute law must be tried in the manner therein directed, but military offenses which do not come within the statute must be tried and punished under the common law of war. The character of the courts which exercise these jurisdictions depends upon

¹³ G. O. 100, 1863, art. 16.

¹⁴ G. O. 100, 1863, art. 4.

¹⁵ G. O. 100, 1863, art. 7. *Vide also infra* Chaps. VIII and IX.

the local laws of each particular country. In the armies of the United States the first is exercised by courts-martial, while cases which do not come within the Rules and Articles of War, or the jurisdiction conferred by statute on courts-martial, are tried by military commissions.¹⁸

17. In Cases of Individual Offenders. Whenever feasible, martial law is carried out in cases of individual offenders by military courts; but sentences of death shall be executed only with the approval of the Chief Executive, provided the urgency of the case does not require a speedier execution, and then only with the approval of the commander of the occupying forces.¹⁹

18. Cruelty, Bad Faith, Extortion, Revenge, Etc., Prohibited. The law of war not only disclaims all cruelty and bad faith concerning engagements concluded with the enemy during the war, but also the breaking of treaty obligations entered into by belligerents in time of peace and avowedly intended to remain in force in case of war between the contracting powers. It disclaims all extortion and other transactions for individual gain; all acts of private revenge, or connivance at such acts. Offenses to the contrary shall be severely punished, and especially so if committed by officers.²⁰

CHAPTER II.

HOSTILITIES.

THE COMMENCEMENT OF HOSTILITIES.

19. Declaration of War Required. H. Con. III, Art. I. The contracting parties recognize that hostilities between themselves must not commence without previous and explicit warning in the form either of a reasoned declaration of war or of an ultimatum accompanied by a conditional declaration of war.¹

¹⁸ Vide Justification of Martial Law, by G. Norman Lieber, p. 3, who says:

“Military jurisdiction is of four kinds, viz.:

“1. Military law, which is the legal system that regulates the government of the military establishment. Military law is a branch of municipal law, and in the United States derives its existence from special constitutional grants.

“2. The law of hostile occupation, or military government, as it is sometimes called; that is, military power exercised by a belligerent over the inhabitants and property of an enemy's territory, occupied by him. This belongs to the law of war, and, therefore, to the law of nations.

“3. Martial law applied to the army; that is, military power extended in time of war, insurrection, or rebellion over persons in the military service, as to obligations arising out of such emergency, and not falling within the domain of military law, nor otherwise regulated by law. It is an application of the doctrine of necessity, founded on the right of national self-preservation.

“4. Martial law at home, or as a domestic fact; by which is meant military power exercised in time of war, insurrection, or rebellion, in parts of the country retaining allegiance, and over persons and things not ordinarily subjected to it.”

¹⁹ G. O. 100, 1863, art. 12.

²⁰ G. O. 100, 1863, art. 11.

¹ The framers of the Hague Rules were agreed to one rule, namely, that “an attack which nothing foreshadowed would be infamous.” A gross violation of international law would be committed by the commencement of hostilities in time of peace without a previous controversy and negotiations with a view to a peaceful settlement. (Vide Hague Peace Conferences, Higgins, p. 203.)

20. Surprise Still Possible. Nothing in the foregoing rule requires that any time shall elapse between the actual declaration of war and the commencement of hostilities. It is still possible, therefore, to make a sudden and unexpected declaration of war and thus surprise an unprepared enemy.²

21. Notification to Neutrals. H. Con. III, Art. II. The existence of a state of war must be notified to the neutral powers without delay, but shall not take effect in regard to them until after the receipt of a notification, which may, however, be given by telegraph. Neutral powers, nevertheless, can not rely on the absence of notification if it is clearly established that they were in fact aware of the existence of a state of war.³

22. It Is Binding Between Parties. H. Con. III, Art. III. Article I of the present convention shall take effect in case of war between two or more of the contracting powers. Article II is binding as between a belligerent power which is a party to the convention and neutral powers which are also parties to the convention.

23. Importance, Both Legal and Commercial. This convention is important from both the legal and commercial point of view since it requires belligerents themselves to publicly announce a definite date for the commencement of hostilities, from which date they become entitled to exercise the rights of belligerency, and are themselves required to comply with and to exact from neutrals the obligations of neutrality.

TREATMENT OF RESIDENT ENEMY SUBJECTS.

24. Legal Status. "Public war is a state of armed hostility between sovereign nations or governments."⁴ So that the first effect of war between two states is to cause every subject of the one to become an enemy of every subject of the other, since it is impossible to sever the subjects from their state.⁵

25. Right of Control. Every belligerent state possesses the inherent right to take such steps as it may deem necessary for the control of all persons whose conduct or presence appears dangerous to its safety.⁶ In strict law

² The French proposal to The Hague Peace Conference of 1907, based substantially on resolutions of the Inst. Int. Law at Ghent in September, 1906, consisted of three articles. The first two were embodied substantially as in the text above, while the third, "Hostilities should not begin till after the expiry of a delay sufficient to insure that the rule of previous and unequivocal notice may not be considered as evaded," was rejected.

³ See Chap. XI on "The rights and duties of neutral powers," *infra*, par. 389.

⁴ G. O. 100, 1863, art. 20.

⁵ G. O. 100, 1863, art. 21. "The citizen or native of a hostile country is thus an enemy, as one of the constituents of the hostile state or nation, and as such is subjected to the hardships of the war." The foregoing is both the American and English view. (Vide Land Warfare, *Opp.*, p. 15.)

⁶ Int. Law Dig. Moore, sec. 1116. "Various measures have been adopted by governments in relation to alien enemies residing within their territory. Such persons may, says Rivier, be detained, especially those subject to military service; or they may be interned in determinate places, or yet may be expelled, a brief delay being allowed them to settle up their affairs. But such measures, although justified by the right of self-preservation, are less and less practiced, and are often criticised as not being in harmony with the spirit of modern war."

enemy subjects located or resident in hostile territory may be detained, interned in designated localities, or expelled from the country.⁷

26. Modern Practice as to Status. It is now universally recognized that hostilities are restricted to the armed forces of belligerents, and that the unarmed citizens who refrain from acts of hostility and pursue their ordinary avocations must be distinguished from the armed forces of the belligerent, must be treated leniently, must not be injured in their lives or liberty, except for cause or after due trial, and must not, as a rule, be deprived of their private property.⁸

27. Practice as to Detention and Internment. Enemy subjects are not made prisoners en masse⁹ on the breaking out of hostilities.¹⁰ Persons known to be active or reserve officers, or reservists, of the hostile army, as well as persons suspected of communicating with the enemy, will be detained and, if deemed advisable, interned on the ground of self-preservation, in the exercise of the right of control.¹¹

28. Practice as to Expulsion. In modern practice the expulsion of the citizens or subjects of the enemy is generally decreed from seaports, fortresses, de-

⁷ Act July 6, 1798: 1 Stat., 577; R. S., sec. 4067. "Whenever there is a declared war between the United States and any foreign nation or government, or any invasion or predatory incursion is perpetrated, attempted, or threatened against the territory of the United States, by any foreign nation or government, and the President makes public proclamation of the event, all male natives, citizens, denizens, or subjects of the hostile nation or government, who are 14 years old and upward, and who are not actually naturalized, may be liable for removal as alien enemies; and the President is authorized to direct the conduct to be observed, on the part of the United States toward aliens who are liable to removal, the manner and degree of restraint to which they may be subjected, and the security upon which their residence may be permitted." Sec. 4069: The courts of the United States having criminal jurisdiction are authorized to enforce such proclamations.

The President need not call in the judiciary to enforce these provisions. (*Lockington v. Smith*, Pet. C. C., 466.)

"The Government may prescribe the conditions under which its executive officers are to deal with its alien enemies." (*C. & O. R. R. v. U. S.*, 20, C. Cls., 49.)

⁸ G. O. 100, 1863, art. 22. "Nevertheless, as civilization has advanced during the last centuries, so has likewise steadily advanced, especially in war on land, the distinction between the private individual belonging to a hostile country and the hostile country itself, with its men in arms. The principle has been more and more acknowledged that the unarmed citizen is to be spared in person, property, and honor as much as the exigencies of war will admit." As to what is meant by "armed forces," see *infra*, Ch. III, pp. 1720-1723.

⁹ Napoleon based his action in making prisoners of war of all British subjects between 18 and 60 years of age in 1803 (the last case of the kind) on the ground of retaliation or reprisal.

¹⁰ Hague Convention, 1907, Actes, Vol. III, p. 109, discussed the following proposition: "Subjects of a belligerent residing in the territory of the adverse party will not be placed in confinement unless the exigencies of war render it necessary." It was suggested that the words "nor expelled," be inserted after the word "confined," but no action was taken. (*Vide also*, pp. 9, 10, and 110.)

¹¹ *Vide notes 6 and 7, par. 25. supra; also Land Warfare. Opp.*, pp. 15-16.

fended areas, and the actual or contemplated theaters of operation.¹² From other territory the practice is not uniform, expulsion being resorted to usually for grave reasons of state only.¹³ When decreed, the persons expelled should be given such reasonable notice, consistent with public safety, as will enable them to arrange for the collection, disposal, and removal of their goods and property.¹⁴

CHAPTER III.

THE ARMED FORCES OF BELLIGERENTS.

29. General Division of Enemy Population. The enemy population is divided in war into two general classes, known as the armed forces and the peaceful population. Both classes have distinct rights, duties, and disabilities, and no person can belong to both classes at one and the same time.¹

30. Who Are Lawful Belligerents. H. R. Art. I. The laws, rights, and duties of war apply not only to armies, but also to militia and volunteer corps fulfilling the following conditions:

¹² During the Crimean War British subjects were expelled from the Russian seaports of Cronstadt, Odessa, and Sevastopol.

Japanese subjects were expelled from Siberia, Vladivostok, and Port Arthur in 1904. (Ariga, pp. 363-4.)

In 1905 the Japanese expelled all foreigners from Port Arthur, except about 20, as soon as the defenses were completed.

In 1870 every German in Paris and Department of The Seine was ordered to leave.

¹³ In the Crimean War Russian subjects were allowed to reside without molestation in Great Britain and France.

In 1870 Frenchmen were permitted to remain in Germany. On the contrary, German citizens were at first permitted to remain in France, but afterwards were required to leave, on the ground of personal safety and public defense.

In 1877 Turkish subjects in Russia were permitted to remain and continue their business, subject to the laws.

In the Spanish-American War the subjects of both belligerents were permitted to remain or withdraw.

In the Russo-Japanese War Russian subjects were authorized to remain in Japan and were assured of the protection of their lives, honor, and property, although a reservation was made as to surveillance or other measures taken by military or naval authorities for military purposes, and limitations were placed as to change of domicile or journeys in case the Government saw fit. (Ariga, p. 43.)

Japanese subjects were allowed to continue, under the protection of the Russian laws, their sojourn and the exercise of peaceful occupations in the Russian Empire, except in territories which are under the control of the Imperial viceroy in the Far East.

In 1879 Chileans were expelled from Bolivia and their goods confiscated.

¹⁴ U. S. R. Stat., sec. 4068: "When an alien who becomes liable to removal as an enemy is not chargeable with actual hostility or other crimes against public safety, he must be allowed for the recovery, disposal, and removal of his goods and effects, and for his departure, the full time which may be stipulated in any treaty; and where no such treaty exists the President may fix such reasonable time as may be consistent with public safety and according to the dictates of humanity and national hospitality."

¹ Vide H. Con. V, Art. XVII (b), "Rights and duties of neutral powers and persons in war on land." Ch. XI.

1. To be commanded by a person responsible for his subordinates;
2. To have a fixed distinctive emblem recognizable at a distance;
3. To carry arms openly; and
4. To conduct their operations in accordance with the laws and usages of war. In countries where militia or volunteer corps constitute the army, or form part of it, they are included under the denomination "army."

31. **The Army.** The members of the army as above defined are entitled to recognition as belligerent forces whether they have joined voluntarily, or have been compelled to do so by state law, and whether they joined before or after war is declared, and whether they are nationals of the enemy or of a neutral state.²

32. **The First Condition for Militia and Volunteer Corps.** This condition is satisfied if commanded by a regularly or temporarily commissioned officer, or by a person of position and authority, or if the officers, noncommissioned officers, and men are furnished with certificates or badges, granted by the government of the state, that will distinguish them from persons acting on their own responsibility.³

33. **The Distinctive Sign.** This requirement will be satisfied by the wearing of a uniform, or even less than a complete uniform. The distance that the sign must be visible is left vague and undetermined and the practice is not uniform. This requirement will be satisfied certainly if this sign is "easily distinguishable by the naked eye of ordinary people" at a distance at which the form of an individual can be determined.⁴ Every nation making use of these troops

² Two classes of militia and volunteer corps are referred to—the one which forms part of or the entire army and includes territorial forces; the other which must fulfill the four conditions mentioned.

³ The German rule in 1870 that "every prisoner of war must prove his status as a French soldier by the production of an order issued by a competent authority and addressed to himself showing that he has been summoned to the colors and is borne on the rolls of a military unit raised by the French Government," and their apparent refusal to recognize individual irregulars and small bands unless they can prove that they have state authorization, is not now legal under The Hague Rules.

⁴ Ariga, pp. 85–86. "The Japanese Government will not consider as belligerents the free corps of the national army referred to in the Russian note unless they can be easily distinguished by the naked eye of ordinary people, or unless they fulfill the conditions required of the militia and volunteer corps by The Hague rule."

"As encounters now take place at long ranges, at which it is impossible to distinguish the color or the cut of the clothing, it would seem advisable to provide irregulars with a helmet, slouch hat, or forage cap, as being completely different in outline from the ordinary civilian dress. It may be objected, however, that a headdress does not legally fulfill the condition that the sign must be fixed. Something of the nature of a badge sewn on the clothing should therefore be worn in addition." (Land Warfare Opp., pp. 19–20.)

In 1870 the French mobile national guard and franc tireurs wore blue or gray blouses with a red arm band. The former wore, in addition, a forage cap (kepis). The Germans refused to recognize this as sufficient, because the blouse was the native costume and the red band could be seen at so short a distance, besides being readily removed, so that it was impossible to distinguish these troops from the ordinary citizen.

Ariga, p. 82. At Ping-yang Japanese civilians wore a white helmet and European clothes, with a flower embroidered in red thread on their coats.

should adopt, before hostilities commence, either a uniform or a distinctive sign which will fulfill the required conditions and give notice of the same to the enemy, although this notification is not required.*

34. Carrying Arms Openly. This condition is imposed to prevent making use of arms for active opposition and afterwards discarding or concealing them on the approach of the enemy, and will not be satisfied by carrying concealed weapons, such as pistols, daggers, sword sticks, etc.

35. Compliance With the Laws of War. When such troops are utilized they must be instructed in and be required to conform to the laws of war, and especially as to certain essentials, such as the use of treachery, maltreatment of prisoners, the wounded and dead, violations of or improper conduct toward flags of truce, pillage, unnecessary violence, and destruction of property, etc.

36. Levee en Masse. H. R., Art. II. The inhabitants of a territory which has not been occupied, who, on the approach of the enemy, spontaneously take up arms to resist the invading troops without having had time to organize themselves in accordance with Article I, shall be regarded as belligerents if they carry arms openly and if they respect the laws and customs of war.*

37. Can Not Be Treated as Brigands, Etc. No belligerent has the right to declare that he will treat every captured man in arms of a *levy en masse* as a brigand or bandit.*

38. Deserters, Etc., Do Not Enjoy Immunity. Certain classes of those forming part of a *levee en masse* can not claim the privileges accorded in the preceding paragraph. Among these are deserters, subjects of the invading belligerent; and those who are known to have violated the laws and customs of war.*

* Ariga, pp. 85-87. The Russians at Saghalien wore no uniform, but had a cross with the letters M. R. (Manchurian Regiment) on their caps, on their sleeves a red band about two-thirds of an inch broad, with a red edging on their overcoats. Some of these troops were executed for violation of the laws of war. The author gives the impression that this was because they did not wear the distinctive marks, not having been issued, or, if issued, were thrown away.

The Russians notified the Japanese of the uniform adopted for the irregular troops in Saghalien.

* Note that the first two requirements for militia and volunteer corps are not required, i.e., no responsible commander and no distinctive sign is required. The American rule, from which the above was taken, is contained in G. O. 100, 1863, art. 51. "If the people of that portion of an invaded country which is not yet occupied by the enemy, or of the whole country, at the approach of a hostile army, rise, under a duly authorized levy, en masse to resist the invader, they are now treated as public enemies, and, if captured, are prisoners of war." The new rule actually "duly authorizes" the levy, and omits including specifically "or of the whole country," making use of the words "the inhabitants of a territory."

Mr. Oppenheim, in *Land Warfare*, p. 21, art. 31, says: "The word 'territory' in this relation is not intended to mean the whole extent of a belligerent state, but refers to any part of it which is not yet invaded."

* G. O. 100, 1863, art. 52, par. 1.

* G. O. 100, 1863, art. 48. "Deserters from the American Army, having entered the service of the enemy, suffer death if they fall again into the hands of the United States, whether by capture or being delivered up to the American Army; and if a deserter from the enemy, having taken service in the Army of the United States, is captured by the enemy, and punished by them with death or otherwise, it is not a breach against the law and usages of war, requiring redress or retaliation."

39. Uprisings in Occupied Territory. If the people of a country, or any portion of the same, already occupied by an army, rise against it, they are violators of the laws of war, and are not entitled to their protection.⁹

40. Duty of Officers as to Status of Troops. The determination of the status of captured troops is to be left to courts organized for the purpose. Summary executions are no longer contemplated under the laws of war. The officers' duty is to hold the persons of those captured, and leave the question of their being regulars, irregulars, deserters, etc., to the determination of competent authority.¹⁰

41. Colored Troops. The law of nations knows no distinction of color, so that the enrolling of individuals belonging to civilized colored races and the employment of whole regiments of colored troops is duly authorized. The employment of savage tribes or barbarous races should not be resorted to in wars between civilized nations.¹¹

42. Armed Forces Consist of Combatants and Noncombatants. H. R., Art. III. The armed forces of the belligerent parties may consist of combatants and noncombatants. In case of capture by the enemy, both have a right to be treated as prisoners of war.

CHAPTER IV.

PRISONERS OF WAR.

43. Definition. A prisoner of war is an individual whom the enemy, upon capture, temporarily deprives of his personal liberty on account of his participation directly or indirectly in the hostilities, and whom the laws of war prescribe shall be treated with certain considerations.¹

44. Treatment. The law of nations allows every sovereign Government to make war upon another sovereign State, and, therefore, admits of no rules or laws different from those of regular warfare, regarding the treatment of prisoners of war, although they may belong to the army of a Government which the captor may consider as a wanton and unjust assailant.²

45. Who Can Claim the Status of Prisoners of War. H. R., Art. III. The armed forces of the belligerent parties may consist of combatants and non-combatants. In the case of capture by the enemy, both have a right to be treated as prisoners of war.³

46. Individuals Who Follow an Army Without Belonging to It. H. R., Art. XIII. Individuals who follow an army without directly belonging to it, such as newspaper correspondents, and reporters, sutlers, and contractors,

⁹ G. O. 100, 1863, art. 52, par. 2, vide *infra*, Chps. VIII and X.

¹⁰ Land Warfare, Opp., par. 37.

¹¹ G. O. 100, 1863, art. 57. "So soon as a man is armed by a sovereign government and takes the soldier's oath of fidelity, he is a belligerent; his killing, wounding, or other warlike acts are not individual crimes or offenses. No belligerent has a right to declare that enemies of a certain class, color, or condition when properly organized as soldiers, will not be treated by him as public enemies."

¹ Vide G. O. 100, 1863, art. 49.

² G. O. 100, 1863, art. 67.

³ As to persons enjoying special exemptions when captured or upon falling into the hands of the enemy, vide *infra*, Geneva Convention, arts. 6 to 13, *infra*, secs. 118 et seq.; as to persons not directly attached to the army, see *infra*, secs. 46 et seq.; as to persons who can not claim the rights of prisoners of war when captured, see sec. 82 and secs. 367 et seq.

who fall into the enemy's hands and whom the latter thinks expedient to detain, are entitled to be treated as prisoners of war, provided they are in possession of a certificate from the military authorities of the army which they accompanied.⁴

47. What Civilians Made Prisoners of War. In addition to the armed forces, both combatant and noncombatant, and civilians authorized to accompany armies, the following may be made prisoners of war:

(a) The sovereign and members of the royal family, the President or head of a republican State, and the ministers who direct the policy of a State.⁵

(b) Civil officials and diplomatic agents attached to the army.

(c) Persons whose services are of particular use and benefit to the hostile army or its government, such as the higher civil officials, diplomatic agents, couriers, guides, etc.; also all persons who may be harmful to the opposing State while at liberty, such as prominent and influential political leaders, journalists, local authorities, clergymen, and teachers, in case they incite the people to resistance.⁶

(d) The citizens who rise en masse to defend their territory or district from invasion by the enemy.⁷

48. Military Attachés and Agents of Neutrals. Military attachés and diplomatic agents of neutral powers accompanying an army in the field, or found within a captured fortress, are not ordinarily held as prisoners, provided they have proper papers of identification in their possession and take no part in the hostilities. They may, however, be ordered out of the theater of war, and, if necessary, handed over by the captor to the ministers of their respective countries.⁸

49. Wounded and Sick Prisoners. G. C., art. 2, par. 1. Subject to the care that must be taken of them under the preceding article (G. C., Art. I), the sick and wounded of an army who fall into the power of the other belligerent become prisoners of war, and the general rules of international law in respect to prisoners become applicable to them.⁹

50. H. R., Art. IV. Prisoners of war are in the power of the hostile government, but not of the individuals or corps who capture them. They must be humanely treated.

51. Subject to Military Jurisdiction. All physical suffering, all brutality which is not necessitated as an indispensable measure for guarding prisoners, are formally prohibited. If prisoners commit crimes or acts punishable according to the ordinary penal or military laws, they are subjected to the military jurisdiction of the state of the captor.¹⁰

52. Personal Belongings Retained. H. R., Art. IV, par. 3. All their per-

⁴ F. S. R., 1914, Art. VIII, pars. 426-431, pp. 168-9, Ariga, pp. 123-124. Certain newspaper correspondents, subjects of the United States, attached to the Russian Army, also a medical officer missionary captured by the Japanese at Lio Yang, were sent under guard to Japan.

For forms of certificate, vide appendices A and B, this chapter.

⁵ G. O. 100, 1863, art. 50, par. 2.

⁶ Vide supra, art. 36, and infra, art. 369; also G. O. 100, 1863, arts. 49 and 51.

⁷ Ariga, p. 122. One foreign naval officer and two officers, military attachés, with the Russian army captured at Mukden by the Japanese were treated with consideration, and sent to Kobe, Japan, where they were turned over to their respective delegations.

⁸ Vide infra, par. 107. As to treatment to be accorded to medical personnel and chaplains, vide G. C., art. 9, infra, par. 130.

⁹ Lois de la Guerre Continentale, Jacomet, p. 31, art. 8.

sonal belongings, except arms, horses, and military papers, remain their property.

53. Can Not Retain Large Sums of Money. This rule does not authorize prisoners to retain large sums of money, or other articles which might facilitate their escape. Such money and articles are usually taken from them, receipts are given, and they are returned at the end of the war.¹⁰

54. Belongings Not Transportable. This rule does not compel the captor to be responsible for such personal belongings of prisoners as they are unable to transport with them.¹¹

55. Includes Uniform, Etc. In practice personal belongings are understood to include military uniform, clothing, and kit required for personal use, although technically they may belong to their Government.¹²

56. Booty. All captures and booty, except personal belongings of prisoners, become the property of the belligerent Government and not of individuals or units capturing them.¹³

57. H. R., Art. IX. Every prisoner of war, if he is questioned on the subject, is bound to give his true name and rank, and if he infringes this rule he is liable to have the advantages accorded to prisoners of his class curtailed.

58. Although a prisoner of war is bound, under the penalties named, to state truthfully his name and rank, yet he is not bound to reply to other questions. The captor is entitled to take advantage of every means, humane and not coercive, in order to obtain all information possible from a prisoner with regard to the numbers, movements, and location of the enemy, but the prisoner can not be punished for giving false information about his own army.¹⁴

59. Internment. H. R., Art. V. Prisoners of war may be interned in a town, fortress, camp, or other place, and bound not to go beyond certain fixed limits; but they can not be confined except as an indispensable measure of safety and only while the circumstances which necessitate the measure continue to exist.

60. Not Criminals. The distinction herein intended is between restriction to a specified locality and close confinement. Prisoners of war must not be regarded as criminals or convicts. They are guarded as a measure of security and not of punishment.¹⁵

61. Internment. The object of internment is solely to prevent prisoners from further participation in the war. Anything, therefore, may be done that is necessary to secure this end, but nothing more. Restrictions and inconveniences are unavoidable, freedom of movement within the area of internment should be permitted unless there are special reasons to the contrary. The place selected for internment should not possess an injurious climate.¹⁶

¹⁰ Holland, *Laws of War on Land*, p. 21, art. 24; Opp. *Land Warfare*, par. 70 and note. They should be made to prove ownership of such money and articles to determine that they are not state property. Such property is subject to requisition as other property. Vide *infra*, arts. 345 et seq.

¹¹ Ariga, p. 325.

¹² Opp. *Land Warfare*, par. 69 and note. Ariga, p. 161.

¹³ G. O. 100, 1863, art. 45. Vide *infra*, art. 337.

¹⁴ *Kriegsbrauch*, p. 16. Opp. *Land Warfare*, par. 68.

¹⁵ Holland, *Laws of War on Land*, par. 25. Opp. *Land Warfare*, pars. 86, 87.

¹⁶ Prisoners of war will usually be interned in some town, fortress, camp, or other place. Certain limits will be fixed, beyond which they are not permitted to go, and may be required to respond to certain roll calls and subjected to other surveillance to prevent their return to their own army. Opp. *Land Warfare*, par. 90.

62. Where Confined. Prisoners of war when confined for security should not be placed in prisons, penitentiaries, or other places for the imprisonment of convicts, but should be confined in rooms that are clean, sanitary, and as decent as possible."

63. Maintained by Captor. H. R., Art. VII. The Government into whose hands prisoners of war have fallen is charged with their maintenance.

In the absence of a special agreement between the belligerents, prisoners of war shall be treated, as regards board, lodging, and clothing, on the same footing as the troops of the Government who captured them."

64. Captured Supplies Used. Prisoners are only entitled to what is customarily used in the captor's country, but due allowance should, if possible, be made for differences of habits, and captured supplies should be used if they are available.

65. Can Utilize Services. H. R., Art. VI. The State may utilize the labor of prisoners of war according to their rank and aptitude, officers excepted. The tasks shall not be excessive and shall have no connection with the operations of the war.

Prisoners may be authorized to work for the public service, for private persons, or on their own account. Work done for the State is paid at the rates in force for work of a similar kind done by soldiers of the national army, or, if there are none in force, at a rate according to the work executed.

When the work is for other branches of the public service or for private persons the conditions are settled in agreement with the military authorities. The wages of the prisoners shall go toward improving their position, and the balance shall be paid them on their release, after deducting the cost of their maintenance.

66. Work, even upon fortifications, at a distance from the scene of operations, would not seem to be prohibited by this article. That the excess of money earned by prisoners, over that paid for purchasing comforts and small luxuries, can be retained by the captor in compensation for cost of maintenance, in case their Government fails to provide for their maintenance in the treaty of peace, is well settled. The practice, however, is against such retention."

ATTEMPTS TO ESCAPE.

67. H. R., Art. VIII. Prisoners of war shall be subject to the laws, regulations, and orders in force in the army of the State in whose power they are. Any act of insubordination justifies the adoption towards them of such measures of severity as may be considered necessary.

68. Execution of. Prisoners of war may be fired upon and may be shot down while attempting to escape, or if they resist their guard, or attempt to assist their own army in any way." They may be executed by sentence of a proper

"For disciplinary measures, vide H. R., Art. VIII infra, par. 67.

"The Japanese granted 60 yen (30 cents) per day to officers and 30 yen (15 cents) to noncommissioned officers and soldiers—Russian prisoners of war—during captivity, which was nearly double the amount allowed for their own troops. (Ariga, p. 113.)

At the close of the Russo-Japanese War it was agreed in the treaty of peace that each belligerent should pay the cost of maintenance of its soldiers while prisoners of war.

"Such is the practice of Great Britain. Mr. Holland says that she expects reciprocity of treatment in this regard. (Laws of War on Land, p. 22, par. 26.)

"They should be summoned to halt or surrender before firing. (Hague Con., 1899, Pt. I, pp. 86, 87.)

court for any offense punishable with death under the laws of the captor, after due trial and conviction. It may well be doubted whether such extreme necessity can ever arise that will compel or warrant a commander to kill his prisoners on the ground of self-preservation.²¹

69. Trial and Punishment. For all crimes and misdemeanors, including conspiracy, mutiny, revolt, or insubordination, prisoners of war are subject to trial and punishment in the same way as soldiers of the army which captured them.

70. Conspiracy. If a conspiracy is discovered, the purpose of which is a united or general escape, the conspirators may be rigorously punished, even with death; and capital punishment may also be inflicted upon prisoners of war who are found to have plotted rebellion against the authority of the captors, whether in union with fellow prisoners or other persons.²²

71. Crimes Committed Before Capture. A prisoner of war remains answerable for his crimes committed against the captor's army or people, committed before he was captured, and for which he has not been punished by his own army.²³

72. Parole. H. R., Art. X. Prisoners of war may be set at liberty on parole if the laws of their country allow, and, in such cases, they are bound, on their personal honor, scrupulously to fulfill, both towards their own Government and the Government by whom they were made prisoners, the engagements they have contracted.

In such cases their own Government is bound neither to require of nor accept from them any service incompatible with the parole given.

73. The parole should be in writing and be signed by the prisoners.²⁴ The conditions thereof should be distinctly stated, so as to fix as definitely as possible exactly what acts the prisoner must refrain from doing; that is, whether he is bound to refrain from all acts against the captor or whether he must refrain only from taking part directly in military operations against the captor, and may accept office and render indirect aid or assistance to his own Government.²⁵

²¹ G. O. 100, 1863, art. 60, in referring to giving of quarter, says: "But a commander is permitted to direct his troops to give no quarter in great straits, when his own salvation makes it impossible to cumber himself with prisoners." The German Kriegsbrauch of 1902 says: "Prisoners can be killed * * * in case of extreme necessity, when other means of security are not available and the presence of the prisoners is a danger to one's own existence. * * * Exigencies of war and the safety of the state come first, and not the consideration that prisoners of war must at any cost remain unmolested." No instance of resort to such executions have occurred since 1799, when Napoleon bayonnetted the Arabs at Jaffa.

²² G. O. 100, 1863, art. 77.

²³ G. O. 100, 1863, art. 59. Vide *infra*, Ch. X.

²⁴ It is customary to make out paroles in duplicate, one of which is sent to the enemy. G. O. 100, 1863, art. 125. "When paroles are given and received there must be an exchange of two written documents, in which the name and rank of the paroled individuals are accurately and truthfully stated."

²⁵ Ariga, p. 115. "C'est l'article 7 de la capitulation qui réglementa la procédure de la libération sur parole. Cet article de la capitulation disait que 'la parole sera donnée par écrit de ne pas reprendre les armes contre le Japon et de n'agir en aucune façon contre les intérêts de ce pays jusqu'à la fin de la guerre actuelle.'"

74. No noncommissioned officer or private can give his parole except through an officer. Individual paroles not given through an officer are not only void, but subject the individuals giving them to the punishment of death as deserters. The only admissible exception is where individuals properly separated from their commands have suffered long confinement without the possibility of being paroled through an officer.*

75. Commissioned officers can give their parole only with the permission of a military superior, as long as such superior in rank is within reach.*

76. No paroling on the battle field, no paroling of entire bodies of troops after a battle, and no dismissal of large numbers of prisoners, with a general declaration that they are paroled, is permitted or of any value.*

77. A belligerent Government may declare, by a general order, whether it will allow paroling, and on what conditions it will allow it. Such order is communicated to the enemy.*

78. H. R., Art. VIII, par. 2. Escaped prisoners who are retaken before being able to rejoin their own army or before leaving the territory occupied by the army which captured them are liable to disciplinary punishment.

79. The words "disciplinary punishment" are intended to exclude a sentence of death. The usual punishment for attempts to escape consist in curtailment of privileges or closer confinement or detention.*

80. **Not Punishable for Previous Escape.** H. R., Art. VIII, par. 3. Prisoners who, after succeeding in escaping, are again taken prisoners, are not liable to punishment on account of the previous flight.

81. **Can Not Force to Accept Parole.** H. R., Art. XI. A prisoner of war can not be compelled to accept his liberty on parole; similarly the hostile Government is not obliged to accede to the request of the prisoner to be set at liberty on parole.

82. **Violation of Parole.** H. R., Art. XII. Prisoners of war liberated on parole and recaptured bearing arms against the Government to whom they

* G. O. 100, 1863, art. 127. The parole is essentially an individual act. The agreement executed by an officer for his subordinates is valid as to each only after his adherence. Vide G. O. 100, 1863, art. 121.

* G. O. 100, 1863, art. 126. As to paroling of officers interned in neutral territory, vide *infra*, art. 414, Ch. XI.

* G. O. 100, 1863, art. 128.

* G. O. 100, 1863, art. 132. But vide *Les Lois de la Guerre Continentale*, by Jacomet, par. 17, p. 36. "It is understood that the reserve formulated above in regard to the legislation of one of the belligerents will be binding only on the nationals of the belligerent and not the government of the adverse State.

"The belligerent who grants liberty on parole to prisoners of war is not bound to know if the laws of the country authorize them to accept their liberty.

"Their government is bound by these obligations (par. 2, H. R.) even if its laws and regulations prohibit freedom on parole, but it has the right to inflict upon its nationals who may have accepted their freedom on parole authorized punishments for violations of laws in force or else make them return to the enemy.

"If liberty on parole is disavowed by his government his duty is to return himself to captivity, but if the enemy refuse to receive him or to relieve him of his parole, the prisoner is bound to conform to the agreements he has entered into."

* Hague Conference, 1899, pt. 1, p. 86 et seq. •

had pledged their honor, or against the allies of that Government, forfeit their right to be treated as prisoners of war, and can be brought before the courts.⁸¹

BUREAU OF INFORMATION.

83. Function of Prisoners' Information Bureau. H. R., Art. XIV, par. 1. A bureau of information for prisoners of war is instituted on the commencement of hostilities in each of the belligerent States, and, when necessary, in neutral countries which have received belligerents in their territory. It is the function of this office to reply to all inquiries about the prisoners. It receives from the various services concerned full information respecting internments and transfers, releases on parole, exchanges, escapes, admissions into hospitals, deaths, as well as other information necessary to enable it to make out and keep up to date an individual return⁸² for each prisoner of war. The office must state in this return⁸³ the regimental number, name and surname, age, place of origin, rank, unit, wounds, date and place of capture, internment, wounding, and death, as well as any observations of a special character. The individual return shall be sent to the Government of the other belligerent after the conclusion of peace.⁸⁴

84. Valuables on Battle Field. H. R., Art. XIV, par. 2. It is likewise the function of the bureau to receive and collect all objects of personal use, valuables, letters, etc., found on the field of battle or left by prisoners who have been released on parole, or exchanged, or who have escaped, or died in hospitals or ambulances, and to forward them to those concerned.

85. Bureaus Enjoy Free Postage, Etc. H. R. Art. XVI, par 1. Bureaus of information enjoy the privilege of free postage. Letters, money orders, and valuables, as well as parcels by post, intended for prisoners of war, or dispatched by them, shall be exempt from all postal duties in the countries of origin and destination, as well as in the countries they pass through.⁸⁵

85a. Free Import Duties. H. R., Art. XVI, par. 2. Presents and relief in kind for prisoners of war shall be admitted free of all import or other duties, as well as of payments for carriage by the state railways.⁸⁶

86. Censorship. The foregoing rule does not preclude censorship and regulations which the belligerent holding the prisoners may decide to establish with regard to receipt and dispatch of letters and other articles referred to.

PRISONERS' RELIEF SOCIETIES.

87. Duties of. H. R., Art. XV. Relief societies for prisoners of war which are properly constituted in accordance with the laws of their country and with the object of serving as the channel for charitable effort shall receive from the

⁸¹ The courts referred to are the military courts contemplated under first paragraph of H. R. XII. According to the French Military Code, art. 204, sec. 2, "Every prisoner of war who, having broken his parole, is recaptured with arms in hand, is punished with death." *Les Lois Jacomet*, art. 20, p. 37.

⁸² The word "card" is perhaps a better translation than the word "return."

⁸³ See G. C., art. 4. It appears that some regulations should be formulated by the United States Government for carrying into effect this article, as also article 4 of the Geneva convention, in view of the requirement to keep each other informed even during the continuance of the war with information about the sick and wounded prisoners.

⁸⁴ Vide note 33, par. 83, *supra*. This article will require postal conventions and additional legislation for full compliance.

⁸⁵ No special legislation has been passed by Congress, but regulations have been formulated by the Treasury Department for giving effect to this treaty stipulation.

belligerents, for themselves and their duly accredited agents, every facility for the efficient performance of their humane task within the bounds imposed by military necessities and administrative regulations. For the purpose of distributing relief, agents of these societies may be admitted to the places of internment, as also to the halting place of repatriated prisoners, if furnished with a personal permit by the military authorities and on giving an undertaking in writing to comply with all measures of order and police which the latter may issue.

PAY OF OFFICERS.—RELIGIOUS PRIVILEGES.—WILLS.

88. Pay of Officers. H. R., Art. XVII. Officers taken prisoners shall receive the same rate of pay as officers of corresponding rank in the country where they are detained, the amount to be ultimately refunded by their own Government.³⁷

89. Religious Freedom. H. R., Art. XVIII. Prisoners of war shall enjoy complete liberty in the exercise of their religion, including attendance at the services of the church to which they may belong, on the sole condition that they comply with the measures of order and police issued by the military authorities.³⁷

90. Prisoners' Wills. H. R., Art. XIX. The wills of prisoners of war are received or drawn up in the same way as for soldiers of the national army.

The same rules shall be observed regarding death certificates as well as for the burial of prisoners of war, due regard being paid to their grade and rank.³⁸

EXCHANGES.

91. Exchange Can Not Be Demanded. The exchange of prisoners is an act of convenience to both belligerents. If no general cartel has been concluded, it can not be demanded by either of them. No belligerent is obliged to exchange prisoners of war.³⁹

92. When Exchange Made. No exchange of prisoners shall be made except after complete capture, and after an accurate account of them and a list of the captured officers have been taken.⁴⁰

93. Exchange of Prisoners. Exchanges of prisoners take place, number for number, rank for rank, disability for disability, with added condition for added condition—such, for instance, as not to serve for a certain period.⁴¹

94. Substitutions. In exchanging prisoners of war such numbers of persons of inferior rank may be substituted as an equivalent for one of superior rank as may be agreed upon by cartel, which requires the sanction of the Government or of the commander of the army in the field.⁴²

³⁷ But see G. C., Art. 13, par. 142, which prescribes that the medical personnel shall receive the "same pay and allowances" as persons of corresponding rank in the enemy's army.

³⁸ The simplest method for carrying out this obligation is to allow ministers of their religion to have access to the prisoners at the usual times of service. Chaplains attached to armies, so long as they confine themselves to their spiritual duties, can not be made prisoners of war, but they should be permitted to accompany prisoners of war into captivity if they desire to do so.

³⁹ Vide H. R. 14, supra, and G. C., art. 4. infra.

⁴⁰ G. O. 100, 1863, art. 109.

⁴¹ G. O. 100, 1863, art. 110.

⁴² G. O. 100, 1863, art. 105.

⁴³ G. O. 100, 1863, art. 106.

95. Surplus. The surplus number of prisoners of war remaining after an exchange has taken place is sometimes released either for the payment of a stipulated sum of money or, in urgent cases, of provisions, clothing, or other necessities. Such arrangement, however, requires the sanction of the highest authority.⁴³

96. Persons Not Entitled to Demand Treatment of Prisoners of War. Spies, war traitors, and war rebels are not exchanged according to the common law of war. The exchange of such persons would require a special cartel, authorized by the Government, or, at a great distance from it, by the chief commander of the army in the field.⁴⁴

97. In modern wars, exchange of prisoners has not been common, but the foregoing rules state accurately the practice of nations in this regard.

98. Repatriation. H. R., Art. XX. After the conclusion of peace, the repatriation of prisoners of war shall be carried out as quickly as possible.

99. When Repatriation Delayed. The immediate repatriation of prisoners of war is not always possible, due to the following causes:

1. Insufficiency of transport;
2. Obvious risk to captor State in restoring to the vanquished power troops of which it has been deprived; and
3. Some prisoners of war may be undergoing punishment for offenses committed during their imprisonment.

APPENDIX A. CORRESPONDENT'S PASS.

War Department,
Washington,, 191...

The Bearer, Mr., whose photograph and signature are hereto attached, is hereby accredited to the Commanding General,
....., United States Army, as news correspondent of the
with permission to accompany said troops, subject to the Regulations Govern-
ing Correspondents with Troops in the Field and the orders of the commander
of said troops.

This pass entitles the correspondent to passage on military railways and, when accommodations are available, on Army transports, with the privileges of a commissioned officer, including purchase of subsistence, forage and in-
dispensable supplies when they can be spared.

LINDLEY M. GARRISON,
Secretary of War.

Official: ,

.....,

The Adjutant General.

⁴⁴ G. O. 100, 1863, art. 103.

CHAPTER V.

THE SICK, WOUNDED, AND DEAD.

100. Regulations Concerning, Where Found. H. R., Art. XXI. The duties of belligerents with regard to the wounded and sick are governed by the Geneva Convention (of 1906).¹

101. Duties of Neutral Powers. The duties of neutral powers as regards wounded and sick who are permitted to enter their territories are dealt with in the "Convention concerning the rights and duties of neutral powers and persons" at The Hague in 1907.²

THE SICK AND WOUNDED.

102. Care of Obligatory. G. C., Art. 1, par. 1. Officers, soldiers and other persons officially attached to armies, who are sick or wounded, shall be respected and cared for, without distinction of nationality, by the belligerent in whose power they are.

103. What Persons Included. This provision extends to all belligerents, as previously defined, who may be described as all those persons who may demand the treatment and privileges accorded to prisoners of war.³

104. Inhabitants Not Included. It does not impose obligations to aid inhabitants or other persons not officially attached to armies who may be wounded by chance or accident as a result of the hostilities in progress. But the dictates of humanity demand that inhabitants so wounded be aided if the other inhabitants are without facilities to give them proper care, and they can be so aided without neglecting the sick and wounded of either belligerent.⁴

105. Sick and Wounded Abandoned. G. C., art. 1, par. 2. A belligerent, however, when compelled to leave his sick or⁵ wounded in the hands of his adversary, shall leave with them, so far as military conditions permit, a portion of the personnel and matériel of his sanitary service to assist in caring for them:

106. Determination of the Exigency. Necessarily the commander of the army, who is compelled by the military situation to abandon his wounded, must determine what the precise exigencies of the situation permit him to do with regard to leaving his medical personnel and matériel behind for the care of his wounded and sick; but it is clearly intended by this article that he shall relieve the victor left in possession of the battle field, as far as practicable, of

¹ The convention for the amelioration of the condition of the sick and wounded of armies in the field, July 6, 1906, became operative six months after signature (art. 30). When duly ratified it replaced the convention at Geneva of Aug. 22, 1864, between the contracting states. The latter convention remains operative between those signatories who did not ratify the subsequent convention of 1906 (art. 31). Other powers were authorized to subsequently ratify the convention of 1906, and it became operative as to them within one year from date of ratification in case no one of the parties filed an objection thereto (art. 32). Any party to this convention can denounce the same by written notice. Such denunciation becomes operative one year after receipt of such written notice (art. 33).

² Convention V of The Hague relates to "The rights and duties of neutral persons in warfare on land." Convention XIII relates to neutral rights and duties in maritime war.

³ Vide ante, Ch. III, pars. 42 and Ch. IV.

⁴ Opp., Land Warfare, art. 177 and note.

⁵ The omission of the words "sick or" in the official transmission is clearly a typographical error. Vide original French and translation.

the additional burdens involved in the care of the enemy sick and wounded as well as his own.⁶

107. Prisoners of War. G. C., art. 2, par. 1. Subject to the care that must be taken of them under the preceding article, the sick and wounded of an army who fall into the power of the other belligerents become prisoners of war, and the general rules of international law in respect to prisoners become applicable to them.⁷

108. Agreements, Exceptions, and Mitigations. G. C., art. 2, par. 2. The belligerents remain free, however, to mutually agree upon such clauses, by way of exception or favor, in relation to the wounded or sick as they may deem proper. They shall especially have authority to agree—

(a) To mutually return the sick and wounded left on the field of battle after an engagement.

(b) To send back to their own country the sick and wounded who have recovered, or who are in a condition to be transported and whom they do not desire to retain as prisoners.

(c) To send the sick and wounded of the enemy to a neutral State, with the consent of the latter and on condition that it shall charge itself with their internment until the close of hostilities.

109. Suggestions Merely. These must be regarded purely as suggestions to commanders as proper relaxations of the rigor of the rules applicable to the wounded or sick, since commanders are "free to agree" as to the foregoing, as well as to many other questions not suggested by these rules, regardless of this article of the convention.⁸

110. Search of Battle Field. G. C., art. 3, par. 1. After every engagement the belligerent who remain in possession of the field of battle shall take measures to search for the wounded and to protect the wounded and dead from robbery and ill-treatment.

111. Police of Battle Field. The foregoing duty of policing the field of battle imposed upon the victor after the fight contemplates that he shall take every means in his power to comply therewith.⁹

112. Punishment of Violations of Article. The obligations imposed upon commanders as to protection of the wounded and sick from pillage and maltreatment contemplate that all guilty persons, whether subject to military law or civilians, shall be severely punished for acts of pillage and maltreatment of the wounded and dead. No statute has been passed by Congress specifically applicable to the punishment of violators of this article since the convention was agreed to and as contemplated by article 28 of the same convention. In the absence of such legislation, however, offenders, both military and civilian, will be proceeded against as marauders by commanding officers in the field.¹⁰

113. Rolls to be Sent to Enemy. G. C., art. 4, par. 1. As soon as possible each belligerent shall forward to the authorities of their country or army * * * a list of names of the sick and wounded taken in charge by him.¹¹

114. Internments, Changes, and Admissions Must be Mutually Noticed. G. C., art. 4, par. 2. Belligerents will keep each other mutually advised of internments and transfers, together with admissions to hospitals and deaths which occur among the sick and wounded in their hands.

115. The foregoing provisions relate obviously to the wounded and sick of

⁶ Holland, War on Land, p. 28, par. 42.

⁷ Vide Hague Con. V, Art. XIII post, Chap. XI, pars. 417-418 and 422.

⁸ Holland, War on Land, p. 28, art. 43.

⁹ For regulations governing this subject see F. S. R., 1914, pars. 231, 349; vide also, Ariga, pp. 153-158, Takahashi, pp. 152, 154.

¹⁰ Vide Chap. X, pars. 171, 374, and notes. Curry v. Collins, 37 Mo., 324, 328.

¹¹ Vide post, par. 166.

the enemy, since the duties referred to with regard to wounded, sick, and dead of his own army will be regulated by the internal laws of the belligerent. The proper channel of communication of such information to the enemy is through the Prisoners' Bureau of Information.

116. Appeals to Inhabitants in Behalf of Wounded, etc. G. C., art. 5. Military authority may make an appeal to the charitable zeal of the inhabitants to receive and, under its supervision, to care for the sick and wounded of the armies, granting to persons responding to such appeals special protection and certain immunities.¹¹

117. Modification of Convention of 1864. The corresponding article of the Geneva convention of 1864 is so modified in this that commanders in the field are relieved of the suggested obligation of informing the inhabitants of the appeal addressed to their humanity. It also withdraws the privileges contained in the convention of 1864, and very properly places the entire subject under military supervision. The collection and removal of the wounded are best performed under military supervision, even when the labor must be requisitioned, because it is only under such supervision that it can be properly regulated and controlled.¹²

SANITARY FORMATIONS AND ESTABLISHMENTS.

118. Privileges of the Sanitary Formations. G. C., art. 6. Mobile sanitary formations (i.e., those which are intended to accompany armies in the field) and the fixed establishments belonging to the sanitary service shall be protected and respected by belligerents.

119. What Are Mobile Sanitary Formations. By mobile sanitary formations must be understood all organizations which follow the troops on the field of battle. In our service is included the following: (1) Regimental equipment; (2) Ambulance companies; (3) Field hospitals; (4) The reserve medical supply; (5) The sanitary column, including (a) Ambulance column, (b) Evacuation hospital; (6) Hospital trains; (7) Hospital boats; (8) Red Cross transport column.¹³

120. Fixed Establishments. The term "fixed establishments" is clearly intended to cover stationary or general hospitals, whether actually movable or located on the line of communications, or at a base, and in our service would include: (1) The base medical supply depot; (2) Base hospitals; (3) Casual camps; (4) Convalescent camps; and (5) Red Cross hospital columns.¹⁴

121. What Meant by Respect and Protection. By "respect and protection"

¹¹ Art. 5, Gen. Con., 1864. "Inhabitants of the country who may bring help to the wounded shall be respected and shall remain free. The generals of the belligerent powers shall make it their duty to inform the inhabitants of the appeal addressed to their humanity and of the neutrality which will be the consequence of it. Any wounded man entertained and taken care of in a house shall be considered as a protection thereto. Any inhabitant who shall have received wounded men into his house shall be exempted from the quartering of troops, as well as from a part of the contributions of war which may be imposed."

¹² The modification of the article of 1864 was due to the fact that, in the absence of military supervision, opportunities were afforded for pillage and maltreatment of the dead and wounded. It was also found that the effect of the article was not to ameliorate the condition of the wounded, but to encourage the inhabitants to move wounded men who should not be removed and to prevent them from receiving proper medical treatment when most needed. Vide Opp., Land Warfare, pars. 182-183.

¹³ Vide Medical Manual, pars. 601, 626, 651, 681, 688, 697, 726.

¹⁴ Vide Medical Manual, pars. 713, 720-722, also Cir. 8, S. G. O., 1912.

it is intended that they shall not be fired upon and shall be protected in the discharge of their duties, and this is applicable to both classes, irrespective of the fact of the actual presence therein of the sick or wounded. They are protected from deliberate attack.¹⁶

122. Must Not Commit Harmful Acts. G. C., art. 7. The protection due to sanitary formations and establishments ceases if they are used to commit acts injurious to the enemy.

123. Cessation of Immunity for Harmful Acts. By cessation of protection is understood that these units may be fired on and the personnel taken prisoners and in a proper case reprisals may be resorted to. As examples of harmful acts may be cited—taking part in the campaign, sheltering spies of combatants, placing these units directly in the line of fire of the enemy, or in a strategic position, where they restrict military operations or conceal guns, or making use of sanitary trains to transport effectives, etc. Since sanitary formations should be placed in concealed points where protected from the enemy's fire, the placing of such units as indicated may excuse their being fired upon and the detention of their personnel, but before firing upon them it is best, if possible, to direct them to withdraw.¹⁷

124. Acts Which Will Not Forfeit Protection. G. C., art. 8. A sanitary formation or establishment shall not be deprived of the protection accorded by article 6 by the fact:

1. That the personnel of a formation or establishment is armed and uses its arms in self-defense or in defense of its sick and wounded.

125. What Meant by Self-Defense. Although the sanitary personnel may carry arms for self-defense, they should not resist with such arms their being captured by the enemy. These arms are for their personal defense and for protection of the sick and wounded under their charge against marauders and the like.¹⁸

126. Pickets and Sentinels. G. C., art. 8, par. 2. That in the absence of armed hospital attendants, the formation is guarded by an armed detachment or by sentinels acting under competent orders.

127. Guard for Medical Unit Protected. Due to the fact that in some armies trained soldiers are used as medical orderlies, it is expressly provided that a picket or sentinel taken from a combatant arm may be used as a guard to a sanitary formation. Such guard, when furnished with authority in due form, is entitled to the same privileges as those of the medical personnel while so employed.

¹⁶ Vide post, G. C., art. 9, par. 130. Land Warfare, Opp., par. 184, and note 1.

¹⁷ In the French Conventions Internationales concernant La Guerre sur Terre, p. 65, art. 7, note, it is stated, in explanation of what is meant by "protection ceases," that "in such case it is permitted to fire upon these formations and make them prisoners. Under certain circumstances where there is a manifest abuse of the immunity reprisals may be resorted to." And in explanation of the injurious acts referred to says: "Whether in a direct manner, by taking part in the combat, or indirectly, for example, when the sanitary trains are used for the transport of effective combatants," etc. "A distinction must be drawn between an act intentionally injurious and where, by its presence only, a sanitary establishment interferes with a military operation, or again, where the sanitary personnel is found in the midst of the enemy troops, could give information of the dispositions made. In such case the respect due to the personnel ceases to be obligatory, but only to the extent demanded by the conduct and security of the operations. In other words, the sanitary service can be ordered to retire, and, if it is necessary, this personnel can be forcibly detained." Vide, also, Ariga, pp. 207 et seq.

¹⁸ Vide Land Warfare, Opp., p. 45, par. 188.

128. Written Order Indispensable. It is indispensable, however, that such picket or sentinel be provided with a written order that he can show to the adversary.²⁰ Such pickets or guards will not be made prisoners of war.²¹

129. Weapons and Cartridges. G. C., art. 8, par. 3. That arms or cartridges, taken from the wounded and not yet turned over to the proper authorities, are found in the formation or establishment.²²

PERSONNEL.

130. Privileges of Personnel. G. C., art. 9. The personnel charged exclusively with the removal, transportation, and treatment of the sick and wounded, as well as with the administration of sanitary formations and establishments, and the chaplains attached to armies, shall be respected and protected under all circumstances. If they fall into the hands of the enemy they shall not be considered as prisoners of war.

These provisions apply to the guards of sanitary formations and establishments in the case provided for in section 2 of article 8.

131. Personnel Contemplated. The personnel here intended by the words "charged exclusively" is clearly the officers and men of the army service corps, including drivers of transports attached to the medical service for the entire campaign, so that musicians and other soldiers, temporarily employed as litter bearers, are not placed under the protection of the convention. These latter should be supplied with a special brassard or certificate.

132. Protection Afforded. The medical personnel above referred to, chaplains, and guards, are protected from deliberate attack. There is no just cause for complaint, as a violation of the convention, if they are accidentally killed or wounded in the execution of their duties.²³

133. Voluntary Aid Societies. G. C., art. 10. The personnel of voluntary aid societies, duly recognized and authorized by their own Governments, who are employed in the sanitary formations and establishments of armies, are assimilated to the personnel contemplated in the preceding article, upon condition that the said personnel shall be subject to military laws and regulations.

Each State shall make known to the other, either in time of peace or at the opening or during the progress of hostilities, and in any case before actual employment, the names of the societies which it has authorized to render assistance, under its responsibility, in the official sanitary service of its armies.²⁴

²⁰ The original French of the article is "d'un mandat regulier," which contemplates an order or written authority duly authenticated by proper authority. Nothing is said about such guard being obliged to wear the brassard.

²¹ Vide, also, G. C., art. 9, par. 2, post par. 130.

²² These arms and ammunition should be turned in as soon as practicable, and, in any event, are subject to confiscation.

²³ Land Warfare, Opp., art. 184, and note 1. "It [medical personnel] can not, naturally, be made immune from the effects of shell and bullet fired at ranges at which badges and uniform are not distinguishable."

²⁴ The American National Red Cross, duly incorporated under the laws of the United States, Jan. 5, 1905 (vide 33 Stat., 600, and amendment, 36 Stat., 604), is, under the proclamation of the President, published in G. O. 170, W. D., Dec. 27, 1911, the only volunteer society now authorized by this Government to render aid to its land and naval forces in time of war, and any other society desiring to render similar assistance can do so only through the American National Red Cross.

Such portion of the society as may render aid to the land and naval forces will constitute a part of the sanitary services thereof.

The War and Navy Departments are duly authorized to communicate directly with the president of the society, arranging for and specifying the character

134. The National Red Cross. The National Red Cross of America is the only volunteer aid society that can be employed by the land and naval forces of the United States in future wars to aid the medical personnel, and their employment must be under the responsibility of the Government as part of the medical personnel and establishments of its Army, and they must be assigned to duties in localities designated by competent military authority.

135. Conditions Prescribed for Employment. The personnel and establishments of voluntary aid societies, while so employed, are entitled to the same privileges and protection as that to which the Army Medical Service is entitled under certain conditions, which are:

(a) That the societies are duly recognized and authorized by their Government.²⁴

(b) That the names of the societies to be employed must be notified to the enemy before any of the personnel is actually employed.²⁵

(c) That the personnel is subject to military law.²⁶

136. Reasons for Conditions Imposed. In past wars so many irregularities and even acts of hostility have been committed by members of volunteer aid societies that the conditions above mentioned have been found necessary. Commanders, before permitting their employment, should therefore assure themselves that these conditions have been strictly complied with.²⁷

137. Volunteer Societies of Neutrals. G. C., art. 11. A recognized society of a neutral State can only lend the services of its sanitary personnel and formations to a belligerent with the prior consent of its own Government and the authority of such belligerent. The belligerent who has accepted such assistance is required to notify the enemy before making any use thereof.

138. Conditions of Employment. It is necessary to secure the consent of the of services required, and designating where the personnel and matériel will be assembled.

It is prescribed that any member of the American National Red Cross when on duty with the land and naval forces of the United States, pursuant to a proper call, will be subject to the military laws and regulations as provided in article 10 of the International Red Cross Convention of 1906 (Geneva), and will be provided with the necessary brassard and certificate of identity.

Except in cases of great emergency, the personnel of the American National Red Cross will not be assigned to duty at the front, but will be confined to hospitals in the home country, at the base of operations, on hospital ships, and along lines of communication of the land and naval forces of the United States.

²⁴ In this country the society is recognized by the statutes (vide note 23, par. 133). The personnel must be provided with the emblem (brassard) and also with a certificate as prescribed. The certificate should give a reasonably accurate description of the person employed, i.e., the age, color, sex, race, height, weight, color of eyes, hair, and complexion. In addition should be added the finger print of the index finger of the right hand with distinguishing marks. The certificate should also contain the number of the brassard issued to each person. For form of certificate, vide Appendix A, this chapter. This certificate should always be on the person and might properly be inclosed in a light metallic case stamped with the same number as the certificate, which would serve as an identification tag.

The employment of a distinctive uniform consisting of a blouse and shirt of blue and a cap of designated design would prevent confusion and injury on the part of the enemy.

²⁵ This will be done by the Government at the outbreak of hostilities, of which notice will be had by commanders.

²⁶ Vide statute cited in note 23, par. 133.

²⁷ Land Warfare, Opp., p. 46, par. 192.

neutral Government as well as that of the belligerent into whose service it proposes to enter, but it is not necessary to obtain the consent of the other belligerent who is notified of the fact of employment.²⁸ Such employment in this country must be accomplished through the American National Red Cross.²⁹

CAPTURED MEDICAL PERSONNEL.

139. Privileges and Duties. G. C., art. 12. Persons described in articles 9, 10, and 11 will continue in the exercise of their functions, under the direction of the enemy, after they have fallen into his power.

When their assistance is no longer indispensable they will be sent back to their army or country, within such period and by such route as may accord with military necessity. They will carry with them such effects, instruments, arms, and horses as are their private property.

140. Interpretation of These Obligations. In interpreting the foregoing obligations two things, among others, must be carefully considered: (1) That the sanitary formations must not be placed in position to take back useful information to their army, and (2) that these rules are not meant to justify depriving the enemy of the services of his medical personnel for an indefinite period of time. The former clearly precludes the absolute freedom of movement of this medical personnel in the theater of war, even though claiming to be engaged in collecting, aiding, or removing the wounded and sick. Medical personnel of the enemy persisting in approaching places after being ordered to halt may be fired on as an extreme measure. There is nothing in the Geneva convention conferring immunity from search of its medical personnel and units, and they may be stopped by the same means as a ship.

141. Detention and Route of Return. The medical personnel of a force which capitulates may be detained to attend the sick and wounded included in the surrender and sent back gradually. It is not left to this captured personnel to choose its own route, or the time of its return, both of which are determined by the captor in conformity to military exigencies.³⁰

142. Pay and Allowances. G. C., art. 13. While they remain in his power, the enemy will secure to the personnel mentioned in article 9 the same pay and allowances to which persons of the same grade in his own army are entitled.

143. Personnel of Aid Societies Not Included. The foregoing article has no application to the personnel of voluntary aid societies, since it is limited exclusively to those of article 9.

MEDICAL MATÉRIEL.

144. Mobile Formations. G. C., art. 14. If mobile sanitary formations fall into the power of the enemy, they shall retain their matériel, including the teams, whatever may be the means of transportation, and the conducting personnel. Competent military authority, however, shall have the right to employ it in caring for the sick and wounded. The restitution of the matériel shall take place in accordance with the conditions prescribed for the sanitary personnel, and, as far as possible, at the same time.

145. Limit on Obligation. The obligation to return the teams of mobile sanitary formations is applicable to teams secured by requisition, but there is no

²⁸ Vide Geneva Conference Actes, p. 115.

²⁹ Vide G. O. 170, Dec. 27, 1911, W. D., par. 2, proclamation of President.

³⁰ Under the convention of 1864 medical personnel (arts. 3 and 4) might and did demand to be sent back to the outposts of their own army. The manifest impracticability of this rule and forced noncompliance at times caused the modification adopted in 1906. Vide Opp., Land Warfare, p. 46, par. 196 and note; Ariga, pp. 197, 206, 207, where instances are set forth.

obligation to provide teams to facilitate the return of the matériel of captured mobile sanitary formations should they have lost all or part of their own animals by casualties."

146. Fixed Establishments. G. C., art. 15. Buildings and matériel pertaining to fixed establishments shall remain subject to the laws of war, but can not be diverted from their use so long as they are necessary for the sick and wounded. Commanders of troops engaged in operations, however, may use them, in case of important military necessity, if, before such use, the sick and wounded who are in them have been provided for."

147. Disposition of Buildings and Material. The buildings of fixed medical establishments, hospitals, and depots can not, from their nature, be sent back to the enemy. It is contemplated that they shall be used for medical purposes so long as necessary for the wounded and sick, except in cases of urgent military necessity; but if other arrangements are made for the welfare of the wounded and sick found in them, there is nothing to prohibit the fortification and use of such buildings by the captor. The matériel in such hospital or other fixed sanitary establishment follows the fate of the buildings and becomes the property of the captor.

148. Matériel of Volunteer Aid Societies. G. C., art. 16. The matériel of aid societies admitted to the benefits of this convention, in conformity to the conditions therein established, is regarded as private property and, as such, will be respected under all circumstances, save that it is subject to the recognized right of requisition by belligerents in conformity to the laws and usages of war.

149. Uncertainty as to the Rule. There is a marked distinction as to treatment accorded to matériel of mobile sanitary formations, of fixed establishments, and of convoys for the evacuation of the sick and wounded; and since volunteer aid societies employ matériel in the same units, it is uncertain what treatment should be accorded it when found in fixed establishments and with convoys. It is believed that this matériel should be treated under all circumstances as private property; but, wherever found, it is subject to requisition."

" Ariga, pp. 206, 207, relates that after the Battle of Mukden the Japanese provided sufficient transport for 60 Russian personnel to return direct to their army, but sent the remaining 710 persons through Chinese territory. Vide also Opp., *Land Warfare*, par. 204 and note. Every assistance practicable should be rendered for the return in such cases on account of the sick and wounded.

" " This article applies only to military hospitals. In conformity with art. 56, R. G. T., there is no authority for taking possession of hospitals which are utilized in time of peace for civilian sick. These hospitals must be maintained for their ordinary purposes. Although they can not be diverted from their primitive object, they can, however, be used by the military under requisition." Vide *Conventions Internationales concernant La Guerre sur Terre*, p. 70. Also " *Les Lois*," etc., by Jacomet, p. 51, art. 45.

" *Land Warfare*, Opp. p. 48, par. 209 and note e. " The difficulties of applying this clause will be great, for in some armies, notably the Austro-Hungarian, the Red Cross societies provide a considerable portion of the transport and other matériel of the regular field medical units. Although not so stated in the convention, the medical matériel of voluntary aid societies should only be requisitioned for the needs of the Army medical service and not for those of the fighting units."

Mr. Holland, in his *War on Land*, p. 34, par. 57, says: " The matériel of aid societies, when employed in mobile units, would of course be restored in pursuance of Art. XIV, G. C. The treatment which it should receive when employed in fixed military establishments is not so obvious. Should it share the fate of such establishments under Art. XV, G. C.? This might be a discouragement to voluntary aid. Or should it be exempt from confiscation? The latter

150. Convoys of Evacuation. G. C., art. 17. Convoys of evacuation shall be treated as mobile sanitary formations subject to the following special provisions:

1. A belligerent intercepting a convoy may, if required by military necessity, break up such convoy, charging himself with the care of the sick and wounded whom it contains.

2. In this case the obligation to return the sanitary personnel, as provided for in article 12, shall be extended to include the entire military personnel employed, under competent orders, in the transportation and protection of the convoy.

The obligation to return the sanitary matériel, as provided for in article 14, shall apply to railway trains and vessels intended for interior navigation which have been especially equipped for evacuation purposes, as well as to the ordinary vehicles, trains, and vessels which belong to the sanitary service.

Military vehicles, with their teams, other than those belonging to the sanitary service, may be captured.

The civil personnel and the various means of transportation obtained by requisition, including railway matériel and vessels utilized for convoys, are subject to the general rules of international law.⁴⁴

151. Power of Belligerent Over Convoy. The belligerent can not only break up the convoy but can also detain it for a definite period of time, confine it to a certain route, or designate the place where it is to report. This was not authorized under the G. C. of 1864.⁴⁵

CONVOY OF EVACUATION.

152. Means of Conveyance. Conveyance may take place by road, by railway, or by water, but to enjoy the benefit of this article must not be combined with or used for the transportation of troops, of supplies, or employed in any other connection with any military operation.

153. The Personnel. The personnel of the convoy may be—

1. Medical, such as those mentioned in articles 9, 10, and 11, which should be restored in accordance with article 12; or,

2. Railway, loaned for transport purposes, which should be restored under article 14; or,

3. Military guards, which should be restored under article 9; or,

4. Civil requisitioned, which should be released, if not again requisitioned by the captor, article 14.

154. The Matériel. The matériel may belong to—

1. The regular medical service of the enemy, or to aid societies recognized by him, in either of which cases it should be restored under article 14; or,

alternative is accepted in this article, although belligerents may thus be tempted to protect matériel properly belonging to their medical service, by assigning it over to volunteer societies."

The French, in *La Guerre sur Terre*, p. 71, says: "Nothing has been definitely decided as to the juridical situation of fixed establishments and formations of aid societies. By analogy to Arts. XV and XVI, G. C., and to Art. 56, R. G. T., it must be respected in the same manner as private property. Possession can be taken of it, but always on condition of not deflecting it from its primitive purposes as soon as it may be needed."

Vide G. C., Arts. 14, 15, and 17, pars. 144, 146, 147, and Appendix 9.

⁴⁴There is no signal, or generally recognized method, for stopping these transports, but the practice is to fire across their front as is done in stopping naval vessels. Vide ante par. 140.

⁴⁵*La Guerre sur Terre*, p. 72.

2. May consist of things requisitioned; that is, carriages, boats, etc., which must be restored in accordance with article 14; or,

3. May consist of carriages, with their teams, borrowed from military units, which are then subject to capture.²⁷

THE DISTINCTIVE EMBLEM.

155. The Red Cross. G. C., art. 18. Out of respect to Switzerland the heraldic emblem of the red cross on a white ground, formed by the reversal of the Federal colors, is continued as the emblem and distinctive sign of the sanitary service of armies.²⁸

156. Where Employed. G. C., art. 19. This emblem appears on flags and brassards as well as upon all matériel appertaining to the sanitary service, with the permission of the competent military authority.

157. The Brassard. G. C., art. 20. The personnel protected in virtue of the first paragraph of article 9, and articles 10 and 11, will wear attached to the left arm a brassard bearing a red cross on a white ground, which will be issued and stamped by competent military authority, and accompanied by a certificate of identity in the case of persons attached to the sanitary service of armies who do not have military uniform.²⁹

158. Brassard to be Fixed. The convention of 1864 with regard to the use of the brassard differs from that of 1906 in that the latter requires that it shall be fixed to the arm and shall be permanently worn.

159. Precautions in Issue of Brassards. For the protection of persons to whom brassards are issued and to prevent their improper use by spies and others, as well as to conform to the requirements of the above article, a register should be kept showing the names and description of the persons to whom brassards have been issued. The brassard should be stamped with a special mark or number by the War Department. In the case of persons not wearing a military uniform a certificate must be issued containing the name, description, and number of the person to whom issued.³⁰

The Medical Department is charged with the duty of providing, stamping, and delivering brassards to all persons entitled to neutrality (protection) by virtue of the first paragraph of article 9 and articles 10 and 11 of the Geneva Convention (1906), and of providing and delivering necessary certificates of identity to persons attached to the sanitary service who do not have a military uniform.³¹

160. The Distinctive Flag. G. C., art. 21. The distinctive flag of the convention can only be displayed over the sanitary formations and establishments which the convention provides shall be respected, and with the consent of the military authorities. It shall be accompanied by the national flag of the belligerent to whose service the formation or establishment is attached.

Sanitary formations which have fallen into the power of the enemy, however,

²⁷ Holland, War on Land, p. 35, art. 58.

²⁸ Turkey acceded to the Geneva Convention of 1906 on August 24, 1907, making the reservation, however, "that its armies will use the emblem of the red crescent for the protection of its ambulances"; adding: "It is nevertheless well understood that the Imperial Government will scrupulously respect the inviolability of the Red Cross flag."

Persia adopted in lieu of the red cross a red lion combined with a red sun. Vide Spaight, War Rights on Land, p. 456. Opp., Land Warfare, par. 210 and note. Holland, War on Land, par. 59, p. 36. Les Lois, Jacomet, art. 48.

²⁹ For dimensions of brassards, see General Orders, No. 84, War Department, May 6, 1906.

³⁰ For form of this certificate, see Appendix A, this chapter.

³¹ G. O., No. 27, W. D., 1909, par. 1.

shall fly no other flag than that of the Red Cross so long as they continue in that situation."

161. Flags Designated. "The flag of the Geneva Convention, to be used in connection with the national flag in time of war with a signatory of the convention, will be as follows:

"For general hospitals, white bunting, 9 by 5 feet, with a red cross of bunting 4 feet high and 4 feet wide in the center; arms of cross to be 16 inches wide.

"For field hospitals, white bunting, 6 by 4 feet, with a red cross of bunting 3 feet high and 3 feet wide in the center; arms of cross to be 12 inches wide.

"For ambulances and for guidons to mark the way to field hospitals, white bunting, 28 by 16 inches, with a red cross of bunting 12 inches high and 12 inches wide in the center; arms of cross to be 4 inches wide."

162. Military Hospital Ships. Convention X, Hague, 1907, Article V. Military hospital ships shall be distinguished by being painted white outside with a horizontal band of green about a meter and a half in breadth.

The ships mentioned in articles 2 and 3 (i.e., hospital ships, equipped wholly or in part at the expense of private individuals or officially recognized relief societies) shall be distinguished by being painted white outside, with a horizontal band of red about a meter and a half in breadth.

The boats of the ships above mentioned, as also small craft which may be used for hospital work, shall be distinguished by similar painting.

All hospital ships shall make themselves known by hoisting, with their national flag, the white flag with a red cross provided by the Geneva Convention, and, further, if they belong to a neutral State, by flying at the mainmast the national flag of the belligerent under whose control they are placed.

Hospital ships which, in the terms of article 4, are detained by the enemy, must haul down the national flag of the belligerent to whom they belong.

The ships and boats above mentioned which wish to insure by night the freedom from interference to which they are entitled must, subject to the assent of the belligerent they are accompanying, take the necessary measures to render their special painting sufficiently plain.

163. Sanitary Formations of Neutral Countries. G. C., art. 22. The sanitary formations of neutral countries which, under the conditions set forth in article 11, have been authorized to render their services, shall fly, with the flag of the convention, the national flag of the belligerent to which they are attached. The provisions of the second paragraph of the preceding article are applicable to them.

164. Protection and Use of the Flag. G. C., art. 23. The emblem of the red cross on a white ground and the words "Red Cross" or "Geneva Cross" may only be used, whether in time of peace or war, to protect or designate sanitary formations and establishments, the personnel and matériel protected by the convention."

"No regulation has been prescribed for flying this flag with the national flag.

"A. R., 1913, par. 225.

At night every sanitary formation, fixed or movable, is designated by means of lights (lanterns). The lights used in this country are green. F. S. R., 1914, Appendix 5.

There seems to be no fixed rule among nations in regard to this designation at night. In France they are designated by two lights—red and white—the one above the other. In Great Britain by two white lights. In some other countries by one or more red lights.

"Since the "Geneva" or "Red Cross" is the distinctive mark of the medical service of armies, some additional mark, such as the name of the society, should be added to it in order to secure proper protection for the matériel of such volunteer aid societies. The "Geneva" or "Red Cross" alone is not sufficient to distinguish such matériel from that of the regular medical service.

THE DEAD.

165. Protection of the Dead. G. C., art. 8. After each engagement the commander in possession of the field shall take measures * * * to insure protection against pillage and maltreatment * * * for the dead.

He will see that a careful examination is made of the bodies of the dead prior to their interment or incineration."

166. Disposition of Marks, Tokens, Letters of the Dead. G. C., art. 4. As soon as possible each belligerent shall forward to the authorities of their country or army the marks or military papers of identification found upon the bodies of the dead. They (the belligerents) will collect all objects of personal use, valuables, letters, etc., which are found upon the field of battle, or have been left by the sick or wounded who have died in sanitary formations or other establishments, for transmission to persons in interest through the authorities of their own country.

167. Application and Carrying Out of the Convention. G. C., art. 24. The provisions of the present convention are obligatory only on the contracting powers, in case of war between two or more of them. The said provisions shall cease to be obligatory if one of the belligerent powers should not be signatory to the convention."

168. Commanders to Carry Out Details and Provide for Unforeseen Cases. G. C., art. 25. It shall be the duty of the commanders in chief of the belligerent armies to provide for the details of execution of the foregoing articles, as well as for unforeseen cases, in accordance with the instructions of their respective Governments, and conformably to the general principles of this convention.

169. Must Instruct Troops and Notify Inhabitants. G. C., art. 26. The signatory Governments shall take the necessary steps to acquaint their troops, and particularly the protected personnel, with the provisions of this convention and to make them known to the people at large.

170. Prevention of Abuses and Infractions. G. C., art. 27. Signatory powers whose legislation may not now be adequate engage to take or recommend to their legislatures such measures as may be necessary to prevent the use, by private persons or by societies other than those upon which this convention confers the right thereto, of the emblem or name of the Red Cross or Geneva Cross, particularly for commercial purposes by means of trade-marks or commercial labels.

The prohibition of the use of the emblem or name in question shall take effect from the time set in each act of legislation, and at the latest five years after this convention goes into effect. After such going into effect, it shall be unlawful to use a trade-mark or commercial label contrary to such prohibition."

171. Repression of Acts of Pillage.—G. C., art. 28. In the event of their military penal laws being insufficient, the signatory Governments also engage to take, or to recommend to their legislatures, the necessary measures to repress, in time of war, individual acts of robbery and illtreatment of the sick and wounded of the armies, as well as to punish, as usurpations of military insignia, the wrongful use of the flag and brassard of the Red Cross by military persons or private individuals not protected by the present convention."

"The evident intent of this article is to insure that life is extinct before burial or cremation. There is no express statement in the Geneva Convention that the dead shall be buried or cremated, although this is the practice of the majority of civilized States. For rules prescribed by the U. S. for clearing the battle field see F. S. R., 1914, pars. 231, 349, 350. "Vide ante, par. 100 and note.

"The American National Red Cross was incorporated under act approved Jan. 5, 1905, and amended by Ch. 372, June 23, 1910 (36 Stat., 604).

"Aside from the legislation referred to in note, par. 133, no special legislation has been enacted by Congress. Vide ante, par. 112 and note, also post, par. 374 and note.

APPENDIX A.

Form 61.
Medical Department, U. S. Army. (Revised Apr. 14, 1915.)

Certificate of Identity, } Place
No. } Date 19..

I certify that is attached to the sanitary service of
(Given name) (Surname)

the United States Army, is authorized to accompany the
(Designate the organization to which attached.)

in the capacity of, and is entitled to the privileges and immunities provided in Chapter III of the International Red Cross Convention of 1906. A brassard, as described in Article 20 thereof, which bears the same number as this certificate, has been issued to the person named. Identification data:

(Describe function.)

(Sex) (Age) (Color of eyes) (Color of hair) { Finger print, }
(Height, approx.) (Weight, approx.) (Race) } right index. }

Remarks:
(Include here notation of scars, etc., visible when clothed, which will aid in identification.)

(Signature line)

(Title, etc., line)

To be 4 by 8 inches, perforated as indicated, bound in books to retain stubs, and printed on light-weight bond paper. Certificate to be numbered at time of issue to correspond to accompanying brassard and carried in a small metal container suspended around the neck.

CHAPTER VI, SECTION I.

THE CONDUCT OF HOSTILITIES.

172. Means of Conducting Hostilities. H. R. XXII. The right of belligerents to adopt means of injuring the enemy is not unlimited.

173. Limitations on Means of Carrying on War. On general principles it is permissible to destroy your enemy and it is immaterial how this is accomplished. But in practice the means employed are definitely restricted by international declarations and conventions, and by the laws and usages of war. Generally speaking, the means to be employed include both force and stratagem, and there is included therein the killing and disabling the enemy, forcing him by defeat and exhaustion to surrender, the investment, bombardment or siege of his fortresses and defended places, the damage, destruction, and appropriation of property, and injury to the general resources of the country.¹

174. Discharging Explosives from Balloons. H. D. XIV, 1907. The contracting powers agree to prohibit, for a period extending to the close of the third peace conference, the discharge of projectiles and explosives from balloons or by other new methods of a similar nature.

175. There were three declarations included in The Hague Conference of 1899 with reference to the improper use of projectiles, but the above is the only one of the three to which the United States was a party. This may be said to be of comparatively little value, since it has only ten signatories and the United States and Great Britain are the only two of the great powers who have ratified the same, and then, too, the same object is substantially accomplished under H. R. XXV.²

¹ Flad Oyen. (1 Rob., 134); G. O. 100, 1863, art. 17. "War is not carried on by arms alone. It is lawful to starve the hostile belligerent, armed or unarmed, so that it leads to the speedier subjection of the enemy."

² For other conventions, see declarations 2 and 3 at The Hague, of 1899, as follows: 2. "The contracting powers renounce the use of projectiles the sole object of which is the diffusion of asphyxiating or deleterious gases." 3. "The contracting powers renounce the use of bullets which expand in the human body, such as bullets with a hard envelope which does not entirely cover the core, or is pierced with incisions."

The United States refused to adhere to these provisions, and its representatives presented as a substitute the following:

"The use of bullets which inflict unnecessarily cruel wounds—such as explosive bullets, and, in general, every kind of bullet which exceeds the limit necessary for placing a man immediately hors de combat—should be forbidden."

The United States has, however, by convention or otherwise, adhered in its wars to the principle announced in the proposed amendment. Vide Am. Jour. Int. Law (Gen. G. B. Davis, vol. 2, pp. 74-76).

The following Declarations of the St. Petersburg Convention were never ratified by the United States, and are now considered as limiting too much the legitimate methods of making war:

"Considering that the progress of civilization should have the effect of alleviating as much as possible the calamities of war;

"That the only legitimate object which States should set before themselves during war is to weaken the military forces of the enemy;

"That for this purpose it is sufficient to disable the greatest possible number of men;

"That this object would be exceeded by the employment of arms which

176. The Use of Poison. H. R. XXIII, par. (a). In addition to the prohibitions provided by special conventions, it is especially forbidden * * * to employ poison or poisoned weapons.

177. Application of Rule. This prohibition extends to the use of means calculated to spread contagious diseases, and includes the deliberate contamination of sources of water by throwing into same dead animals and all poisonous substances of any kind, but does not prohibit measures being taken to dry up springs or to divert rivers and aqueducts from their courses.³

178. The Use of Treachery. H. R. XXIII, par. (b). It is especially forbidden * * * to kill or wound treacherously individuals belonging to the hostile nation or army.⁴

179. Assassination and Outlawry. Civilized nations look with horror upon offers of rewards for the assassination of enemies, and the perpetrator of such an act has no claim to be treated as a combatant, but should be treated as a criminal. So, too, the proclaiming of an individual belonging to the hostile army, or a citizen or subject of the hostile government, an outlaw, who may be slain without trial by a captor. The article includes not only assault upon individuals, but as well any offer for an individual "dead or alive."⁵

180. Injuring an Enemy Who Has Surrendered. H. R. XXIII, par. (c). It is especially forbidden * * * to kill or wound an enemy who, having laid down his arms, or having no longer means of defense, has surrendered at discretion.

181. Penalty for Violation. War is for the purpose of overcoming armed resistance, and no vengeance can be taken because an individual has done his duty to the last. And "whoever intentionally inflicts additional wounds on an enemy already wholly disabled, or kills such an enemy, or who orders or encourages soldiers to do so, shall suffer death, if duly convicted, whether he belongs to the Army of the United States or is an enemy captured after having committed the misdeed."⁶

182. Refusal of Quarter. H. R. XXIII, par. (d). It is especially forbidden * * * to declare that no quarter will be given.

would uselessly aggravate the sufferings of disabled men, or render their death inevitable; and

"That the employment of such arms would, therefore, be contrary to the laws of humanity."

³ The original or base of this prohibition is found in G. O. 100, of 1863, art. 70, as follows: "The use of poison in any manner, be it to poison wells, or food, or arms, is wholly excluded from modern warfare. He that uses it puts himself out of the pale of the laws and usages of war."

⁴ It would be treacherous to call out, "Do not fire; we are friends," and then fire a volley. To feign death and then fire at an enemy. Land Warfare, Opp. 37, note (b).

⁵ Vide Laws of War on Land, Holland, p. 43; Land Warfare, Opp. arts. 46 and 47; Les Lois, Jacomet, p. 58, art. 5; G. O. 100, 1863, par. 148. "The law of war does not allow proclaiming either an individual belonging to the hostile army or a citizen or a subject of the hostile Government an outlaw who may be slain without trial by any captor, any more than the modern law of peace allows such intentional outlawry; on the contrary it abhors such outrage. The sternest retaliation should follow the murder committed in consequence of such proclamation, made by whatever authority. Civilized nations look with horror upon offers of rewards for the assassination of enemies as relapses into barbarism."

⁶ G. O. 100, 1863, art. 71. Vide also G. C., arts. 3 and 28, pars. 110, 165, and 171, supra.

183. It is no longer contemplated that quarter will be refused to the garrison of a fortress carried by assault, to the defenders of an undefended place who did not surrender when threatened with bombardment, or to a weak garrison which obstinately and uselessly persevered in defending a fortified place against overwhelming odds.¹

184. **Employment of Arms, Etc., Causing Unnecessary Injury.** H. R. XXIII, par. (e). It is especially forbidden * * * to employ arms, projectiles, or material, of a nature to cause unnecessary injury.

185. **What Included in Prohibition.** The foregoing prohibition is not intended to apply to the use of explosives contained in artillery projectiles, mines, aerial torpedoes, or hand grenades, but it does include the use of lances with barbed heads, irregular-shaped bullets, projectiles filled with glass, etc., and the use of any substance on these bullets that would tend to unnecessarily inflame a wound inflicted by them, and the scoring of the surface or filing off the ends of the hard case of such bullets. It is believed that this prohibition extends to the use of soft-nosed and explosive bullets, mentioned in paragraph 175 and note.

186. **Train Wrecking, Etc.** Train wrecking and setting on fire camps or military depots are legitimate means of injuring the enemy when carried out by the members of the armed forces. Wrecking of trains should be limited strictly to cases which tend directly to weaken the enemy's military forces.²

¹ Land Warfare, Opp. p. 24, par. 49. But see G. O. 100, 1863, art. 62: "All troops of the enemy known or discovered to give no quarter in general, or to any portion of the army, receive none."

Art. 60. "It is against the usage of modern warfare to resolve, in hatred and revenge, to give no quarter. No body of troops has the right to declare that it will not give, and therefore will not expect, quarter; but a commander is permitted to direct his troops to give no quarter, in great straits, when his own salvation makes it impossible to cumber himself with prisoners."

Art. 63. "Troops who fight in the uniform of their enemies, without any plain, striking, and uniform mark of distinction of their own, can expect no quarter." See also arts. 63 and 66.

All of the foregoing rules are now superseded by The Hague rule. Vide par. 368, *infra*.

² Opp., Land Warfare, p. 24, par. 45. Mr. Spaight, War Rights on Land, on p. 127, says: "Though railway breaking is a legitimate act of warfare, designedly to wreck a hospital train, or a train which is known to be conveying peaceable inhabitants, would not be legitimate, for it would lack the essential requirement of being intended to weaken the enemy's military forces. But, generally speaking, railroads being to-day an all-important means of warfare, such design would have to be clearly proved against a belligerent to condemn him for exercising his broad war right to interrupt his enemy's communications. It is a very sad but inevitable consequence of a lawful act that it may endanger or kill persons who are strangers to hostilities. * * * A belligerent has a war right not only to stop a train, but to blow it sky high, if it carries fighting troops or war material or supplies, and this war right he will hardly forego for humanitarian reasons. The strategic use of railways is so important that they must be regarded, in a country where active hostilities are going on, as a specific means of warfare, and only secondarily as fulfilling the ordinary functions of railways in peace time. As I have said before, noncombatants must travel by train at their risk when there is war in the land, and the only practical method of insuring their safety appears to be the sending ahead of a herald engine to test the line."

187. Subjects Not to be Compelled to Take Part in Operations Against Their Own Country. H. R. XXIII, last par. A belligerent is likewise forbidden to compel the nationals of the hostile party to take part in the operations of war directed against their own country, even if they were in the belligerent's service before the commencement of the war.

188. Interpretation of This Article. This article was introduced by Germany for the purpose of extending the principle of article 44 of The Hague Conference of 1899, which it was intended to replace, to all persons over whom a State exercised jurisdiction. The Austro-Hungarian amendment to insert the words "as combatants" after the words "take part" was rejected and the article passed substantially as proposed. The language used is still ambiguous, since it is uncertain whether it is unlawful to compel inhabitants of occupied territory to work on certain works that may be urgently required, such as roads and bridges which may be of ultimate military service, or whether these inhabitants can be compelled to act as guides by the enemy. This practice is still considered as admissible by Germany.*

CHAPTER VI, SECTION II.

STRATAGEMS.

189. H. R. XXIV. Ruses of war and the employment of measures necessary for obtaining information about the enemy and the country are considered permissible.

190. Good Faith. Absolute good faith with the enemy must be observed as a rule of conduct. Without it war will degenerate into excesses and violences, ending only in the total destruction of one or both of the belligerents."

191. In general, belligerents may resort to such measures for mystifying or misleading the enemy, which the enemy ought to take measures to secure himself against, such as the employment of spies, inducing soldiers to desert, to surrender, to rebel, or to give false information to the enemy.

192. Must Not Involve Treachery or Perfidy. The ruses of war are, however, legitimate so long as they do not involve treachery or perfidy on the part of the belligerent resorting to them. They are forbidden if they contravene any generally accepted rule."

The line of demarcation, however, between legitimate ruses and forbidden acts of treachery and perfidy is sometimes rather indistinct, and with regard to same the writers of authority have disagreed. For example: It would be an improper practice to secure an advantage of the enemy by deliberate lying which involves a breach of faith, or when there is a moral obligation to speak

* Vide War on Land. Holland, p. 44, art. 77. The Hague Peace Conferences, by Higgins, pp. 265-269, for further discussion. Kriegsbrauch, p. 48. Vide post discussion of H. R. 44, pars. 321-323 and notes.

"G. O. 100, 1863, art. 16. "It (military necessity) admits of deception, but disclaims acts of perfidy; and, in general, military necessity does not include any act of hostility which makes return to peace unnecessarily difficult." Land Warfare, Opp., pars. 140, 141: "Should it be found impossible to count on the loyalty of the adversary, there is grave danger of war degenerating into excesses and violence, to avoid which has been the aim of modern wars."

"To demand a suspension of arms and break it by surprise, or to violate a safe conduct or any other agreement in order to gain an advantage is an act of perfidy." (Land Warfare, Opp., par. 148.) Vide par. 232 infra.

the truth, such as declaring that an armistice had been agreed upon when such was not the case. On the other hand, it is a perfectly proper ruse to summon a force to surrender on the ground that it is surrounded, and thereby induce such surrender with a small force."

193. Legitimate Ruses. "Among legitimate ruses may be counted surprises; ambushes; feigning attacks, retreats, or flights; simulating quiet and inactivity; giving large outposts or a strong advanced guard to a small force; constructing works, bridges, etc., which it is not intended to use; transmitting false or misleading signals and telegraph messages, and sending false dispatches and newspapers, with a view to their being intercepted by the enemy; lighting camp fires where there are no troops; making use of the enemy's signals, bugle and trumpet calls, watchwords, and words of command; pretending to communicate with troops or reinforcements which have no existence; moving landmarks; putting up dummy guns or laying dummy mines; removing badges from uniforms; clothing the men of a single unit in the uniform of several different units so that prisoners and dead may give the idea of a large force." "

194. Use of Flags, Insignia, Military Uniforms of the Enemy. H. R. XXIII, par. (f). It is especially forbidden * * * to make improper use of a flag of truce, of the national flag, or of the military insignia and uniform of the enemy, as well as of the distinctive badges of the Geneva Convention.

195. Flags of Truce. Flags of truce must not be used surreptitiously to obtain military information or merely to obtain time to effect a retreat or secure reinforcements or to feign a surrender in order to surprise an enemy. An officer receiving them is not on this account absolved from the duty of exercising proper precautions with regard to them."

196. National Flags, Insignia, and Uniforms as a Ruse. In practice it has been authorized to make use of these as a ruse. The foregoing rule does not prohibit such use, but does prohibit their improper use. It is certainly forbidden to make use of them during a combat. Before opening fire upon the enemy

"H. R. XXIII, par. (b). Ante par. 178, G. O. 100, 1863, art. 101. "While deception in war is admitted as a just and necessary means of hostility, and is consistent with honorable warfare, the common law of war allows even capital punishment for clandestine or treacherous attempts to injure an enemy, because they are so dangerous, and it is so difficult to guard against them."

Vide also Hague Conference, 1899, p. 146.

"Land Warfare, Opp., par. 144.

"Ariga, p. 255 et seq., cites an example of the use of the flag of truce combined with the Red Cross flag at Tang-tsiatoun, near Mukden, and during the battle, which he considers as legitimate. March 7, about 1 o'clock p. m., some Russians hoisted the two flags and advanced toward the Japanese First Army and asked for a suspension of arms for several hours to remove the wounded and dead. Both armies were actually engaged in this work, so that the request was assented to without any defined agreement. When the Japanese resumed fire in the evening the Russians had withdrawn.

This informal suspension of arms was taken advantage of to retire unseen by the enemy, and it was upon this ground that it is considered lawful; that is, they can be taken advantage of to effect movements unseen by the enemy.

Vide G. O. 100, 1863, art. 114. "If it be discovered and fairly proved that a flag of truce has been abused for surreptitiously obtaining military knowledge, the bearer of the flag thus abusing his sacred character is deemed a spy.

"So sacred is the character of a flag of truce, and so necessary is its sacredness, that while its abuse is an especially heinous offense, great caution is requisite, on the other hand, in convicting the bearer of a flag of truce as a spy."

they must be discarded. Whether the enemy flag can be displayed and his uniform worn to effect an advance or to withdraw is not settled."

197. Practice as to Enemy Uniform in This Country. In this country it has always been authorized to utilize uniforms captured from the enemy, provided some striking mark or sign is attached to distinguish the American soldier from the enemy. All distinctive badges or marks of the enemy should be removed before making use of them. It is believed that such uniforms should not be used except in case of absolute necessity."

198. Improper Use of Distinctive Badges of Geneva Convention. The Red Cross flag must be limited to the protection of units and material provided for in the Geneva Convention. As examples of the improper use may be cited covering wagons containing ammunition or nonmedical stores, a hospital train used to facilitate the escape of combatants, firing from a tent or building flying the Red Cross flag, using a hospital or other building accorded such protection as an observatory or military office or store, or generally for committing acts of hostility."

CHAPTER VI, SECTION III.

ESPIONAGE AND TREASON.

199. Spies. H. R. XXIX. A person can only be considered a spy when, acting clandestinely or on false pretenses, he obtains or endeavors to obtain information in the zone of operations of a belligerent, with the intention of communicating it to the hostile party."

Thus, soldiers not wearing a disguise who have penetrated into the zone of operations of the hostile army, for the purpose of obtaining information, are not considered spies; similarly, the following are not considered spies: Soldiers and civilians, carrying out their mission openly, intrusted with the delivery of dispatches intended either for their own army or for the enemy's army. To this class belong likewise persons sent in balloons for the purpose of carrying

"The Germans hold that The Hague Rules forbid absolutely the use of the enemy's flag and uniforms. (*Kriegsbrauch*, p. 24.) The French manual (*La Guerre sur Terre*) says: "In all the wars since 1866 belligerents have made many complaints upon this subject" (p. 25, note). The English rule is as stated in the text. (*Land Warfare*, Opp., par. 152.)

G. O. 100, 1863, art. 65. "The use of the enemy's national standard, flag, or other emblem of nationality, for the purpose of deceiving the enemy in battle is an act of perfidy, by which they lose all claim to protection of the laws of war."

G. O. 100, 1863, art. 63. "Troops who fight in the uniform of their enemies, without any plain, striking, and uniform mark of distinction of their own, can expect no quarter."

"G. O. 100, 1863, art. 64. "If American troops capture a train containing uniforms of the enemy, and the commander considers it advisable to distribute them for use among his men, some striking mark or sign must be adopted to distinguish the American soldier from the enemy."

"G. O. 100, 1863, art. 117. "It is justly considered an act of bad faith, of infamy, or fiendishness, to deceive the enemy by flags of protection. Such act of bad faith may be good cause for refusing to respect such flags."

"Compare this definition with G. O. 100, 1863, art. 88. "A spy is a person who secretly, in disguise or under false pretenses, seeks information with the intention of communicating it to the enemy"

dispatches and, generally, of maintaining communications between different parts of an army or a territory.¹⁹

200. Recognition of Necessity for Obtaining Information. In the foregoing rule and in H. R. XXIV is distinct recognition of the necessity for employing spies and other secret agents for obtaining information about the enemy, so that the acquirement of such information by secret methods is regulated by the laws and usages of war.

201. Who Included in Definition. The definition above comprehends all classes, whether officer, soldier, or civilian, and, like the criminal law, makes no distinction as to sex.²⁰ As to the offense, it limits the same to securing information clandestinely or on false pretences in the zone of operations. It does not include all cases in which a person makes or endeavors to make unauthorized or secret communications to the enemy. These latter cases must therefore be dealt with under the laws relating to treason and espionage.²¹

202. Treason. All unauthorized or secret communication with the enemy is considered treasonable by the law of war. Foreign residents in an invaded or occupied territory, or foreign visitors in the same, can claim no immunity from this law. They may communicate with foreign parts or with the inhabitants of the hostile country so far as military authority permits, but no further.²²

203. War Traitor. A traitor under the law, or a war traitor, is a person in a place or district under martial law (military government), who, unauthorized by the military commander, gives information of any kind to the enemy or holds intercourse with him.²³

204. Subject Giving Information to Own Government. If the citizen or subject of a country or place invaded or conquered gives information to his own Government, from which he is separated by the hostile army, or to the army of his Government, he is a war traitor.²⁴

205. Guide As. If a citizen of a hostile and invaded district voluntarily serves as a guide to the enemy, or offers to do so, he is deemed a war traitor.²⁵

¹⁹ The fact of being in the enemy's lines dressed as a civilian, or wearing the enemy's uniform, is presumed to constitute a spy, but it is possible to rebut this presumption by proof of no intention to obtain military information. On the other hand, the fact that a person charged with being a spy is in the uniform of his State does not render it impossible for him to be a spy in fact, since he may have gained admission into the enemy's lines under the privileges of the Red Cross and have taken advantage of the opportunity afforded him for obtaining information.

Likewise the article does not preclude in any sense the use of balloons for espionage and the persons so using them from being treated as spies. Disimulation of the object sought is the principal characteristic of the offense of the spy. Vide *Land Warfare, Opp.*, pars. 162-165. *War Rights on Land, Spaight*, pp. 203-215. *War on Land, Holland*, pp. 47-48. *Les Lois, Jacomet*, pp. 65-66.

²⁰ G. O. 100, 1863, art. 102: "The law of war, like the criminal law regarding other offenses, makes no difference on account of the difference of sexes concerning the spy, the war traitor, or the war rebel."

²¹ In occupied territory offenses relating to communication with the enemy will be punished as treason by the occupying forces. If committed in the home country, the laws relating to that subject or internal laws will govern. *Land Warfare, Opp.*, par. 167 and note.

²² G. O. 100, 1863, art. 98.

²³ G. O. 100, 1863, art. 90.

²⁴ G. O. 100, 1863, art. 92.

²⁵ G. O. 100, 1863, art. 95.

206. Punishment of Spies. The spy is punishable with death, whether or not he succeed in obtaining the information or in conveying it to the enemy.²⁴

207. Punishment of Treason. The war traitor is always severely punished. If his offense consists in betraying to the enemy anything concerning the condition, safety, operations, or plans of the troops holding or occupying the place or district, his punishment is death.²⁵

208. Spy Must be Tried. H. R. XXX: A spy taken in the act should not be punished without previous trial.²⁶

209. Spy Immune from Punishment After Joining His Own Army. H. R. XXXI: A spy who, after rejoining the army to which he belongs, is subsequently captured by the enemy, is treated as a prisoner of war, and incurs no responsibility for his previous acts of espionage.²⁷

210. Immunity Not Applicable to Treason. This immunity does not extend to persons guilty of treason, who may be arrested at any place or any time within the jurisdiction. And it is not necessary for traitors to be caught in the act in order that they may be punished.²⁸

211. Assisting Espionage Punishable.—Assisting or favoring espionage or treason and knowingly concealing a spy may be made the subject of charges; and such acts are by the customary laws of war equally punishable.²⁹

CHAPTER VI, SECTION IV.

BOMBARDMENTS, ASSAULTS, AND SIEGES.

212. Bombardment of Undefended Places Forbidden. H. R. XXV: The attack, or bombardment, by whatever means, of towns, villages, dwellings, or buildings which are undefended is prohibited.³⁰

²⁴ G. O. 100, 1863, art. 88, par. 2. See also Rev. Stat. U. S., 1343: "All persons who, in times of war or rebellion against the supreme authority of the United States, shall be found lurking or acting as spies in or about any of the fortifications, posts, quarters, or encampments of any of the armies of the United States, or elsewhere, shall be triable by a general court-martial or by a military commission, and shall on conviction thereof suffer death."

²⁵ G. O. 100, 1863, art. 91.

²⁶ No one else should be punished for this offense of espionage or treason without previous trial. (Vide Hague Conference, 1899, p. 146.)

²⁷ This immunity extends only to previous acts of espionage, but does not extend to other offenses he may have committed, such as murder, etc. Hague Conference, 1899, p. 146.

²⁸ For practice of the Japanese Army, which is in accord with the text, see Ariga, pp. 395-397.

²⁹ Ariga, pp. 396-397, and Land Warfare, Opp., par. 172.

³⁰ Compare this article with the following from Convention IX of The Hague, 1907, "Bombardment by naval forces in time of war:

"Art. I. The bombardment by naval forces of undefended ports, towns, villages, dwellings, or buildings is forbidden.

"A place can not be bombarded solely because automatic submarine contact mines are anchored off the harbor.

"Art. II. Military works, military or naval establishments, depots of arms or war matériel, workshops or plants which could be utilized for the needs of the hostile fleet or army, and the ships of war in the harbor, are not, however, included in this prohibition. The commander of a naval force may destroy them with artillery, after a summons followed by a reasonable time, if all other means

213. The Use of Balloons. The addition of the words "by whatever means" was for the purpose of making it clear that the bombardment of these undefended localities from balloons or aeroplanes is prohibited.²³

214. Defended Place Defined. Investment, bombardment, assault and siege have always been recognized as legitimate means of warfare, but under the foregoing rule their use is limited to defended places, which certainly will include the following:

(a) A fort or fortified place.

(b) A town surrounded by detached forts is considered jointly with such forts as an indivisible whole, as a defended place.

(c) A place that is occupied by a military force or through which such force is passing is a defended place. The occupation of such place by sanitary troops alone is not sufficient to consider it a defended place.

215. Throwing Projectiles from Balloons on Forts and Fortified Places. There is no prohibition in The Hague Rules or in other conventions against throwing authorized projectiles from balloons or aeroplanes into forts and fortified places.²⁴

216. Notice of Bombardment. H. R. XXVI. The officer in command of an attacking force must, before commencing a bombardment, except in case of assault, do all in his power to warn the authorities.

are impossible, and when the local authorities have not themselves destroyed them within the time fixed.

"He incurs no responsibility for any unavoidable damage which may be caused by a bombardment under such circumstances.

"If for military reasons immediate action is necessary, and no delay can be allowed the enemy, it is understood that the prohibition to bombard the undefended town holds good, as in the case given in paragraph 1, and that the commander shall take all due measures in order that the town may suffer as little harm as possible.

"Art. III. After due notice has been given, the bombardment of undefended ports, towns, villages, dwellings, or buildings may be commenced, if the local authorities, after a formal summons has been made to them, decline to comply with requisitions for provisions or supplies necessary for the immediate use of the naval force before the place in question.

"These requisitions shall be in proportion to the resources of the place. They shall only be demanded in the name of the commander of the said naval force, and they shall, as far as possible, be paid for in cash; if not, they shall be evidenced by receipts.

"Art. IV. The bombardment of undefended ports, towns, villages, dwellings, or buildings for the nonpayment of money contributions is forbidden."

Holland, War on Land, says: "A place, although not fortified, may be bombarded if it is defended. This article is not to be taken to prohibit the use of any means for the destruction of buildings for military reasons. A place must not be bombarded with a view merely to the exaction from it of a ransom." (Art. 80, note.) Mr. Oppenheim, Land Warfare, art. 118, says: "It is not sufficient reason for bombardment that a town contains supplies of value to the enemy, or railway establishments, telegraphs, or bridges. They must, if it is necessary to do so, be destroyed by other means."

"The French Manual, by Lieut. Jacomet, art. 63, says: "It is forbidden therefore to throw projectiles from a balloon or aeroplane upon towns, villages, dwellings, or buildings which are undefended, unless it is a question of immovable property of immediate use to the enemy's army."

"Les Lois, Jacomet, art. 59. But see ante, pars. 174-175, and note; also H. D. I. 1907, appendix 7, p. 181.

217. The American Rule. Commanders, whenever admissible, inform the enemy of their intention to bombard a place, so that the noncombatants, and especially the women and children, may be removed before the bombardment commences. But it is no infraction of the common law of war to omit thus to inform the enemy. Surprise may be a necessity.*

218. No Rule Compelling Belligerent to Authorize Population to Leave Besieged Place. There is no rule of law which compels the commander of an investing force to authorize the population, including women, children, aged, sick, wounded, subjects of neutral powers, or temporary residents, to leave the besieged locality, even when a bombardment is about to commence. It is entirely within the discretion of the besieging commander whether he will permit them to leave or not and under what conditions.**

* G. O. 100, 1863, art. 19.

Mr. Oppenheim (Land Warfare, par. 124 and note) thus states the rule in Great Britain: "If military exigencies permit, the commander of an attacking force must do all in his power to warn the authorities before commencing a bombardment, unless surprise is considered an essential element of success. There is, however, no obligation to give notice of an intended assault." No notice was given of the bombardment of Paris in 1870.

** For action of Gen. Scott in refusing truce to consuls at Vera Cruz, see Dig. Int. Law, Moore, sec. 1112. Scott Autobiography, II, pp. 426-428.

The following are the conditions proposed by the Japanese at Port Arthur:

August 16, 1914.

From General Headquarters of the Japanese Army investing Port Arthur.

To the General and Admiral highest in rank, commanding the Imperial Russian Army and Navy at Port Arthur.

Your Excellencies: We have the honor to inform you herewith that it is the humane and magnanimous intention of H. M. the Emperor of Japan, to save from danger and accord protection to the women, children, priests, diplomats, military and naval attachés of neutral powers who are in Port Arthur and wish to avoid the dangers of the bombardment and assault.

In order to carry out the kind solicitation of H. M. the Emperor of Japan, we propose the following:

1. In case you should have the intention of taking advantage of the well-meaning offer of H. M. the Emperor of Japan, you will inform us as to the approximate number of persons who among the above mentioned ought to benefit thereby, and after having divided them into classes; youths of sixteen years or above are excluded from this privilege.

2. Your bearer of the flag of truce bringing the reply must arrive at the first line of the Japanese army, north of Chouet-si-ying, on the main route leading from Port Arthur to Kin-tcheou, to-morrow, August 17, 1904, before one minute after 6 a. m.

3. The persons specified above will, under the protection of a white flag, repair to the same place where they must arrive on August 17, 1904, before one minute after two o'clock in the afternoon.

4. A troop of our infantry will also go with a white flag and at the time stated to the same place to await the arrival of the persons already mentioned.

5. The persons so stated will each have the right to carry away a single pack of ordinary size, the contents of which can be examined if it is thought necessary.

6. These packs must not contain letters, documents or other written or printed matter relating directly to the war, under pain of confiscation.

7. The persons before specified will be protected and escorted by our troops

219. Diplomatic Agents of Neutrals. Diplomatic agents of a neutral power should not be prevented from leaving a besieged place before hostilities commence. This privilege can not be claimed while hostilities are in progress. The same privileges should properly be accorded to a consular officer of a neutral power. Should they voluntarily decide to remain, they must undergo the same treatment as other inhabitants."

220. Persons in Zone Between Troops. Persons dwelling in the zone between the opposing forces in the first stages of a siege are treated as inhabitants of the invaded locality.

221. Individuals Leaving Without Permission. Individuals who attempt to leave or enter a besieged place without obtaining the necessary permission are liable to be fired on and may be sent back into the besieged place or detained and put on trial as suspects.

222. Persons Expelled May be Sent Back. When a commander of a besieged place expels the noncombatants, in order to lessen the number of those who consume his stock of provisions, it is lawful, though an extreme measure, to drive them back, so as to hasten the surrender."

223. Not Compelled to Cease Fire When Expelled. It is not necessary to cease or relax fire because the enemy sends women and children out of his lines in order to get them to a place of safety, or to employ compassion, but fire must not be intentionally opened in their direction.

224. Can Forbid Communication with Besieged Place. The commander of the investing force has the absolute right to forbid all communication between the besieged place and the outside. The application of this rule to diplomatic envoys of neutral powers is unsettled."

stated in article 4, as far as Dalny, where arrangements will be made for their departure.

You are requested to accept or refuse the above propositions in a lump; no modifications can be brought about. If the bearer of the flag of truce referred to in article 2, does not arrive at the specified time, we shall consider our proposals rejected.

We avail ourselves of the opportunity to express to you the assurance of our respectful sentiments.

(S.) GENERAL BARON NOGHI,
Commanding the Japanese Army Investing Port Arthur.
(S.) ADMIRAL TOGO,

Commanding the Japanese Fleet Blockading the Liao-tong Peninsula.

" See G. O. 100, 1863, art. 87, post art. 233.

" G. O. 100, 1863, art. 18.

" On the 28th Sept., 1870, Count Bismarck, in reply to a request of diplomatic representatives of neutral States, shut up in Paris, to send out a courier once a week, said:

" The authorization of exchange of correspondence with a besieged fortress is not, in general, in accordance with the customs of war; although we willingly authorize the transmission of open letters of diplomatic agents, provided their contents are unobjectionable from a military viewpoint, I can not admit that the opinion of those who consider the interior of the fortifications of Paris as a suitable center for diplomatic relations has a good foundation."

Mr. Fish, in dispatch to Baron Gerolt, Nov. 21, 1870, said:

" Paris, however, is the capital of France. There the diplomatic representatives of neutral States had their residence prior to the investment. If they think proper to stay here while it lasts, they must expect to put up with the inconveniences necessarily incident to their choice. Among these, however, the stopping of communication with their Governments can not be recognized.

225. Buildings Dedicated to Religious Works, Etc., to be Spared. H. R. XXVII. In sieges and bombardments all necessary steps must be taken to spare, as far as possible, buildings dedicated to religion, art, science, or charitable purposes, historic monuments, hospitals, and places where the sick and wounded are collected, provided that they are not being used at the time for military purposes.

It is the duty of the besieged to indicate the presence of such buildings or places by distinctive and visible signs, which shall be notified to the enemy beforehand.

226. Use of Geneva Flag Limited to Hospitals, Etc. Only hospitals and places where the sick and wounded are located can be indicated by means of the red cross on a white ground. It is certainly desirable, in order to avoid injury from actual or erratic shots, that the sick and wounded in besieged places should be concentrated in some safe place, preferably in neutral territory, if possible to arrange.

227. Hague Convention IX, Art. V, par. 2, 1907. It is the duty of the inhabitants to indicate such monuments, edifices, or places by visible signs, which shall consist of large stiff rectangular panels divided diagonally into two colored triangular portions, the upper portion black, the lower portion white.⁴

228. Buildings Protected Can Not be Used for Military Purposes. The besieging forces are not required to observe the signs indicating inviolability of buildings that are known to be used for military purposes, such as quarters for officers and men, as observatories, or signaling stations.

229. Pillage Forbidden. H. R. XXVIII. The pillage of a town or place, even when taken by assault, is prohibited.⁴

CHAPTER VII, SECTION I.

INTERCOURSE BETWEEN BELLIGERENTS.

230. Nonintercourse the Rule. All intercourse between the territories occupied by belligerent armies, whether by traffic, by letter, by travel, or in any other way, ceases. This is the general rule, to be observed without special proclamation.¹

231. Exceptions to Rule. Exceptions to this rule, whether by safe-conduct, or permission to trade on a small or large scale, or by exchanging mails, or by travel from one territory into the other, can take place only according to agreement approved by the Government or by the highest military authority. Contraventions of this rule are highly punishable.²

232. Good Faith Essential. It is absolutely essential in all non-hostile relations that the most scrupulous good faith shall be observed by both parties,

* * * The undersigned is consequently directed to claim that the right of correspondence between the representatives of neutral powers at Paris and their Governments is a right sanctioned by public law." See Moore's Dig. Int. Law, sec. 675.

* The foregoing rule adopted in this convention for naval warfare should be adopted for protecting buildings under bombardment in land warfare.

⁴ Vide *infra*, par. 339 and note.

¹ G. O. 100, 1863, art. 86, par. 1. See also the following cases: *The Rapid* (8 Cranch, 155); *The Julia* (8 Cranch, 181); *Montgomery v. U. S.* (8 Wall., 185); *McKee v. U. S.* (8 Wall., 163); *Hamilton v. Dillin* (21 Wall., 73); *Griggs* (22 Op. Att. Gen., 268).

² G. O. 100, 1863, art. 86, par. 2. *Hamilton v. Dillin* (21 Wall., 73).

and that no advantage not intended to be given by the adversary shall be taken.*

233. Ambassadors and Diplomatic Agents. Ambassadors and other diplomatic agents of neutral powers, accredited to the enemy, may receive safe-conducts through the territories occupied by the belligerents, unless there are military reasons to the contrary, and unless they may reach the place of their destination conveniently by another route. It implies no international affront if the safe-conduct is declined. Such passes are usually given by the supreme authority of the State, and not by the subordinates.⁴

234. Rules, Where Found. These non-hostile relations are usually comprised under the headings of parlementaires, and flags of truce, armistices, capitulations, passports, and safe-conducts, safeguards, and cartels.⁵

PARLEMENTAIRES AND FLAGS OF TRUCE.

235. Parlementaires. Parlementaires are ordinarily agents in the non-hostile intercourse of belligerent armies.⁶ Their duties include every form of communication with the enemy in the field.

236. H. R. XXXII. A person is regarded as a parlementaire (bearing a flag of truce) who has been authorized by one of the belligerents to enter into communication with the other, and who advances bearing a white flag. He has a right to inviolability, as well as the trumpeter, bugler or drummer, the flag bearer, and interpreter who may accompany him.

237. Soldiers Acquainted With Privileges of, Etc. All soldiers, of whatever grade, should be thoroughly acquainted with the qualifications and privileges accorded parlementaires and with the proper method of receiving them when they present themselves.⁷

238. Signification of White Flag. The white flag, when used by troops, indicates a desire to communicate with the enemy. The hoisting of a white flag has no other signification in international law. It may indicate that the party hoisting it desires to open communication with a view to an armistice or a surrender. If hoisted in action by individual soldiers or a small party, it has come to signify surrender. It is essential, therefore, to determine whether the flag was actually hoisted by authority of the commander.

239. Fire Need Not Cease When White Flag Is Hoisted. The enemy is not required to cease firing when a white flag is raised. To indicate that the hoist-

* Vide, ante, par. 190.

⁴ G. O. 100, 1863, art. 87. Vide par. 219, supra.

⁵ Vide pars. 83-85a and 166, ante, for intercourse in re prisoners of war, sick, and wounded.

⁶ The adoption of the word "parlementaire" to designate and distinguish the agent or envoy seems absolutely essential in order to avoid confusion and because all other nations, including Great Britain, utilize the word. In the past this word has been translated at times to mean the agent or envoy only, at other times the agent and emblem, or both. To call the parlementaire "the bearer of a flag of truce" is not in reality correct, because he seldom, if ever, actually carries it.

⁷ Vide F. S. R., 1914, par. 48.

Bearers of flags of truce and their escorts are halted and required to face outwards; they are then blindfolded and disposed of in accordance with instructions from the support commander; if they fail to obey, they are fired upon. No conversation with them is permitted.

Deserters are required to lay down their arms, and a patrol is sent out to bring them in. Deserters pursued by the enemy are ordered to drop their arms and an alarm is given; if they fail to obey they are fired upon.

ing is authorized, the belligerent should cease firing. He should also send a parlementaire.*

240. Fire Not to Be Directed on the Parlementaire. The fire should not be intentionally directed on the person carrying the flag or upon those with him; if, however, the parlementaire or those near him present themselves during an engagement and are killed or wounded, it furnishes no ground for complaint. It is the duty of the parlementaire to select a propitious moment for displaying his flag, such as during the intervals of active operations, and to avoid the dangerous zone by making a detour.†

241. Must Be Duly Authorized. The parlementaire, in addition to presenting himself under cover of a white flag, must be duly authorized in a written instrument signed by the commander of the forces.‡

242. No Communication at Night. No provision is made for opening communication with an enemy during the hours of darkness, when a white flag can not be seen. An attempt to send a parlementaire at night is very dangerous, and at best uncertain.

243. H. R. XXXIII. The commander to whom a parlementaire is sent is not obliged to receive him under all circumstances. He may take all the necessary steps to prevent the parlementaire from taking advantage of his mission to obtain information. In case of abuse, he has the right to detain the envoy temporarily.

244. May Prescribe Formalities. The commander may declare the formalities and conditions upon which he will receive a parlementaire and fix the hour and place at which he must appear.‡ The present rule is that a belligerent may not declare beforehand, even for a specified period—except in case of reprisal

* G. O. 100, 1863. "Firing is not required to cease on the appearance of a flag of truce in battle."

Ariga, p. 274. "There are several hypotheses in which an enemy may hoist the white flag and the conduct to be pursued in each case.

"1. If a soldier hoists a white flag (he can use a handkerchief, etc.), indicating that he surrenders, make him a prisoner of war.

"2. During the bombardment of a fortress, although a particular fort hoist the white flag, there is no necessity to cease firing on that fort. Bombardment must be continued until an agreement is come to by the arrival of a parlementaire. Special order to cease fire will then be given by the commander of the army.

"3. The same course will be pursued if all the forts hoist a white flag; but in this case a report will be made as soon as possible to headquarters. Whilst awaiting orders fire will continue.

"4. If during a bombardment a parlementaire is seen leaving the enemy's lines, fire must not on any account be stopped or relaxed in the direction from which he comes, but he must not be fired on intentionally."

Vide also Land Warfare, Opp., p. 52 and note 2.

* "If the bearer of a flag of truce, presenting himself during an engagement, is killed or wounded, it furnishes no ground of complaint whatever." G. O. 100, 1863, art. 113.

† Ariga, pp. 302-304, gives the correspondence covering the capitulation of Port Arthur, including the terms of the capitulation. The usual form of authorization was "I authorize by these presents ——— to negotiate, etc.," which was signed by the commander-in-chief.

‡ Ariga, pp. 277 and 303, gives two instances in which Gen. Baron Nogi fixed definitely the hour and place for the parlementaire to report.

for abuses of the flag of truce—that he will not receive parlementaires.¹³ An unnecessary repetition of visits need not be allowed.¹⁴

245. Who May Accompany the Parlementaire. Only three persons are authorized to accompany the parlementaire. These, under the rule, are entitled to the same immunity. In case he is to have more than these, authority for the same should be previously obtained.¹⁵ He may be accompanied by a less number, and may even go alone with the flag of truce. It is advisable to have at least a trumpeter, bugler, or drummer with him in order to more readily and surely make known his status, thereby avoiding danger as much as possible.¹⁶

246. Formalities in the Reception of Parlementaires. 1. The parlementaire, with necessary authorization and with his duly authorized attendants, should approach the enemy's outpost or lines at a slow pace. When he arrives near enough to be recognized—that is, seen and heard—he causes his trumpet or bugle to be sounded or drum to be beaten and his flag to be waved.

2. He then advances at a slow pace toward the line, carefully obeying all instructions signaled or given him by any party of the enemy sent out to meet or conduct him.

3. He will then proceed to the point and by the route designated for receiving him. He may be furnished an escort for this by the enemy.

4. On arriving at the post of admittance the bearer and his escort dismount, and, leaving the escort at a convenient distance in rear, he proceeds on foot to the commander or senior officer of the post and states his mission.

5. The escort should not attempt to enter the lines with the parlementaire, and must obey all instructions or signals given them.

6. Marked courtesy must be observed on both sides. Conversation should be prudent and not touch upon the military operations. Great care will be exercised not to ask for nor to impart information.

7. The parlementaire will be treated with all the honors due to his rank and station and furnished an escort or guard in case of necessity.

8. A parlementaire can not of strict right claim to pass the outposts, nor can he demand to be conducted into the presence of the commanding officer. His message, if written, may be transmitted to the commanding officer; if verbal,

¹³ The old rule, announced at the Brussels conference of 1874, was as follows: "He (the commander) may equally declare beforehand that he will not receive bearers of flags of truce during a certain period. Envoys presenting themselves after such notification from the side to which it has been given forfeit their inviolability." This rule is still adhered to by Germany and some others, but was rejected by The Hague Convention of 1899, and again in 1907. Vide Higgins, *The Hague Peace Conferences*, p. 279, and Holls, *The Peace Conferences at The Hague*, p. 154. Mr. Oppenheim, *Land Warfare*, p. 53, art. 234, considers that this action may be taken as matter of reprisal for abuses of flags of truce. Vide par. 249 and note.

¹⁴ G. O. 100, 1863, art. 111. "The bearer of a flag of truce can not insist upon being admitted. He must always be admitted with great caution. Unnecessary frequency is carefully to be avoided." Vide also *Land Warfare*, Opp., par. 236.

¹⁵ The Germans add horseholders to these three authorized attendants, but there is no authority for adding any one, or to expect immunity to be granted to any others. *Kriegsbrauch*, p. 26.

¹⁶ Hague conference, 1899, p. 147, clearly authorizes a parlementaire to proceed alone. *Kriegsbrauch*, p. 26, "The bearer of a flag ought to be externally recognizable as such, and especially by signs which catch the sight and hearing from a distance and which are used and which are well known everywhere, the flag of truce (in case of necessity, a white handkerchief, etc.), calls on the bugle or trumpet, roll of the drum."

he may be required to reduce it to writing or deliver it orally to such person as may be designated to receive it. If he is sent to the rear for any reason whatever, he should be blindfolded and sent by a circuitous route.

9. In cases where resort is had to a decision from higher authority, the parlementaire must wait until same is returned.

10. The parlementaire will be permitted to retire and return with the same formalities and precautions as upon arrival."

247. Detention of Parlementaire. In addition to right of detention for abuse of his position, a parlementaire may be detained in case he has seen anything, or obtained knowledge which may be detrimental to the enemy, or if his departure should reveal information of the movement of troops. He should be detained only so long as circumstances imperatively demand, and information should be sent at once to his commander as to such detention, as well as of any other action taken against him or against his party.

248. Inviolability, Loss of. H. R. XXXIV. The parlementaire loses his right of inviolability if it is proved in a clear and incontestable manner that he has taken advantage of his privileged position to provoke or commit an act of treachery."

249. Abuse of Flag of Truce. It constitutes an abuse of the flag of truce, forbidden as an improper use under Hague Rule XXIII (f), for an enemy not to halt and cease firing while the parlementaire sent by him is advancing and being received by the other party. Likewise, if the flag of truce is made use of for the purpose of inducing the enemy to believe that a parlementaire is going to be sent when no such intention exists. It is also an abuse of a flag of truce to carry out operations under the protection granted by the enemy to the pretended flag of truce. An abuse of a flag of truce may authorize a resort to reprisals."

CHAPTER VII, SECTION II.

CAPITULATIONS.

250. Military Honor in. H. R. Art. XXXV. Capitulations agreed upon between the contracting powers must take into account the rules of military honor.

Once settled, they must be scrupulously observed by both parties."

251. Definition. A capitulation is an agreement entered into between commanders of belligerent forces for the surrender of a body of troops, a fortress, or other defended locality, or of a district of the theater of operations.

Capitulations are essentially military agreements, which involve the cessation of further resistance by the force of the enemy which capitulates. The surrender of a territory is frequently spoken of as an evacuation.

"Vide par. 236 and note 7, par. 237. Also F. S. R., 1914, par. 83. See Land Warfare, Opp., pp. 52-55. Kriegsbrauch, pp. 25 et seq.

"The original French word used is "trahisen," in The Hague rule. It was translated "treachery," probably because a parlementaire can not, strictly speaking, be guilty of treason.

"See infra as to reprisals, pars. 379 et seq. Land Warfare, Opp., par. 255. "Every abuse of the flag of truce entitles the injured party to reprisals."

"The foregoing is the only article on the subject of capitulations in The Hague Rules. It will be observed that it refers solely to the question of military honor in such conventions. The rules concerning such capitulations must therefore be sought for outside of The Hague Conventions. For forms of capitulation see Appendices A, B, C, D, this chapter.

252. Powers of Commanders. The commander of a fort or place and the commander-in-chief of an army are presumed to be duly authorized to enter into capitulations, being responsible to their respective Governments for any excess of power in stipulations entered into by them.²⁰ His powers do not extend beyond what is necessary for the exercise of his command.²¹ He does not possess power to treat for a permanent cession of the place under his command, for the surrender of a territory, for the cessation of hostilities in a district beyond his command,²² or generally to make or agree to terms of a political nature or such as will take effect after the termination of hostilities.²³

253. Forms of Capitulations. There is no specified form for capitulations. They may be concluded either orally or in writing, but in order to avoid disputes which may arise as to the terms thereof it is best, whenever possible, that they be reduced to writing. The convention should contain in precise terms every condition to be imposed; the time, manner, and execution should be laid down in the most precise and unequivocal terms. In case of an unconditional surrender following an assault, the terms might be oral, but should be reduced to writing if practicable.

254. Subjects Usually Regulated. In the terms of capitulation the following subjects are usually determined:

(a) The fate of the garrison, including those persons who may have assisted them:

These are usually declared to be prisoners of war, but it frequently occurs

²⁰ Marshal Blanco and the Spanish Government both disputed the right of Gen. Toral to capitulate at Santiago in 1898, "But the Spanish Government was forced to recognize the validity of the capitulation, for a governor of a fortress may capitulate under his personal responsibility, without any authorization from his Government." War Rights on Land, Spaight, p. 249.

For abuse of powers such as surrendering upon too lenient terms or when he should not do so, he is subject to trial under the laws or articles of war of his own country. Vide A. W., art. 42.

²¹ Vide Hague Convention, 1907, Actes, p. 25. "The competence of a commander to accept conditions of capitulation is limited to the troops immediately under his command, and does not necessarily extend to detached forts or to all the forts of a fortress." Land Warfare, Opp., par. 306.

The surrender of Gen. Lee did not include the other Confederate armies, although subsequent surrenders were made in accordance with its terms.

²² The capitulation of Verdun Nov. 8, 1870, stipulated that the surrender was made on the express condition of the retrocession of the fortress and town to France on the conclusion of peace. This exceeded the powers of the contracting commanders and created no obligation for their Governments. Land Warfare, p. 67, par. 304 and notes.

²³ In reply to a letter from Gen. Lee to Gen. Grant, 1865, proposing to "submit the subjects of controversy between the belligerents to a military convention," President Lincoln, to whom the letter had been referred by Gen. Grant, replied:

"The President directs me to say to you that he wishes you to have no conference with Gen. Lee, unless it be for the capitulation of Lee's army, or on solely minor or purely military matters. He instructs me to say that you are not to decide, discuss, or confer upon any political question. Such questions the President holds in his own hands and will submit them to no military conferences or conventions. Meantime you are to press to the utmost your military advantage." Draper, Am. Civil War, Vol. III, p. 561, cited by Spaight, p. 250.

that on account of their valorous resistance they are authorized to march out from the garrison with the "honors of war."²²

(b) The disarming of the place and of the defenders:

It frequently occurs that the officers are allowed to retain their arms, equipment, and certain specified articles of personal property.²³

(c) The turning over of the arms and matériel, and, in a proper case, the locating of the mine defenses, etc.:

The French, Russian, and other Governments require that in every case the commander of the place must not surrender until he has destroyed all flags, but this should be done before signing the capitulation.²⁴

(d) Provisions relative to private property of prisoners, including personal belongings and valuables:

Usually prisoners retain the ownership of their effects, personal belongings and valuables. However, they can be deprived temporarily of the possession of them as a measure of safety.²⁵

(e) The evacuation of and taking possession of the surrendered place.

The provisions relative to the withdrawal of the defenders and the entering into possession by the besiegers are fixed in advance with absolute precision, according to the circumstances of each case.

Commissions are named for the delivery and taking possession, respectively.²⁶

(f) Provisions relative to the medical personnel, sick, and wounded.²⁷

²² For examples see *Surrender of Belfort*, in 1871; *Bellair's Transvaal War*, 1880-81, p. 272. At *Potchefstroom*, in 1881, the troops were allowed the honors of war. In 1855 the garrison at *Kars* marched out with the honors of war, but became prisoners.

²³ The officers are not usually allowed to take their horses, although sometimes permitted to retain private mounts.

Mr. Spaight, in his *Laws of War on Land*, pp. 258-259, gives a table showing the disposition of certain property at *Kars* (1855), *Vicksburg* (1863), *Appomattox* (1865), *Sedan* (1870), *Strasburg* (1870), *Metz* (1870), *Belfort* (1871), *Bitsche* (1871), *Avliar* (1877), *Wei-hai-wei* (1895), *Santiago* (1898), *Manila* (1898), *Verliesfontein* (1900), and *Port Arthur* (1905), as follows: War matériel, etc., surrendered entirely in every case but two, when only partially; arms and troops, surrendered in all cases except three; officers' swords, retained in all cases except at *Wei-hai-wei*; officers' private property, retained (at *Sedan* by paroled officers only); troops' private property, retained (at *Appomattox* clothing only retained); officers' horses, surrendered in 8 cases, retained in 4 cases, private owned in 1 case, and 1 horse each in 1 case; troops' horses, surrendered in 10 cases, retained in 3 cases.

²⁴ Gen. Stoessel destroyed all Russian flags at *Port Arthur*. (Ariga, 309-310.)

²⁵ Gen. Grant declined to permit Confederate officers at *Vicksburg* to take their servants (slaves) as private property. (Draper, Vol. III, p. 52.) The Japanese permitted the men to take with them their tents and necessary personal belongings, the officers to take baggage within the limits of weights fixed for corresponding ranks in the Japanese Army, though reasonable excesses were not objected to. (Ariga, p. 312.) The Japanese declined to assume any responsibility for the private property of Russian officers. (Ariga, p. 325.) Vide ante as to prisoners, pars. 52-55.

²⁶ The details for the evacuation and taking possession of *Port Arthur* were incorporated in an annex to the convention. For latter see Appendix D, this chapter.

²⁷ The provision with regard to the medical personnel, sick, and wounded is contained in Art. IX of the treaty of *Port Arthur*. Appendix D, this chapter, and conforms to the provisions of *The Hague and Geneva Conventions*.

(g) Provisions for taking over the civil government and property of the place, with regard to the peaceable population.

These, together with the preparation of the lists of prisoners, repatriation of prisoners, etc., may be arranged in what is known as the appendix to the original terms of the convention.²⁰

(h) Stipulations with regard to the immediate handing over to the besiegers of certain forts or places, or other similar provisions, as a pledge for the fulfillment of the capitulation.²¹

255. Damage or Destruction of Property Prohibited After Capitulation. So soon as a capitulation is signed, the capitulator has no right to demolish, destroy, or injure the works, arms, stores, or ammunition in his possession during the time which elapses between the signing and the execution of the capitulation, unless otherwise stipulated in same.²²

256. Denunciation of Capitulation. A capitulation can be denounced and hostilities immediately resumed for failure to execute any clause which has been agreed upon, or in case it was obtained through a breach of faith.²³

²⁰ The civil and military archives may be left in the hands of the officials of the vanquished party. *Land Warfare, Opp.*, par. 319.

²¹ This was done at Paris and likewise at Port Arthur. See treaties, Appendix D, this chapter.

²² "Nothing, however, prevents a commander who intends to surrender from destroying fortifications, war material, and stores, the possession of which might assist the enemy, providing he does so before signing the capitulation."

Marshal Bazaine was tried for surrendering Metz and was sentenced to death and military degradation for treating with the enemy "without having previously done all that duty and honor required." He was charged, among other things, with failing to destroy his arms and ammunition before surrendering. *Cassell's History*, Vol. I, p. 296. *Hozier, Franco-Prussian War*, Vol. II, p. 121. Cited in *Spaight, War on Land*, p. 252.

²³ *Land Warfare, Opp.*, p. 324. "It may not, however, be annulled, because one of the parties has been induced to agree to it by ruse, or from motives for which there is no justification, or by his own incapacity or feebleness."

In 1898 the Spanish Government contended that the capitulation of Manila, which occurred on the 14th, was null and void, because the protocol which was signed two days before, on August 12, stipulated that the hostilities should cease. The United States claimed that by the terms of the protocol it was to take effect upon receipt of notice of same; that notice had been immediately dispatched, but was not received in Manila before the capitulation, and added further that "as to the nature of the right by which the United States holds the city, bay, and harbor of Manila, it is the opinion of this Government that it is immaterial whether the occupation is to be considered as existing by virtue of the capitulation or by virtue of the protocol, since in either case the powers of the military occupant are the same." *Vide Dig. Int. Law, Moore*, sec. 1160. Mr. Oppenheim says in this connection: "A capitulation which took place after a general armistice has been agreed upon, and of which the parties to the capitulation had had no knowledge, is null and void, unless the armistice stipulated cessation of hostilities from the time when notification reaches the different forces concerned, and not from the date of signature." *Land Warfare*, par. 325.

APPENDIX A.

CAPITULATION AT METZ, 1870.

PROTOCOL.

Between the undersigned, the chief of the staff of the Prussian Army before Metz, and the chief of the staff of the French Army in Metz, both being delegated with full powers by H. R. H. General of Cavalry Prince Frederick Charles of Prussia, and by H. E. the Commander in Chief, Marshal Bazaine, the following agreement has been ratified:

Article I. The French Army under the orders of Marshal Bazaine are prisoners of war.

Art. II. The fortress and the town of Metz, with all the forts, matériel of war, stores of all kinds, and all public property, will be handed over to the Prussian Army in the same condition in which it stands at the time of signing this agreement. Forts St. Quentin, Plappeville, St. Julien, Queuleu, and St. Privat, as well as the Mazelle Gate (Strassburg Road) will be handed over on Saturday, the 29th of October, at noon, to the Prussian troops. At 10 a.m. that day artillery and engineer officers, with some noncommissioned officers, will be admitted into the above-mentioned forts for the purpose of taking over the powder magazines and rendering harmless any mines that might exist.

Art. III. The arms, as well as the whole of the war matériel of the army, consisting of the colors, eagles, cannon, mitrailleuses, horses, money chests, military wagons, ammunition, etc., will be handed over, in Metz and in the forts, to a commission appointed by Marshal Bazaine, for the purpose of being transferred immediately after to Prussian commissaries.

The troops, disarmed, will be drawn up by regiment or by corps, and will be brought in parade order to the places which shall be indicated for each corps.

The officers will then return to the lines of the intrenched camp or to Metz, but on the condition that they are hereby bound on their word of honor not to quit Metz without orders from the Prussian commandant.

The troops will then be conducted by their noncommissioned officers to their places of bivouac.

The soldiers will retain their knapsacks, effects, and camp equipment (tents, blankets, cooking utensils, etc.).

Art. IV. All generals and other officers, in addition to those military officials holding the relative rank of officers, who give their word of honor in writing not to serve against Germany during the present war, nor to act against its interests in any other manner, will cease to be prisoners of war.

The officers and officials who accept this condition will retain their arms and personal property.

In consideration of the valor displayed by both the army and the garrison during the campaign, those officers who elect to be prisoners of war will be permitted, in addition, to take with them their swords and their personal property.

Art. V. All army doctors will remain at Metz in order to look after the wounded; they will receive the privileges in conformity with the Geneva Convention. The same is to apply to the personnel of the hospitals.

Art. VI. Explanations with regard to certain points, more particularly with regard to local interests, are treated in an appendix hereto annexed, which has the same authority as the present protocol.

Art. VII. Any article which might admit of doubt will always be interpreted in favor of the French Army.

Done at Château Frescaty, 27th October, 1870.

(Signed) V. STIEHLE.
(Signed) JARRAS.

[APPENDIX.]

Article 1. The civil officials, superior and inferior, belonging to the army or the fortress, now present at Metz, may proceed whither they desire and take all their property with them.

Art. 2. No one, whether he belong to the national guard or be he an inhabitant of the town, or a fugitive therein, shall be liable to punishment, either on account of political or religious views, or for any share that he may have taken in the defense, or on account of any assistance he may have rendered to the army or to the garrison.

Art. 3. Sick and wounded left in the town shall receive every care which their condition may require.

Art. 4. Families which may be left in Metz by the garrison shall not be molested, and, like the civil officials, may likewise depart without let or hindrance with all that belongs to them.

The furniture and effects which the members of the garrison are compelled to leave in Metz shall neither be plundered nor confiscated, but shall remain their property. It will be optional with them to cause this property to be fetched away within a period of six months from the conclusion of peace or their release from captivity.

Art. 5. The commander-in-chief of the Prussian Army undertakes the duty of preventing any damage being done either to the persons or goods of the inhabitants.

In the same manner the property of the Department, of the parishes, of trade or other unions, of civil or spiritual or other corporations, of work-houses or charitable institutions, shall remain uninjured.

The privileges which on the day of the capitulation the corporations and societies, as also private persons, may mutually exercise, according to French law, shall in no wise be interfered with.

Art. 6. To this end it is especially arranged that all local administrations, as also the above-mentioned societies or corporations, shall retain those archives, books, papers, collections, and documents of every kind which may be in their possession.

The notaries, advocates, and other judicial officials shall retain their archives and deeds or deposits.

Art. 7. The archives, books, and papers belonging to the state shall remain generally in the fortress, and at the conclusion of peace all such documents as refer to those districts reverting to France shall be returned to France.

The outstanding amounts which are necessary for the adjustment of the accounts, or which might give rise to lawsuits, to reclamations on the part of third persons, shall remain in the hands of those officials or agents to whom they are at present intrusted; the provisions of the preceding paragraph in this respect undergo amendment.

Art. 8. With regard to the movement of the French troops from their bivouacs as prescribed by Article III of the protocol, the following course will be adopted: The officers will lead their troops to the points and in the directions as below prescribed. On arrival at their destinations they will deliver to the Prussian commander of troops a statement of the effective of the troops under their orders, after which they will hand over the command to the noncommissioned officers and withdraw.

The Sixth Corps and Forton's Cavalry Division will follow the road from Thionville to Ladonchamps.

The Fourth Corps, moving between Forts St. Quentin and Plappeville along the Amanvillers Road, will be led as far as the Prussian lines.

The guard, the general artillery reserve, the engineers, and equipage train of the headquarters, passing along the railway embankment, will take the road to Nancy as far as Tournebride.

The Second Corps, with Laveaucoupet's Division and Lapasset's Brigade, which belong to it, will move along the road to Magny-sur-Seille, and will halt at St. Thiebault farm.

The Gardes Mobiles of Metz and other troops of the garrison, except Laveaucoupet's Division, will move along the Strassburg Road as far as Grigy.

Lastly, the Third Corps will move along the Saarbrücken Road as far as Bellecroix farm.

Done at Château Frescaty, 27th October, 1870.

(Signed) V. STIEHLE.
(Signed) JARRAS.

APPENDIX B.

CAPITULATION OF SANTIAGO, 1898.

Terms of the military convention for the capitulation of the Spanish forces occupying the territory which constitutes the division of Santiago de Cuba, and described as follows: All that portion of the island of Cuba east of a line passing through Aserradero, Dos Palmas, Cauto Abajo, Escondida, Tanamo, and Aguidora, said troops being in command of Gen. José Toral, agreed upon by the undersigned commissioners: Brig. Gen. Don Federico Escario, Lieut. Col. of Staff Don Ventura Fontan, and, as interpreter, Mr. Robert Mason, of the city of Santiago de Cuba, appointed by Gen. Toral, commanding the Spanish forces, on behalf of the Kingdom of Spain, and Maj. Gen. Joseph Wheeler, United States Volunteers; Maj. Gen. H. W. Lawton, United States Volunteers; and First Lieut. J. D. Miley, Second Artillery, aid-de-camp, appointed by Gen. Shafter, commanding the American forces, on behalf of the United States:

1. That all hostilities between American and Spanish forces in this district absolutely and unequivocally cease.

2. That this capitulation includes all the forces and war material in said territory.

3. That the United States agrees with as little delay as possible to transport all the Spanish troops in said district to the Kingdom of Spain, the troops being embarked, as far as possible, at the port nearest the garrisons they now occupy.

4. That the officers of the Spanish Army be permitted to retain their side arms and both officers and private soldiers their personal property.

5. That the Spanish authorities agree to remove, or assist the American Navy in removing, all mines or other obstructions to navigation now in the harbor of Santiago and its mouth.

6. That the commander of the Spanish forces deliver, without delay, a complete inventory of all arms and munitions of war of the Spanish forces in above-described district to the commander of the American forces; also a roster of said forces now in said district.

7. That the commander of the Spanish forces, in leaving said district, is authorized to carry with him all military archives and records pertaining to the Spanish Army now in said district.

8. That all that portion of the Spanish forces known as volunteers, mobilizados, and guerrillas who wish to remain in the island of Cuba are permitted to do so upon condition of delivering up their arms and taking a parole not

to bear arms against the United States during the continuance of the present war between Spain and the United States.

9. That the Spanish forces will march out of Santiago de Cuba with honors of war, depositing their arms thereafter at a point mutually agreed upon, to await their disposition by the United States Government, it being understood that the United States commissioners will recommend that the Spanish soldier return to Spain with the arms he so bravely defended.

10. That the provisions of the foregoing instrument become operative immediately upon its being signed.

Entered into this 16th day of July, 1898, by the undersigned commissioners, acting under instructions from their respective commanding generals and with the approbation of their respective governments.

APPENDIX C.

CAPITULATION OF MANILA.

Manila, August 14, 1898.

The undersigned having been appointed a commission to determine the details of the capitulation of the city and defenses of Manila and its suburbs, and the Spanish forces stationed therein, in accordance with the agreement entered into the previous day by Maj. Gen. Wesley Merritt, United States Army, American commander-in-chief in the Philippines, and his excellency Don Fermin Jaudenes, acting general in chief of the Spanish Army in the Philippines, have agreed upon the following:

1. The Spanish troops, European and native, capitulate with the city and its defenses, with all the honors of war, depositing their arms in the places designated by the authorities of the United States, and remaining in the quarters designated and under the orders of their officers and subject to control of the aforesaid United States authorities, until the conclusion of a treaty of peace between the two belligerent nations.

All persons included in the capitulation remain at liberty, the officers remaining in their respective homes, which shall be respected as long as they observe the regulations prescribed for their Government and the laws in force.

2. Officers shall retain their side arms, horses, and private property.

3. All public horses and public property of all kinds shall be turned over to staff officers designated by the United States.

4. Complete returns in duplicate of men by organizations, and full lists of public property and stores, shall be rendered to the United States within 10 days from this date.

5. All questions relating to the repatriation of officers and men of the Spanish forces and of their families and of the expenses which said repatriation may occasion, shall be referred to the Government of the United States at Washington.

Spanish families may leave Manila at any time convenient to them.

The return of the arms surrendered by the Spanish forces shall take place when they evacuate the city or when the American Army evacuates.

6. Officers and men included in the capitulation shall be supplied by the United States, according to their rank, with rations and necessary aid as though they were prisoners of war, until the conclusion of a treaty of peace between the United States and Spain.

All the funds in the Spanish treasury, and all other public funds, shall be turned over to the authorities of the United States.

7. This city, its inhabitants, its churches and religious worship, its educational establishments, and its private property of all descriptions are placed under the special safeguard of the faith and honor of the American Army.

F. V. GREENE,

Brigadier General of Volunteers, United States Army.

Coronel de Estado Mayor.

APPENDIX D.

THE TERMS OF THE CAPITULATION OF PORT ARTHUR, 1904.

Article I. The military and naval forces of Russia in the fortress and harbor of Port Arthur, as well as the volunteers and the officials, shall all become prisoners.

Art. II. The forts and fortifications of Port Arthur, the warships and other craft, including torpedo craft, the arms, the ammunition, the horses, all and every material for warlike use, shall be handed over as they are to the Japanese Army.

Art. III. When the above two articles are agreed to, the following steps shall be taken by way of guaranty, namely, by noon on the 3d instant all garrisons shall be withdrawn from fortifications and forts at I-zu-shan, Hsiao-an-tzu-shan, Ta-an-tzu-shan, and all the highlands on the southeast of these, and the said fortifications and forts shall be handed over to the Japanese Army.

Art. IV. Should it be recognized that the Russian military or naval forces destroy or take any other steps to alter the condition of the things enumerated in Article II and actually existing at the time of the signature of this agreement, these negotiations shall be broken off and the Japanese Army will break off negotiation and resume freedom of action.

Art. V. The officers of the Russian military and naval forces of Port Arthur shall compile and hand to the Japanese Army maps showing the arrangement of the defenses, the positions of mines and torpedoes or other dangerous objects, as well as lists of the organization of the naval and military forces in Port Arthur, nominal rolls of the military and naval officers, their ranks

or grades, similar rolls relating to the warships, lists of the ships of all descriptions and their crews, and tables of the noncombatants, male and female, their nationalities and their occupations.

Art. VI. The arms (including those in the hands of the forces), the ammunition, and all material for war uses (except private property) shall be all left in their present positions. Rules relating to the handing over and receipt of these objects shall be arranged by commissioners from the Russian and Japanese Armies.

Art. VII. The Japanese Army, as an honor to the brave defense made by the Russian Army, will allow the officers of the Russian military and naval forces and the officials attached to the said forces to retain their swords, together with all privately owned articles directly necessary for daily existence. Further, with regard to the said officers, officials, and volunteers, such of them as solemnly pledge themselves in writing not to bear arms again until the close of the present war, and not to perform any act of whatsoever kind detrimental to the interests of Japan, shall be permitted to return to their country, and one soldier shall be allowed to accompany each officer of the army or navy. These soldiers shall be required to give a similar pledge.

Art. VIII. The disarmed noncommissioned officers and men of the army and navy, as well as of the volunteers, wearing their uniforms, carrying their tents and all privately owned necessities of daily life, shall under the command of their respective officers assemble at places indicated by the Japanese Army. The details of this arrangement will be shown by the commissioners of the Japanese Army.

Art. IX. The officials of the sanitary and paymaster's departments of the Russian military and naval forces in Port Arthur shall remain and continue to discharge their duties under the control of the Japanese sanitary and paymaster's departments so long as the Japanese Army deems it necessary for ministering and affording sustenance to the sick, the wounded, and the prisoners.

Art. X. Detailed regulations with reference to the management of the noncombatants, the administration of the town, the performance of financial duties, the transfer of documents relating to these matters, and with reference to the carrying out of the agreement in other respects shall be entered in an appendix to this agreement. Such appendix shall have the force of the agreement itself.

Art. XI. Each of the contracting parties shall receive one copy of this agreement, and it shall become operative from the time of its signature.

CHAPTER VII, SECTION III.

ARMISTICES.

256a. Armistice Defined. An armistice is the cessation of active hostilities for a period agreed on between belligerents. It must be agreed upon in writing and duly ratified by the highest authorities of the contending parties."

257. Effect of Armistice. H. R. Art. XXXVI. An armistice suspends military operations by mutual agreement between the belligerent parties. If its duration is not defined, the belligerent parties may resume operations at any time, provided always that the enemy is warned within the time agreed upon, in accordance with the terms of the armistice.

258. Nature of. An armistice is not a partial or a temporary peace; it is

"G. O. 100, 1863, art. 135.

only the suspension of military operations to the extent agreed upon by the parties."

259. When Binding. An armistice is binding upon the belligerents from the day of the agreed commencement, but the officers of the armies are responsible from the day only when they receive official information of its existence."

260. Importance of Fixing Time of. In all armistices it is of the utmost importance that the exact moment for the commencement and for the termination of same shall be fixed in the terms thereof beyond any possibility of mistake or misconception."

261. What May Be Done During an Armistice. An armistice need not in terms prohibit actual hostilities." Anything else may be done during an armistice that is not in express terms prohibited by the agreement."

262. Form of Armistice. No special form for an armistice is prescribed. It should, whenever practicable, be reduced to writing, in order to avoid misunderstandings and for purposes of reference should differences of opinion arise. It should be drafted with the greatest precision and with absolute clearness as to statements."

263. Kinds of Armistice. H. R. Art. XXXVII. An armistice may be general or local. The first suspends the military operations of the belligerent States

"G. O. 100, 1863, art. 142. A treaty of peace, after signature, but before ratification, operates as a general armistice. It acts as an armistice if no separate armistice is concluded. Hall, Int. Law, 5th ed., 559.

"G. O. 100, 1863, art. 139.

"Hostile relations are too far-reaching in their results not to furnish cause for complaints, recriminations, and even reprisals in case of violations, or supposed violations, of the time for passing from the actual hostilities to peaceable relations or the reverse. In case of a short armistice, as for a few hours, no difficulty appears. If the term be for a designated number of days, questions arise as to whether the first or last day is inclusive or exclusive. In case an armistice is for an indefinite period, good faith requires that notice must be given of intention to resume hostilities.

A good example of an indefinite period in an armistice which was to terminate upon reasonable notice given by either party is that between Gen. Sherman and Gen. J. E. Johnston near Durham, N. C., in April, 1865. The armistice agreed upon was disapproved at Washington as containing political stipulations, whereupon Gen. Sherman was instructed to notify Gen. Johnston of the termination of the armistice and to resume hostilities "at the earliest moment, acting in good faith." Whereupon Sherman sent the following notice to Johnston:

"You will take notice that the truce or suspension of hostilities agreed to between us will cease in 48 hours after this is received in your lines, under the first of the articles of agreement." (Sherman's memoirs, pp. 346, 358, 367.)

"Actual hostilities will provide, of course, that firing shall cease; that the belligerents must not gain ground to the front; and, during siege operations, "that the besieger must cease all extension, perfection, or advance of his attacking works, as much so as from attacks by main force." (G. O. 100, 1863, art. 142.)

"In modern practice the principle has been followed that what is not expressly prohibited is allowed. The principle "that a belligerent must abstain from everything which the other could have prevented had there been no armistice," is rejected by continental armies. (See Spaight, War Rights on Land, pp. 235-238; Ariga, p. 560; Les Lois, Jacomet, p. 90.)

"For forms of armistice, see appendices, this section.

everywhere; the second only between certain fractions of the belligerent armies and within a fixed radius."

264. General Armistice. General armistices are of a combined political and military character. They usually precede the negotiations for peace, but may be concluded for other purposes." Due to its political importance, a general armistice is concluded by the Governments concerned or by their commanders-in-chief, and are ratified in all cases. General armistices are frequently arranged by diplomatic representatives."

265. Local Armistice. A local armistice suspends operations between certain portions of the belligerent forces, or within a designated district of the theater of operations. A local armistice may be concluded by the military forces only, or by the naval forces only, or between a less number than all of the belligerents at war."

266. Suspension of Arms. A suspension of arms is a form of armistice concluded between commanders of armies, or even of detachments, for some local military purpose: such as to bury the dead, to collect the wounded, to arrange for exchange of prisoners, to enable a commander to communicate with his Government or superior officer."

267. Notification of Armistice. H. R. Art. XXXVIII. An armistice must be notified officially and in good time to the competent authorities and to the troops. Hostilities are suspended immediately after notification, or on the date fixed."

268. Intercourse in Theater of Operations. H. R. Art. XXXIX. It rests with the contracting parties to settle, in the terms of the armistice, what intercourse may be held in the theater of war with and between the populations."

"The following names have been applied to armistices, viz.: general and local as in the text (the term special is used in G. O. 100, 1863, art. 137), truce, local truce, cessation of hostilities, cessation of arms, and suspension of arms. The continental writers still make use of the terms armistice and suspension of arms. As a matter of fact, there is no essential difference between truces, suspensions of arms, and armistices.

"A general armistice may not apply to all of the forces in the field. The armistice executed in Paris on the 28th of January, 1871, which preceded the peace, was called a "general armistice," and yet it excluded the Departments of Doubs, Jura, and Cote d'Or and the town of Belfort.

"The armistice at the close of the Franco-German War in 1870 was concluded between Count von Bismarck and Jules Favre, and the armistice which closed the Russo-Japanese War was concluded at Portsmouth, N. H., by diplomatic representatives. In the latter case the detailed conditions were settled by the military authorities in Manchuria.

"G. O. 100, 1863, art. 137, par. 1: "An armistice may be general and valid for all points and lines of the belligerents; or special, that is, referring to certain troops or certain localities only."

"The above distinction as stated is not absolutely essential, although Mr. Oppenheim still draws the distinction between the three forms mentioned in the above text (Land Warfare, pp. 56-57). But see Westlake, War, part 2, p. 92, and Spaight, War on Land, pp. 233-234. A suspension of arms was asked for by the governor of Manila of Admiral Dewey on Aug. 9, 1898, which would allow him to communicate with his Government and receive instructions.

"Vide par. 259.

"This translation of the text is copied from that of Messrs. Westlake and Spaight, and is believed to more accurately express the intent of the framers. The original from which this article was probably taken is in G. O. 100 of

269. Rule in Absence of Stipulation. If nothing is stipulated, the intercourse remains suspended, as during actual hostilities.⁴

270. What Stipulations Armistice Should Contain. The following stipulations should be incorporated in an armistice:

(a) The precise date, day, and hour of the commencement of the armistice. The date of commencement of an armistice may be different for different parts of an army.⁵

(b) The Duration of the Armistice. The duration may be for a definite or indefinite period, and may terminate with or without notice of expiration. In case it is indefinite, a belligerent may resume operations at any time, with due notice given. If the term is fixed and no agreement has been made for prolonging same, hostilities may be resumed without notice in the absence of positive terms to the contrary. An armistice commences, in the absence of express mention to the contrary, at the moment it is signed.⁶

(c) The principal lines and all other marks or signs necessary to determine the locations of the belligerent troops should be fixed. Belligerents frequently make use of maps with the lines indicated shown thereon, which maps are made part of the convention. A neutral zone is frequently determined upon between the two armies. These lines are not to be crossed or the

1863, art. 141: "It is incumbent upon the contracting parties of an armistice to stipulate what intercourse of persons or traffic between the inhabitants of the territories occupied by the hostile armies shall be allowed, if any. If nothing is stipulated the intercourse remains suspended, as during actual hostilities."

Our own official translation is as follows:

"It rests with the contracting parties to settle, in the terms of the armistice, what communications may be held in the theater of war with the inhabitants and between the inhabitants of one belligerent State and those of the other."

The British official translation is as follows:

"It is for the contracting parties to settle, in the terms of the armistice, what communications may be held, on the theater of war, with the populations and with each other."

Of course, what is intended to be regulated is the intercourse of the population of the occupied territory with the population of the country still held by the enemy (in both cases nationals of the enemy State), and also between each belligerent force and the inhabitants of the localities held by the other.

⁴ G. O. 100, 1863, art. 141, par. 2. The French manual, p. 61, states: "If the contracting parties have omitted to arrange as to the mutual relations of the population during the armistice, each belligerent preserves the absolute right to settle the question as he chooses on the territory held by him. An armistice is not a temporary peace; it leaves the state of war in existence; consequently the comings and goings of the inhabitants about the respective positions or within the neutral zone may offer inconveniences and facilitate spying."

⁵ Vide par. 260, *supra*.

⁶ In 1898 Spain protested against hostilities being continued during the negotiations for an armistice in Washington. The United States replied that it was a belligerent's strict right to continue operations so long as an armistice had not been concluded.

In 1865 Gen. Wilson captured Macon, Ga., during an armistice between Gens. Sherman and Johnston, of which Gen. Wilson had been informed by Gen. Cobb, but not by his own commander. Gen. Sherman directed him to release the captured Confederate generals (Cobb, G. W. Smith, and McCall) and to occupy ground outside of Macon.

zone entered except by parlementaires or other parties by special agreement for specified purposes, such as to bury the dead and collect the wounded.²⁷¹

(d) The relation of the armies with the people. In the absence of stipulations to the contrary, each belligerent will exercise toward the inhabitants the rights of belligerents over occupied territory, such as billeting troops, requisitioning supplies, etc., as well as all intercourse between them.²⁷²

(e) What acts are prohibited during the armistice. In the absence of stipulations to the contrary, each belligerent is authorized to make movements of troops within his own lines, to receive and instruct recruits, to construct intrenchments, to repair bridges, to establish new batteries, and, in general, to take advantage of the time and means at his disposal to prepare for resuming hostilities. This includes the right to continue espionage, but does not include the right to introduce supplies into a fortress unless especially stipulated in the agreement.²⁷³

271. Denunciation of Armistice. H. R. Art. XL. Any serious violation of the armistice by one of the parties gives the other party the right of denouncing it, and even, in cases of urgency, of recommencing hostilities immediately.

272. Must Not Constitute Perfidy. To denounce an armistice without some very serious breach, and to surprise the enemy before he can have time to put himself on guard, would constitute an act of perfidy. In the absence of extreme urgency, some delay should be given between the denunciation and resumption of hostilities.²⁷⁴

273. Armistice No Excuse for Lack of Vigilance. The existence of an armistice does not warrant relaxation of vigilance in the service of security and protection, or in the preparedness of troops for action, or exposing positions to the enemy.²⁷⁵

274. Violations by Individuals. H. R. Art. XLI. A violation of the terms of the armistice by individuals acting on their own initiative only entitles the injured party to demand punishment of the offenders or, if necessary, compensation for the losses sustained.

²⁷¹ It is customary to designate the roads that are to be used by all parties entering or passing through a neutral zone. Vide general form armistice, Appendix A, this section.

²⁷² Vide Spaight, War Rights on Land, p. 247.

²⁷³ Les Lois, Jacomet, art. 133. Vide note 39, par. 261, supra.

In the Brussels Conference it was proposed to make the matter clear as to what a belligerent may or may not do after an armistice is concluded, by specifying that "on the conclusion of an armistice, what each of the parties may do and what he may not do shall be precisely stated."

This was not passed because of the belief that this was implied in Art. XXXVI of the present rules. See the French rule in note 48, par. 269, supra. For practice during modern wars which conform to the foregoing principle, see Spaight, War Rights on Land, pp. 233 et seq.

²⁷⁴ Land Warfare, Opp., pars. 296-297.

²⁷⁵ At the second battle of Fredericksburg, May 5, 1863, the Federals discovered the weakness of Gen. Barksdale's force during a suspension of hostilities to collect the wounded after the second repulse. *Memoirs, Alexander*, p. 351. In the suspension of arms at Wynnes Hill, during the relief of Ladysmith, many of the burghers stood up and disclosed the position of their trenches, which until then had not been located by the enemy. *South African War, Vol. II*, p. 602.

275. Soldiers Captured Violating Armistice Are Prisoners of War. Soldiers captured in the act of breaking an armistice must be treated as prisoners of war. Such acts do not justify denunciation of the armistice.⁶⁶

APPENDIX A.

FORM OF ARMISTICE.

ARMISTICE BETWEEN TWO OPPOSING FORCES.

A B, authorized by C D, commander in chief of the United States forces in, and E F, authorized by G H, commander in chief of the troops in, agree to the following articles:

Art. 1. On the publication of this armistice, hostilities shall cease between the United States and forces at all points along the frontier of between and

Art. 2. The armistice shall continue until noon on the day of, and until such further time as is hereinafter mentioned.

Art. 3. Either side may at any time on or after the said day of, give days' notice of its intention to determine the armistice, and the armistice shall be determined at the expiration of such days. Notice shall be given by writing, stating the intention to determine the armistice, and sent from the headquarters of one army to the headquarters of the other army. In reckoning time for the purpose of the said days' notice, the day on which the notice is given, at whatever hour the same may be given, shall be reckoned as an entire day, and the armistice shall expire at midnight on the day succeeding the day on which the notice is given.

Art. 4. The lines of demarcation shown on the attached map shall be strictly adhered to during the armistice. The territory lying between the two lines of demarcation shall be strictly neutral, and any advance into it by any member of either army is prohibited except for the purposes of communication between the two armies. Neither army shall extend its line in a or direction beyond the points shown as the extremities of their respective lines.

Art. 5. Subject to the restrictions mentioned in the fourth article, as respects making an advance into the neutral territory, either army may take measures to strengthen its position, and may receive reinforcements and stores of warlike and other material, and may do any other act not being an act of direct hostility.

Art. 6. During the two days following the day on which this armistice is ratified, burial parties from both armies shall be permitted to visit the field of battle of the instant, for the purpose of burying the dead.

Art. 7. The main road from A to B via C will be used for communication between the commanders in chief of the two armies.

⁶⁶ Mr. Oppenheim says: "There is no justification in such circumstances for a renewal of hostilities, unless the behavior of these individuals is approved of or sanctioned by their superiors. If, however, the violation of the armistice by individuals acting on their own initiative be repeated, and if it become evident that the adversary is unable to repress such abuses, there might be no other way, after proper protest, to obtain redress except by denouncing the armistice." Land Warfare, art. 299; Ariga, p. 555, states that "during the armistice frequent reports were received that Russian soldiers entered the neutral zone in violation of the third article of the protocol. We have never believed, however, that we should make any complaint with regard to this, because it was a question in reality only of small individual infractions which should have no influence upon the general effect of the armistice."

Art. 8. During the continuance of the armistice the peaceful inhabitants of the country shall be allowed to pursue their occupations, and to buy from or sell to either army provisions or goods, but any measures consistent with the observance of the articles of the armistice in relation to the neutral territory may be taken by either army to prevent inhabitants, after entering the lines of or obtaining information respecting one army, from passing or carrying information to the other army.

Art. 9. This armistice shall come into force immediately on its ratification by the commanders in chief of the two armies, and officers shall be dispatched with all speed, from the headquarters of each army, to give notice of the armistice at all points along the line.

APPENDIX B.

FORM OF ARMISTICE.

BETWEEN BESIEGING FORCE AND GARRISON.

A B, general, commander in chief of the United States forces now in, and C D, general, commander in chief of the garrison of, agree to the following articles:

Article 1. An armistice between the United States troops investing and the troops forming the garrison of shall begin at noon on the instant and shall end at noon on the instant.

Art. 2. White flags shall be hoisted simultaneously at the beginning of the armistice, the one at, within the United States lines, and the other at Fort

The flags shall be kept flying during the continuance of the armistice and shall be lowered simultaneously at its conclusion.

Art. 3. Provisions to the extent of rations shall be supplied daily for the use of the garrison by the besiegers on payment of such sums as may be agreed upon as the value thereof by commissioners to be appointed by the above-named commanders in chief, respectively. The provisions shall be delivered to persons authorized to demand the same by the general commanding the garrison, at such times, and in such places in front of the United States lines, as may be agreed upon by the above-named commanders in chief, and shall be conveyed to the garrison by the persons authorized as above stated.

Art. 4. Save in so far as is provided by article 3, or as may be agreed upon between the above-named commanders in chief, it is agreed that the garrison shall not attempt to obtain succor, and that no communication whatever shall, during the armistice, take place between the garrison, whether friend or enemy, and a space of around the fortification shall be considered neutral ground, and no person whatever, whether he be a stranger or belonging to the garrison or to the besieging army, shall be allowed to enter on such space without the permission of the above-named commanders in chief.

Art. 5. General, commanding the garrison, engages on behalf of the garrison not to repair the fortifications or to undertake any new siege works, or do any act or thing whatsoever calculated to place the garrison in a better position in regard to its defense; and General, on behalf of the United States troops, engages not to undertake any siege works, or to make any hostile move against the garrison, but it is understood that he is at liberty to obtain fresh supplies of provisions or reinforcements of troops.

APPENDIX C.

FORM OF SUSPENSION OF ARMS FOR THE BURIAL OF THE DEAD, ETC.

General A B, commanding the United States forces at, and General C D, commanding the forces at, agree as follows:

Article 1. A suspension of arms for the space of three hours, beginning at 10 o'clock and ending at 1 o'clock on this day of is agreed to for the purpose of burying the dead and withdrawing the wounded.

Art. 2. The beginning of the suspension of arms shall be notified by two white flags hoisted simultaneously, the one within the United States lines, and the other within the lines. The white flags shall continue flying during the suspension of arms, and such flags shall be lowered simultaneously as a signal of the conclusion of the suspension of arms.

Art. 3. All firing shall cease during the suspension of arms.

Art. 4. The United States troops shall not, during the suspension of arms, advance beyond the line, and the troops shall not advance beyond the line. The space between the two lines shall be open to all persons engaged in burying the dead, or in attending to the wounded, or in carrying away the dead or wounded, but to no other persons.

APPENDIX D.

ARMISTICE AGREED ON BY JAPAN AND RUSSIA AT PORTSMOUTH (U. S. A.) OF 5TH SEPTEMBER, 1905.

The undersigned plenipotentiaries of Japan and Russia, duly authorized to that effect by their respective Governments, have agreed on the following terms of the armistice, which will remain in force until the execution of the treaty of peace:

(1) A certain distance (zone of demarcation) shall be fixed to separate the front of the armies of the two powers in Manchuria, and also in the Tumen region.

(2) The naval force of one of the belligerents may not bombard the territory occupied or belonging to the other.

(3) The taking of maritime prizes will not be interrupted by the armistice.

(4) During the armistice no reinforcements may be sent to the theater of war. Those who are on the way from Japan may not be sent north of Mukden, and those on the way from Russia may not be sent south of Harbin.

(5) The commanders of the military and naval forces will arrange the details of the armistice in accordance with principles above enunciated.

(6) The two Governments will issue the order to put this protocol into execution directly after the signature of the treaty of peace.

(Signed) WITTE.
ROSEN.

(Signed) KOMOURA.
TAKAHURA.

APPENDIX E.

PROTOCOL OF THE CONDITIONS OF THE ARMISTICE CONCLUDED IN MANCHURIA ON 13TH SEPTEMBER, 1905.

Article. 1. Fighting is suspended throughout the extent of Manchuria.

Art. 2. The space between the front lines of the Japanese and Russian Armies, which are indicated on the maps exchanged with the present protocol, constitutes the neutral zone.

Art. 3. Every person having the least connection with either of the armies is forbidden to enter the neutral zone on any pretext whatsoever.

Art. 4. The road leading from Shuang-miao-tzu to Sha-ho-tzu is to be employed for communication between the two armies.

Art. 5. The present protocol will come into force on the 16th (Russian style 3d) September, 1905, at midday, and will remain in force until the execution of the treaty of peace signed at Portsmouth by the plenipotentiaries of the two powers.

The present protocol is signed by the representatives of the commanders in chief of the Japanese and Russian Armies in Manchuria, in virtue of the full powers which have been given to them by the said commanders in chief.

Done on the road situated close to Sha-ho-tzu the 13th September, 1905, in two texts, Japanese and Russian, each party keeping a Japanese and a Russian text.

(Signed)

FUKUSHIMA,
Major General, etc.
ORANOUSKI,
Major General, etc.

APPENDIX F.

JAPANESE PROJECT FOR THE ARMISTICE IN THE TUMEN REGION.

Article 1. The Japanese and Russian Armies in the Tumen region will execute the armistice according to the stipulations of the present convention.

Art. 2. The Japanese Army will canton south of the line The positions of the Russian Army will be limited to the north of the line The region between these two lines will form the neutral zone.

Art. 3. No troops, patrols, or men sent on reconnaissance nor any individual belonging or attached to the army will be permitted to enter the neutral zone.

Art. 4. No preparations for attack or defense will be made near the line limiting the neutral zone. The necessary preparations for cantoning the troops will not be considered as preparations for attack or defense.

Art. 5. No requisitions of coolies, horses, or any other objects will be made in the neutral zone.

Art. 6. The Japanese and Russian Armies in the Tumen region will both commence to evacuate their troops beyond the lines indicated in article 2 on the third day, and must have completed the evacuation behind the lines by the seventh day from the signing of the present convention.

Art. 7. Once the convention is drawn up, the commanders of the Japanese and Russian Armies will order the troops and the officials under their command to execute the armistice, in such a manner that the order may reach them as soon as possible. They will at the same time notify the commanders of the land and sea forces.

Art. 8. This convention will come in force immediately it has been signed by the plenipotentiaries of the Japanese and Russian Armies; it will lapse on the execution of the treaty of peace.

Art. 9. The present convention will be drawn up in two Japanese and two Russian texts, each army keeping a text in each language.

(This project was not agreeable to the Russians and an armistice had not been concluded when the treaty of peace was ratified.)

APPENDIX G.

SUSPENSION OF ARMS AT THE SIEGE OF BELFORT, 13TH FEBRUARY, 1871.

It has been agreed by the undersigned, Capt. Krafft, of the auxiliary engineers, and Capt. von Schultzen-dorf, general staff, of the besieging army, both furnished with full powers by Col. Denfert-Rochereau, commandant of Belfort, and by Lieut. Gen. von Treskow, commandant of the besieging corps—

As follows:

(1) Lieut. Gen. von Treskow will send a telegram to Versailles to acquaint the Imperial Chancellor Count Bismarck that Col. Denfert-Rochereau requires direct instructions from his Government as regards the surrender of the fortress.

(2) Col. Denfert-Rochereau will send an officer to Bale to await the telegraphic instructions from the French Government.

(3) Until the return of this officer there will be a suspension of arms between the besieged and besiegers, beginning the 13th February at 11 p.m. Nevertheless, the suspension of arms may be denounced at any moment 12 hours before the time intended for the resumption of hostilities.

(4) During the suspension of arms the two parties shall remain in their present positions. The limits thus traced shall not be crossed, and, moreover, there shall be no communication on the part of civilians between the fortress and the outside.

(5) Col. Denfert-Rochereau engages to inform Lieut. Gen. von Treskow with the least possible delay of the decision he makes after receiving the instructions of the French Government.

The present convention has been made in duplicate original, one text in German and the other in French.

(Signed)

KRAFFT.
VON SCHULTZEN-DORF.
13th February, 1871.

CHAPTER VII, SECTION IV.

PASSPORTS, SAFE-CONDUCTS, SAFEGUARDS, AND CARTELS.

276. Passport Defined. A passport is a written document given to a person or persons by a commander of belligerent forces authorizing him or them to travel unmolested within the district occupied by his troops."

277. Safe-Conduct as to Persons. A safe-conduct is a document given to an enemy, alien, or other, person or persons by a commander of belligerent forces

"Mr. Spaight says: "The terms (passport and safe-conduct) appear to be convertible, though some would make the 'passport' confer a more extended liberty of movement than the 'safe-conduct' which they would confine to an authority to come to a specified place for a specified object" (War Rights on Land, p. 230).

Passports are issued by the State Department, or similar office in other countries, to diplomatic agents and others entering or traveling in foreign countries, which are of the same general character as those issued during war. The latter should, when practicable, have the photograph of the bearer attached. For form see appendix, this section.

authorizing him or them to go into places which they could not reach without coming into collision with armed forces actively operating against the enemy."²⁷⁸

278. Safe-Conduct as to Goods. A safe-conduct is a written authority or license to carry goods to or out of, or to trade in, a certain place or places otherwise forbidden by the laws of war, given by a commander of belligerent forces to an enemy, alien, or other person."²⁷⁹

279. Character of These Instruments. Both passports and safe-conducts fall within the scope of international law when granted by arrangement with the enemy or with a neutral power. The passports and safe-conducts as to persons are individual and nontransferable. A safe-conduct for goods, while restricted to the articles named in it, may be transferred from one person to another, provided it does not designate who is to carry the goods or to trade. They may be transferred when the licensee is designated; if the transferee is approved by the authorizing belligerent. The term "pass" is now frequently used instead of the older term "passport," and likewise the word "permit"; the word "pass" being used for a general permission to do certain things, the word "permit" being used like the word "safe-conduct," to signify permission to do a particular thing.

280. May Be Revoked. Passports and safe-conducts may be revoked by the commander issuing them or by his superiors for reasons of military expediency, but, until revoked, they are binding upon grantors and their successors. When a time is specified in the document it is valid only during such time. These documents should not be revoked for the purpose of securing the persons of the holders who should be given time to withdraw in safety; in case of violation of their terms the privilege will be withdrawn and the case investigated."²⁸¹ They are valid in the district of the commander who grants them only.

281. Licenses to Trade. Licenses to trade are general and special. A general license relaxes the exercise of the rights of war, generally or partially, in relation to any community or individuals liable to be affected by their operation. A special license is one given to individuals for a particular voyage or journey for the importation or exportation of particular goods."²⁸²

282. Safeguard. A safeguard is a detachment of soldiers posted or detailed by a commander of troops for the purpose of protecting some person or persons, or a particular village, building, or other property. The term "safe-

²⁷⁸ Safe-conducts are more frequently issued to enemy subjects. Safe-conducts were issued to the Boer leaders in April and May, 1902, to permit them to confer about the terms of surrender. (Spaight, p. 230.) Gen. Scott issued a safe-conduct to several members of the new Federal Congress to permit them to pass through the City of Mexico and a passport to Gen. Santa Anna's wife to permit her to join her husband. (Moore's Int. Law. Dig., sec. 1158.) For form see appendix, this section.

²⁷⁹ For form of safe-conduct see appendix, this section.

²⁸⁰ See Land Warfare, Opp., art. 334; Spaight, War Rights on Land, p. 230.

²⁸¹ Licenses to trade must, as a general rule, emanate from the supreme authority of the State. In certain exceptional cases the governor of a province, the general of an army, or the admiral of a fleet, may grant licenses to trade within the limits of their commands.

As to licenses to trade see the following cases:

The Sea Lion, 5 Wall., 630.

Coppell v. Hall, 7 Wall., 542.

Hamilton v. Dillin, 21 Wall., 73.

U. S. v. One hundred barrels of cement, 27 Fed. Cases, 292.

Dig. Int. Law, Moore, sec. 1141.

guard" is also used to designate a written order by a commander of belligerent forces for the protection of an enemy subject or enemy property. It is usually directed to the succeeding commander requesting the grant of protection to such individuals or property."

283. Inviolability of Soldiers as Safeguards. Soldiers on duty as safeguards are guaranteed against the application of the laws of war, and it is customary to send them back to their army when the locality is occupied by the enemy, together with their baggage and arms, as soon as military exigencies permit."

284. Cartels. In the customary military sense a cartel is an agreement entered into by belligerents for the exchange of prisoners of war. In its broader sense it is a convention concluded between belligerents for the purpose of arranging or regulating certain kinds of non-hostile intercourse otherwise prohibited by the existence of the war." A cartel is voidable as soon as either party has violated it."

APPENDIX.

Form of Passport.

(Place and date of issue.)

Authority is hereby granted to Mr. (or other title) living at (if on a mission, state the same), to pass out of the lines for the purpose of (state object of journey)

He will cross the lines by the road from A to B (or at a designated point) during the (forenoon, afternoon, or day) of (date).

He is authorized to take with him (persons, articles, carriages, etc.).

He will proceed to (name of destination) by the route C. D. E.

.....
(Signature of officer.)

.....
(Rank, etc.)

Photograph or
finger print
or signature.

Note. This passport is strictly personal and will be void unless used on the date stated.

Note. Blank forms for these should be issued at the commencement of hostilities. A photograph should be attached where the pass is for an extended period. A finger print or signature can be substituted if desired.

"The object of a safeguard is usually to protect museums, historic monuments, etc. A case of this which caused much discussion was the action of Gen. McClellan in placing a safeguard over the residence of Mrs. R. E. Lee in 1862. McClellan's Own Story, p. 360; Spaight, War Rights on Land, p. 231.

The French call the first kind vive and the second mort. "It is called dead (mort) or alive (vive) according to whether it consists in the simple posting of a notice showing the protection given to the establishment or, when, in order to insure the efficacy of the exemption accorded, there is placed over it a body of troops charged with enforcing the order." Les Lois, Jacomet, art. 139.

"Enemy safeguards which have been posted without previous arrangement ought, nevertheless, to be treated in the same way, provided that the circumstances of the case prove that their posting was bona fide." Land Warfare, Opp., par. 336.

"A cartel ship is a vessel engaged in the exchange of prisoners or in carrying official communications to the enemy. Such a ship is considered inviolable, but must not engage in hostilities or carry any implements of war except a signal gun." Land Warfare, Opp., par. 239.

United States v. Wright, 28 Fed. Cas., 796. Both belligerents are bound to observe the terms of the cartel, and they "are of such force under the law of nations that even the sovereign can not annul them."

"Vide G. O 100, 1863, art. 109.

In making application for a passport from the State Department, the applicant must make affidavit containing statement of his citizenship, residence, occupation, destination, and object of journey, and to which an oath of allegiance is attached. Attached is a description of the applicant and identification with address of witness testifying to applicant's identity. (This is or has been waived in certain cases.)

**SAFE CONDUCT.**

(Place and date of issue.)

.....residing at.....
(or if on a mission, the mission to be stated) is authorized
to proceed to for the purpose of

He will follow the route A. B. C.

He is authorized to take with him (persons, articles, vehicles).

This safe conduct is good until.....

All military authorities are directed to protect the bearer of this safe conduct and in nowise to molest him.

.....
(Signature of officer.)

.....
(Rank, etc.)

Note. This safe conduct is strictly personal and shall be void unless used within the time fixed.

FORMS OF SAFEGUARD.^a

(Date and place of issue.)

All officers and enlisted men belonging to the.....
(Name the army or subdivision thereof.)
.....are directed to respect the premises of.....
situated at.....

No requisitions thereon, nor damage thereto, will be permitted, and protection will be afforded by all officers and enlisted men against any person who shall attempt to act in violation of this order.

.....
(Signature of officer.)

.....
(Rank, etc.)

The following form was prescribed by Gen. Scott in Mexico:

SAFEGUARD.

By authority of Major Gen..... (or Brigadier Gen.....).

The person, the property, and the family of..... (or such a college, and the persons and things belonging to it; such mill, etc.), are placed under the safeguard of the United States. To offer any violence or injury to them is expressly forbidden; on the contrary, it is ordered that safety and protection be given to him or them in case of need.

Done at the headquarters ofthis.....day of....., 18...

^aForms for safeguards ought to be printed in blank, headed by the article of war relative thereto, and held ready to be filled up, as occasions may offer. A duplicate, etc., in each case might be affixed to the houses or edifices to which they relate.

57th Article of War: Whosoever, belonging to the armies of the United States in foreign parts, or at any place within the United States or their Territories, during rebellion against the supreme authority of the United States, forces a safeguard shall suffer death.

63rd Article of War: All retainers to the camp, and all persons serving with the armies of the United States in the field, though not enlisted soldiers, are to be subject to orders according to the rules and discipline of war.

CHAPTER VIII.

MILITARY AUTHORITY OVER THE TERRITORY OF THE HOSTILE STATE.

285. Military Occupation. H. R. Art. XLII. Territory is considered occupied when it is actually placed under the authority of the hostile army.

The occupation extends only to the territory where such authority has been established and can be exercised.

286. Occupation Question of Fact. Military occupation is a question of fact. It presupposes a hostile invasion as a result of which the invader has rendered the invaded Government incapable of publicly exercising its authority, and that the invader is in position to substitute and has substituted his own authority for that of the legitimate Government in the territory invaded.¹

287. Does Not Transfer Sovereignty. Being an incident of war, military occupation confers upon the invading force the right to exercise control for the period of occupation. It does not transfer the sovereignty to the occupant, but simply the authority or power to exercise some of the rights of sovereignty.² The exercise of these rights results from the established power of the occupant and is considered legitimate by reason of the necessity for maintaining law and order, indispensable for both the inhabitants and for the occupying force.³

288. Distinguished From Invasion. The state of invasion corresponds with the period of resistance. Invasion is not necessarily occupation, although it

¹ *Thirty Hogshead of Sugar v. Boyle*, 9 Cranch, 191: "Some doubt has been suggested whether Santa Cruz, while in the possession of Great Britain, could properly be considered as a British island. But for this doubt there can be no foundation. Although acquisitions made during war are not considered as permanent until confirmed by treaty, yet to every commercial and belligerent purpose, they are considered as part of the domain of the conqueror, so long as he retains the possession and government of them."

² "The territory of Castine, by the conquest and occupation by Great Britain, passed under the temporary allegiance and sovereignty of the British sovereign. The sovereignty of the United States over the territory was suspended during such occupation, so that the laws of the United States could not be rightfully enforced there, or be obligatory upon the inhabitants who remained and submitted to the conquerors." *United States v. Rice*, 4 Wheat., 246; *United States v. Hayward*, 2 Gallison, 485.

³ In the case of *Dooley v. United States*, 182 U. S., 222, 231, the court said: "In *New Orleans v. Steamship Co.*, 20 Wall., 393, it was said, with respect to the powers of the military government over the city of New Orleans after its conquest, that it had the same power and rights in territory held by conquest, as if the territory had belonged to a foreign country and had been subjugated in a foreign war. In such cases the conquering power has the right to displace the pre-existing authority, and to assume to such extent as it may deem proper the exercise by itself of all the powers and functions of government. It may appoint all the necessary officers and clothe them with designated powers, larger or smaller, according to its pleasure. It may prescribe the revenues to be paid, and apply them to its own use or otherwise. It may do anything necessary to strengthen itself and weaken the enemy. There is no limit to the powers that may be exerted in such cases, save those which are found in the laws and usages of war. These principles have the sanction of all publicists who have considered the subject." See also *Fleming v. Page*, 9 How., 603; *Am. Ins. Co. v. Canter*, 1 Pet., 511.

precedes it and may frequently coincide with it. An invader may push rapidly through a large portion of enemy country without establishing that effective control which is essential to the status of occupation. He may send small raiding parties or flying columns, reconnoitering detachments, etc., into or through a district where they may be temporarily located and exercise control, yet when they pass on it can not be said that such district is under his military occupation.⁴

289. Distinguished From Subjugation or Conquest. Subjugation and conquest imply the annexation of the property or territory by the conqueror through the treaty of peace, and with it the sovereignty. Military occupation is based upon the fact of possession and is essentially provisional until the conclusion of peace or the annihilation of the adversary, when sovereignty passes and military occupation technically ceases.⁵

290. Occupation Must Be Effective. It follows from the definition that military occupation must be both actual and effective; that is, the organized resistance must be overcome and the forces in possession have taken measures to establish law and order. It is sufficient that the occupying army can, within a reasonable time, send detachments of troops to make its authority felt within the occupied district. It is immaterial by what methods the authority is exercised, whether by fixed garrisons or flying columns, small or large forces.⁶

291. Presence of Invested Fort Immaterial. The existence of a fort or defended area within the occupied district, provided such place is invested, does not render the occupation of the remainder of the district ineffective, nor is the consent of the inhabitants in any manner essential.⁷

292. Proclamation of Occupation. In a strict legal sense no proclamation of military occupation is necessary. On account of the special relations established between the inhabitants of the occupied territory and the occupant, by virtue of the presence of the invading force, the fact of military occupation, with the extent of territory affected by the same, should be made known by proclamation.⁸

⁴ Early invaded Maryland in July, 1864, but the country was not occupied.

⁵ G. O. No. 11, H. Q. Army of Virginia, Wash., July 26, 1862, by Gen. Pope, furnishes an example of improper conception of allegiance and military occupation. His last paragraph, concerning communications, is strictly in accord with the laws and usages of war. The German conception of her rights of sovereignty over Alsace and Lorraine, in that she made no pretension to absolute sovereignty until after their cession by France, is strictly in accord with the rights of military occupation. Vide Spaight, *War Rights on Land*, pp. 329-333.

⁶ Land Warfare, Opp., par. 344. "Practically, all enemy territory will be considered effectively occupied by a French army, over which a service of supply shall have been established in rear of the army of invasion." Lieut. Jacomet, *Les Lois*, p. 69.

⁷ Land Warfare, Opp., par. 345. Citing "That when Alsace was declared occupied on 14th August, 1870, the fortresses in that Province were still uncaptured, but for the sieges in progress it had ceased to be the theater of active operations."

⁸ The French rule is given by Lieut. Jacomet as follows: "Occupation should be preceded by a notification which should take the form of proclamations posted in the community, of circulars addressed to the local authorities, notices inserted in the local papers. These publications should enumerate the acts from which the inhabitants have to abstain, and the penalties imposed for corresponding infractions." *Les Lois*, p. 69. The Germans in 1870, usually issued a proclamation in accordance with that of August, 1870, which stated that:

293. Commencement of Occupation. In the absence of a proclamation or similar notice the exact time of commencement of occupation may be difficult to fix. The presence of a sufficient force to disarm the inhabitants or enforce submission and the cessation of local resistance due to the defeat of the enemy's forces determine the commencement of occupation.⁹

294. Cessation of Occupation. Occupation once acquired must be maintained. In case the occupant evacuates the district or is driven out of the same by the enemy, or by a levee en masse, and the legitimate government actually resumes its functions, the occupation ceases. It does not cease, however, if the occupant, after establishing his authority, moves forward against the enemy, leaving a smaller force to administer the affairs of the district. Nor does the existence of a rebellion or the operations of guerrilla bands cause it to cease unless the legitimate government is reestablished and the occupant fails to promptly suppress such rebellion or guerrilla operations. Hostile military occupation ceases on the conclusion of peace.

295. Administration of Occupied Territory. Military government is the organization through which a belligerent exercises authority over the territory of the enemy invaded and occupied by him.¹⁰ The necessity for such government arises from the failure or inability of the legitimate government to exercise its functions on account of the military operations or occupation.¹¹

ADMINISTRATION OF OCCUPIED TERRITORY.

296. Duty to Restore Law and Order. H. R. Art. XLIII. The authority of the legitimate power having in fact passed into the hands of the occupant, the latter shall take all the measures in his power to restore, and insure, as far as possible, public order and safety, while respecting, unless absolutely prevented, the laws in force in the country.

297. Functions of Government. All the functions of the hostile government—legislative, executive or administrative—whether of a general, provincial, or local

"The military jurisdiction will be considered in force and proclaimed for the whole area of a 'canton' immediately a proclamation has been posted up in one of the localities of the same."

In Great Britain proclamations were issued by Wellington simply warning the inhabitants to behave peaceably and not to communicate with the enemy. The same rule was followed by the Japanese in the war with China, and again in Manchuria. (Ariga, p. 443.) For practice in this country vide the proclamations by Gen. Kearney on Aug. 22, 1846; Gen. Taylor in Mexico, H. R. Executive Doc. N. 119, pp. 13-17; Gen. Scott in Mexico at Vera Cruz, Apr. 11, 1847; at Tampico, Feb. 19, 1847; G. O. No. 20, Feb. 19, 1847; and G. O. 287, Army Mex., Sept. 17, 1847; G. O. 101, W. D., July 18, 1898; Proc. Gen. Miles, July 28, 1898, as to Porto Rico; Proc. Gen. Merritt, Aug. 14, 1898, in Philippines.

⁹"The presence of a hostile army proclaims its martial law." G. O. 100, 1863, art. 1, par. 2.

¹⁰"The organization through which the authority is exercised in a region under military occupation constitutes the military government." Wilson on Int. Law, H. S., par. 143, p. 331.

¹¹In *Dooley v. U. S.*, 182 U. S., 222, 230, the court said: "Upon the occupation of the country (Porto Rico) by the military forces of the United States the authority of the Spanish Government was superseded, but the necessity for a revenue did not cease. The government must be carried on, and there was no one left to administer its functions but the military forces of the United States." Cited in Dig. Int. Law, Moore, sec. 1145, p. 270, with other cases.

character, cease under military occupation, or continue only with the sanction, or, if deemed necessary, the participation of the occupier or invader."¹²

298. Nature of Government. It is immaterial whether the government established over an enemy's territory be called a military or civil government. Its character is the same and the source of its authority is the same. It is a government imposed by force, and the legality of its acts are determined by the laws of war. During military occupation it may exercise all the powers given by the laws of war."¹³

299. The Laws in Force. The principal object of the occupant is to provide for the security of the invading army and to contribute to its support and efficiency and the success of its operations. In restoring public order and safety he will continue in force the ordinary civil and criminal laws of the occupied territory which do not conflict with this object. These laws will be administered by the local officials as far as practicable. All crimes not of a military nature and which do not affect the safety of the invading army are left to the jurisdiction of the local courts."¹⁴

300. Power to Suspend and Promulgate Laws. The military occupant may suspend existing laws and promulgate new ones when the exigencies of the military service demand such action.

¹² G. O. 100, 1863, art. 6.

¹³ See Halleck Int. Law (4th ed.), 2 p. 466. "While a military government continues as an instrument of warfare, used to promote the objects of invasion by weakening the enemy or strengthening the invader, its powers are practically boundless." Magoon, Law of Civ. Gov. under Mil. Occupation, p. 14. United States v. Dieckmann, 92 U. S., 520. But note the language of the Sup. Court in the case of Dooley v. U. S., 222, 234-5; in speaking of the powers of the military commander the court said: "While his power is necessarily despotic, this must be understood rather in an administrative than in a legislative sense. * * * His power to administer would be absolute, but his power to legislate would not be without certain restrictions; in other words, they would not extend beyond the necessities of the case."

See also the Admittance, Jecker v. Montgomery, 13 How., 498, in which it was held that the executive power could not establish a prize court in Mexico. Also The Grapeshot, 9 Wall., 129, 133; Mitchell v. Harmony, 13 How., 115; Raymond v. Thomas, 91 U. S. 712.

¹⁴ The jurisdiction of these local courts is never extended to members of the invading Army.

"All civil and penal law shall continue to take its usual course in the enemy's places and territories under martial law, unless interrupted or stopped by order of the occupying military power." G. O. 100, 1863, art. 6.

Dow v. Johnson, 100 U. S., 158: "An officer of the Army of the United States, whilst serving in the enemy's country during the rebellion, was not liable to an action in the courts of the country for injuries resulting from his military orders or acts; nor could he be required by a civil tribunal to justify or explain them upon any allegation of the injured party that they were not justified by military necessity. He was subject to the laws of war and amenable only to his own Government.

"When any portion of the insurgent States was in the occupation of the United States during rebellion, the municipal laws, if not suspended or superseded, were generally administered there by the ordinary tribunals for the benefit and protection of persons not in the military service. Their continued enforcement was not for the protection or control of officers or soldiers of the Army."

301. Nature of Laws Suspended. The occupant will naturally alter or suspend all laws of a political nature as well as political privileges and all laws which affect the welfare and safety of his command. Of this class are those relating to recruitment in occupied territory, the right of assembly, the right to bear arms, the right of suffrage, the freedom of the press, the right to quit or travel freely in occupied territory. Such suspensions should be made known to the inhabitants.³⁵

302. Nature of Laws Promulgated. An occupant may create new laws for the government of a country where none exist.³⁶ He will promulgate such new laws and regulations as military necessity demands. In this class will be included those laws which come into being as a result of military rule; that is; those which establish new crimes and offenses incident to a state of war and are necessary for the control of the country and the protection of the army.³⁷

³⁵ See Wilson on Int. Law, H. S., p. 335; Land Warfare, Opp., p. 80. See Dow v. Johnson above and cases cited.

³⁶ Mr. Spaight cites as perhaps the only modern case that of Bulgaria in 1877-8, and quotes Prof. De Martens that "The Russians were quite unable to comply with the Brussels rule which enjoined respect for local laws and institutions, for local laws and institutions there were none." War Rights on Land, p. 357. De Martens, *La Paix et la Guerre*, p. 243.

³⁷ The following is extracted from various martial-law regulations of the Japanese in Manchuria.

All laws and regulations relating to the punishments for acts detrimental to the Japanese Army in Korea and Manchuria can not be given here. All that can be done is to indicate the principal acts for which punishment can be awarded.

1. To oppose our land and sea forces, military authorities, or persons attached to our army or navy.

2. To be attached to the enemy and act hostilely against our army without being clothed in a regular uniform.

3. To act as a spy, to conceal a spy, or assist his flight.

4. To guide our army badly.

5. To communicate to the enemy the movement of our land or sea forces.

6. To spread false news.

7. To make a noise or utter outcries of a nature to disturb our land and sea forces.

8. To publish placards detrimental to our army.

9. To disturb public order by meetings, assemblies, publication of newspapers, and reviews, posting up placards, and other means.

10. To aid or facilitate the movements of the enemy.

11. To guide the enemy.

12. To guide or assist knowingly the flight of the enemy.

13. To deliver up prisoners of war, hide them, and assist their escape.

14. To destroy, burn, or steal military stores, military buildings, such as depots, barracks, military stores, etc.

15. To destroy or spoil military stores, arms, and other articles left on the field of battle by our army or the enemy.

16. To destroy or burn the various means of military communication, such as telegraph wires, railways, bridges and highways, canals etc., and to cause inconvenience to the military postal service.

17. To destroy, steal, damage, or change the position of signals, indicating posts, placards, etc., rendered necessary by military operations.

18. To prejudice the needs of our army by rendering water not drinkable or by hiding vehicles, commodities, supplies, and fuel.

303. Prohibition as to Rights and Rights of Action. H. R. Art. XXIII, last par. It is especially forbidden * * * to declare abolished, suspended, or inadmissible in a court of law the rights and rights of action of the nationals of the hostile party.¹⁸

304. General Restrictions Imposed—Commercial Relations. The occupant has the unquestioned right to regulate commercial intercourse in occupied territory; i.e., he may prohibit entirely or place such restrictions and limitations upon such intercourse as he considers desirable for military purposes.¹⁹

305. Censorship of Press and Correspondence. The military occupant may establish censorship of the press and of telegraphic and postal correspondence. He may prohibit entirely the publication of newspapers, prescribe regulations for their publication and circulation and especially in unoccupied portions of the territory and in neutral countries. He is not required to furnish facilities for postal service, but may take charge of them himself, especially if the officials of the occupied district fail to act or to obey his orders.²⁰

306. Means of Transportation. The military occupant exercises authority over all means of transportation, both public and private within the occupied district, and may seize and utilize the same and regulate their operation.²¹

19. To destroy or prevent the working of aqueducts, or to suppress the electric light.

20. To coin or alter money, notes, and Japanese military assignats and to make use of them whilst being aware of their fraudulent character.

21. To oppose requisitions in general, such as the lodgment or hiring of coolies, or to fail to comply with any requisitions.

22. To prevent by trickery or threat any duty imposed on individuals serving in our army.

23. To be in possession of arms and military stores without authority.

24. To enter ports, batteries, or other prohibited places without permission.

25. To infringe the prohibition against entering or remaining in forbidden radii.

26. To make trenches in the mountains and hills without authority.

27. To inspect, sketch, photograph, or make descriptions of views on land and sea without authority.

28. To plunder articles belonging to the wounded or dead on the field of battle.

29. To exhume or destroy dead bodies on the field of battle or to steal articles from them.

30. To put to death Japanese or allied soldiers.

31. To assassinate or steal with violence.

32. To provide opium, to procure the instruments for smoking it, and a favorable place to enable our soldiers, allies, and other persons attached to the army to make use of it.

33. To commit any other acts detrimental to the Japanese army.

34. To disobey orders given by our army.

35. Acts detrimental to our army of which mention is not made above will be punished according to the military, naval, and penal law, or according to the ordinary penal code of Japan.

¹⁸ For rule that debts due from citizens of one belligerent to those of another are not extinguished but suspended during war, see *State of Georgia v. Brailsford* (3 Dall., 1), *Ware v. Hylton* (3 Dall., 199, 281), *Williams v. Bruffy*, (96 U. S. 176, 186-188), *Dig. Int. Law Moore*, sec. 1155.

¹⁹ *Mil. Gov. and Martial Law*, Birkhimer (2d ed.), par. 272 et seq.; *Fleming v. Page* (9 How., 615); *Land Warfare*, Opp., par. 373.

²⁰ *Vide F. S. R.*, 1914, pars. 419-432.

²¹ *Vide infra* pars. 341-343.

307. Regulation as to Taxes. H. R. Art. XLVIII. If, in the territory occupied, the occupant collects the taxes, dues, and tolls imposed for the benefit of the State, he shall do so, as far as is possible, in accordance with the rules of assessment and incidence in force, and shall in consequence be bound to defray the expenses of the administration of the occupied territory to the same extent as the legitimate Government was so bound.

308. New Taxes Not to Be Levied. The imposition of taxes being an attribute of sovereignty, no new taxes should be imposed by the occupant. The occupant may, however, levy contributions and requisitions.²²

309. When Existing Rules May Be Disregarded. If due to the flight or unwillingness of the local officials, it is impracticable to follow the rules of incidence and assessment in force, then the total amount of the taxes to be paid may be allotted among the districts, towns, etc., and the local authorities be required to collect it as a capitation tax or otherwise.²³

310. Surplus May Be Used. The first charge upon the State taxes is for the cost of local maintenance. The balance may be used for the purposes of the occupant.²⁴

311. What Included in Taxes, Tolls, Etc. The words "for the benefit of the State" were inserted in the article to exclude local dues collected by local authorities. The occupant will supervise the expenditure of such revenue and prevent its hostile use.²⁵

EFFECTS OF OCCUPATION ON THE POPULATION.

312. Right to Enforce Obedience. The occupant can demand and enforce from the inhabitants of occupied territory such obedience as may be necessary for the security of his forces, for the maintenance of law and order, and the proper administration of the country.

313. Oath of Allegiance Forbidden. H. R. Art. XLV. It is forbidden to compel the inhabitants of occupied territory to swear allegiance to the hostile power.²⁶

314. Must Respect Persons, Religious Convictions, Etc. H. R. Art. XLVI. Family honor and rights, the lives of persons, * * * as well as religious convictions and practice, must be respected.²⁷

²² As to requisitions vide infra pars. 345 et seq. As to contributions vide pars. 351 et seq.

²³ G. O. 101, W. D. 1898. "As the result of military occupation the taxes and duties payable by the inhabitants to the former Government become payable to the military occupant; unless he sees fit to substitute for them other rates or modes of contribution to the expenses of the Government. The moneys so collected are to be used for the purpose of paying the expenses of government under the military occupation, such as the salaries of the judges and the police, and for the payment of the expenses of the army."

²⁴ See note to preceding paragraph.

²⁵ Holland, *Laws of War on Land*, par. 108. Spaight, *War Rights on Land*, p. 378.

²⁶ Both the British and Boers required an oath of neutrality. They also punished those who violated such oaths with terms of imprisonment. The necessity for such oath is not readily apparent, except, perhaps, as a reminder of his obligations, since the inhabitant owes the obligations imposed and can be punished for violations of such obligations under the laws and rules of war. For form of oath required by Great Britain, vide Spaight, *War Rights on Land*, p. 372.

²⁷ Mr. Spaight, after pronouncing this article the "magna charta of war law," says: "One is disheartened when one thinks of requisitions, of contributions, of fines, of reprisals, of houses leveled as a measure of tactics, of a whole

315. United States Rule. The United States acknowledge and protect, in hostile countries occupied by them, religion and morality; the persons of inhabitants, especially those of women; and the sacredness of domestic relations. Offenses to the contrary shall be rigorously punished.²³

316. Reciprocal Obligations of Inhabitants. In return for such considerate treatment, it is the duty of the inhabitants to carry on their ordinary peaceful pursuits, to behave in an absolutely peaceful manner, to take no part whatever in the hostilities carried on, to refrain from all injurious acts toward the troops or in respect to their operations, and to render strict obedience to the officials of the occupant.²⁴

317. Limitation as to Services of Inhabitants. H. R. Art. LII. Services shall not be demanded from inhabitants except for the needs of the army of occupation. They shall be of such a nature as not to involve the inhabitants in the obligation of taking part in military operations against their own country.

Such services shall only be demanded on the authority of the commander in the locality occupied.

town emptied as a military precaution (as Sherman emptied Atlanta and Burrows's brigade emptied Kandahar in 1880), of wide provinces cleared of their habitations and crops, of a thousand instances in which the provisions of Article XLVI have conspicuously not been adhered to, in later-day wars. If an invader had to comply strictly with its terms, that of itself would bring his invasion to an end. An invader must and does interfere with the lives and property of citizens in many ways; even their religious worship and the sanctity of their churches or chapels are not secure from the encroachments of the greedy mawed aggressor, the necessity of war. * * * The fact is that this Article XLVI must be read subject to military necessities. One might add such a proviso as to nearly every article, as Baron Jomini pointed out at the conference of 1874, but after none is the proviso so necessary as after this. So read, the article forbids certain violent acts unless they are demanded by the necessity of overcoming the armed forces of the enemy. Such acts must not be done as a substantive measure of war—they must not be made an end in themselves, but only as a means to the legitimate end of war; that is, the destruction of the other belligerent's fighting force." War Rights on Land, p. 374-375. Vide pars. 333 and 336 *infra*.

²³ "It will therefore be the duty of the commander of the expedition, immediately on his arrival in the islands, to publish a proclamation, declaring that we come not to make war upon the people of the Philippines, nor upon any party or faction among them, but to protect them in their homes, in their employments, and in their personal and religious rights." (Instructions to Gen. Merritt, May 28, 1898.) G. O. 100, 1863, art. 37, par. 1.

²⁴ "The freedom of the people to pursue their accustomed occupations will be abridged only when it becomes necessary to do so.

"While the rule of conduct of the American commander in chief will be such as has just been defined, it will be his duty to adopt measures of a different kind if, unfortunately, the course of the people should render such measures indispensable to the maintenance of law and order. He will then possess the power to replace or expel the native officials in part or altogether, to substitute new courts of his own constitution for those that now exist, or to create such new or supplementary tribunals as may be necessary. In the exercise of these high powers the commander must be guided by his judgment and his experience, and a high sense of justice." Ins. to Gen. Merritt, May 28, 1898. See also to same effect, G. O. 101, A. G. O., 1898. G. O. 100, 1863, art. 22. "The principle has been more and more acknowledged that the unarmed citizen is to be spared in person, property and honor as much as the exigencies of war will admit."

318. General Right to Requisition Services. Services of the inhabitants of occupied territory may be requisitioned for the needs of the Army. These will include the services of professional men and tradesmen, such as surgeons, carpenters, butchers, bakers, etc., employees of gas, electric light, and water works, and of other public utilities, and of sanitary boards in connection with their ordinary vocations. The officials and employees of railways, canals, river or coastwise steamship companies, telegraph, telephone, postal, and similar services, and drivers of transport, whether employed by the State or private companies, may be requisitioned to perform their professional duties so long as the duties required do not directly concern the operations of war against their own country.³⁰

319. Can Restore General Conditions. The occupant can requisition labor to restore the general condition of the public works of the country to that of peace; that is, to repair roads, bridges, railways, and as well to bury the dead and collect the wounded. In short, under the rules of obedience, they may be called upon to perform such work as may be necessary for the ordinary purposes of government, including police and sanitary work.

320. Can Not Be Forced to Construct Forts, Etc. The prohibition against forcing the inhabitants to take part in the operations of war against their own country precludes requisitioning their services upon works directly promoting the ends of the war, such as construction of forts, fortifications, and entrenchments; but there is no objection to their being employed voluntarily, for pay, on this class of work, except the military reason of preventing information concerning such work from falling into the hands of the enemy.³¹

321. Can Not Force Furnishing Information About Enemy. H. R. Art. XLIV. A belligerent is forbidden to force the inhabitants of territory occupied by it to furnish information about the army of the other belligerent, or about its means of defense.

322. Interpretation of Rule. This article was reserved by Austria-Hungary, Bulgaria, Montenegro, Russia, Japan, and Roumania, because it was believed that the prohibition was contrary to the general rule and practice of nations as expressed in G. O. 100, 1863, art. 93, that "All armies in the field stand in need of guides, and impress them if they can not obtain them otherwise." That the impressment of guides was intended to be forbidden by this rule seems evident from the action of the above nations who reserved it, and as well from the discussions at The Hague.³²

323. The Practice as to Guides. As to the countries making reservations, the old practice will prevail. Officers of all armies with experience in the field know that guides are absolutely essential to success in practically all military operations in the field in unknown enemy country. Whenever, therefore, guides are in fact essential to success, and, for that reason, a military necessity, the foregoing rule must give way to and be interpreted as subordinate to such military necessity.³³

³⁰ Land Warfare, Opp., par. 388.

³¹ The better rule is to pay for all services rendered whenever practicable to do so, since it avoids antagonizing the people against the occupant and forcing stronger adherence to his own Government. Vide *Les Lois*, Jacomet, par. 93; Land Warfare, Opp., par. 392.

³² Spaight, *War Rights on Land*, pp. 368-371. *Les Lois*, Jacomet, art. 95. Land Warfare, Opp., par. 382 and note (h). Hague Conference, 1907, Actes, Vol. III, pp. 136-141. Mr. Holland places the above rule (H. R. XLIV) in square brackets, to indicate that it possesses but little value. *War on Land*, art. 104.

³³ No invader can be expected to forego the chances of success or imperil seriously his operations against the enemy by foregoing a well-understood and

OFFICIALS IN OCCUPIED TERRITORY.

324. Oath of Officials. The occupant may require such officials as are continued in their offices to take an oath to perform their duties conscientiously and not to act to his prejudice. Every such official who declines to take such oath may be expelled; but, whether they do so or not, they owe strict obedience to the occupant.²⁴

325. Retention of Officials. It is to the best interests of the occupant, and more especially to that of the population, that at least some of the civil officials should remain in their offices in order to assist in the maintenance of order, as well as for the safety of the inhabitants themselves and of their property.²⁵

326. Municipal Officials Should Remain. Municipal officials, including the judges and magistrates, sanitary and police authorities, as well as the staffs of museums, libraries, and all establishments entitled to special protection during hostilities, should remain and be retained in office if consistent with the safety of the Army. The political officials, as well as railway, postal, telegraph, and telephone officials, will probably cease work.²⁶

327. Salaries of Officials. The salaries of civil officials of the hostile government who remain in the invaded territory, and continue the work of their offices, especially those who can properly continue it under the circumstances arising out of the war—such as judges, administrative or police officers, officers of city or communal governments—are paid from the public revenues of the invaded territory, until the military government has reason wholly or partially to dispense with their services. Salaries or incomes connected with purely honorary titles are always suspended.²⁷

328. Resignation of Officials. An official of the hostile government who has accepted service under the occupant should be permitted to resign and should not be punished for exercising such privilege. Such official should not be forced to exercise his functions against his will.²⁸

329. Removal of Civil Officials. By virtue of his powers of control the occupant is duly empowered to remove officials of every character. He will on principle remove political officials. Any official considered dangerous to the occupant may be removed, made a prisoner of war, or expelled from the occupied territory.

330. Punishment of Civil Officials. Acts of civil officers that are harmful or injurious to the occupant will be dealt with under the laws of war. Other wrongs or crimes committed by them will be punished according to the law of the land.

well-established practice of armies in the field as to the employment of a few individuals of his enemy as guides. Moreover, he must be protected in the use of such guides, because the success of his operations and the safety of his army are and must be his first consideration before which everything else must give way and be subordinated; and, as said by Mr. Lieber, "Military government—martial law—affects chiefly the police, etc. * * * and refers mainly to the support and efficiency of the army, its safety, and the safety of its operations." G. O. 100, 1863, art. 10.

²⁴ G. O. 100, 1863, art. 26, states: "Commanding generals may cause the magistrates and civil officers of the hostile country to take the oath of temporary allegiance or an oath of fidelity to their own victorious Government or rulers, and they may expel any one who declines to do so." Such oath is not essential, and should not be insisted upon, especially when the form of the oath implies allegiance which pertains to sovereignty.

²⁶ Land Warfare, Opp., par. 395.

²⁷ G. O. 100, 1863, art. 39.

²⁸ Brussels Conference, p. 243; Spaight, War Rights on Land, p. 365.

CHAPTER IX.

TREATMENT OF ENEMY PROPERTY.

331. Destruction and Seizure of. H. R. Art. XXIII, par. (g). It is especially forbidden * * * to destroy or seize the enemy's property, unless such destruction or seizure be imperatively demanded by the necessities of war.

332. General Rule as to War Right to Seize and Destroy Property. The rule is that in war a belligerent can destroy or seize all property of whatever nature, public or private, hostile or neutral, unless such property is specifically protected by some definite law of war, provided such destruction or seizure is imperatively demanded by the necessities of war.¹

PRIVATE PROPERTY.

333. Must Be Respected. H. R. XLVI, par. 1. Private property * * * must be respected.

334. Devastation. The measure of permissible devastation is found in the strict necessities of war. As an end in itself, as a separate measure of war, devastation is not sanctioned by the law of war. There must be some reasonably close connection between the destruction of property and the overcoming of the enemy's army. Thus the rule requiring respect for private property is not violated through damage resulting from operations, movements, or combats of the army; that is, real estate may be utilized for marches, camp sites, construction of trenches, etc. Buildings may be used for shelter for troops, the sick and wounded, for animals, for reconnaissance, cover, defense, etc. Fences, woods, crops, buildings, etc., may be demolished, cut down, and removed to clear a field of fire, to construct bridges, to furnish fuel if imperatively needed for the army.²

335. American Rule. This rule (respect for private property, etc.) does not interfere with the right of the victorious invader to tax the people or their property, to levy forced loans, to billet soldiers, or to appropriate property, especially houses, boats or ships, lands, and churches, for temporary and military use.³

336. Confiscation. H. R. Art. XLVI, par. 2. Private property can not be confiscated.⁴

¹ This right is recognized by comparison of H. R. XXIII and XLVI. The only property safeguarded is the matériel of the mobile sanitary formations under the Geneva Convention.

For the American rule, see G. O. 100, 1863, art. 15, ante par. 12. The British rule is given as follows: "The 'necessities of war' may obviously justify not only the seizure of private property but even the destruction of such property and the devastation of whole districts." Spaight, War Rights on Land, p. 116.

The German rule is as follows: "No damage must be done, not even the most trivial, which is not necessitated by military reasons. Every damage—the very greatest—is justifiable if war demands it or if it is a consequence of the proper carrying on of war." Kriegsbrauch, p. 54.

² Vide Hall, Int. Law (5th ed.), p. 535; Spaight, War Rights on Land, p. 112 et seq.; Dig. Int. Law, Moore, sec. 1113.

³ G. O. 100, 1863, art. 37, par. 2.

⁴ The seizure of enemy property by the United States as prize of war on land, *jure belli*, is not authorized by the law of nations, and can be upheld only by an act of Congress. *United States v. 1,756 Shares Capital Stock* (5 Blatchf., 231).

"It is no bar to the recovery of a claim that it was confiscated during the rebellion by a Confederate court, because due to a loyal citizen." (*Stevens v. Griffith*, 111 U. S., 48.)

337. Booty. All captures and booty belong, according to the modern law of war, primarily to the Government of the captor.

Prize money whether on land or sea can now only be claimed under local law.*

338. Private Gain by Officers and Soldiers Prohibited. Neither officers nor soldiers are allowed to make use of their position or power in the hostile country for private gain, not even for commercial transactions otherwise legitimate. Offenses to the contrary committed by commissioned officers will be punished with cashiering or such other punishment as the nature of the offense may require; if by soldiers, they shall be punished according to the nature of the offense.*

339. Pillage. H. R. Art. XLVII. Pillage is formally forbidden.*

340. Private property can be seized only by way of military necessity for the support or other benefit of the Army or of the occupant. All destruction of property not commanded by the authorized officer, all pillage or sacking, even after taking a town or place by assault, are prohibited under the penalty of death, or such other severe punishment as may seem adequate to the gravity of the offense. A soldier, officer, or private, in the act of committing such violence, and disobeying a superior ordering him to abstain from it, may be lawfully killed on the spot by such superior.*

341. Private Property Susceptible of Direct Military Use. H. R. Art. LIII, par. 2. All appliances, whether on land, at sea, or in the air, adapted for the

"The Government recognized to the fullest extent the humane maxims of the modern law of nations, which exempt private property of noncombatant enemies from capture as booty of war." (U. S. v. Klein, 13 Wall., 128, 137; Lamar v. Browne, 92 U. S., 194.)

"If property be such that it ministers directly to the strength of the enemy and its possession alone enables him to supply himself with the munitions of war and to continue the struggle, then it may be confiscated." (Prize cases, 2 Black, 687.)

"The rightful capture of movable property on land transfers the title to the Government of the captor as soon as the capture is completed." Young v. U. S., 97 U. S., 39, 60.

"This rule as to property on land has received very important qualifications from usage, from the reasoning of enlightened publicists, and from judicial decisions. It may now be regarded as substantially restricted 'to special cases dictated by the necessary operation of the war,' and as excluding in general the seizure of the private property of pacific persons for the sake of gain." Mrs. Alexander's Cotton, 2 Wall., 404, 419. Briggs v. U. S., 143 U. S., 346, 355-358.

As to abandoned and captured property act, see Dig. Int. Law, Moore, sec. 1152.

*G. O. 100, 1863, art. 46.

"Pillage was defined by Prof. Holland as 'Booty which is not permitted.' He refers to the following offenses for which the death penalty or any less punishment may be inflicted when committed by a soldier on active service: (1) Leaving his commanding officer to go in search of plunder; (2) committing any offense against the property or person of any inhabitant of or resident in the country in which he is serving; (3) breaking into any house or other place in search of plunder." Vide Spaight, War Rights on Land, p. 188.

Baron Jomini remarked in the Brussels Conference, "There is a kind of booty which is allowed on the field of battle, for instance, that which consists of horses, munitions, cannon, etc.—it is the booty gained at the cost of private property which the committee wish to forbid."

*G. O. 100, 1863, arts. 38 and 44.

transmission of news, or for the transport of persons or things, exclusive of cases governed by naval law, depots of arms, and, generally, all kinds of ammunition of war, may be seized, even if they belong to private individuals, but must be restored and compensation fixed when peace is declared.

342. What Included in Rule. The foregoing rule includes everything susceptible of direct military use, such as cables, telephone and telegraph plants, horses, and other draft and riding animals, motors, bicycles, motorcycles, carts, wagons, carriages, railways, railway plants, tramways, ships in port, all manner of craft in canals and rivers, balloons, airships, aeroplanes, depots of arms, whether military or sporting, and in general all kinds of war material.*

343. Destruction of Such Property. The destruction of the foregoing property and all damage to the same are justifiable if it is required by the exigencies of the war.¹⁰

344. Submarine Cables. H. R. Art. LIV. Submarine cables connecting an occupied territory with a neutral territory shall not be seized or destroyed except in the case of absolute necessity. They must likewise be restored and compensation fixed when peace is made.¹¹

REQUISITIONS.

345. Requisitions. H. R. Art. LII. Requisitions in kind shall not be demanded from municipalities or inhabitants except for the needs of the army of occupation. They shall be in proportion to the resources of the country, and of such a nature as not to involve the inhabitants in the obligation of taking part in military operations against their own country.

Such requisitions shall only be demanded on the authority of the commander in the locality occupied.

Contributions in kind shall as far as possible be paid for in cash; if not, a receipt shall be given and the payment of the amount due shall be made as soon as possible.¹²

346. What May Be Requisitioned. Practically everything may be requisitioned under this article that is necessary for the maintenance of the Army and not of direct military use, such as fuel and food supplies, clothing, wine, tobacco,

* Land Warfare, Opp., par. 415.

¹⁰ Spaight, War Rights on Land, pp. 117 et seq., 410.

¹¹ The Institute of Int. Law in 1902 agreed to the following rules:

1. A submarine cable uniting two neutral territories is inviolable.
2. A cable uniting the territories of two belligerents or of two parts of the territory of one of the belligerents may be cut anywhere, except in the territorial waters or the neutralized waters of a neutral State.
3. A cable uniting a neutral territory to the territory of one of the belligerents may not under any circumstances be cut in the territorial or neutralized waters of a neutral State. In the high sea this class of cable can be cut only if an effective blockade exists and within the limits of the line of the blockade, and the cable must be restored with the least practicable delay; it may always be cut on the territory or in the territorial waters of an enemy's territory up to a distance of 3 marine miles from low-water mark.

4. The liberty a neutral State has of transmitting messages does not imply the right to use the cable, or allow it to be used, clearly to assist one of the belligerents.

5. In the application of these rules no difference is to be made between cables belonging to the State and those belonging to individuals, or between cables belonging to the enemy and to neutrals.

¹² For form of requisition receipt see Appendix, this chapter.

printing presses, type, etc., leather, cloth, etc."¹³ Billeting of troops for quarters and subsistence is also authorized.¹⁴

347. Method of Requisitioning. Requisitions must be made under the authority of the commander in the locality.¹⁵ No prescribed method is fixed, but if practicable requisitions should be accomplished through the local authorities by systematic collection in bulk. They may be made direct by detachments if local authorities fail for any reason.¹⁶ Billeting may be resorted to if deemed advisable.¹⁷

¹³ Mr. Spaight says that "practically everything under the sun" may be requisitioned, and cites a case of a bootjack being requisitioned, and also that the Fifth Army Corps staff requisitioned six eggs. War Rights on Land, p. 402. Vide F. S. R., 1914, arts. 290-293. Marshal Oyama's instructions in the Chino-Japanese War were that "Requisitions are to be limited to objects essential for the subsistence or lodgment of troops, or discharge of fatigue duties, works of transport and organization of services for the transmission of messages. If it is necessary to requisition anything not here enumerated, the sanction of the commander in chief must be obtained." Takahashi, pp. 155-160. For articles and services that may be requisitioned under French law, see Bonfils, p. 702, par. 1211: "Subject to the right of requisition are all objects and everything the providing of which is necessitated by the military interest of the occupant, when even the local legislation would not permit requisition to the national government. Such is the principle. (Compare art. 52, Hague Rules.) Here are the cases of application. Purveyance can be demanded for the following: Lodging in the house of the inhabitant and cantonment for the men and horses, mules, and cattle, in available places, as also necessary buildings for the personnel and matériel of service of any kind and belonging to the army. Subsistence for officers and men lodged with the inhabitant, according to the custom of the country. Provisions and fuel for the army, forage for horses, mules, and cattle, and bed straw for troops encamped or lodged in huts. Teams and means of transportation of every kind, including the personnel. Boats or small craft found on streams, rivers, lakes, or canals. Mills and bakeries. Materials, tools, machinery, and equipments necessary for the construction and repair of roads. Treatment of the sick and wounded in the house of the resident. Clothing, articles of equipment, camping equipage, horse furniture, bedding. Drugs, medicines, and first-aid articles. See French laws and decrees on military requisitions."

¹⁴ As to billeting of troops, see III amendment to the Const. U. S., and F. S. R., 1914, par. 241.

¹⁵ Note that it differs from the rule as to contributions, which require the order of the commander in chief. It is not necessary to actually show the order of the commander. Vide par. 352, par. 1, *infra*.

¹⁶ It is generally recognized by all States that the assistance of local authorities is advisable, since in addition to the avoidance of contact with troops and inhabitants, the more even distribution of supplies furnished by the inhabitants is secured. The direct method was resorted to in the Civil War, and especially by Gen. Sherman, because "the country was sparsely settled, with no magistrates or civil authorities, who could respond to requisitions, as is done in all wars in Europe; so that this system of foraging was indispensable to our success." *Memoirs*, Vol. II, p. 183.

In case the direct method (foraging) is resorted to, it is the practice of all countries to send a commissioned officer in charge of the detachment. F. S. R., 1914, par. 290.

¹⁷ Subsisting troops by billeting can generally be resorted to only in case of small commands or when troops are scattered. F. S. R., 1914, par. 241.

348. The Amount Taken. The expression "needs of the army" was adopted rather than "necessities of the war" as more favorable to the inhabitants, but the commander is not thereby limited to the absolute needs of the troops actually present.¹⁹ The object was to avoid reducing the population to starvation.²⁰

349. Fixing Prices. The prices of articles requisitioned to be paid for, can and should be fixed by the commander. The prices of commodities on sale may also be regulated and limits placed on the hours and places of trading. All authorities agree that it is good policy to pay cash if possible and to take up receipts as soon as possible.²¹

350. Method of Enforcing. If cash is paid, coercion will seldom be necessary. The coercive measures adopted will be limited to the amount and kind necessary to secure the articles requisitioned.²²

CONTRIBUTIONS.

351. Contributions. H. R. Art. XLIX. If, in addition to the taxes mentioned in the above article (XLVIII), the occupant levies other money contributions in the occupied territory, this shall only be for the needs of the army or of the administration of the territory in question.

352. Method of Levying Contributions. H. R. Art. LI. No contribution shall be collected except under a written order, and on the responsibility of a commander in chief.

The collection of the said contribution shall only be effected as far as possible in accordance with the rules of assessment and incidence of the taxes in force.²³

For every contribution a receipt shall be given to the contributor.

353. Penalty for Individual Acts of Inhabitants. H. R. Art. L. No general

¹⁹ It was stated in The Hague Convention that "occupied territory is not to be systematically exhausted." Actes, Vol. III, p. 149.

²⁰ The practice in the British Army is to leave three days' supplies with residents of municipalities and one week's supply with the inhabitants of farms and outlying district. F. S. R., Part II, p. 63. The Japanese were instructed to "take into account the competence of the inhabitants to supply what was demanded." Takahashi, p. 159.

²¹ F. S. R., 1914, par. 290. See also Land Warfare, Opp., art. 421; Spaight, War Rights on Land, p. 407. The Japanese in 1904 prescribed: "5th. The price of each commodity should be strictly reasonable, and whoever demands intentionally an exorbitant price or commits an act of fraud shall be punished." Ariga, p. 457. In the Chinese War the rule was that requisitions shall be paid for "at a rate deemed appropriate, though not necessarily so large as to obtain the consent of the owners of the requisitioned articles." Takahashi, p. 159. The British in South Africa stopped cash payments and made receipts non-negotiable, but payable at the end of the war.

²² The practice of the Germans in the War of 1870-1 was "to increase the amount demanded if it were not immediately forthcoming, and then, if the inhabitants still proved recalcitrant, to bombard and burn the village. Often hostages were taken to secure levies in money or kind. At Nancy a threat to shoot certain workmen was made, but not executed." Mr. Spaight says: "It is the experience of history that an occupant can usually seize, in land war, what he wants; and if he can not, the threat of either carrying off the prominent citizens as prisoners of war (hostages) or of burning down a few houses usually suffices to bring the people to terms." War Rights on Land, p. 407. Vide, as to bombardment of undefended towns, etc., in naval warfare, Hague Con., IX, Art. III, 1907.

²³ Vide par. 309, *supra*.

penalty, pecuniary or otherwise, shall be inflicted upon the population on account of acts of individuals for which they can not be regarded as jointly and severally responsible.

354. Collective Punishments Authorized. Collective punishments may be inflicted for such offenses as the community has committed or permitted to be committed. Such offenses are not necessarily limited to violations of the laws of war. Any breach of the occupant's proclamations or martial-law regulations may be punished collectively. For instance, a town or village may be held collectively responsible for damage done to railways, telegraphs, roads, and bridges in the vicinity.²⁶ The most frequent form of collective punishment consists in fines.²⁶

REAL PROPERTY OF A STATE.

355. Occupant the Administrator and Usufructuary of. H. R. Art. I.V. The occupying State shall be regarded as administrator and usufructuary of public buildings, real estate, forests, and agricultural estates belonging to the hostile State, and situated in the occupied territory. It must safeguard the capital of these properties, and administer them in accordance with the rules of usufruct.²⁷

²⁶ This rule does not prejudice the question of reprisals, as to which see *infra*, pars. 379 et seq.

²⁷ The Germans in 1870-71 imposed collective responsibility, which made not only the commune from which the delinquent came but also that in which the offense was committed liable for the offense. Vide Spaight, *War Rights on Land*, pp. 408-409.

²⁸ The following table is taken from Spaight, *War Rights on Land*, p. 418: "Tabular statement showing the treatment of property in an occupied country. Property may be either:

I. Confiscable, when it becomes the property of the occupant outright, no indemnity or compensation being due (C).

II. Not confiscable, but subject to sequestration by the occupant, who must, however, return the property at the peace or pay compensation (S).

III. Neither confiscable nor sequestrable, but subject to be requisitioned (for barracks or billets, e.g., services or supplies) (R).

IV. Subject to usufruct, i.e., it may be exploited by the occupant, who must not, however, alienate, damage, or destroy the substance (U).

CLASSIFICATION OF PROPERTY UNDER THE ABOVE HEADINGS.

| Nature of the property. | Public property. | Private property |
|---|------------------|------------------|
| Movables: | | |
| (1) Money, notes, realizable securities..... | C | R |
| (2) War material—depots of arms, uniforms, army stores, and, generally speaking, property directly adaptable to war.. | C | S |
| (3) Railway material, telegraphs, shore ends of cables, wagons, horses, motorcars, airships, boats, and other means of transit and communication..... | C ²⁸ | S |
| (4) Movable property not directly adaptable to warlike purposes..... | R | R |
| Immovables: | | |
| (1) Institutions devoted to religion, ²⁹ charity, education, arts, and sciences..... | R | R |
| (2) Other buildings, lands, forests, and agricultural undertakings. | U | R |
| The property of communes—e. g., "town halls, waterworks, gas works, police stations" (Holland, <i>Laws and Customs of War</i> , p. 40)..... | R | R |
| Shore ends of submarine cables connected with a neutral country.. | S | S |

356. What Occupant May Do with Such Property. The occupant does not have the absolute right of disposal or sale of enemy's real property. As administrator or usufructuary he should not exercise his rights in such wasteful and negligent manner as to seriously impair its value. He may, however, lease or utilize public lands or buildings, sell the crops, cut and sell timber, and work the mines. A lease or contract should not extend beyond the conclusion of the war.²³

357. State Real Property Susceptible of Direct Military Use. Real property of a State which is of direct military use, such as forts, arsenals, dockyards, magazines, barracks, railways, canals, bridges, piers, wharves, remain in the hands of the occupant until the close of the war, and may be destroyed or damaged, if deemed necessary, in military operations.²⁴

²³ Whether State-owned railway rolling stock is to be retained by captor or restored should be specially settled in the treaty of peace.

²⁴ Includes churches, temples, mosques, synagogues, etc., without any distinction as to the nature of the religious cult (Hague I. B. B., p. 152).

As to neutral property in an occupied country, see chapter XV.

N. B.: Imperative military necessity may justify the destruction of any of the above kinds of property."

²⁵ Land Warfare, Opp., par. 427. Spaight, War Rights on Land, p. 416. The rules of usufruct of the invaded territory should be applied especially as to forests, which should not be treated in a barbarous manner.

²⁶ Rules adopted by the Japanese upon the occupation of Dalny. Ariga, pp. 354-355.

I. PUBLIC PROPERTY OF THE ENEMY.

A. Landed Properties.

(a) The buildings, grounds, and other real estate belonging to the Government will be utilized by our army or will be a source of revenue to it. The army will destroy them only in extreme necessity of war. Outside of this case, it must manage them as a usufruct and never claim the property for itself. However, the ordnance depots, telegraph, and telephone establishments will be seized.

(b) The landed estates of the city of Dalny, and the establishments devoted to public worship, charity, fine arts, and sciences will be protected and considered as private properties.

B. Personal Properties.

(a) All moneys, securities, arms, munitions, railroad material, wagons, horses, vessels, provisions, clothing, and all objects fit for use in war, will be seized.

(b) The properties belonging to the city of Dalny and institutions of public worship, charity, education, fine arts and sciences, will be treated as private properties.

II. PRIVATE PROPERTY.

A. Real Property.

(a) Only grounds, buildings, or real properties, the owners of which have left without intrusting them to administrators, can be temporarily occupied by our army.

(b) Common landed property will be placed for our use by way of request only.

358. Property of Municipalities, Etc. H. R. Art. LVI. The property of municipalities, that of institutions dedicated to religion, charity and education, the arts and sciences, even when State property, shall be treated as private property.

All seizure of, destruction or willful damage done to institutions of this character, historic monuments, works of art, science, is forbidden, and should be made the subject of legal proceedings.

359. Authorized Treatment of. The property included in the foregoing rule may be utilized in case of necessity for quartering the troops, the sick and wounded, horses, stores, etc., and generally as prescribed for private property.²⁰ Such property must, however, be secured against all avoidable injury, even when located in fortified places which are subject to seizure or bombardment.²¹

360. Public Movable Property. H. R. Art. LIII, par. 1. An army of occupation can only take possession of cash, funds, and realizable securities which are strictly the property of the State, depots of arms, means of transport, stores

B. Personal Property.

(a) Only railroad material, vessels, arms, munitions, horses, stores, clothing, and all articles that can be used directly in war will be appropriated.

(b) Other private properties shall be turned to account of our army by right of taxation, contribution, or requisition only.

III. PROPERTY OF UNKNOWN ORIGIN.

When it is not clear whether property is public or private, it will be temporarily regarded as public property upon condition that the principle of private property is applied to it if, subsequently, the private ownership is clearly proved.

REMARKS.

1. As the administration of the Railway Co. of Eastern China may be considered as a State undertaking, everything owned by it or connected with its working will be considered and treated as property of the State.

2. As the greater part of the property of the town of Dalny is so situated that it is impossible to ascertain definitely the ownership, especially after the destructive acts of the Russians, the pillage and devastation of marauding bands and of the Chinese inhabitants themselves, no provisions can be made with respect thereto. That to which the owners can prove their right by incontestable evidence will be treated according to the principles of international law.

3. Private property seized will be restored and the question of indemnity settled when peace is reestablished. For every article of private property seized by the army, a certificate will, as soon as possible, be furnished.

4. When our army makes use of property the ownership of which is not certain, the designation of these articles, their number, and any information as to the place where they were found, etc., will, as far as possible, be recorded.

²⁰ Vide ante pars. 333-335.

²¹ Vide ante pars. 225-228. Sieges and bombardments.

G. O. 100, 1863, art. 35: "Classical works of art, libraries, scientific collections, or precious instruments, such as astronomical telescopes, as well as hospitals, must be secured against all avoidable injury, even when they are contained in fortified places whilst besieged or bombarded."

and supplies, and, generally, all movable property belonging to the State which may be used for military operations."²²

361. Two Classes of Movable Property of Enemy. All movable property belonging to the State directly susceptible of military use may be taken possession of as booty and utilized for the benefit of the invader's Government. Other movable property, not directly susceptible of military use, must be respected and can not be appropriated."²³

362. Property of Unknown Ownership. Where the ownership of property is unknown—that is, where there is any doubt as to whether it is public or private, as frequently happens—it should be treated as public property until ownership is definitely settled."²⁴

APPENDIX.

The following blanks were prepared in the office of the Quartermaster's Corps for use of officers in making requisitions. They are issued in triplicating books so arranged that one copy can be sent to proper headquarters, one copy given to the party from whom articles are requisitioned, and one copy retained.

[Field Form No. —.]

Not negotiable.

Receipt for supplies in enemy's country.

I certify that I have received the above stores. That I have (have not) paid for same and that they will be taken up and accounted for on my
 for 19....

, Quartermaster.

²² On January 23, 1898, the firm of Smith, Bell & Co., of Manila (bankers), were required to pay to the military authorities \$100,000 for a draft for that amount drawn in favor of one Mariano Trias, who was the custodian of the funds, or treasurer, of the Philippine Insurgents. The original draft, which was not in the possession of the United States authorities, passed through several hands and was finally located in the possession of a certain Filipino, who was warned that if he attempted to collect the amount, or to let same out of his possession, his house and lands would be confiscated to the United States.

The action of the military authorities was sustained. Vide Magoon's reports, p. 261.

²³ It is usual to accord protection to Crown pictures, jewels, collections of art, and archives, but papers connected with the war may be secured, even if they pertain to archives. Land Warfare, Opp., par. 431.

²⁴ The application of this rule will avoid fraudulent transfer of title of public property to private individuals. Land Warfare, Opp., par. 432.

Station:

 (Signature of person furnishing supplies.)

Authority
 Under Art. 52, Hague Convention October 18, 1907, respecting laws and customs of war on land. 32 Stats., Part 2, Page 1823.

Instructions to holder.

This receipt should be delivered to

.....
 (Name of disbursing officer.)

at
 (Address of disbursing officer.)

.....
 within 30 days of its date.

The holder will request a certificate of acknowledgment at the time of turning in this receipt, which is intended to safeguard his interests in case of loss of this receipt while in transit or during adjustment.

The holder is informed that this receipt will be examined and inquired into and that he may be required to present satisfactory evidence as to his title, etc., to the property taken before payment is made.

No payment can be made under any circumstances whatever until this receipt has been turned in.

CHAPTER X.

PENALTIES FOR VIOLATIONS OF THE LAWS OF WAR.

363. Violations by Belligerent Party. H. Con. IV, Art. III. A belligerent party which violates the provisions of the said regulations shall, if the case demands, be liable to pay compensation. It shall be responsible for all acts committed by persons forming part of its armed forces.¹

364. Penalties for States. From the inherent nature of war as a last remedy of States, and from the nature of governments themselves, no penalties can be directed against the State itself, although certain practical measures are recognized in international law for securing the legitimate conduct of war by belligerents which will be considered under the following heads: (a) Public complaints; (b) punishment of individuals; (c) reprisals or retaliation; and (d) taking hostages.

(A) COMPLAINTS.

365. Complaints. (1) Complaints through the public, and especially foreign, press have force solely through the formation of adverse public opinion, which no nation at war can afford to disregard.

(2) Complaints sent through neutral States—the only channel of diplomatic intercourse—may result in mediation or good offices, or intervention.²

(3) Complaints sent direct by parlementaires made use of between commanders of belligerent forces produce results in the future avoidance of acts complained of or in the punishment of offenders for violations of the laws of war.³

¹ See also Hague Con., IV, Art. I; H. R., Art. LVI, par. 2; and Gen. Con., art. 28.

² Ariga, p. 253.

³ Ariga, p. 286.

(B) PUNISHMENT OF INDIVIDUALS.

WAR CRIMES.

366. Offenses Committed by Armed Forces. The principal offenses of this class are: Making use of poisoned and otherwise forbidden arms and ammunition; killing of the wounded; refusal of quarter; treacherous request for quarter; maltreatment of dead bodies on the battle field; ill treatment of prisoners of war; breach of parole by prisoners of war; firing on undefended localities; abuse of the flag of truce; firing on the flag of truce; abuse of the Red Cross flag and emblem; and other violations of the Geneva Convention; use of civilian clothing by troops to conceal their military character during battle; bombardment of hospitals and other privileged buildings, improper use of privileged buildings for military purposes; poisoning of wells and streams; pillage and purposeless destruction; ill-treatment of inhabitants in occupied territory.* Individuals of the armed forces will not be punished for these offenses in case they are committed under the orders or sanction of their government or commanders. The commanders ordering the commission of such acts, or under whose authority they are committed by their troops, may be punished by the belligerent into whose hands they may fall.

367. Effect of Disregard of War Law by Entire Corps. When an entire corps, or body of troops, systematically disregards the laws of war, e.g., by refusal of quarter, any individuals belonging to it who are taken prisoners may be treated as implicated in the offense.[†]

368. Refusal of Quarter. All troops of the enemy known or discovered to give no quarter in general, or to any portion of the army, receive none.[‡]

369. Hostilities Committed by Individuals Not of Armed Forces. Persons who take up arms and commit hostilities without having complied with the conditions prescribed for securing the privileges of belligerents, are, when captured by the enemy, liable to punishment for such hostile acts as war criminals.

370. War Rebels. War rebels are persons within an occupied territory who rise in arms against the occupying or conquering army, or against the authorities established by the same. If captured, they may suffer death, whether they rise singly, in small or large bands, and whether called upon to do so by their own, but expelled government or not. They are not prisoners of war; nor are they, if discovered and secured before their conspiracy has matured to an actual rising or armed violence.[§]

371. Highway Robbers and Pirates of War. Men, or squads of men, who commit hostilities, whether by fighting, or by inroads for destruction or plunder, or by raids of any kind, without commission, without being part and portion of the organized hostile army, and without sharing continuously in the war, but who do so with intermitting returns to their homes and avocations, or with the occasional assumption of the semblance of peaceful pursuits, divesting themselves of the character or appearance of soldiers—such men, or squads of men, are not public enemies, and, therefore, if captured, are not entitled to

* Land Warfare, Opp., par. 118.

† Laws of War on Land. Holland, par. 118.

‡ G. O. 100, 1863, art. 62: "Quarter having been given to an enemy by American troops, under a misapprehension of his true character, he may, nevertheless, be ordered to suffer death if, within three days after the battle, it be discovered that he belongs to a corps which gives no quarter." G. O. 100, 1863, art. 66. Vide par. 183, supra.

§ G. O. 100, 1863, art. 65.

the privileges of prisoners of war, but shall be treated summarily as highway robbers and pirates."

372. Acts Punished as War Treason. Some of the principal acts punished as treasonable by belligerents in invaded territory, when committed by the inhabitants, are espionage, supplying information to the enemy, damage to railways, war material, telegraphs, or other means of communication; aiding prisoners of war to escape; conspiracy against the armed forces of the enemy or members thereof; intentional misleading of troops while acting as guides; voluntary assistance to the enemy by giving money or serving as guides; inducing soldiers to serve as spies, to desert, or to surrender; bribing soldiers in the interest of the enemy; damage or alteration to military notices and signposts in the interests of the enemy; fouling sources of water supply and concealing animals, vehicles, supplies, and fuel in the interest of the enemy; knowingly aiding the advance or retirement of the enemy; circulating proclamations in the interests of the enemy."

373. Armed Prowlers. Armed prowlers, by whatever names they may be called, or persons of the enemy's territory, who steal within the lines of the hostile army for the purpose of robbing, killing, or of destroying bridges, roads, or canals, or of robbing or destroying the mail, or of cutting the telegraph wires, are not entitled to the privileges of the prisoner of war."

374. Marauders. Marauders are individuals, either civilians or soldiers, who have left their corps, and who follow armies on the march or appear on battlefields, either singly or in bands, in quest of booty, and rob, maltreat, or murder stragglers and wounded, and pillage the dead. Their acts are considered acts of illegitimate warfare, and the punishment is imposed in the interest of either belligerent."

375. Other Crimes. There are many other crimes or offenses which are the result of war and which a belligerent may forbid and punish in the maintenance of order and the safety of his army, such as evasion of censorship regulations; making false claims for damage; making false accusations against the troops; furnishing liquor to soldiers; being in possession of animals, stores, or supplies pertaining to the army, and, generally, neglect and disobedience of orders of the Government, including police and sanitary regulations. All such crimes should be defined and the liability to punishment therefor made known to the inhabitants."

376. Trials. In every case trial of individuals before military or other courts designated by the belligerent should precede punishment."

377. Punishments. All war crimes are subject to the death penalty, although the fact of trial indicates that a lesser penalty may be pronounced. The

⁸ G. O. 100, 1863, art. 82.

⁹ Land Warfare, Opp., par. 445.

¹⁰ G. O. 100, 1863, art. 84.

¹¹ The foregoing definition is taken from Land Warfare, Opp., par. 488. See also *Curry v. Collins*, 37 Mo., 324, 328, where the court says: "A marauder is one who while employed in the army as a soldier commits larceny or robbery in the neighborhood of the camp or while wandering away from the army (2 Bouv. Law Dict., 133). But in the modern and metaphysical sense of the word, as now sometimes used in common speech, the word seems to be applied to a class of persons who are not a part of any regular army, and are not answerable to any military discipline, but who are mere lawless banditti, engaged in robbery, murder, and all conceivable crimes." See pars. 112 and 171.

¹² Land Warfare, Opp., par. 446. See also note 17 to par. 302, supra.

¹³ Hague Conference, 1899, p. 146.

punishment should be deterrent, and in imposing a sentence of imprisonment it is not necessary to take into consideration the end of the war, which fact does not necessarily limit the imprisonment imposed. Any other construction of this would result in belligerents imposing the extreme penalty of death in all cases.¹⁴

378. Crimes punishable by all penal codes, such as arson, murder, maiming, assaults, highway robbery, theft, burglary, fraud, forgery, and rape, if committed by an American soldier in a hostile country against its inhabitants, are not only punishable as at home, but in all cases in which death is not inflicted, the severer punishment shall be preferred.¹⁵

(C) REPRISALS.

379. **Reprisals.** Reprisals are acts of retaliation, resorted to by one belligerent against the enemy individuals or property for illegal acts of warfare committed by the other belligerent, for the purpose of enforcing future compliance with the recognized rules of civilized warfare.¹⁶

380. **Retaliation Indispensable.** The law of war can no more wholly dispense with retaliation than can the law of nations, of which it is a branch. Yet civilized nations acknowledge retaliation as the sternest feature of war. A reckless enemy often leaves to his opponent no other means of securing himself against the repetition of barbarous outrage.¹⁷

381. **Retaliation Not Resorted to for Revenge.** Retaliation will, therefore, never be resorted to as a measure of mere revenge, but only as a means of protective retribution, and, moreover, cautiously and unavoidably; that is to say, retaliation shall only be resorted to after careful inquiry into the real occurrence, and the character of the misdeeds that may demand retribution. Unjust or inconsiderate retaliation removes the belligerents farther and farther from the mitigating rules of regular war, and by rapid steps leads them nearer to the internecine wars of savages.¹⁸

382. **Who May Commit the Illegal Acts Causing Reprisals.** The illegal acts of warfare may be committed by a government, by its military commanders, or by a community, or individuals thereof whom it is impossible to apprehend, try, and punish.

383. **Subjects of Retaliation.** All prisoners of war are liable to the infliction of retaliatory measures.¹⁹ Persons guilty of no offense whatever may be punished as retaliation for the guilty acts of others.

¹⁴ Land Warfare, Opp., pars. 450-451.

¹⁵ G. O. 100, 1863, art. 47. See also A. W. 58.

¹⁶ The following rules were adopted at the Inst. of Int. Law at Oxford, arts. 85 and 86:

"Reprisals are formally forbidden in all cases in which the wrong complained of has been redressed.

"In the grave cases in which reprisals appear to be an imperious necessity, the manner of inflicting them, and their extent, must not be disproportioned to the infraction committed by the enemy.

"They can only be inflicted under the authority of the commander-in-chief.

"They must in all cases take account of the laws of humanity and morality."

¹⁷ G. O. 100, 1863, art. 27.

¹⁸ G. O. 100, 1863, art. 28.

¹⁹ G. O. 100, 1863, art. 59, par. 2.

384. Who May Resort to Retaliation. Reprisals should never be resorted to by individual soldiers but solely under the direct orders of a commander.²²

385. Procedure. The rule requiring careful inquiry into the real occurrence will always be followed unless the safety of the troops requires immediate drastic action and the persons who actually committed the offense can not be ascertained.²³

386. Form of Reprisal. The acts resorted to as reprisal need not conform to those complained of by the injured party, but should not be excessive or exceed the degree of violence committed by the enemy. Villages or houses, etc., may be burned for acts of hostility committed from them where the guilty individuals can not be identified, tried, and punished. Collective punishments may be inflicted either in form of fine or otherwise.²⁴

(D) HOSTAGES.

387. Hostages. Hostages have been taken in recent wars for the following purposes: (1) To insure proper treatment of wounded and sick when left behind in hostile localities; (2) to protect the lives of prisoners of war and railroad officials who have fallen into the hands of irregular troops or whose lives have been threatened; (3) to protect lines of communication by placing them on engines of trains in occupied territory; (4) to insure compliance with requisitions, contributions, etc. When a hostage is accepted he is treated as a prisoner of war.²⁵

²² Land Warfare, Opp., par. 455.

²³ See par. 381, ante. Spaight, War Rights on Land, p. 469; Opp., Land Warfare, par. 456.

²⁴ See note 24, par. 354, supra. Also Spaight, War Rights on Land, pp. 464-465; Land Warfare, Opp., par. 459. The Germans in 1870-1 by way of reprisals for hostile acts committed by inhabitants on troops, convoys, etc., exacted fines or burned buildings. At Chammes the Casino was burned. The village of Fontenay was burned and a fine of 10,000,000 francs levied on account of the destruction of the railroad bridge near the village with the connivance of the inhabitants.

²⁵ German practice: F. S. R., p. 143. "It is a good plan to make each locality in the neighborhood of a telegraph or telephone line responsible, under heavy penalties, for the preservation of a particular section."

In 1870 in France the Germans directed that all trains in Alsace and other occupied districts "be accompanied by inhabitants who are well known and generally respected, and who shall be placed upon the locomotive, so that it may be made known that every accident caused by the hostility of the inhabitants will, in the first place, injure their countrymen."

The same practice prevailed in South Africa under proclamation of Lord Roberts of June 16, 1900, although this proclamation was subsequently repealed. In the war of 1861-1865, Gen. Sherman caused a suspected place to be tested by drawing a carload of prisoners, or of citizens implicated, over it by a long rope. See McClellan's Own Story, pp. 326-327. Sheridan Memoirs, Vol. I, pp. 380-381. Grant's Memoirs, p. 558.

The Germans in 1870-1 took hostages at Chatillon for the safety of 200 prisoners in the hands of Garibaldi, who had threatened to kill them, and at Remiremont for some railway officials who had been carried off. Spaight, War Rights on Land, pp. 466, et seq.

Vide requisitions, supra, par. 350, and note.

CHAPTER XI.

NEUTRALITY.

388. Definition. Neutrality on the part of a State not a party to the war, consists in refraining from all participation in the war, and in exercising absolute impartiality in preventing, tolerating, and regulating certain acts on its own part, by its subjects and by the belligerents. It is the duty of belligerents to respect the territory and rights of the neutral States.¹

389. Notification of State of War and Effect Upon Neutrals. H. Con. III, Art. II. The existence of a state of war must be notified to the neutral powers without delay, and shall not take effect with regard to them until after the receipt of a notification, which may, however, be given by telegraph. Neutral powers, nevertheless, can not rely on the absence of notification if it is clearly established that they were in fact aware of the existence of a state of war.²

NEUTRAL RIGHTS AND DUTIES.

390. Inviolability of Territory. H. C. V, Art. I. The territory of neutral powers is inviolable.³

391. Movements of Troops and Convoys of Supplies. H. C. V, Art. II. Belligerents are forbidden to move troops or convoys of either munitions of war or supplies across the territory of a neutral power.

392. Neutral Can Resist Violations of Neutrality by Force. H. C. V, Art. X. The fact of a neutral power resisting, even by force, attempts to violate its neutrality can not be regarded as a hostile act.

393. Patrolling the Frontier. It is quite usual, frequently necessary, and therefore the duty of a neutral power whose territory is adjacent to a theater of war, to mobilize a portion of its forces to enforce its neutrality along the frontier. That is to prevent troops of either belligerent to enter its territory, to intern such as may be permitted to enter, and generally to enforce its neutrality duties.⁴

¹ The written law on the subject of neutrality in regard to land warfare is found in conventions III and V of The Hague of 1907.

The purpose and effect of the rules laid down at The Hague in convention V were (1) to define more clearly the rights and duties of neutral powers in war on land and defining their positions with regard to the belligerents; and (2) defining the term neutral and the position of neutral individuals in their relations with the belligerents.

² Vide par. 21, *supra*.

³ It is a principle of the law of nations that no belligerent can rightfully make use of the territory of a neutral State for belligerent purposes without the consent of the neutral Government: 7 Opp. Att. Gen. 367, Cushing.

⁴ In 1806 the Danes formed a cordon of troops along the frontier near Lubeck, with arms in their hands to make their neutrality respected. They fired on French troops who were pursuing the Prussians. Letters and documents, Murat, Vol. IV, Despatch 2639. In 1870-71 both Belgium and Switzerland mobilized troops on their frontiers to prevent violations of their neutrality by the belligerents. Germany complained that no measures were taken by the Grand Duchy of Luxemburg to prevent French troops from crossing their territory and violating their territory. There have been frequent mobilizations of United States troops on the Mexican frontier for the enforcement of our neutrality laws during rebellions in Mexico. For the past three years the entire frontier has been patrolled along the Mexican border and we now have a large number of Federal troops interned at El Paso. They crossed the border at or near Ojinaga.

394. Effect of Failure in Preventing Belligerent Troops Violating Neutrality. Should the neutral State be unable, or fail for any reasons, to prevent violations of its neutrality by the troops of one belligerent entering or passing through its territory, the other belligerent may be justified in attacking the enemy forces on this territory.^a

395. Convoys of Munitions and Supplies. A distinction must be drawn between the official acts of the belligerent State in conveying or shipping munitions and supplies through neutral territory as part of an expedition and the shipment of such supplies commercially. The former is forbidden while the latter is not.^a

RECRUITING.

396. Forming Corps of Combatants and Recruiting Forbidden. H. C. V., Art. IV. Corps of combatants can not be formed nor recruiting agencies opened on the territory of a neutral power to assist the belligerents.

397. What is Prohibited. The establishment of recruiting agencies, the actual recruiting of men, the formation and organization of hostile expeditions on neutral territory, and the passage across its frontiers of organized bodies of men intending to enlist are prohibited.^a

398. Personnel of Voluntary Aid Society. This prohibition does not extend to the medical personnel and units of a recognized voluntary aid society duly authorized to join one of the belligerents.^a

^a In August, 1870, Von Moltke issued orders to the Third, and Meuse armies, directing that: "Should the enemy pass over into Belgium without being at once disarmed, he is to be pursued thither without delay." Ger. Off. Hist., pt. 1, Vol. II, Appendix 42.

In the South African War a Boer commando retreated into Swaziland (understood and agreed to be neutral), where it was followed and attacked by a British column in March, 1901. Times Hist., Vol. V, p. 177.

In the Russo-Japanese War, Manchuria and Chosen, both neutral States, became the theater of military operations between the two belligerents. The avowed object of the war was the expulsion of the Russians from these two States, neither of which were able to prevent violations of their neutrality. Japan deliberately violated the neutrality of Chosen in order to forestall similar action by Russia. Prof. Ariga said that in many cases "a violation of neutrality may, in land war, have so very great an influence on the general issue of the operations that the other belligerent will usually not have to resort to the always uncertain methods of diplomacy; he must therefore retort in kind and at once to the act of violation, whatever be the intention of the neutral nation." P. 506.

For protest of Mr. Evarts, Secretary of State, against the troops of Gen. Diaz crossing the border into Texas and attacking his enemies, vide Digest of International Law, Moore, sec. 1334.

^a Vide H. C. V. Art. VII, par. 403 *infra*.

^a Rev. Stat. U. S., secs. 5281-5291. Sec. 5282. "Every person who, within the territory or jurisdiction of the United States, enlists or enters himself, or hires or retains another person to enlist or enter himself, or to go beyond the limits or jurisdiction of the United States with intent to be enlisted or entered in the service of any foreign prince, State, colony, district, or people, as a soldier, * * * shall be deemed guilty of a high misdemeanor, and shall be fined not less than one thousand dollars, and imprisoned not more than three years."

Sec. 5291. "The provisions of this title shall not be construed to extend to any subject or citizen of any foreign prince, State, colony, district, or people, who is transiently in the United States."

^a Vide Geneva Conference, 1906, Art. II.

399. Does Not Extend to Individuals. H. C. V, Art. VI. The responsibility of a neutral power is not engaged by the fact of individuals crossing the frontier separately to offer their services to one of the belligerents.

400. What the Test. The prohibition in the two foregoing rules is directed against organized bodies which only require to be armed to become an immediate fighting force. Individuals crossing the frontier singly or in small bands that are unorganized create no obligation on the neutral State.*

401. Nationals of Belligerent Not Included. Nationals of a belligerent State are permitted freely to leave neutral territory to join the armies of their country.¹⁹

402. Officers on Active List. Officers of the land forces of neutral powers on the active list should not be permitted to join a belligerent, and having joined such belligerent forces should be recalled.²⁰

* The Santissima Trinidad, I. Brock, 478. "An American citizen may enter either the land or naval service of a foreign Government without compromising the neutrality of his own."

United States v. Louis Kazinski, 2 Sprague, 7. "It is not a crime, under the neutrality law, to leave this country with intent to enlist in foreign military service; nor to transport persons out of the country with their own consent who have an intention of so enlisting. To constitute a crime under the statute, such person must be hired or retained to go abroad with the intent to be so enlisted."

Vide, 4, Op. Att. Gen., 336 (Nelson) and 7 Op. Att. Gen., 367 (Cushing). 8 id. 468 and id. 476. "It goes without saying that the neutral State must prevent its frontiers being crossed by corps or bands which have been organized on its territory without its knowledge. On the other hand, individuals may be considered as acting in an isolated manner when there exists between them no bond of a known or obvious organization, even when a number of them pass the frontier simultaneously." Hague Con. Actes, p. 127.

¹⁹ In 1870 the United States permitted large numbers of French and Germans to leave this country under recalls from their Governments. In one case about 1,200 Frenchmen embarked in French ships with 96,000 rifles and 11,000,000 cartridges. The United States held that the men were not officered or in any manner organized, and as the arms and ammunition were legitimate subjects of commerce, the issuing of the ships from an American port did not constitute an expedition. Vide Hall Int. Law, p. 609, and Spaight, War Rights on Land, pp. 492 et seq. See also sec. 5291, U. S. Rev. Stat., supra, note 7, par. 397.

²⁰ See 5281, U. S. Rev. Stat.: "Every citizen of the United States who, within the territory or jurisdiction thereof, accepts and exercises a commission to serve a foreign prince, State, colony, district, or people, in war, by land or by sea, against any prince, State, colony, district, or people, with whom the United States are at peace, shall be deemed guilty of a high misdemeanor, and shall be fined not more than two thousand dollars and imprisoned not more than three years." Murray v. Schooner Charming Betsy, 2 Cranch, 64, 82.

The consensus of opinion is that it is an unneutral act for a State to permit its officers on the active list to take service in a foreign belligerent army. The practice of States has not always been uniform. In 1899, Germany recalled and punished some of her officers on the active list for taking service in the South African War. In 1876, Russia permitted many of her officers to serve in the Servian Army against Turkey, but in 1887 withdrew her officers from the Bulgarian Army on the outbreak of war with Servia.

Mr. Spaight says that, "Retired officers, having ceased to possess an official

SUPPLIES.

403. Neutral Not Bound to Prevent Shipment of Supplies. H. C. V, Art. VII. A neutral power is not called upon to prevent the export or transport, on behalf of one or other of the belligerents, of arms, munitions of war, or, in general, of anything which can be of use to an army or a fleet.

404. Obligations of Neutral State as to Supplies. A neutral state, as such, is prohibited from furnishing supplies, munitions of war, or to make loans¹² to a belligerent. It is also forbidden to permit the use of its territory for the fitting out of hostile expeditions.¹³ It should issue a proclamation of neutrality.¹⁴

405. Commercial Transactions Not Prohibited. Commercial transactions by neutral companies, citizens, or persons resident in its territory with belligerents are not prohibited. That is, a belligerent can purchase from neutral companies, citizens, or persons within its territory supplies, munitions of war, or anything that can be of use to an army or fleet, which can be exported or transported without involving the neutral state.¹⁵

character, as it were, are recognized as having a freedom of action which the usages affecting neutrality do not allow to serving officers. War Rights on Land, p. 495.

As to medical personnel, see par. 398.

¹² As to loans by individuals see H. C. V., Art. XVIII, *infra*, par. 430.

¹³ U. S. Rev. Stat., Sec. 5286.—“Every person who, within the territory or jurisdiction of the United States, begins, or sets on foot, or provides or prepares the means for, any military expedition or enterprise, to be carried on from thence against the territory or dominions of any foreign prince or State, or of any colony, district, or people, with whom the United States are at peace, shall be deemed guilty of a high misdemeanor, and shall be fined not exceeding three thousand dollars, and imprisoned not more than three years.”

Kennett v. Chambers, 14 How., 38. *United States v. Ybanez*, 53 Fed. Rep., 536. *Wiborg v. United States*, 163 U. S., 632, 655. *U. S. v. Murphy*, 84 Fed. Rep., 609. *United States v. Hart*, 78 Fed. Rep., 868.—“Sec. 5286, Rev. Stat., creates two offenses, (1) the setting on foot, within the United States, a military expedition, to be carried on against any power, etc., with whom the United States are at peace; (2) providing the means for such expedition.”

Vide as to sales of arms, etc., by the U. S. Govt. Dig. Int. Law, Moore, sec. 1309.

¹⁴ See par. 389 *supra*. For neutrality proclamations of President Grant, Aug. 22, 1870, see For. Rel., 1870, p. 45; also Dig. Int. Law, Moore, sec. 1319. After setting forth categorically acts prohibited by the laws of neutrality, warns the population that “while all persons may lawfully and without restriction, by reason of the aforesaid state of war, manufacture and sell within the United States arms and munitions of war, and other articles ordinarily known as contraband of war, yet they can not carry such articles upon the high seas for the use or service of either belligerent, nor can they transport soldiers and officers of either, * * * without incurring the risk of hostile capture, and the penalties denounced by the law of nations in that behalf.” See also the proclamation of President Roosevelt on February 11, 1904, upon the opening of hostilities between Japan and Russia. For. Rel., 1904, pp. 32 *et seq.*

¹⁵ *United States v. The Laurada*, 85 Fed. Rep., 760.—“The neutrality laws are not designed to interfere with commerce, even in contraband of war, but merely to prevent distinctly hostile acts, as against a friendly power, which tend to involve this country in war.” *Pearson v. Parson*, 108 Fed. Rep., 461.

The *Peterhoff*, 5 Wall., 28.—“The trade of neutrals with belligerents in articles not contraband is absolutely free, unless interrupted by blockade.”

406. Means of Communication. H. C. V, Art VIII. A neutral power is not called upon to forbid or restrict the use on behalf of the belligerents of telegraph or telephone cables or of wireless telegraph apparatus belonging to it or to companies or private individuals.

407. Must Not Manifestly Assist One Belligerent. The liberty of a neutral State to transmit dispatches by means of its telegraph lines on land, its submarine cables, and wireless apparatus does not imply the power to use them or permit their use to lend a manifest assistance to one of the belligerents."

408. Impartiality. H. C. V, Art. IX. Every measure of restriction or prohibition taken by a neutral power in regard to the matters referred to in Articles VII and VIII (pars. 403, 406) must be impartially applied by it to both belligerents.

A neutral power must see to the same obligation being observed by companies or private individuals owning telegraph or telephone cables or wireless telegraph apparatus.

409. Use of Neutral Territory to Establish Wireless Telegraphy. H. C. V, Art. III. Belligerents are likewise forbidden to:

(a) Erect on the territory of a neutral power a wireless telegraphy station or other apparatus for the purpose of communicating with belligerent forces on land or sea."

(b) Use any installation of this kind established by them before the war on the territory of a neutral power for purely military purposes, and which has not been opened for the service of public messages."

410. Neutral State Must Prohibit Acts on Its Own Territory. H. C. V, Art. V. A neutral power must not allow any of the acts referred to in Articles II to IV (pars. 391, 396, 409) to occur on its territory.

It is not called upon to punish acts in violation of its neutrality unless the said acts have been committed on its own territory.

BELLIGERENTS INTERNED IN NEUTRAL TERRITORY.

411. Internment. H. C. V, Art. XI. A neutral power which receives on its territory troops belonging to the belligerent armies shall intern them, as far as possible, at a distance from the theater of war.

It may keep them in camps and even confine them in fortresses or in places set apart for this purpose.

It shall decide whether officers can be left at liberty on giving their parole not to leave the neutral territory without permission.

Northern Pac. Ry. Co. v. American Trading Co., 195 U. S., 439, 465.—
"Contracts for the transportation of contraband articles are enforceable."

Hendricks v. Gonzales, 67 Fed. Rep., 351; 14 C. C. A., 659.—"A collector of customs is not justified in refusing clearance to a vessel and her cargo, under sec. 5290, Rev. Stat., because she is intended to transport arms and munitions of war for the use of an insurrectionary party in a country with which the United States is at peace."

"Hague conference 1907, Actes Vol. III, p. 56. No mention is made of the use of postal services in these rules. It is assumed that they can be used, subject to the same restrictions.

"This paragraph was intended to prohibit in future a repetition of the action by Russia in establishing a wireless station at Chefoo in Chinese territory, by means of which communication was kept up between Port Arthur and the outer world during the siege in 1904. Spaight, War Rights on Land, p. 490.

"Vide Hague Con., 1907, Actes, Vol. III, p. 53.—"The inviolability of the territory of a neutral State is incompatible with the use of this territory by a belligerent in the aid of any of the objects that Art. III is directed at."

412. Duty of Neutral State. A neutral is not bound to permit belligerent troops to enter its territory. On the other hand it may permit them to do so without violating its neutrality. But they must be interned or confined in places designated by the neutral. They will naturally be disarmed and placed under the necessary guard, thereby occupying in many respects the same status as prisoners of war.²⁹

413. Neutral Can Impose Terms. If troops or soldiers of a belligerent are permitted to seek refuge in neutral territory, the neutral can impose the terms upon which they may do so. In case of large bodies of troops seeking refuge in neutral territory, these conditions will be usually stipulated in a convention drawn up by and between the duly authorized representative of the neutral power and the senior officer of the troops.³⁰

414. Parole of Officers. Beyond the right of deciding which, if any, of the officers are to be paroled, no conditions are specified and no penalties are prescribed for breach of parole.³¹

415. Disposition of Arms, Equipment, Etc. The munitions, stores, and effects which the interned troops bring with them should be restored to their Government at the termination of the war.³²

416. Maintenance. H. C. V, Art. XII. In the absence of a special convention to the contrary, the neutral power shall supply the interned with the food, clothing, and relief required by humanity.

At the conclusion of peace the expenses caused by the internment shall be made good.³³

417. Prisoners of War. H. C. V, Art. XIII. A neutral power which receives escaped prisoners of war shall leave them at liberty. If it allows them to remain in its territory it may assign them a place of residence.

The same rule applies to prisoners of war brought by troops taking refuge in the territory of a neutral power.³⁴

418. Sick and Wounded. H. C. V, Art. XIV. A neutral power may authorize the passage into its territory of the sick and wounded belonging to the

²⁹ See as to inviolability of neutral territory, *supra*, pars. 391-395 and notes.

³⁰ The historical example of this is the convention drawn up between Gen. Clinchant, of the French Army, and the Swiss general, Herzog, appendix A to this chapter.

³¹ The proposition by Japan "that officers and other members of the armed forces of a belligerent should not be given their liberty or authorized to return to their country except with the consent and under conditions laid down by the other belligerent, and that the parole given to a neutral State by such individuals should be deemed equivalent to a pledge given to the enemy," was rejected by the committee. Hague Con. Actes, Vol. III, p. 61. As to medical personnel, see *infra*, par. 424.

³² Vide Appendix A to this chapter. The foregoing rule is subject to the exception that the neutral State would certainly sell such articles as are subject to deterioration, utilizing the proceeds for the maintenance of the troops. As to material captured by and in the hands of the troops seeking asylum in neutral territory, the proposition was made that it should be returned at the end of the war to the Government from which it was captured. Objection was raised to this, and the proposal was withdrawn. Hague Conference Actes, Vol. III, pp. 59-60.

³³ See Appendix A, this chapter.

³⁴ Note that a different rule applies with regard to sick and wounded prisoners of the enemy forming part of a convoy permitted to pass through neutral territory under Art. XIV, par. 2. See pars. 107, 418, and 422.

belligerent armies, on condition that the trains bringing them shall carry neither personnel or war material. In such a case, the neutral power is bound to take whatever measures of safety and control are necessary for the purpose.

The sick or wounded brought under these conditions into neutral territory by one of the belligerents, and belonging to the hostile party, must be guarded by the neutral power so as to insure their not taking part again in the military operations. The same duty shall devolve on the neutral State with regard to wounded or sick of the other army who may be committed to its care.²⁸

419. Obligations of Neutral State. The neutral power is under no obligation to permit the passage of a convoy of evacuation of sick and wounded through its territory, but when permitted to pass, the neutral must exercise control, must see that neither personnel nor matériel is carried, and generally must accord impartiality of treatment to the belligerents.²⁹

420. Consent of Other Belligerent. There is no indicated necessity for obtaining the consent of the other belligerent before granting authority for the passage of the convoy, but this action seems advisable, especially where the passage of a considerable body of sick and wounded is contemplated.³⁰

421. Sick and Wounded of Belligerent Convoying Same. The sick and wounded of the belligerent conveying them may be carried through to their own territory. If, however, they are left in the neutral's territory they must be interned so as to insure their not taking part again in the war.

422. Sick and Wounded Prisoners of War. Sick and wounded prisoners of war brought into neutral territory as part of a convoy of evacuation, granted right of passage through neutral territory, can not be transported to their own country nor liberated, as are prisoners of war escaping into or brought by troops seeking asylum in neutral territory, but must be detained by the neutral power.³¹

423. The Geneva Convention. H. C. V, Art. XV. The Geneva convention applies to sick and wounded interned in neutral territory.

424. Medical Personnel. The medical personnel belonging to belligerent forces, who have sought asylum and are interned under Article XI (par. 411), can be released by the neutral and permitted to return to their own State or army. Medical personnel and matériel necessary for the care of the sick and wounded of a convoy of evacuation, permitted to pass through neutral territory under Article XIV (par. 418), may be permitted to accompany the convoy. The neutral State may retain the necessary medical personnel and matériel for the care of the sick and wounded left in its care, and, failing this, may furnish same

²⁸ See pars. 107, 417 and 422, and note.

²⁹ Recognizing that in facilitating the evacuation of sick and wounded of a belligerent a neutral power may render valuable assistance to a belligerent, it was officially explained in the peace conference in 1899 that the article had no other meaning than "to establish that considerations of humanity and hygiene might determine a neutral State to permit such sick and wounded soldiers to cross its territory without failing in its duties of neutrality." Land Warfare, Opp. par. 495. Hague Conference 1899, p. 153.

³⁰ French Manual, p. 82. "Neutral States abstain from authorizing the transit of convoys of sick and wounded until the consent of the belligerent has been obtained." In 1870-1 Belgium, after consulting with England, refused passage of German sick and wounded across its territory on the ground that it would be a breach of neutrality. Luxemburg authorized such passage. Land Warfare, Opp. par. 496, note a.

³¹ See par. 417 supra.

and will have expense of same refunded by the belligerent concerned after the termination of the war.²²

425. Neutral Persons. H. C. V, Art. XVI. The nationals of a State which is not taking part in the war are considered as neutrals.²³

426. Neutral Persons Resident in Enemy Territory. Neutral persons resident in occupied territory are not entitled to claim different treatment, in general, from that accorded the other inhabitants.²⁴ They must refrain from all participation in the war, from all hostile acts, and observe strictly the rules of the occupant.²⁵

427. Diplomatic Agents. Diplomatic agents of neutral sovereigns and Governments must be treated with all courtesy, and be permitted such freedom of action as is possible to allow, with due regard to the necessities of the war.²⁶

²² See note 21, par. 414, supra.

²³ The intention in using the word "nationaux" was to convey the idea of "citizens" as understood in the English use of the word. Hague Convention Actes, 1907, p. 64.

²⁴ The articles relating to neutral persons (XVI, XVII, and XVIII) are what is left of twelve articles proposed to The Hague by Germany. England has never ratified them. The intention of these articles was to accord preferential treatment to the neutral persons and property during war. With regard to the suppressed articles the following two voeux were adopted by the conference:

"1. That in case of war the competent authorities, civil and military, shall make it a special duty to assist and protect the maintenance of peaceful relations, and in particular of commercial and industrial relations, between the inhabitants of the belligerent States and neutral States.

"2. That the high contracting powers shall seek to establish, by agreements between them, uniform contractual provisions determining the relations, in respect of military obligations, of each State with foreigners established in its territory."

²⁵ Vide supra pars. 312 et seq.

Mr. Oppenheim (Land Warfare) says: "Subjects of neutral powers not resident but only on a temporary visit within occupied territory can, to a certain extent, claim different treatment from that accorded to inhabitants, provided they take no part in the war. For instance, they are as a rule exempt from requisitions and contributions, and, if their property is required for military ends and needs, they must be fully indemnified." Par. 505 and note.

²⁶ The same rule applies to consuls of non-Christian countries, excluding Japan. In all countries consuls, while not diplomatic agents, are entitled to have their persons and offices exempted from martial law, except in urgent cases, although their property and business are not necessarily exempted.

As to right of correspondence, see Dig. Int. Law, Moore, sec. 675, as to correspondence by Mr. Washburn, our ambassador in Paris at the time of the siege of that city.

The Japanese in the exceptional case of correspondence by the Imperial Government at Peking and the Provinces in Manchuria laid down the following rules:

"1. Communications of the Government of Peking with local officials in the territory occupied by the enemy, through territory occupied by our army. Not permitted.

"2. Communications addressed by the local Chinese functionaries in the country occupied by the enemy to the Peking Government through territory occupied by our army. Permitted by a designated route which could not be used returning.

428. Punishments. All subjects of neutral powers whether resident or temporarily visiting in occupied territory may be punished for offenses committed by them to the same extent and in the same manner as enemy subjects."

429. Forfeiting Rights by Neutrals. H. C. V, Art. XVII. A neutral can not avail himself of his neutrality:

(a) If he commits hostile acts against a belligerent.

(b) If he commits acts in favor of a belligerent, particularly if he voluntarily enlists in the ranks of the armed force of one of the parties.

In such a case, the neutral shall not be more severely treated by the belligerent as against whom he has abandoned his neutrality than a national of the other belligerent State could be for the same act.

430. What Acts Not Favorable to One Belligerent. H. C. V, Art. XVIII. The following acts shall not be considered as committed in favor of one belligerent in the sense of Article XVII, letter (b):

(a) Supplies furnished or loans made to one of the belligerents, provided that the person who furnishes the supplies or who makes the loans lives neither in the territory of the other party nor in the territory occupied by him, and that the supplies do not come from these territories.

(b) Services rendered in matters of police or civil administration.

RAILWAY MATERIAL."

431. Railway Material. H. C. V, Art. XIX. Railway material coming from the territory of neutral powers, whether it be the property of the said powers or of companies or private persons, and recognizable as such, shall not be requisitioned or utilized by a belligerent except where and to the extent that it is absolutely necessary. It shall be sent back as soon as possible to the country of origin.

A neutral power may likewise, in case of necessity, retain and utilize to an equal extent material coming from the territory of the belligerent power."

"3. Communications from the local Chinese functionaries in the territory occupied by our army to those in territory occupied by the enemy. Absolutely prohibited, except after minute examination by our army.

"4. Communications from local Chinese functionaries in territory occupied by the enemy with regions occupied by our army. Permitted after examination at the outposts of the messengers and the official communications.

"5. Communications between the Government at Peking and the local functionaries in territory occupied by our army. Absolutely free. Ariga. pp. 544-547."

"Vide supra Military occupation, Chapter VIII, and Penalties for Violations of the Laws of War, Chapter X.

"For law as to preference to be given to the transportation of troops and material of war in time of war, see U. S. Stat. at Large, vol. 34, part 1, chap. 3591, p. 587: Provided, That wherever the word "carrier" occurs in this act it shall be held to mean "common carrier."

"That in time of war or threatened war preference and precedence shall, upon the demand of the President of the United States, be given, over all other traffic, to the transportation of troops and material of war, and carriers shall adopt every means within their control to facilitate and expedite the military traffic."

"This paragraph is new, being inserted in 1907. "It has the double object of: 1. To prevent a neutral State having its own railway service disturbed by the loss of its rolling stock; 2. To provide an automatic discouragement, as it were, to the practice of seizing neutral material which a belligerent might be inclined to resort to if the material so obtained became a clear addition to his resources." Spaight, War Rights on Land, pp. 512-513.

Compensation shall be paid by one party or the other in proportion to the material used and to the period of usage."

APPENDIX A.

Military Convention between the Commander of the First French Army and the General-in-chief of the Army of the Swiss Confederation for the entry of the French troops into Switzerland; signed at Les Verrieres, February 1, 1871.

The following convention has been made between General Clinchant, General-in-chief of the First French Army, and General Herzog, General-in-chief of the Army of Swiss Confederation:

Article 1. The French Army demanding to pass into Swiss territory will on entering lay down its arms, equipment, and ammunition.

Art. 2. These arms, equipment, and ammunition will be restored to France after peace and after the definitive settlement of the expenses occasioned to Switzerland by the sojourn of the French troops.

Art. 3. The artillery material and ammunition will be dealt with as above.

Art. 4. The horses, arms, and effects of the officers will remain at their disposal.

Art. 5. Arrangements will be made later as regards the troop horses.

Art. 6. Supply and baggage wagons, after having deposited their contents, will immediately return to France with their drivers and horses.

Art. 7. The treasure chest and post wagons will be handed over with the contents to the Swiss Confederation, which will account for them when the settlement of expenses is taking place.

Art. 8. The execution of these arrangements will take place in the presence of French and Swiss officers nominated for the purpose.

Art. 9. The confederation reserves the designation of the place of internment for officers and soldiers.

Art. 10. It is the right of the Federal Council to indicate the detailed prescriptions necessary to complete the present convention.

Done in triplicate at Les Verrieres, 1st Feb., 1871.

| (Signed) | HERZOG. |

"Article XIX recognizes the right of a belligerent to seize and destroy the property of neutrals temporarily passing through his territory in so far as railway material is concerned.

This right as to certain neutral ships was exercised by Germany in December, 1870, by seizing some English colliers lying in the Seine near Rouen and sinking them for the purpose of obstructing the channel so that French gunboats could not ascend the river. The right to do this was not questioned by Great Britain and the matter was settled by Germany paying a satisfactory indemnity. Land Warfare, Opp. pars. 505, note c, and 507-510.

'CHAPTER XII.

AUTOMATIC SUBMARINE CONTACT MINES.¹

432. Kinds of Mines. There are three general classes of mines: (1) Observation mines which are anchored along the coast and connected therewith by wires by which they can be exploded electrically. (2) Anchored automatic contact mines which are attached to heavy weights, and which can be placed at any required depth below the surface; these mines are exploded automatically by contact with heavy bodies such as ships. (3) Unanchored automatic contact mines which also explode by contact.²

433. Unanchored Automatic Contact Mines. H. VIII, art. 1, par. 1. It is forbidden to lay unanchored automatic contact mines unless they be so constructed as to become harmless one hour at most after those who laid them have lost control over them.³

434. Commercial Navigation. H. VIII, art. 2. It is forbidden to lay automatic contact mines off the coasts and ports of the enemy, with the sole object of intercepting commercial navigation.

435. Effect of This Article. It is not probable that a belligerent resorting to the use of these contact mines off the coasts and ports of his enemy will hesitate to disavow the intention of intercepting commercial navigation. In its present form this rule permits the use of such mines so as to cause great risks to neutral navigation.⁴

436. Anchored Automatic Contact Mines. H. VIII, art. 1, par. 2. It is forbidden to lay anchored automatic contact mines which do not become harmless as soon as they have broken loose from their moorings.

437. Precautions to be Taken. H. VIII, art. 3. When anchored automatic contact mines are employed, every possible precaution must be taken for the security of peaceful navigation.

The belligerents undertake to provide, as far as possible, for these mines becoming harmless after a limited time has elapsed, and, where the mines cease to be under observation, to notify danger zones, as soon as military exigencies permit, by a notice to mariners, which must also be communicated to the Governments through the diplomatic channel.

¹ The rules governing this subject are contained in Convention VIII of The Hague of Oct. 18, 1907. The rules contained in this chapter are of special interest to officers of the seacoast artillery and will be of value to other arms of the mobile army in connection with the defense of our seacoast fortifications.

² These rules do not deal with the first class of mines, since they are innocuous to peaceful shipping.

³ This rule as originally presented by Great Britain was as follows: "The employment of unanchored automatic submarine contact mines is forbidden." The rule as stated in the text is decidedly modified by article 6, which fixes no time within which States are obligated to cause their mines to conform to the provisions of this article.

⁴ "This convention, however, as it has been adopted, imposes on the belligerent no restriction as to the placing of anchored mines, which consequently may be laid wherever the belligerent chooses, in his own waters for self-defense, in the waters of the enemy as a means of attack, or, lastly, on the high seas, so that neutral navigation will inevitably run great risks in time of naval warfare and may be exposed to many a disaster. We have already on several occasions insisted on the danger of a situation of this kind." Sir Ernest Satow's declaration before The Hague Committee. Vide The Hague Peace Conference, Higgins, p. 341.

438. Neutral Powers Can Lay Mines. H. VIII, art. 4. Neutral powers which lay automatic contact mines off their coasts must observe the same rules and take the same precautions as are imposed on belligerents.

The neutral power must give notice to mariners in advance of the places where automatic contact mines have been laid. This notice must be communicated at once to the Governments through the diplomatic channel.

439. Must Remove Mines at Close of War. H. VIII, art. 5. At the close of the war the contracting powers undertake to do their utmost to remove the mines which they have laid, each power removing its own mines.

As regards anchored automatic contact mines laid by one of the belligerents off the coast of the other, their position must be notified to the other party by the power which laid them, and each power must proceed with the least possible delay to remove the mines in its own waters.

440. Agreement to Convert Matériel of Mines. H. VIII, art. 6. The contracting powers which do not at present own perfected mines of the description contemplated in the present convention, and which, consequently, could not at present carry out the rules laid down in articles 1 and 3, undertake to convert the matériel of their mines as soon as possible, so as to bring it into conformity with the foregoing requirement.*

441. Torpedoes. H. VIII, art. 1. par. 3. It is forbidden to use torpedoes which do not become harmless when they have missed their mark.

442. Duration of Convention. H. VIII, art. 11. The present convention shall remain in force for seven years, dating from the sixtieth day after the date of the first deposit of ratifications. Unless denounced, it shall continue in force after the expiration of this period.

443. Incompleteness of Convention. That this convention attempted to reduce to writing the rules governing the use of mines principally for the protection of neutral shipping, and in large measure failed, appears from the following facts, to wit: There is nothing in its provisions to prevent a belligerent placing mines on the high seas. There is nothing to prevent a belligerent from placing mines off the coasts of the enemy without regard to neutral shipping, except the proviso that danger zones shall be notified "as soon as military exigencies allow," which is of little or no practical value. The delegate from Great Britain declared that this convention is wholly inadequate for the protection of neutral shipping, and that the signing of the convention would not preclude his Government from contesting the legitimacy of acts

* At the time of The Hague convention the Chinese delegate made the following statement: "The Chinese Government is even to-day obliged to furnish vessels engaged in coastal navigation with special apparatus to raise and destroy floating mines which are found not only on the open sea, but even in its territorial waters. In spite of the precautions which have been taken, a very considerable number of coasting vessels, fishing boats, junks, and sampans have been lost with all hands without the details of the disasters being known to the western world. It is calculated from five to six hundred of our countrymen engaged in their peaceful occupations, have there met a cruel death in consequence of these dangerous engines of war."

* Vide article 1, pars. 433, 436, 441. Mr. Higgins says: "The prohibitions contained in the first article are in effect nullified by the sixth, for no time is specified within which States are to cause their material to conform to the requirements of article 1, and where neutrals suffer from the use of imperfectly constructed mines it is not likely that they will be satisfied with the belligerent's plea that he has been prevented by lack of funds or time from making the needful changes." Peace Conferences, pp. 343-344.

committed in violation of neutral rights. The Institute of International Law formulated rules upon this subject at their meetings in 1908, 1910, and 1912. The two last will be found in the note.¹

¹ The following rules are taken from the proceedings of the Institute of 1910, *Annuaire de L'Institut de Droit International*, vol. 23, pp. 202-204:

1. It is forbidden to lay anchored or unanchored mines on the high seas.
2. Belligerents can place mines in their territorial waters or in those of the enemy.

But they are forbidden, even in territorial waters—

1. To lay unanchored automatic contact mines, unless they be so constructed as to become harmless one hour at most after the person who laid them has ceased to control them.

2. To lay anchored automatic contact mines which do not become harmless as soon as they have broken loose from their moorings.

3. It is forbidden to use, as well in the territorial waters as on the high seas, torpedoes which do not become harmless when they have missed their mark.

4. It is forbidden to block the ports or coasts of the enemy or the points occupied by him by means of automatic contact mines.

It is likewise prohibited to place automatic contact mines in the passage of straits leading into the open sea.

5. When anchored or unanchored automatic contact mines are employed all precautions must be taken for the safety of peaceful navigation.

The belligerents will do their utmost to render these mines harmless after a limited time has elapsed.

In the case where the mines cease to be under observation by them, the belligerents will point out the danger zones as soon as military exigencies permit by a notice to navigation, which must also be communicated to the Governments through diplomatic channels.

6. Neutral powers can lay mines off their coasts for the defense of their neutrality. They must in such a case observe the same rules and take the same precautions as are imposed on belligerents.

The neutral power must give notice to mariners in advance of the places where automatic contact mines will be laid. This notice must be communicated at once to the Governments through diplomatic channels.

7. Omitted.

8. At the close of the war the belligerent and neutral powers will do their utmost, each on its part, to remove the mines which they have laid.

As regards anchored automatic contact mines laid by one of the belligerents off the coast of the other, their position must be indicated to the other party by the power which laid them, and each power must proceed with the least possible delay to raising the mines in its own waters.

The belligerent powers will furthermore announce the date on which the removal of the mines is terminated, and navigation will cease to be dangerous in the zones where the mines had been laid.

9. Omitted.

10. Violation of one of the rules preceding, involves the responsibility of the power at fault.

This responsibility will be brought before the International Prize Court, which will have full liberty for investigating the matter at fault, in appreciating the degree and fixing, if needs be, the amount of reparations.

The following taken from "*Les lois de la guerre maritime dans les rapports entre belligérants.*" Manuel adopté par l'Institut de droit international session d'Oxford, 1913:

Article 20. Submarine mines. It is forbidden to lay on the high seas anchored or unanchored automatic contact mines.

Article 21. The belligerents can lay mines in their territorial waters and in those of the enemy.

But they are forbidden even in these territorial waters:

1. To lay unanchored automatic contact mines, unless they be so constructed as to become harmless, one hour at most, after the person who placed them has ceased to control them.

2. To lay anchored automatic contact mines which do not become harmless as soon as they have broken loose from their moorings.

Article 22. A belligerent can place mines off the coast and ports of his adversary for military and naval purposes only. It is forbidden to place them for establishing or maintaining a blockade to commerce.

Article 23. When anchored or unanchored automatic contact mines are used, every precaution must be taken for the safety of peaceful navigation.

Belligerents will do all that is possible to render the mines harmless after the lapse of a limited time.

In the case where the mines cease to be under observation by them, the belligerents will point out the danger zones as soon as military exigencies permit, by a notice to navigation, which must also be communicated to the Governments through diplomatic channels.

INFANTRY UNIT ACCOUNTABILITY EQUIPMENT MANUAL

JUNE 20, 1913
REVISED AUGUST 26, 1914
REVISED OCTOBER 25, 1916

War Department,
Office of the Chief of Staff,
Washington, October 25, 1916.

1. Classification of Property. Hereafter Government property in the hands of troops will be divided into classes as follows:

Equipment "A" is the equipment prescribed for use in campaign, in simulated campaign, or on the march. It is limited to the animals and vehicles prescribed in the Tables of Organization, the equipment and clothing worn on the person, and the articles carried on mount, and transported in field, combat, and divisional trains.

Equipment "B" is the equipment which, in addition to equipment "A," is prescribed for the use of troops in mobilization, concentration, instruction, or maneuver camps, and during such pauses in operations against an enemy as permit the better care of troops.

Equipment "C" is the sum of equipments "A" and "B."

Garrison equipment is the equipment prescribed for use in garrison.

2. Unit Accountability Equipment and Accountability Therefor. The unit accountability equipments of the various organizations will consist of the articles of "A" and "B" equipment prescribed in the unit of accountability manuals for the strength authorized and will be accounted for by organization commanders on unit accountability returns (Form No. 451, A. G. O.) in accordance with War Department orders.

3. Accountability and Responsibility for Other Government Property. All garrison equipment and other Government property in the hands of organization commanders, except that held under unit accountability, will be held on memorandum receipts from the various post, regimental, or other designated supply officers, who will render to the chiefs of the staff departments concerned returns as at present for all property for which they are accountable.

4. In this revised manual the unit accountability equipment for the present authorized minimum and maximum strength is given in Part I. In Part II are given the sets of individual arms and equipment of unit accountability equipment by which any increase or decrease in equipment corresponding to any authorized increase or decrease in strength may be readily determined and expressed.

5. Upon receipt of this manual, organization commanders will immediately adjust their (unit) accountability by turning in to the proper supply officer all surplus articles on hand and supplying the deficiencies by requisition, so that the articles on hand of unit accountability equipment of their respective organizations will conform to the number authorized in this manual with the least practicable delay. All such adjustments will be covered by exchange of regular invoices and receipts.

6. In Part III of this revised manual is listed the garrison equipment for the present authorized minimum and maximum strengths.

By order of the Secretary of War:

H. L. SCOTT,
Major General, Chief of Staff.

¹ Eight for each rifle company to be issued on memorandum receipt, and 24 for assignment by the regimental commander.

² One set, each consisting of one-fourth of the articles, is intended for the regiment and 1 set for each battalion.

Note. When regiment is attached to and serving with a brigade or a division the intrenching tool wagon and contents will be transferred to the commanding officer of the engineer train of the brigade or division. When the regiment is permanently detached from the brigade or division, the intrenching tool wagon will be retransferred to the commanding officer of the supply company of the regiment. In cases of transfer, formal invoices and receipts should be used.

TABLE 2.—SIGNAL PROPERTY.

| Kits, flag, combination, standard ⁵ | | 3 | 16 | | 19 | 4.02 |
| Kits, Artillery, signal ⁶ ... | | | 4 | | 4 | 4.02 |

¹ Type B glass costs \$17.50 complete. The item of field glasses includes case and strap. Prices of case and strap: For type A glass, \$4.50; type B glass, \$3; type C glass, \$3.50; type E E glass, \$5.40.

² Type E E field glasses will be issued as soon as available without requisition.

³ Until a supply of type E E field glasses is available, machine-gun companies will be equipped with two type A or B and two type E E glasses instead of the four type E E glasses to which they are entitled. Type E E glasses to replace these A or B glasses will be issued to the organizations without requisitions as soon as they are available.

⁴ An Infantry combination flag kit is identical with the standard combination flag kit with the exception that one Infantry flag, 29 cents, is substituted for the red 2 foot flag.

⁵ A standard combination flag kit consists of 1 case, \$1.29; 1 staff, jointed, for 2-foot flag, \$1.75 (when joints are supplied separately the cost for lower section is 63 cents; middle section, 60 cents; upper section, 52 cents); 2 staffs, semaphore flag, 6 cents each; two 2-foot flags (1 red with white center 27 cents, and 1 white with red center 27 cents); and 2 flags, semaphore, standard type, 16 cents each.

⁶ An Artillery signal kit consists of one case, \$1.29; and one signaling device, Artillery, \$2.73.

| Company repair kit, complete ⁶ | | | 3 | | 3 | 5.06 |
| Pistol-cleaning kit | | 1 | 1 | | 2 | 5.35 |

¹ Price for company and supply company, \$0.23; machine-gun and headquarters company, \$0.29.

² Price for company and supply company, \$0.44; machine-gun and headquarters company, \$0.50.

³ See footnote (¹). A stencil outfit consists of 1 chest, at 47 cents; 1 stencil brush, at 11 cents; 1 box of stencil paste, at 10 cents; 1 set of letters, $\frac{1}{2}$ -inch, A to Z, character "&," and period, each letter 1 cent, 28 cents; 1 set of figures, $\frac{1}{2}$ -inch, 0 to 9, inclusive, each figure 1 cent, 10 cents; 4 end pieces, $\frac{1}{4}$ -inch, 1 cent each, 4 cents; 1 set of letters, 1-inch, A to Z, character "&," and period, each letter 2 cents, 56 cents; 1 set of figures, 1-inch, 0 to 9, inclusive, each figure 2 cents, 20 cents; 4 end pieces, 1-inch, 2 cents each, 8 cents.

⁴ A set consists of 26 letters, A to Z, and 10 numbers, 0 to 9, $5\frac{1}{2}$ inches high. In garrison, where parts of regiments are serving at separate stations, these wagon stencils can be sent by parcel post to organizations detached from headquarters for necessary time to mark their wagons.

⁵ One is issued to each battalion, to be accounted for by the company to which it is assigned on the return of unit accountability equipment (Form No. 451, A. G. O.) under the entry "The equipment includes one range finder for use of battalion." Where a greater number is issued for experimental purposes the additional number should be held on memorandum receipt from the post or regimental supply officer.

⁶ One for the use of each battalion for field operations. In permanent camp or garrison two of them will be used by other organizations of the regiment. Organizations not otherwise supplied in permanent camp or garrison will be furnished "company repair kits" by the post ordnance officer or supply officer on memorandum receipt.

¹ The magazine pockets are issued only when the cartridge belt, caliber .30, mounted, is provided with revolver cartridge pockets.

² Issued with the curb bridle, model of 1902, but not with the Cavalry bridle, model of 1909 or 1912.

³ In lieu of feed bags combined with grain bags, nose bags, at \$1.20, may be issued.

⁴ Until these saddles are supplied, the saddle, McClellan, Cavalry, at \$26.88, may be used.

⁵ Also supplied as part of pack for machine-gun equipment.

¹ Carried in equipment "B" of machine-gun company. See Table 8, p. 1844.² Carried in equipment "B" of company and machine-gun company. See Table 8, p. 1844. A stencil outfit consists of 1 chest, at 47 cents; 1 stencil brush, at 11 cents; 1 box of stencil paste, at 10 cents; 1 set of letters, $\frac{1}{2}$ -inch, A to Z, character "&," and period, each letter 1 cent, 28 cents; 1 set of figures, $\frac{1}{2}$ -inch, 0 to 9, inclusive, each figure 1 cent, 10 cents; 4 end pieces, $\frac{1}{2}$ -inch, 1 cent each, 4 cents; 1 set of letters, 1-inch, A to Z, character "&," and period, each letter 2 cents, 56 cents; 1 set of figures, 1-inch, 0 to 9, inclusive, each figure 2 cents, 20 cents; 4 end pieces, 1-inch, 2 cents each, 8 cents.³ Price per company, 22 cents; per machine-gun company, 28 cents; per headquarters company, 28 cents; per supply company, 23 cents.⁴ A set consists of 26 letters, A to Z, and 10 numbers, 0 to 9, $5\frac{1}{4}$ inches high. In garrison, where parts of regiments are serving at separate stations, these wagon stencils can be sent by parcel post to organizations detached from headquarters, for necessary time to mark their wagons.⁵ One is issued to each battalion to be accounted for by the company to which it is assigned on the return of unit accountability equipment (Form No. 451, A. G. O.) under the entry "The equipment includes one range finder for use of battalion." Where a greater number is issued for experimental purposes the additional number should be held on memorandum receipt from the post or regimental supply officer.

⁵ Carried in Equipment "A" of headquarters company. See Table 4, p. 1833.

PART II.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS.

ORDNANCE PROPERTY.

Individual sets of arms and equipments are prescribed as follows:

Note: The tables below show the equipment for use with the .45-caliber pistol. In case organizations are equipped with the .38- or .45-caliber revolver instead of the .45-caliber pistol, substitute for the articles of pistol equipment the corresponding articles of revolver equipment, as follows:

| Articles of Pistol Equipment. | Corresponding Articles of Revolver Equipment. |
|--|--|
| 21 cartridges, ball, pistol, caliber .45 | 20 cartridges, ball, revolver, caliber .38 or .45. |
| 1 pistol. | 1 revolver. |
| 1 pistol holster. | 1 revolver holster. |
| 1 pistol belt, without saber ring. | 1 revolver cartridge belt, without. |
| 2 magazines, pistol, extra. | saber ring. |
| 1 magazine pocket, web, double. | |

1. OLD MODEL EQUIPMENT.

(a) For sergeants major, regimental supply sergeants, color sergeants, and also the first sergeant of supply company:

| | |
|---|------------------------------------|
| 1 blanket-roll straps, set (4) (if dis- | 1 knife. |
| mounted). | 2 magazines, pistol, extra. |
| 1 canteen, Cavalry. | 1 meat can. |
| 1 canteen strap, Cavalry (if mounted). | 1 pistol. |
| 2 canteen-haversack straps (if dis- | 1 pistol belt, without saber ring. |
| mounted). | 1 pistol holster. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pouch for first-aid packet. |
| 1 cup | 1 spoon. |
| 1 fork. | 1 spurs, pair (if mounted). |
| 1 haversack (if dismounted). | 1 spur straps, set (if mounted). |

(b) For mounted orderlies (privates of headquarters company) and corporal of supply company:

| | |
|---|--|
| 1 brush and thong. ¹ | 1 magazine pocket, web, double. |
| 1 canteen, Cavalry. | 1 meat can. |
| 1 canteen strap, Cavalry. | 1 oiler and thong case. ¹ |
| 90 cartridges, ball, caliber .30. | 1 pistol. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pistol holster. |
| 1 cartridge belt, caliber .30, Cavalry. | 1 pouch for first-aid packet. |
| 1 cartridge-belt suspenders, pair. | 1 rifle scabbard. |
| 1 cup. | 1 spoon. |
| 1 fork. | 1 spurs, pair. |
| 1 front-sight cover. | 1 spur straps, set. |
| 1 gun sling. | 1 United States rifle, caliber .30. |
| 1 knife. | 1 wire cutter. } For mounted |
| 2 magazines, pistol, extra. | 1 wire-cutter carrier. } orderlies only. |

¹To be omitted if rifle is provided with spare-part container.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(c) For members of machine-gun company:

| | |
|--|------------------------------------|
| 1 blanket-roll straps, set (4) (if dis-mounted). | 1 knife. |
| 1 bolo. | 2 magazines, pistol, extra. |
| 1 bolo scabbard. | 1 meat can. |
| 1 canteen, Cavalry. | 1 pistol. |
| 1 canteen strap, Cavalry (if mounted). | 1 pistol belt, without saber ring. |
| 2 canteen-haversack straps (if dis-mounted). | 1 pistol holster. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pouch for first-aid packet. |
| 1 cup. | 1 spoon. |
| 1 fork. | 1 spurs, pair (if mounted). |
| 1 haversack (if dismounted). | 1 spur straps, set (if mounted). |
| | 1 wire cutter. |
| | 1 wire-cutter carrier. |
| | } For certain designated members. |

(d) For mess sergeants, supply sergeants, sergeants, corporals, cooks, mechanics, and privates of a company; mess sergeants, supply sergeants, stable sergeants, cooks, and horseshoers of headquarters company; and mess sergeants, stable sergeants, cooks, saddlers and horseshoers of supply company:

| | |
|--|--------------------------------------|
| 1 blanket-roll straps, set (4). | 1 front-sight cover. |
| 1 bayonet. | 1 gun sling. |
| 1 bayonet scabbard. | 1 haversack. |
| 1 brush and thong. ^a | 1 knife. |
| 1 canteen, Infantry. ^a | 1 meat can. |
| 90 cartridges, ball, caliber .30. | 1 oiler and thong case. ^a |
| 1 cartridge belt, caliber .30, Infantry. | 1 pouch for first-aid packet. |
| 1 cartridge-belt suspenders, pair. | 1 spoon. |
| 1 cup. | 1 United States rifle, caliber .30. |
| 1 fork. | |

(e) For first sergeants and members of bands of headquarters company and first sergeants and buglers of a company:

| | |
|---|---|
| 1 blanket-roll straps, set (4). | 1 meat can. |
| 1 canteen, Cavalry. | 1 pistol. |
| 2 canteen-haversack straps. | 1 pistol belt, without saber ring. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pistol holster. |
| 1 cup. | 1 pouch for first-aid packet. |
| 1 fork. | 1 rule, 2-foot (for first sergeants of company only). |
| 1 haversack. | 1 spoon. |
| 1 knife. | |
| 2 magazines, pistol, extra. | |

(f) For company buglers, in addition to (e):

| | |
|----------------|------------------------|
| 1 wire cutter. | 1 wire-cutter carrier. |
|----------------|------------------------|

(g) Horse equipment for each man mounted on a horse:

| | | |
|------------------------------------|--|---------------------|
| 1 bridle, curb, model of 1902, and | } or 1 bridle, Cavalry, model of 1909. | 1 horse brush. |
| 1 bridle, watering | | 1 lariat. |
| 1 currycomb. | | 1 lariat strap. |
| 1 feed bag | } or 1 nose bag. | 1 link. |
| and | | 1 picket pin. |
| 1 grain bag | | 1 saddlebags, pair. |
| 1 halter headstall. | | 1 saddle blanket. |
| 1 halter tie rope. | | 1 saddle, Cavalry. |
| | | 1 surcingle. |

^aTo be omitted if rifle is provided with spare-part container.^aThe canteen, tin, with canteen strap, web, or canteen, model of 1910, and dismounted cover, may be issued.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(h) Horse equipment for each man mounted on a mule.

| | |
|---------------------------------|---------------------|
| 1 currycomb. | 1 lariat strap. |
| 1 feed bag | 1 link. |
| and | 1 picket pin. |
| 1 grain bag } or 1 nose bag. | 1 saddle, mule. |
| | 1 saddlebags, pair. |
| 1 halter bridle, model of 1910. | 1 saddle blanket. |
| 1 horse brush. | 1 surcingle. |
| 1 lariat. | |

(i) Equipment of ammunition mule for Benét Mercié machine gun, caliber .30, model of 1909:

| | |
|--|-----------------------|
| 1 aparejo. | 1 pack frame. |
| 1 aparejo cincha. | 2 ammunition hangers. |
| 1 blinder. | 1 currycomb. |
| 1 corona. | 1 feed bag. |
| 1 crupper. | 1 grain bag. |
| 1 halter bridle, with leather or rope reins. | 1 horse brush. |
| 1 saddle blanket | 6 ammunition boxes. |
| 1 sobrejalma. | 60 feed strips. |
| | 6 thongs. |

(j) Equipment of gun mule for Benét Mercié machine gun, caliber .30, model of 1909:

| | |
|--------------------------------------|-----------------------------------|
| 1 aparejo. | 1 grain bag. |
| 1 aparejo cincha. | 1 horse brush. |
| 1 blinder. | 4 ammunition boxes. |
| 1 corona. | 40 feed strips. |
| 1 crupper. | 1 rifle. |
| 1 halter bridle, with leather reins. | 1 rifle case. |
| 1 saddle blanket. | 1 spare barrel.* |
| 1 sobrejalma. | 1 spare-barrel case.* |
| 1 pack frame. | 1 gunner's pouch, with contents.* |
| 1 rifle hanger. | 1 cooling sponge.* |
| 1 ammunition hanger. | 1 cooling-sponge cover.* |
| 1 currycomb. | 1 latigo strap. |
| 1 feed bag. | 6 thongs. |

(k) Equipment for ammunition mule, Maxim automatic machine gun, model of 1904:

| | |
|--|-----------------------|
| 1 aparejo. | 2 ammunition hangers. |
| 1 aparejo cincha. | 1 pack frame. |
| 1 blinder. | 6 thongs. |
| 1 corona. | 6 ammunition boxes. |
| 1 crupper. | 6 cartridge belts. |
| 1 halter bridle, with leather or rope reins. | 1 feed bag. |
| 1 saddle blanket. | 1 grain bag. |
| 1 sobrejalma. | 2 water boxes. |

(1). Equipment for gun mule, Maxim automatic gun, model of 1904:

| | |
|-------------------------------------|------------------|
| 1 aparejo. | 1 sobrejalma. |
| 1 aparejo cincha. | 1 gun case. |
| 1 blinder. | 1 gun hanger. |
| 1 corona. | 1 pack frame. |
| 1 crupper. | 6 thongs. |
| 1 halter bridle, with leather rein. | 1 tripod hanger. |
| 1 saddle blanket. | |

*Not carried by spare-gun mule.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(m) For men armed with rifle:

| | |
|---------------------|--------------------------|
| 1 cleaning rod. | } For every 8 rifles. |
| 1 cleaning-rod case | |
| 1 screw driver | |

(n) For each squad of a company:

| | | | |
|--------------------------|------------------------------------|------------------------|---------------------------------|
| 1 hand ax or | } To be carried by privates. | 4 shovels. | } To be carried by privates. |
| 1 bolo | | 4 shovel carriers. | |
| 1 hand ax carrier or | | 1 wire cutter. | } To be carried by corporal. |
| 1 bolo scabbard | | 1 wire-cutter carrier. | |
| 2 pick mattocks. | } To be carried by privates. | | |
| 2 pick-mattock carriers. | | | |

Each odd-numbered squad of a company will have:

| | |
|------------|------------------|
| 1 bolo and | 1 bolo scabbard. |
|------------|------------------|

Each even-numbered squad of a company will have:

| | |
|---------------|--------------------|
| 1 hand ax and | 1 hand-ax carrier. |
|---------------|--------------------|

(t) For wagoner (Infantry) with each authorized wagon of field and combat train:

| | |
|---------------------------------|---|
| 1 blanket-roll straps, set (4). | 1 meat can. |
| 1 canteen, Cavalry. | 1 pistol. |
| 2 canteen-haversack straps. | 21 cartridges, ball, pistol, caliber .45. |
| 1 cup. | 1 pistol belt, without saber ring. |
| 1 fork. | 1 pistol holster. |
| 1 haversack. | 1 pouch for first-aid packet. |
| 1 knife. | 1 spoon. |
| 2 magazines, pistol, extra. | |

2. NEW-MODEL EQUIPMENT (1910).

(a) For sergeants major, regimental supply sergeants, color sergeants, and also the first sergeant of supply company:

| | |
|---|------------------------------------|
| 1 can, bacon. | 1 meat can. |
| 1 can, condiment. | 1 pack carrier (if dismounted). |
| 1 canteen. | 1 pistol belt, without saber ring. |
| 1 canteen cover, dismounted. | 1 pistol. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pistol holster. |
| 1 cup. | 1 pouch for first-aid packet. |
| 1 fork. | 1 spoon. |
| 1 haversack (if dismounted). | 1 spurs, pair (if mounted). |
| 1 knife. | 1 spur straps, set (if mounted). |
| 2 magazines, pistol, extra. | |

(b) For mounted orderlies (privates of headquarters company) and corporal of supply company:

| | |
|------------------------------|---|
| 1 can, bacon. | 100 cartridges, ball, caliber .30. |
| 1 can, condiment. | 21 cartridges, ball, pistol, caliber .45. |
| 1 brush and thong.* | 1 cartridge belt, caliber .30 (mounted). |
| 1 canteen. | 1 cup. |
| 1 canteen cover, dismounted. | 1 fork. |

* To be omitted if rifle is provided with spare-part container.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

| | |
|----------------------------------|--------------------------------------|
| 1 front-sight cover. | 1 pouch for first-aid packet. |
| 1 gun sling. | 1 rifle scabbard. |
| 1 knife. | 1 spoon. |
| 2 magazines, pistol, extra. | 1 spurs, pair. |
| 1 magazine pocket, web, double.* | 1 spur straps, set. |
| 1 meat can. | 1 United States rifle, caliber .30. |
| 1 oiler and thong case.† | 1 wire cutter. |
| 1 pistol. | 1 wire-cutter carrier. } For mounted |
| 1 pistol holster. | orderlies only. |

(c) For members of machine-gun company:

| | |
|---|--------------------------------------|
| 1 can, bacon. | 1 meat can. |
| 1 can, condiment. | 1 pack carrier (if dismounted). |
| 1 bolo. | 1 pistol. |
| 1 bolo scabbard. | 1 pistol belt, without saber ring. |
| 1 canteen. | 1 pistol holster. |
| 1 canteen cover, dismounted. | 1 pouch for first-aid packet. |
| 21 cartridges, ball, pistol, caliber .45. | 1 spoon. |
| 1 cup. | 1 spurs, pair (if mounted). |
| 1 fork. | 1 spur straps, set (if mounted). |
| 1 haversack (if dismounted). | 1 wire cutter. |
| 1 knife. | 1 wire-cutter carrier. } For certain |

| | |
|---|---|
| 1 can, bacon. | 1 meat can. |
| 1 can, condiment. | 1 pack carrier. |
| 1 canteen. | 1 pistol. |
| 1 canteen cover, dismounted. | 1 pistol holster. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pistol belt, without saber ring. |
| 1 cup. | 1 pouch for first-aid packet. |
| 1 fork. | 1 spoon. |
| 1 haversack. | 1 steel tape, 5-foot (for first sergeants of company only). |
| 1 knife. | |
| 2 magazines, pistol, extra. | |

* Issued only if the cartridge belt, caliber .30, mounted, is provided with revolver cartridge pockets.

† To be omitted if rifle is provided with spare-part container.

* To be omitted if rifle is provided with spare-part container.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(f) For company buglers, in addition to (e):

1 wire cutter.

1 wire-cutter carrier.

(g) Horse equipment for each man mounted on horse:

| | | |
|--|--|---------------------|
| 1 bridle, curb, model of 1902, and | } or 1 bridle, Cav- alry, model of 1909. | 1 horse brush. |
| 1 bridle, watering, | | 1 lariat. |
| 1 currycomb. | | 1 lariat strap. |
| 1 feed bag | } or 1 nose bag. | 1 link. |
| and | | 1 picket pin. |
| 1 grain bag | | 1 saddlebags, pair. |
| 1 halter headstall. | | 1 saddle blanket. |
| 1 halter tie rope. | | 1 saddle, Cavalry. |
| | | 1 surcingle. |

(h) Horse equipment for each man mounted on a mule:

| | | |
|---------------------------------|----------------|---------------------|
| 1 currycomb. | | 1 link. |
| 1 feed bag | } or nose bag. | 1 picket pin. |
| 1 grain bag | | 1 saddle, mule. |
| 1 halter bridle, model of 1910. | | 1 saddlebags, pair. |
| 1 horse brush. | | 1 saddle blanket. |
| 1 lariat. | | 1 surcingle. |
| 1 lariat strap. | | |

(i) Equipment of ammunition mule, Benét Mercié machine gun, caliber .30, model of 1909:

| | |
|---|-----------------------|
| 1 aparejo. | 1 pack frame. |
| 1 aparejo cincha. | 2 ammunition hangers. |
| 1 blinder. | 1 currycomb. |
| 1 corona. | 1 feed bag. |
| 1 crupper. | 1 grain bag. |
| 1 halter bridle, with leather or rope reins. | 1 horse brush. |
| 1 saddle blanket. | 6 ammunition boxes. |
| 1 sobrejalma. | 60 feed strips. |
| | 6 thongs. |

(j) Equipment of gun mule, Benét Mercié machine gun, caliber .30, model of 1909:

| | |
|--------------------------------------|-----------------------------------|
| 1 aparejo. | 1 grain bag. |
| 1 aparejo cincha. | 1 horse brush. |
| 1 blinder. | 4 ammunition boxes. |
| 1 corona. | 40 feed strips. |
| 1 crupper. | 1 rifle. |
| 1 halter bridle, with leather reins. | 1 rifle case. |
| 1 saddle blanket. | 1 spare barrel.* |
| 1 sobrejalma. | 1 spare-barrel case.* |
| 1 pack frame. | 1 gunner's pouch, with contents.* |
| 1 rifle hanger. | 1 cooling sponge.* |
| 1 ammunition hanger. | 1 cooling-sponge cover.* |
| 1 currycomb. | 1 latigo strap. |
| 1 feed bag. | 6 thongs. |

* Not carried by spare-gun mule.

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(k) Equipment for ammunition mule, Maxim automatic machine gun, model of 1904:

| | |
|-----------------------|--|
| 6 ammunition boxes. | 1 grain bag. |
| 2 ammunition hangers. | 1 halter bridle, with leather or rope reins. |
| 1 aparejo. | 1 pack frame. |
| 1 aparejo cincha. | 1 saddle blanket. |
| 1 blinder. | 1 sobrejalma. |
| 6 cartridge belts. | 6 thongs. |
| 1 corona. | 2 water boxes. |
| 1 crupper. | |
| 1 feed bag. | |

(l) Equipment for gun mule, Maxim automatic machine gun, model of 1904:

| | |
|-------------------|--------------------------------------|
| 1 aparejo. | 1 halter bridle, with leather reins. |
| 1 aparejo cincha. | 1 pack frame. |
| 1 blinder. | 1 saddle blanket. |
| 1 corona. | 1 sobrejalma. |
| 1 crupper. | 6 thongs. |
| 1 gun case. | 1 tripod hanger. |
| 1 gun hanger. | |

(m) For men armed with rifle:

| | |
|---------------------|--------------------------|
| 1 cleaning rod | } For every 8 rifles. |
| 1 cleaning-rod case | |
| 1 screw driver | |

(n) For each squad of a company:

| | | | |
|--------------------------|------------------------------------|------------------------|---------------------------------|
| 1 hand ax or | } To be carried by privates. | 4 shovels. | } To be carried by privates. |
| 1 bolo | | 4 shovel carriers. | |
| 1 hand-ax carrier or | | 1 wire cutter. | } To be carried by corporal. |
| 1 bolo scabbard. | | 1 wire-cutter carrier. | |
| 2 pick mattocks. | } To be carried by privates. | | |
| 2 pick-mattock carriers. | | | |

Each odd-numbered squad of a company will have:

| | |
|------------|------------------|
| 1 bolo and | 1 bolo scabbard. |
|------------|------------------|

Each even-numbered squad of a company will have:

| | |
|---------------|--------------------|
| 1 hand ax and | 1 hand-ax carrier. |
|---------------|--------------------|

(t) For wagoner (Infantry) with each authorized wagon of field and combat train:

| | |
|---|------------------------------------|
| 1 can, bacon. | 2 magazines, pistol, extra. |
| 1 can, condiment. | 1 meat can. |
| 1 canteen. | 1 pack carrier. |
| 1 canteen cover, dismounted. | 1 pistol. |
| 21 cartridges, ball, pistol, caliber .45. | 1 pistol holster. |
| 1 cup. | 1 pistol belt, without saber ring. |
| 1 fork. | 1 pouch for first-aid packet. |
| 1 haversack. | 1 spoon. |
| 1 knife. | |

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

(o) For officers entitled to horse equipment (paragraph 1520, Army Regulations of 1913): "

| | |
|---|---|
| 1 bridle, Cavalry. | 1 link. |
| 1 bridle, watering (issued only with curb bridle, model of 1902). | 1 picket pin. |
| 1 currycomb. | 1 saber straps, pair. |
| 1 feed bag. | 1 saddle (McClellan or Whitman). |
| 1 grain bag. | 1 saddlebags, pair. |
| 1 halter headstall. | 1 saddle blanket. |
| 1 halter tie rope. | 2 saddlecloths, with insignia, officers'. |
| 1 horse brush. | 1 spurs, pair. |
| 1 lariat. | 1 spur straps, russet, set. |
| 1 lariat strap. | 1 spur straps, black, set. |
| | 1 surcingle. |

(p) Pistol equipment for use of officers under A. R. 1522: "

| | |
|------------------------------|---------------------------------|
| 21 cartridges, ball, pistol. | 1 pistol holster. |
| 2 magazines, pistol, extra. | 1 pistol belt, with saber ring. |
| 1 pistol. | |

Note: The above equipments are for use with the .45-caliber pistol. In case organizations are equipped with .38 or .45 caliber revolvers substitute for the articles of pistol equipment the corresponding articles of revolver equipment as follows:

(q) Revolver equipment for use of officers under A. R. 1522: "

| | |
|--------------------------------|----------------------------|
| 20 cartridges, ball, revolver. | 1 revolver holster. |
| 1 revolver. | 1 revolver cartridge belt. |

Note: The sets of officers' horse equipments, pistol or revolver equipment on hand, and also all individual equipment units retained on hand for additional men, will, in each case, be briefly reported (in the space provided for the purpose), on page 2 of the return—Form No. 451, A. G. O.—as so many sets, followed by the letters (a), (b), (c), etc., given in this manual to designate the unit, after the following manner:

| | |
|-------------|-------------|
| 7 sets (a). | 3 sets (p). |
| 7 sets (e). | 3 sets (q). |
| 3 sets (o). | |

Each set of horse or pistol equipment provided for use of officers, and each set of individual equipment obtained on account of additional men, should be complete and consist of only the articles enumerated in this manual as the unit for the set indicated by the letter.

If at any time the number of rifles, gun slings, cartridge belts, and cartridge-

" Articles held on unit accountability under the provisions of paragraph 1520, A. R., 1913, will be limited to those shown under (o). The additional equipment (halter headstall and halter tie rope), authorized by orders where an officer below the grade of major has provided himself with two mounts, will be obtained on memorandum receipt from the post ordnance officer or ordnance supply officer, by the officers individually concerned.

" Organization commanders may keep on hand a sufficient number of sets of these articles to meet the provisions of paragraph 1522, A. R., 1913. Articles held under the provisions of this paragraph will be limited to those shown under (p) or (q).

TABLE 14.—SETS OF INDIVIDUAL ARMS AND EQUIPMENTS—Continued.

belt suspenders on hand pertaining to the regular unit accountability equipment of the organization is not sufficient to meet the provisions of paragraph 1522, A. R., 1913, then such stores should be drawn by the individual officers requiring the use of them from the post ordnance officer or ordnance supply officer, under memorandum receipt. Rifles, gun slings, cartridge belts, and cartridge-belt suspenders drawn by officers under paragraph 1522, A. R., are for garrison use only; therefore, when an officer to whom any of these articles have been issued under this authority departs for service in the field he will, before leaving the post turn in all of them to the ordnance officer from whom he held them on memorandum receipt.

The small-arms ammunition drawn by officers under paragraph 1522, A. R., 1913, for expenditure in authorized target practice, will be taken from the ammunition which is held by organization commanders under memorandum receipt from the supply officer, as authorized by paragraph 6, G. O., No. 52, W. D., 1915.

ENGINEER PROPERTY.

- (a) For sergeants of a company:

1 compass, watch.

SIGNAL PROPERTY.

- (a) For headquarters company:

For mounted orderlies of regimental and battalion commanders—

4 glasses, field, type EE.

16 kits, flag, combination, standard.

For regimental and battalion sergeants major—

4 kits, Artillery, signal.

- (b) For machine-gun company:

2 glasses, field, type C.

4 glasses, field, type EE (or type A or B).

For signalman—

³ For old-model equipment.

⁴ To be kept on hand in organizations only where climatic conditions may require their use, 1 for each horse, including officers' mounts.

⁵ Model of 1912 (includes surcingle), \$3.36; model of 1912, blanket lined (includes surcingle), \$8; unlined, \$5; blanket lined, \$10 (old model).

TABLE 15.—ORDNANCE PROPERTY—Continued.

| Articles. | Enlisted strength. | | | | | Philip- pine Scouts. | Unit price. |
|---|--------------------|-----------------------------|-------------------------------|--------------------|------------------------------|----------------------------|----------------|
| | 150 | 74 | 58 | 10 | 1,942 | | |
| | Com- pany. | Machine- gun company. | Head- quarters company. | Supply company. | Regi- ment, total for. | | |
| GARRISON EQUIPMENT— continued. | | | | | | | |
| <i>Class X, section 2.</i> | | | | | | | |
| Fencing outfits, Cavalry, sets (C. M.) ¹ | 4 | | | | 48 | | \$14.98 |
| Fencing outfits, Infantry, sets (C. M.) ² | 16 | | | | 192 | | 23.46 |
| <i>Class X, section 7.</i> | | | | | | | |
| Aiming devices..... | 6 | 2 | 1 | | 75 | | .40 |
| Recording rifle rod outfits ³ | 15 | 8 | 3 | | 191 | | 1.55 |
| Slide rules for determining accuracy in estimating distances..... | 1 | 1 | 1 | | 14 | | .80 |
| <i>Class X, section 8.</i> | | | | | | | |
| Decapping and cleaning tools, sets (C. M.) ⁴ | 1 | 1 | 1 | | 14 | | 4.95 |

¹ A set consists of 1 right-hand glove, \$3.10; 1 Cavalry plastron, \$4.75; 1 Cavalry mask, \$6.30; 1 singlestick, \$0.44; 1 wooden saber, \$0.39.

² A set consists of 1 pair of gloves, \$6.20; 1 Infantry plastron, \$6.20; 1 Infantry mask, \$6.46; 1 fencing musket, \$2.65; 1 fencing bayonet, \$1.95.

³ Complete with device for dummy cartridges, \$5.87.

⁴ For the components of a set of these tools, see Ordnance Pamphlet No. 1990.

Bacon and condiment chests have been discontinued as a part of the field equipment. Those on hand form part of the permanent camp equipment until the supply on hand is exhausted. (G. O. No. 3, W. D., 1915.)

In addition to the above, the necessary garrison equipment should be procured for each wagoner present with each authorized wagon of the field and combat train.

REGULATIONS FOR THE UNIFORM OF THE UNITED STATES ARMY

TO INCLUDE CHANGES 18, DECEMBER 30, 1916.

General Orders, }
No. 63. }

War Department,
Washington, May 15, 1917.

The following instructions regarding uniforms will be complied with during the continuance of war conditions:

1. The service uniform, Tables of Occasions, pages 1886-1888, for officers, and 1896, 1897, for enlisted men, Uniform Regulations, 1914, is prescribed for all occasions except as indicated to the contrary for wear at the White House, page 1895, those regulations.

2. Department commanders in the tropics may in their discretion authorize the use of the white mess jacket and the white uniform as contemplated, page 1894, Uniform Regulations.

3. The uniform as above prescribed will be worn by all officers on active duty at all times.

4. Section III, General Orders No. 49, War Department, 1917, relating to instructions regarding uniforms during the continuance of war conditions, is rescinded.

By order of the Secretary of War:

H. L. SCOTT,
Major General, Chief of Staff.

Official:

H. P. McCAIN,
The Adjutant General.

**War Department,
Office of the Chief of Staff,
Washington, July 22, 1914.**

The following are the regulations for the uniform of the United States Army, and the equipment of officers.

They will be referred to officially as the Uniform Regulations (abbreviated U. R.).

All regulations, in any form, heretofore published with reference to the uniform are rescinded.

By order of the Secretary of War:

**W. W. WOTHERSPOON,
Major General, Chief of Staff.**

REGULATIONS FOR THE UNIFORM OF THE UNITED STATES ARMY

PART I.

GENERAL PROVISIONS.

1. Rescinded.

2. **Additional Officers** will wear the same uniform as other officers according to the rules set forth in this order. For the insignia of corps, department, or arm of service of those not regularly assigned to organizations, see par. 24.

3. **Alaska.** All clothing, specially provided for troops stationed in Alaska, including those of the Signal Corps on duty aboard cable ships during service in Alaskan waters, will be issued gratuitously or on memorandum receipt in conformity with the recommendations of the board of officers convened pursuant to the provisions of Special Orders, No. 36, Headquarters, Western Division, February 12, 1912, as approved by the Secretary of War. (C. U. R. No. 6, Dec. 26, 1914.)

4. **Alterations, Fitting of Uniforms, Etc.** Alterations will not be made in any article of the uniform that will result in a material change from the cut prescribed for it in regulations; nor will hooks be placed on the front of the coat below the buttons. Company commanders will exercise personal supervision over the fitting of the uniforms of the men of their companies, and permit only such changes as will insure a proper fit without disturbing the general appearance of the uniform.

5. **Athletic Clothes.** Tennis, baseball, football, golf, and other athletic clothes may be worn when engaged in athletic games and sports.

6. **Band Uniforms.** Bands will wear the general uniform of their regiment or corps. Commanding officers may, from regimental or band funds (A. R. 325 and 326), add such ornaments to the full dress and the dress uniform as they may deem proper and which are not contrary to the provisions of this order. Such ornaments will not include shoulder knots, shoulder straps, officers' trouser stripes, officers' insignia of rank, or any other article specially prescribed for officers.

Drum majors of mounted bands will carry sabers. Those of dismounted bands will carry batons.

The Ordnance Department will issue to bands, without charge, waist belts of enamel leather of the color of their corps or arm of the service. The Quartermaster Corps will issue, without charge, batons, music pouches, and black lynx-skin shakos. These articles will remain the property of the United States, but will be charged in case of loss or damage.

7. **Boards of Officers** will hold their first session in such uniform as the President may prescribe. Thereafter the board will decide the uniform.

8. **Changes and Modifications in Articles of Uniform.** When changes or modifications are made in articles of clothing or equipage, issues to the Regular Army and Organized Militia of the kinds and patterns then on hand will be continued until the supply thereof is exhausted; and whenever any particular kind or size of articles of clothing or equipage that has been modified is exhausted, requisitions for that kind or size will be filled from the new pattern that may be adopted.

9. **Chaplains.** When a particular coat or vestment is required by the church to which a chaplain belongs he may wear such coat or vestment while conducting services.

10. **Civilian Clothing.**

(a) Civilian evening dress will not be worn at posts by officers belonging to the command.

(b) Enlisted Men on Pass and Furlough. Enlisted men may wear civilian clothing on furlough, and within the continental limits of the United States they may be authorized by the commanding officer to wear civilian clothing when on pass.

(c) The wearing of civilian clothing within the post by officers and enlisted men will be restricted to the time necessary in entering and leaving same. (See "Uniform to be worn in camp and garrison," par. 51.)

(d) Philippines and Other Foreign Stations. Officers stationed in the Philippines, the Hawaiian Islands, Alaska, the Panama Canal Zone, and Porto Rico are not authorized to wear civilian clothing except when leaving or returning to such countries, unless especially exempted by the Secretary of War. Officers with troops on other foreign service will be governed by the same rule.

(e) Not to be Accompanied by Parts of Uniform. When officers or enlisted men wear civilian dress, it will not be accompanied by any mark or part of the uniform, except that officers may wear service breeches and regulation leather leggings or russet-leather boots with civilian coat when riding outside of post limits and off duty. The use of the service hat and the regulation saddle-cloth by officers riding in civilian clothes is prohibited.

(f) Optional Wear of Rosettes and Buttons. Rosettes or buttons of approved pattern, to consist of ribbons of the same color as those that pertain to the several service medals and badges, are authorized for optional wear with civilian clothing on the part of those persons to whom such medals and badges have been awarded or may be awarded, in lieu of the medals or badges to which such rosettes or buttons pertain respectively.

11. **Civilians Not to Wear the Uniform.** In Alabama, Arizona, Arkansas, California, Connecticut, Florida, Georgia, Idaho, Illinois, Iowa, Maine, Maryland, Michigan, Mississippi, Missouri, Montana, New Hampshire, New Mexico, New York, North Dakota, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Washington, West Virginia, and Wisconsin it is a misdemeanor for any person not an officer or enlisted man of the United States Army, Navy, Marine Corps, National Guard, Revenue Service or Forestry Service, or inmate of a veterans' or soldiers' home to wear the uniform of the United States Army. The law does not apply to persons of the theatrical profession while actually engaged in their profession.

12. **Conformity of Articles of the Uniform and Arms and Equipments to Standard Patterns, and Publication of Descriptions and Specifications of Same.** All articles of the uniform, including garments of headgear, footgear, ornaments, insignia, buttons, decorations, and other articles herein specified, will,

with the exceptions stated in this paragraph, conform in the quality, design, and color to the sealed patterns in the office of the Quartermaster General, who will from time to time publish descriptions and specifications of such patterns. Exceptions: Officers' collars, cuffs, evening dress shirts, neckties, shirt studs, shoes, socks, and white gloves; also suspenders for officers and enlisted men.

Organization commanders and other officers may obtain copies of the Uniform Specifications upon application to the Chief, War College Division, Washington, D. C.

The articles of equipment furnished by the Ordnance Department will conform to the patterns in the office of the Chief of Ordnance, who will from time to time publish descriptions and specifications of same.

The red-cross brassards will conform to the pattern in the office of the Surgeon General.

13. Decorations, Jewelry, Etc. No decoration received from a foreign Government, and no civilian decoration or jewelry, watch chains, fobs, etc., shall appear exposed on the uniform, except that fob may be worn exposed with the special evening dress and the blue mess jacket.

14. Dental Surgeon. The uniform of dental surgeons will be the same as that prescribed for a first lieutenant of the Medical Reserve Corps, except that the letters "D. C." will replace the letters "R. C." on the caduceus (see par. 25).

15. Dignity of the Uniform. Officers, especially organization commanders, will impress upon enlisted men that the dignity of the uniform and the respect due it are best preserved when its wearers so conduct themselves as never to cast discredit upon it. Permission to wear civilian clothes when on pass should never be granted enlisted men merely as a reward for good conduct, as this would appear to discredit the uniform. Such permission should be given only when conditions indicate that it would be for the best interests of the service, and is not in violation of the provisions of these regulations.

16. Discrimination Against the Uniform a Misdemeanor in the District of Columbia, Territories, Insular Possessions, and Certain States. In the District of Columbia, in any Territory, the District of Alaska, and any insular possession of the United States, and in the States of Connecticut, Florida, Maryland, Massachusetts, Minnesota, New Hampshire, New York, Oklahoma, Pennsylvania, Rhode Island, and Wyoming, it is a misdemeanor for the proprietor, manager, or employee of a theater or other public place of entertainment or amusement to discriminate against any person lawfully wearing the uniform of the Army of the United States.

17. Evening Uniform. These uniforms will be worn by officers in the evening:

(a) In the United States, Including Alaska:

For Ordinary Evening Wear. The dress uniform (dismounted) or the blue mess jacket, or the special evening dress will be worn. In warm weather the white uniform or the white mess jacket may be worn instead.

Evening Functions, Social or Official, of a General Nature. The special evening dress will be worn. If the occasion be one of special ceremony, the full dress will be prescribed by the commanding officer. In warm weather the white uniform may be prescribed instead.

Private Formal Dinners and Other Private Formal Social Functions Occurring in the Evening. The blue mess jacket or the special evening dress will be worn. In warm weather the white mess jacket may be worn instead. See par. 35 (b).

(b) In the Tropics:

For Evening Functions, Social or Official, of a General Nature, for Formal Dinners and Other Private Formal Social Functions Occurring in the Evening. The white mess jacket will be worn. The commanding officer may prescribe the white uniform for evening official functions under arms.

For ordinary evening wear, the white uniform or the white mess jacket will be worn.

(c) On transports: See par. 53 (a).

18. Example by Officers. Officers will, by their appearance, set an example of neatness and strict conformity to regulations in uniform and equipment.

19. Foreign Countries. In foreign countries, on occasions of reviews, official balls, entertainments given by military or naval authorities, or messes, or by civil officials during official visits of ceremony, and at social functions partaking of an official character, officers present in an official capacity will appear in uniform suitable for the occasion.

20. Funerals. For military funerals the uniform prescribed will be the full dress or dress with side arms. For commands not provided with the full dress or dress uniform the service uniform with side arms will be prescribed.

21. Special Courts-martial and Courts of Inquiry will hold their first session in the dress or service uniform, as the president may prescribe. Thereafter the court will decide the uniform. Side arms will be worn.

The judge advocate and counsel will wear the same uniform as the court, without side arms; so will the accused, when practicable.

Witnesses and orderlies will appear in the same uniform as the court, with side arms.

22. General Courts-martial will hold their first session in such uniform as may be prescribed by the president. Thereafter the court will decide the uniform, except that when the members of a general court-martial are assembled from different stations the president of the court will, upon receipt of the order convening the court, at once notify every member of the uniform to be worn, and all sessions of the court will be held in the uniform so prescribed by the president. Side arms will be worn.

The judge advocate and counsel will wear the same uniform as the court, without side arms; so will the accused, when practicable.

Witnesses and orderlies will appear in the same uniform as the court, with side arms.

23. Guard. The uniform of the guard will be prescribed by the commanding officer, and unless he orders a change, individual members of the guard will wear until retreat the identical garments in which they are mounted. After retreat, and until breakfast, they may wear other garments of the uniform prescribed.

24. Insignia of Detailed, Detached, and Unassigned Officers.

(a) Officers detailed to fill vacancies in The Adjutant General's Department, the Inspector General's Department, the Quartermaster Corps, the Ordnance Department, the Signal Corps, and the Bureau of Insular Affairs, and officers of the General Staff Corps, acting judge advocates, and acting inspectors general under the provisions of the act of June 23, 1874, will wear the uniform of the corps, department, or arm of service to which they permanently belong, omitting the insignia therefor, and substituting the insignia of the corps or department in which they are serving (see "Aiguillettes," par. 55). Permanent officers of the former Subsistence and Pay Departments may continue to wear the uniform of their respective former departments while such uniforms are serviceable, substituting the insignia of the Quartermaster

Corps for other insignia. If detailed to the General Staff Corps they will wear the insignia of that corps instead.

(b) The 200 officers detached from their proper commands under the provisions of section 27 of the act approved February 2, 1901, as amended by the act of Congress approved March 3, 1911, except those who come under the provisions of (a), above, will continue during the period of their detached service to wear the insignia of their arms or corps without the regimental numbers. Their saddlecloths will also be used without the regimental numbers.

(c) Officers not regularly assigned to any regiment will be governed by the same rule (b), above, unless attached to some regiment for duty, in which case they will wear the insignia of the regiment to which attached.

(d) Officers detailed on duty carrying increased rank will wear the uniform of their permanent corps, department, or arm of the service with proper insignia to indicate increased rank and their particular duty as may be prescribed by the Secretary of War.

25. Medical Reserve Corps. The uniform for officers of the Medical Reserve Corps will be the same as that prescribed for officers of the Medical Corps, except that the caduceus of gold or gilt, will be superimposed in the center by a monogram of dull finish bronze, bearing the letters "R. C.," and the caduceus of bronze will be superimposed in the center by the same monogram in gold or gilt.

26. Mourning. The badge of military mourning will consist of a straight band of black crêpe or plain black cloth, 5 inches wide, worn around the left arm above the elbow; also, when the sword is worn, a knot of black crêpe on the hilt; but no badge of military mourning shall be worn with the uniform, except at funerals or for occasions prescribed by the War Department. As family mourning, officers may wear the arm band prescribed in the foregoing.

27. Officer of the Day. Until retreat the officer of the day will wear the uniform of the guard. After retreat, he may wear any one of the evening uniforms prescribed in par. 17. With the mess jacket or the special evening dress, the saber belt, with full-dress slings, will be worn under the waistcoat. (See note, par. 59 (d).)

When present at a function of a general nature, he will wear the uniform prescribed for the occasion.

He will wear side arms during his tour of duty. (See par. 98 (d).)

28. Officers Not Serving with Troops will wear the prescribed uniform during the hours of duty, unless authorized by the Secretary of War to wear civilian clothing.

29. Officers to be in Same Uniform as Troops. When troops appear in any of the uniforms prescribed in these regulations, all officers on duty therewith or attached thereto in any capacity shall wear the corresponding uniform prescribed for officers. This does not apply to inspectors, who will wear such uniform as is best adapted to the performance of their duty.

30. Orderlies will wear side arms. In garrison, musician orderlies will wear only the belt; with the dress or full-dress uniform they will wear white gloves.

31. Over-sea Traveling. Whenever enlisted men, including recruits, are ordered to over-sea stations, except in Alaska, commanding officers of military posts and stations, including recruit depots, will see that each soldier, upon departing for the point of embarkation, has one suit of fatigue uniform and two suits of cotton olive-drab in his telescope case or canvas bag for use aboard the transport. (See par. 66 (c).)

32. Quartermasters will wear the service uniform when paying troops.

33. Philippine Scouts. The uniform of the Philippine Scouts shall be the

olive-drab cotton uniform, with the insignia of the Infantry or Cavalry, according to their organization, the letter "P" taking the place of the number of the regiment wherever it occurs.

34. Porto Rico Regiment of Infantry. The uniform of the Porto Rico Regiment of Infantry will be the same as that prescribed for Infantry, except that the letters "P. R." will replace the number of the regiment wherever it occurs.

35. Prescribing the Uniform.

(a) The uniform to be worn by a command, as well as that to be worn by officers on all occasions, social or official, of a general nature will, in every case, be prescribed by the commanding officer in accordance with the provisions of this order (see "Tables of Occasions," p. 1886, and "Evening uniform," par. 17), and whatever the dress prescribed may be, there must be uniformity.

(b) When a social function of a general nature is given by an individual officer in his quarters or elsewhere on the post, the uniform to be worn will, subject to the approval of the commanding officer, be indicated by the officer giving the entertainment. The uniform indicated will be in accordance with the "Tables of Occasions."

(c) For inspection of the condition of an organization and its equipment by its commander, the latter may prescribe the uniform and equipment.

(d) In case of inspections by a superior commander, or by a staff officer deputed to perform that duty, such officer may prescribe any regulation uniform and equipment according to the special object which he has in view.

36. Providing of Uniforms and Inspections of Same.

(a) All officers will provide themselves with the uniforms, arms, and personal and horse equipments pertaining to their rank and duty, and maintain them thoroughly neat and serviceable.

(b) Commanding officers will be held responsible that all officers have each uniform prescribed by them in accordance with the "Tables of Occasions," whether or not such officers be present upon the occasion for which the uniform is prescribed. Commanding officers will inspect and verify the arms, service uniforms, and field equipments of officers and enlisted men as often as they may deem necessary to assure themselves that all members of their commands are prepared to take the field upon short notice, fully equipped and uniformed, as prescribed herein.

37. Record of Sizes of Clothing.

(a) A record will be kept in each company, troop, battery, and detachment of the sizes of clothing required for each enlisted man thereof as ascertained by actual trial of the various articles of clothing. A sample of each size of garment used at the post will be furnished to post quartermasters for the use of organization commanders in "trying on" the garments until a satisfactory fit is secured and the soldier's record is correct. This record will be amended from time to time, especially in the case of young soldiers, as occasion may require. Requisitions will conform to the record of sizes.

When, for any reason, the proper sizes can not be obtained by actual trial, the tables published in the Annual Price List of Clothing and Equipage will be consulted by organization commanders in the preparation and maintenance of the soldier's record, which may be kept conveniently by entering the name of each man and the name and required size of each article of clothing on one of the individual slips of the clothing requisition blank, and then binding these slips to form 86, Quartermaster Corps, suitably labeled to show contents.

(b) Size sticks for use in measuring the feet of enlisted men with a view to determining the correct sizes of shoes required, and shoe stretchers for use whenever necessary, will be furnished by the Quartermaster Corps upon

duly approved requisitions at the rate of one size stick and two shoe stretchers for each company or detachment.

38. Recruiting Service. Officers and enlisted men on duty at general recruiting stations will wear, according to the season, either the dress or the service uniform. Olive-drab shirts may be worn when considered necessary by the recruiting officer in charge of the district, who will also determine for his district the time for wearing any particular uniform.

Recruiting officers and members of their recruiting parties will be in uniform when on duty as such.

While posted at the main entrance of recruiting stations, or while on duty in parks and squares, or on other duty as may be directed by the recruiting officer in charge, enlisted men will, while wearing the dress uniform, wear white gloves and the garrison belt.

39. Responsibility of Officers Regarding the Uniform.

(a) Commanding officers will issue such instructions as may be necessary to have all enlisted men on pass inspected before they leave and when they return to the post. Men who are not in proper uniform and who do not present a neat appearance will not be allowed to leave the limits of the post, and men who return in an untidy or dirty condition will be disciplined. This will also apply to enlisted men on transports in foreign or home ports.

(b) Organization commanders will be held responsible for the appearance of their men in garrison and on pass, and they will do everything possible to facilitate the proper care, cleaning, and preservation of the uniform, encouraging their men to keep their uniforms clean and neat.

(c) All officers will observe the appearance of enlisted men seen on pass and will report cases of men who are untidy or not in proper uniform.

40. Retired Enlisted Men may wear the pattern of uniform prescribed at the date of their retirement, except that the insignia of corps, department, or arm of service will be omitted.

41. Retired Officers.

The uniform of retired officers will be, at their option, either the pattern prescribed for officers of corresponding rank in their corps, department, or arm of service at date of retirement, or the pattern that is at present or may hereafter be prescribed for officers on the active list, except that the two uniforms shall not be mixed and officers below the grade of brigadier general shall omit the insignia of corps, department, or arm of service.

Retired officers on active duty may wear the uniform prescribed for officers on the active list, except that the insignia of corps, department, or arm of service will be omitted.

Uniform of Actual Rank to Be Worn. A retired officer is not authorized to wear any uniform other than that of his actual rank.

42. Saddle. All officers when on duty will use one of the types of the regulation saddles as furnished by the Ordnance Department for sale to officers.

Officers may use a flat type of saddle similar to the English saddle, covered with russet leather, open stirrup of white metal or steel finish, for polo, park riding, horse training, and other similar purposes.

43. Sale or Purchase of Uniform and Equipment Illegal.

(a) Sale. The clothes, arms, military outfits, and accouterments furnished by the United States to any soldier shall not be sold, bartered, exchanged, pledged, loaned, or given away; and no person not a soldier or duly authorized officer of the United States, who has possession of any such clothes, arms, military outfits, or accouterments, so furnished, and which have been the subject of any such sale, barter, exchange, pledge, loan, or gift, shall have any right, title, or interest therein; but the same may be seized and taken wherever

found by any officer of the United States, civil or military, and shall thereupon be delivered to any quartermaster, or other officer authorized to receive the same. The possession of any such clothes, arms, military outfits, or accouterments by any person not a soldier or officer of the United States shall be presumptive evidence of such a sale, barter, exchange, pledge, loan, or gift. (Sec. 3748, R. S.)

(b) **Purchase.** Whoever shall knowingly purchase or receive in pledge for any obligation or indebtedness from any soldier, sailor, or other person called into or employed in the military or naval service, any arms, equipments, ammunition, clothes, military stores, or other public property, whether furnished to the soldier, sailor, officer, or person, under a clothing allowance or otherwise, such soldier, sailor, officer, or other person not having the lawful right to pledge or sell the same, shall be fined not more than \$500, and imprisoned not more than two years. (Act of Mar. 4, 1909.)

44. Scouts. The uniform for enlisted scouts will, in general, be the same as the service uniform prescribed for enlisted men of the corresponding arm of service, the letters "U. S. S." in dull finish bronze replacing the collar ornaments.

45. Standard Patterns. A set of standard patterns of officers' uniforms will be kept in the office of the quartermaster of every territorial department for examination by officers, and a set of the articles of equipment furnished by the Ordnance Department will be kept in the office of the ordnance officer of the department.

46. Summary Court. The summary court officer, the accused, and the witnesses will wear the uniform of the command, without side arms.

47. Tailors (Enlisted Men). When necessary a soldier may be relieved from ordinary military duty to make, repair, or alter uniforms. The post exchange council will fix the rates to be charged, which will not exceed the cost of doing such work at the clothing depot, and company commanders will cause to be deducted from the pay of enlisted men and turned over to the proper person the amount properly due therefor. (A. R., 279.)

48. Unauthorized Articles of Uniform. Enlisted men will not be permitted to wear any articles of uniform which are not furnished by the Quartermaster Corps, nor will they be permitted to wear articles of the uniform other than those furnished to the organization to which they belong.

49. Unauthorized Combinations.

(a) Combinations of various articles of the uniform other than the combinations prescribed in these regulations are prohibited.

(b) Former post commissary sergeants and other enlisted men transferred to the Quartermaster Corps may continue to wear the uniform of their corps, department, or arms of the service in their possession at time of transfer until such uniforms, including service chevrons and trousers stripes, are worn out, changing insignia and grade of chevrons only at time of transfer to conform to those prescribed for enlisted men in the Quartermaster Corps.

50. Underclothing and Stockings. Wool knit undershirts, cotton knit undershirts, canton flannel or jean drawers, and woolen and cotton stockings will be provided for enlisted men according to climatic conditions.

51. Uniforms to be Worn in Camp and Garrison.

(a) Officers belonging to a camp or garrison will, whenever within the limits of such camp or garrison, wear the prescribed uniform, except when wearing civilian clothing as authorized in par. 10 (c).)

(b) The uniform appropriate to the occasion, with side arms, will be worn by officers when making official calls of the kind mentioned in paragraphs 403, 407, 408, and 409, Army Regulations, 1913, and other state calls.

(c) Officers reporting for duty will wear the uniform of the command, with side arms.¹

(d) Enlisted men will at all times, whether on or off duty, wear the uniform except when wearing civilian clothing as authorized in par. 10 (b) and par. 15.

52. Uniform that May be Worn by Certain Persons Who Served During the Civil War or the Spanish-American War. Officers who served during the War with Spain or since as officers of the Regular or Volunteer Army of the United States, and officers who served during the Civil War, and who have been honorably separated from the service, by discharge, resignation, or otherwise, may, upon occasions of ceremony, wear the uniform of the highest grade that they held by brevet or other commission in the regular or volunteer service. (Sec. 1226, R. S., and acts of Feb. 4, 1897, and Feb. 2, 1901.)

The uniform of such officers will be, at their option, either the pattern prescribed for officers of corresponding rank in their corps, department, or arm of service at date of separation from the service, or the pattern that is at present or may hereafter be prescribed for officers on the active list, except that the two uniforms shall not be mixed, and officers below the grade of brigadier general shall omit the insignia of corps, department, or arm of service.

53. (a) United States Army Transports, in time of peace.

Enlisted men will wear the service uniform and those on fatigue duty the fatigue uniform. (See par. 39 (a).)

Officers. Until retreat the service or the white uniform will be worn. After retreat the service or any one of the evening uniforms (par. 17) will be worn. The commanding officer will prescribe the uniform for all functions of a general nature on shore and for official or semiofficial functions whether or not of a general nature, and whatever the dress prescribed may be there must be uniformity. In foreign ports the special evening dress will be worn by all officers dining with naval or military authorities, messes, or civil officials. At official dinners of special formality side arms will be worn. (See note, par. 59.) These regulations will apply to all officers on board, whether or not on duty with troops.

(b) United States Military Academy. The uniform and the insignia of the permanent professors, the master of the sword, the chaplain, and the civilian instructors, and the insignia of the superintendent, commandant of cadets, and temporary professors, are prescribed in the regulations of the Academy.

54. Rescinded.

¹This requirement will not apply to the various headquarters and other places where civilian clothing is worn during office hours by authority of the Secretary of War. (See par. 28.)

PART II.

VARIOUS ARTICLES OF UNIFORM AND EQUIPMENT—BY WHOM, WHEN, AND HOW WORN.

55. Aiguillettes.

(a) By Whom Worn. They will be worn by officers of the General Staff Corps, and by the permanent and detailed officers of The Adjutant General's and the Inspector General's Departments (including acting inspectors general detailed under the provisions of the act of Congress approved June 23, 1874), the officers of the Bureau of Insular Affairs, aids, the adjutant of the United States Military Academy at West Point, N. Y., brigade and regimental adjutants, adjutants of coast artillery districts and coast defense commands, adjutants of engineer battalions, and military attachés.

(b) When Worn. They will be worn with the full dress and with the special evening dress on all occasions, with the dress uniform and white uniform under arms, and with the mess jacket on special occasions.

(c) How Worn. Except by the Chief of Staff and aides to the President, aiguillettes will be worn from the left shoulder, the long pencil cord in rear and the short pencil cord in front, the loops crossing on the arm, the front loop on top. By the Chief of Staff and aides to the President they will be worn from the right shoulder.

The short brass bar will be used except with the dress uniform, the hinge loop of the shoulder knot or epaulet passing through it. With the white uniform this bar will be fastened underneath the shoulder loop of the coat and concealed thereby. With the dress uniform the long brass bar will be slipped lengthwise under the shoulder strap.

With the full dress, the dress and the white uniforms the front pencil will be hung on the top button (right side with full dress in case of the Chief of Staff and aides to the President; left side in case of other officers), and the rear pencil cord, passing under the arm, on the second button, both cords, when the aiguillettes are worn from the right side, being so hung before the coat is buttoned.

With the special evening dress and the mess jacket the pencil cords will be hung on supports correspondingly placed beneath the right lapel in case of the Chief of Staff and aids to the President and beneath the left lapel in case of other officers.

56. Badges and Medals.

(a) Military and Naval Badges and Medals Awarded by the Government. The military and naval badges awarded by the Government are enumerated in subsection (l), section (j), paragraph 58.

Officers and enlisted men of the Army are authorized to wear with the uniform any medals or badges awarded to them by the Government during previous service in any other branch of the Government.

(b) Part of the Uniform. The badges and medals named above are a part of the uniform and will be worn as prescribed in these regulations.

(c) The Badges of Military Societies and of Corps and Divisions that Officers Are Authorized to Wear Are: The badges of military societies commemorative of the wars of the United States, including the Philippine insurrection and the China relief expedition; 2. The badges of the Regular Army and Navy Union of the United States and of the Army and Navy Union of the United States; 3. The corps and division badges of the Civil War.

(d) Badges and Medals Enumerated in (a) and (c) Not to Be Worn Together. The badges enumerated in paragraph (c) may be worn as prescribed in these regulations; will not be worn with the badges and medals named in paragraph (a) above, except with those named in (a-6.)

57. Medal of Honor.

(a) By Whom Worn. By those to whom it has been awarded.

(b) When Worn. With the full dress uniform, the special evening dress, and the mess jacket.

(c) How Worn. With the full dress the medal of honor will be worn pendent from the neck, the ribbon passing between the upper and lower hooks of the coat collar so that the medal proper shall hang about 1 inch below the opening of the collar; with the special evening dress and mess jacket it will be worn pendent from the neck, the ribbon passing around the neck under the collar so that the medal proper shall hang about 1 inch below the tie.

(d) The medal of honor will not be worn by officers suspended from rank and command, nor by enlisted men serving sentence of confinement.

(See "Philippine Scouts," par. 58 (l).)

58. Other Medals and Badges.

(a) By Whom Worn. Badges and medals awarded by the Government are worn by those entitled thereto by law and regulations. (For those entitled to campaign badges, see General Orders, No. 129, War Department, 1908, and General Orders, No. 23, War Department, 1911; for those entitled to wear the Army of Cuban Pacification badge, see General Orders, No. 96, War Department, 1909, and for those entitled to wear the Army of Cuban Occupation badge, see General Orders, No. 40, War Department, 1915.)

(b) Badges of military societies may be worn by officers and enlisted men who, in their own right or by the right of inheritance, are members of military societies of men who served in the armies and navies of the United States in the War of the Revolution, the War of 1812, the Mexican War, the Civil War, or

the Indian wars of the United States, the Spanish-American War and the incidental insurrection in the Philippines, or the China Relief Expedition, or are members of the Regular Army and Navy Union of the United States, or of the Army and Navy Union of the United States.

(c) Corps and Division Badges of the Civil War. Officers and enlisted men who served as officers, noncommissioned officers, privates, or other enlisted men in the Regular Army, volunteer or militia forces of the United States during the Civil War, and have been honorably discharged from the service, or still remain in the same, may wear the distinctive Army badge ordered for or adopted by the Army corps or division, respectively, in which they served.

(d) When Worn. Badges and medals are worn with the full dress uniform. (See "Philippine Scouts," par. 58 (l).)

(e) The various distinctive marks awarded for excellence in marksmanship, the aviator's badge, and the swordsman's badge may be worn with the full dress, the dress, and the service uniforms. However, they will not be worn in the field.

(f) When worn with the ribbons, they will be worn as prescribed in par. (i).

(g) How Worn. Badges and medals will be worn on the left breast of the coat in a horizontal line, about 4 inches below the middle point of the top of the shoulder, those with ribbons being suspended from a bar of metal passed through the upper ends and tops of the ribbons. The badges and medals that have ribbons will be worn in but one line, overlapping, if necessary. See (j) (3).

(h) Distinctive marks awarded for excellence in marksmanship and corps and division badges of the Civil War are worn in a similar manner, except that they are not suspended from bars of metal passing through ribbons.

(i) When marksmanship badges are worn with ribbons, the badges will be worn under the ribbons, in a horizontal line parallel to and three-eighths inch from the bottom of the ribbons.

(j) Order in Which Worn. They will be worn in the following order of precedence, beginning at the right:

(1) Military, Naval, and Other Badges and Medals Awarded by the Government. 1. Certificate of merit badge (issued by the War Department); 2. Medal commemorating the Battle of Manila Bay (issued by the Navy Department); 3. Medal commemorating the naval engagements in the West Indies (issued by the Navy Department); 4. Special meritorious medal for service during the War with Spain, other than in battle (issued by the Navy Department); 5. Philippine Congressional medal (issued by the War Department); 6. Campaign badges, in the order of the dates of the campaigns (issued by the War and Navy Departments); 7. Gold life-saving medal (issued by the Treasury Department); 8. Silver life-saving medal (issued by the Treasury Department); 9. Army of Cuban Occupation badge (issued by War Department); 10. Army of Cuban Pacification badge (issued by the War and Navy Departments); 11. Good-conduct medal (issued by the Navy Department); 12. Aviator's badge (issued by the War Department); 13. Various distinctive marks awarded for excellence in small-arms practice (issued by the War and Navy Departments); 14. Swordsman's badge (issued by the War Department); 15. Medals or badges awarded for service performed while in the Army, Navy, or Marine Corps, or other branch of the Government, if not included among those specified above.

(2) Badges of Military Societies and Corps and Divisions. 1. The badges of military societies commemorative of the wars of the United States, including the Philippine Insurrection and the China Relief Expedition, in the order of the dates of such wars; 2. The badges of the Regular Army and Navy Union of the United States and of the Army and Navy Union of the United States;

3. The corps and divisions badges of the Civil War and the War with Spain;
4. The badge of the Enlisted Men's Abstinence League.

(3) When Worn in More than One Line. If necessary to have more than one line of badges and medals, the second line will be placed below the first line, the bars from which the badges and medals are suspended being parallel to the upper bar and three-eighths inch from the bottom of the lowest medal, the middle of the lower line of medals being in the same vertical line as the middle of the upper line.

(k) Organized Militia. Officers and enlisted men of the active list of the Organized Militia, who have had service as indicated in paragraph 1, General Orders, No. 129, War Department, 1908, are entitled to campaign badges. (For instructions regarding preparation of requisitions, etc., see Circular No. 4, War Department, 1909.)

(l) Philippine Scouts. Officers, including majors, and enlisted men of the Philippine Scouts, who are entitled thereto, will wear the medal of honor, the certificate of merit badge, the Philippine congressional medal, and the campaign badges with service uniform on all occasions of ceremony. The medal of honor will be worn as in the case of the full dress uniform. (Par. 57 (c).)

(m) Campaign Badges. An officer or enlisted man of the Army who rendered, while an officer or enlisted man of the Navy or Marine Corps, service that would have entitled him to a campaign badge had it been rendered as an officer or enlisted man of the Army, is entitled to wear such campaign badge.

(n) Rescinded.

(o) Badges and Medals Not to be Worn by Officers Suspended from Command Nor by Enlisted Men Serving Sentence of Confinement. Neither badges nor medals will be worn by officers suspended from rank and command nor by enlisted men serving sentence of confinement.

59. Belts, Saber.

(a) Officers. The full dress saber belt, with full dress slings, will be worn with the full dress uniform and on the outside of the coat.

[Note: The black webbing belt prescribed for brigadier generals is worn on the outside of the full dress coat, under the sash.]

(b) The garrison belt, with slings, will be worn with the service uniform, on the outside of the coat. The garrison belt for infantry officers is of olive-drab webbing; for cavalry officers it is of russet leather. The present russet leather saber belt may be worn for a period of three months after the date on which any organization may be issued the 1910 infantry equipment.

(c) The full dress or the garrison belt, with full dress slings, will be worn with the dress and the white uniforms, under the coat.

A belt of webbing or of soft, pliable leather, with detachable full dress slings, may be worn with the dress and the white uniforms.

(d) The belt will not be worn outside the overcoat.

[Note: When the special evening dress or the mess jacket is worn, as authorized in par. 27 and par. 53 (a), the full dress or the service belt or a belt of webbing or of soft pliable leather, with full dress slings, will be worn under the waistcoat.]

(e) Enlisted Men. Saber belts and cartridge-carrying devices, when worn with the overcoat, will be worn outside the overcoat.

(For manner of wearing pistol belt, see par. 95.)

59½. Bolo. Enlisted men armed with the bolo will wear it suspended from the waist belt on the left side, as prescribed in orders from the War Department (Par. I, G. O. No. 172, W. D., 1908.) When mounted the wearer should carry the bolo on the left hip far enough forward so as not to mar the saddle.

60. Boots.

(a) **Leather.** Boots of black, black enamel, or patent leather will be worn with the mounted full dress and the mounted dress uniforms.

Unless otherwise prescribed, boots of russet leather may be worn with the service uniform by mounted officers, and russet leather boots may be worn with the service uniform and black boots with the blue uniform by other officers when mounted.

(b) **Rubber.** Rubber boots may be worn by officers in inclement weather.

Rubber boots (half hip) are authorized for enlisted men of mine companies, mine planters, cable steamers, and enlisted men of the Quartermaster Corps.

Rubber boots (hip) are authorized for issue to troops in Alaska.

61. Brassards.

Red. The authorized mounted orderlies of infantry and cavalry regiments, the mounted men assigned as orderlies to brigade and higher commanders, and agents of communication of the Field Artillery and machine-gun companies will, while on duty in that capacity at drill or in the field, wear a red brassard on the right forearm.

The brassards will be furnished by the Quartermaster Corps.

Red Cross. In time of war with a signatory of the Geneva convention, all persons in the military service rendered neutral by the terms of said convention will wear a brassard of white cloth, with a Geneva cross of red cloth in the center, on the left arm above the elbow while on duty in the field of operations. These persons are entitled to wear brassards: Chaplains attached to armies; the personnel charged exclusively with the removal, transportation, and treatment of the sick and wounded, and those charged with the administration of sanitary formations and establishments, e. g., surgeons, members of the Hospital Corps, and nurses.

Red-cross brassards will be worn by those entitled to wear them, when equipped for field duty.

They will be furnished by the Medical Department.

62. Breast Cord. The breast cord will be worn by enlisted men when full dress is prescribed. It will be attached to the dress coat, beginning at the button of the left shoulder loop, one cord passing in rear of the neck and the other in front, under the first button of the coat, crossing under the right shoulder loop and brought together under the right arm with a slide, then passing across the breast between the third and fourth buttons and attached to the left shoulder button.

63. Canteen will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, the canteen will be worn on the right buttock, when dismounted; when mounted, it will be fastened to the off cantle ring.

64. Cap Covers. In stormy weather officers may wear a black waterproof cover over the dress cap and an olive drab one over the service cap.

65. Cape. The cape may be worn by officers when not on duty with troops under arms. It may be worn by the officer of the day while visiting and inspecting the guard in evening uniform. (See par. 27.)

66. Caps.

(a) **Dress.** The dress cap will be worn with the full dress, the special evening dress, the blue mess jacket, and the dress uniform, except that general officers will wear the chapeau with the full dress dismounted uniform, unless shoulder knots are worn instead of epaulets, as authorized in par. 105, in which event the dress cap will be worn.

(b) **Fur.** Fur caps are authorized for troops serving in Alaska. (See par. 3.)

(c) **Service.** The service cap will be worn with the service uniform except as provided in paragraph 77 (c). When organizations or individual enlisted men are ordered for service in the Philippine Islands, Hawaii, and the Canal Zone, service caps will not be taken, except that all recruits en route from recruit depots to join the organizations to which they have been assigned, whether such organizations be stationed in the United States or elsewhere, will wear service caps. Service hats will be issued to them after they shall have joined the organizations to which they have been assigned. (C. U. R. No. 3, Nov. 10, 1914.)

(d) **White.** The white cap will be worn with the white mess jacket; with the white uniform it will be worn by all officers and by enlisted men as authorized.

(e) **Winter.** The winter cap may be worn by officers and enlisted men in cold weather when not at formations and will be worn whenever prescribed by the commanding officer.

(f) **Chin Strap.** At all mounted formations of ceremony, and such other occasions as may be necessary, the chin strap on dress and service caps will be used.

67. Chapeau. The chapeau will be worn by general officers with the full dress, dismounted except when shoulder knots are worn with cape, waterproof, or overcoat because of inclement weather, in which event the dress cap will be worn. The chapeau will be worn with the front peak turned slightly to the left, showing the gilt ornaments upon the right side.

68. Coats. The full dress, the dress, the white, and the service coats will be buttoned throughout whenever worn.

69. Cravats.

(a) Officers will wear an evening dress tie of black silk with the special evening dress and the mess jacket.

(b) Chaplains may wear either a black or white tie with the clerical coat or vestment authorized in par. 9.

(c) When off duty, in permanent and maneuver camp and out of camp, when service uniform with olive-drab shirt and without coat is authorized, officers and enlisted men will wear a plain black cravat tied as a four-in-hand. No other style or color of cravat will be so worn.

70. Currycomb and Horsebrush will be carried as prescribed in orders from the War Department and in authorized equipment manuals whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, these articles will be carried in the off-side saddlebag or the off-side pommel pocket.

71. Dispatch Case. Staff officers and inspector-instructors of the Organized Militia, and those acting as such, will, when the nature of their duty requires it, carry a dispatch case to be furnished by the Ordnance Department. Dispatch cases will be furnished inspector-instructors on requisition and will be accounted for as are other articles of ordnance property that are supplied to those officers; they will be furnished other officers on memorandum receipt.

72. Epaulets.

(a) Epaulets will be worn by general officers with the dismounted full dress.

(b) In case of inclement weather, when capes, waterproofs, or overcoats are worn, shoulder knots may take the place of epaulets.

73. Field Glasses will be carried by all officers, except officers of the Medical Department and chaplains, when equipped for the field, and will be carried on the right side, the strap passing over the left shoulder.

Medical officers on duty with sanitary units of the mobile army will carry field glasses.

74. First-aid Packet and Magazine Pocket. The first-aid packet for troops of the line will be worn with the field rifle or pistol belt on the left hip just back

of the seam of the breeches. The magazine pocket, web, double, will be worn on the Cavalry field rifle belt, in front of the left hip. When the pistol belt is worn with field equipment, the magazine pocket, web, double, will be worn in front of the left hip. Hospital Corps men will wear the first-aid packet on the waist belt with field equipment, in front of the left hip.

Officers will wear the first-aid packet and magazine pocket, web, double, in corresponding positions.

75. Gloves for Enlisted Men.

(a) Leather gloves of the pattern prescribed for the purpose will be issued to enlisted men of the Coast Artillery, of mountain batteries of Field Artillery, of the machine-gun platoons, of the Ordnance Department, of the Signal Corps, and of the Corps of Engineers, to protect their hands while handling guns, machinery, and other appliances. (C. U. R. No. 3, Nov. 10, 1914.)

(b) Regulation riding gloves will be worn, when mounted, when prescribed.

(c) White cotton or olive-drab woolen gloves will be worn on dismounted duty when prescribed, but white gloves will not be worn with the service uniform. When off duty olive-drab woolen gloves may be worn with the full dress, the dress, and the woolen service uniform.

(d) When ordered, gloves will be worn under arms and with side arms, except with the cotton uniform.

76. Gloves for Officers.

(a) Dress Uniform. White leather gloves will be worn with the dress uniform when mounted.

(b) When under arms and not mounted, plain white gloves will be worn.

(c) At afternoon receptions and on other social occasions of a similar nature, whether or not under arms, plain white gloves (except white cotton gloves) will be worn with the blue uniform.

(d) Aids and other officers who may be in official attendance on distinguished persons will wear white gloves (except white cotton gloves) when in dress uniform, without side arms.

(e) Upon other occasions when not on duty with troops under arms, officers may wear any of the gloves prescribed above.

(f) Full Dress Uniform. White leather gloves will be worn with the full dress uniform when mounted.

(g) When not mounted, plain white gloves (except white cotton gloves) will be worn.

(h) Mess Jacket. At dances plain white kid gloves will be worn with the blue mess jacket, and plain white lisle thread gloves with the white mess jacket. On other occasions the wearing of gloves is optional.

(i) Service Uniform. Regulation riding gloves will be worn with the service uniform when mounted, and may be worn with the service uniform upon other occasions when the olive-drab woolen glove is not prescribed. The olive-drab woolen glove will be prescribed for officers whenever it is prescribed for enlisted men; on other occasions it may be worn with the woolen olive-drab uniform.

(j) Special Evening Dress. Same as blue mess jacket.

(k) White Uniform. When under arms, and also when at dances, plain white gloves of lisle thread will be worn.

(l) Chaplains may wear white gloves whenever their duty requires it.

77. Hats.

(a) Blue Denim. The blue denim hat will be worn with the fatigue uniform by enlisted men of the Coast Artillery, Quartermaster Corps, field companies of the Signal Corps when on duty on cable ships, and the Aviation Section, Signal Corps.

(b) **Oilskin.** The oilskin hat may be worn by officers and enlisted men of mine companies, mine planters, and cable ships.

(c) **Service.** The service hat will be worn with the service uniform for field duty and target practice; also with the cotton service uniform by all troops in the United States when stationed south of parallel 35° north latitude, and by all troops in the Philippine Islands, Hawaii, Porto Rico, and the Canal Zone. It will also be worn with the fatigue uniform and with stable frocks, except by enlisted men of the Coast Artillery Corps and the Aviation Section, Signal Corps. It may be worn in garrison with the service uniform when waterproof coats, overcoats, slickers, or ponchos are worn, or when authorized by the post commander on account of exceptional or severe climatic conditions, when the wearing of caps would endanger the health of his command. (C. U. R. No. 10, Mar. 24.)

(d) **Hat Strings.** At all mounted formations of ceremony, and such other occasions as may be necessary, the hat strings provided on service hats will be used, tied either under the chin or as chin straps on the point of the chin.

78. Haversacks will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, the 1910 model haversack and the 1912 model ration-bag knapsack will be worn on the back. When dismounted, the old model haversack will be worn on the left side, the strap, in the case of officers, passing over the right shoulder; when mounted, saddlebags or pommel pockets and ration bags will be carried instead.

79. Identification Tag. When equipped for field duty the identification tag will be worn under the shirt, suspended from a cord around the neck.

80. Insignia on Cap.

(a) **Officers.** The insignia is embroidered in gold or gilt on the dress cap. The detachable insignia of bronze will be worn on the service cap, and those of gold or gilt metal on the white cap. They will be attached to the front of the cap so that the top of the insignia will be slightly below the top of the cap.

(b) **Enlisted Men.** The detachable insignia of gilt will be worn on the dress and the white caps, and the detachable insignia of bronze on the service cap, the fastenings of the insignia being inserted in the eyelet in the front of the cap.

81. Insignia on Collar of Coat.

All insignia will be of metal.

For the Regular Army the letters "U. S."; for the Volunteer Army the letters "U. S. V."; for the Officers' Reserve Corps and the Enlisted Reserve Corps the letters "U. S. R."; for the National Guard while in the service of the United States, the letters—not to exceed four—forming the abbreviation of the name of the State, Territory, or District of Columbia.

(a) **Officers.** The letters "U. S." will be worn 1 inch from each end of the collar, with a suitable space between the letters, and placed midway between the upper and lower edges of the collar. The letters "U. S. V." or "U. S. R." will be similarly worn, but five-eighths inch from each end of collar.

If the abbreviation of the name of a State, Territory, or the District of Columbia consists of but two letters, it will be worn at 1 inch from the end of the collar; in other cases at five-eighths of an inch.

The insignia of the corps, department, or arm of service and the insignia of aids, chiefs of staff, and chaplains will be worn five-eighths inch from the letters "U. S.," and one-half inch from the letters "U. S. V.," or "U. S. R.," next to letter farthest from opening of collar.

The same rule will establish intervals from State, Territory, and District of Columbia abbreviations.

(b) The gold or gilt insignia will be worn on the collar of the dress and white uniforms, and the bronze insignia on the collar of the service uniform, except that chaplains will wear the silver Latin cross on all uniforms.

(c) Enlisted Men. The letters "U. S.," "U. S. V.," "U. S. R.," or those forming the State abbreviation, and the insignia of corps, department, or arm of service will be worn on the dress and the white coats, and will be placed as in the case of officers. No insignia will be worn on the white coats of cooks or bakers except those of the Quartermaster Corps.

The button insignia will be worn on the service coat, the button with the letters "U. S.," "U. S. V.," "U. S. R.," or those forming the State, Territory, or District of Columbia abbreviations being worn on the right side of the collar, and the button with the corps, department, or regiment and company on the left side; the edge of the button to be 1 inch from the end of the collar, and the button to be midway between the upper and the lower edges of the collar.

82. Insignia on Collar of Shirt. (When the shirt is worn without the coat.) See paragraph 102 (a). The insignia of rank worn on the collar of the shirt will be of metal and will be worn as follows:

(a) OFFICERS.

(1) Regular Service.

Major General of the Line. On both sides, in the middle of the collar, the letters "U. S.," and two stars, points up. On each side, the letters "U. S." to be 1 inch from the end of collar.

Brigadier General of the Line. Same as for major general, but with only one star on each side.

For General Officers of Staff Corps or Departments. Substitute for the letters "U. S." on the left side, the proper device.

Colonel. On the right side, in the middle of the collar, the letters "U. S." and an eagle, beak to the front; the letters "U. S." to be one inch from end of collar. On the left side, in the middle of the collar, and one inch from the end, the insignia of corps, department, or arm of service.

Lieutenant Colonel. On the right side, in the middle of the collar, the letters "U. S." and a silver oak leaf, point up; the letters "U. S." to be one inch from the end of the collar. On the left side, in the middle of the collar, and one inch from the end, the insignia of corps, department, or arm of service.

Major. Same as lieutenant colonel (substituting "a gold oak leaf").

Captain. Same as lieutenant colonel (substituting "two bars, one-fourth inch apart and parallel to the end of the collar").

First lieutenant. Same as lieutenant colonel (substituting "one bar parallel to the end of the collar").

Second Lieutenant. On the right side, in the middle of the collar, and one inch from the end, the letters "U. S." On the left side, in the middle of the collar, and one inch from the end, the insignia of corps, department, or arm of service.

General Staff Officers, Chiefs of Staff, Aids, and Chaplains. Substitute on the left side of the collar the proper device in place of the insignia of corps, department, or arm of the service.

(2) National Guard Service.

Same as for officers of the regular service, except that the letters—not to exceed four—forming the abbreviation of the name of the State, Territory, or District of Columbia will be substituted for the letters "U. S."

(a) **Volunteers or Officers' Reserve Corps.**

Same as for officers of the regular service, except that the letters "U. S. V." or "U. S. R." will be substituted for the letters "U. S."

(B) **ENLISTED MEN.**

When the shirt is worn without the coat, the button insignia will be worn on the collar as prescribed for the service coat in paragraph 81 (c).

83. Insignia on Saddlecloth. The bronze insignia of staff corps, department, and Coast Artillery, and the regiment number in enamel in case of the Infantry, Cavalry, and Field Artillery, will be placed in each flank corner of the saddlecloth, in this position: Draw a line bisecting the angle made by the inner seams of the binding; place the median line of the insignia on this line in the same manner as if the bisector were a vertical line on the collar of the dress coat, the lowest point of the insignia being at the following distances from the intersection of the inner seams:

2.25 inches:

Ordnance Department.

Medical Department.

Chaplains.

2.5 inches:

Infantry.

Cavalry.

Field Artillery.

Adjutant General's Department.

Signal Corps.

Aids.

2.75 inches:

Quartermaster Corps.

3.25 inches:

Coast Artillery. (The line joining the lowest points of the two cannon to cut the bisector of the angle at a point 3.25 inches from the intersection of the inner seams of the binding.)

Judge Advocate General's Department. (The line adjoining the two lowest points of the wreath to cut the bisector of the angle at a point 3.25 inches from the intersection of the inner seams of the binding.)

Corps of Engineers.

3.5 inches:

General Staff. (The point of the star farthest from the intersection of the inner seams of the binding, to be on the bisector of the angle; the line joining the two points (of the star) nearest the intersection of the inner seams, to cut the bisector at a point 3.5 inches from the intersection of seams.)

Inspector General's Department. (The line joining the two lowest points of the wreath, to cut the bisector of the angle at a point 3.5 inches from the intersection of the inner seams of the binding.)

GENERAL OFFICERS (BRONZE INSIGNIA).

General. The coat of arms will be placed with the longer median line on the bisector of the angle, center of eagle 5.25 inches from the intersection of the inner seams, a star being placed on each side of the coat of arms and midway

between the eagle and the inner seam, two of the points of each star being on the arc of a circle of a radius of 5.25 inches, with the intersection of the inner seams as a center.

Lieutenant General. The large star will be placed on the bisector of the angle, with a small star on each side, two of the points of each of the three stars being on the arc of a circle of a radius of 6 inches, with the intersection of the inner seams as a center, each small star being midway between the large star and the inner seam.

Major General. Two of the points of each star will be placed on the arc of a circle of a radius of 4 inches, with the intersection of the inner seams as a center, the centers of the two stars being $2\frac{3}{4}$ inches apart, the stars being equidistant from the bisector of the angle.

Brigadier General. The star will be placed as in the case of the General Staff insignia.

84. Insignia on Shoulder Loop. On the shoulder loops of the service and the white uniforms, metal insignia of rank will be worn as follows:

General. The coat of arms, head of eagle up, in center of loop, midway between the two stars, whose centers will be 3 inches apart, point up.

Lieutenant General. The large star, point up, in center of loop, midway between the two small stars, whose centers will be 3 inches apart, point up.

Major General. The centers of the two stars, point up, $2\frac{3}{4}$ inches apart, the stars to be equidistant from the ends of the loop.

Brigadier General. Star in center of loop, point up.

Colonel. Eagle, head up, beak to the front, in middle of loop, talons of eagle five-eighths inch from sleeve end of loop.

Lieutenant Colonel. Oak leaf, point up, in middle of loop, stem of leaf five-eighths inch from sleeve end of loop.

Major. Oak leaf to be worn same as oak leaf of lieutenant colonel.

Captain. The two bars, one-fourth inch apart, in middle of loop, lower bar parallel to and five-eighths inch from sleeve end of loop.

First Lieutenant. The bar in middle of loop, parallel to and five-eighths inch from sleeve end of loop.

85. Insignia on Sleeve.¹ The sleeve insignia of corps, department, arm of service, or aid will be of metal (gilt or gold), except that officers who already have embroidered insignia may continue to wear them on their present uniforms until they change corps, department, or arm of service.

OFFICERS.

(a) Full dress coat, special evening dress coat, and mess jacket.

General Officers of the Staff Corps and Departments. The proper corps or department insignia will be placed in the center of sleeve, 1 inch above the cuff.

[Note: The stars indicating rank will be worn 1 inch above the corps or department insignia. General officers of the line will wear the stars 1 inch above the cuff.]

All Officers Below the Rank of Brigadier General, Except Officers of the

¹ The insignia of rank in the case of officers below the grade of brigadier general, as indicated by knots on the sleeves and the braid ornamentations, are given in detail in the specifications issued by the Quartermaster General of the Army. In the case of officers above the grade of colonel the rank is indicated by stars.

General Staff Corps. The insignia of corps, department, arm of service, or aid will be placed in the center of the open space under the lace insignia, or if no lace insignia are worn, the ornament will be placed with the base line 1 inch above the gold band.

Officers of the General Staff Corps will wear the corps insignia on the shoulder knot.

(b) Overcoat. The insignia of corps, department, or arm of service, or aid, will not be worn on the sleeve of the overcoat.

The insignia of rank will be indicated on the sleeve as described in the specifications issued by the Quartermaster General.

ENLISTED MEN.

(c) Chevrons of noncommissioned officers will be worn on both sleeves, points up and midway between the elbow and top of sleeve. They will be worn on the sleeves of the overcoat and all coats; also on the sleeves of the olive-drab shirt when worn without the coat. (See par. (j).)

(d) Insignia for Excellence in Target Practice, Coast Artillery. Enlisted men belonging to the batteries of the Coast Artillery Corps making the highest average figure of merit for the year in each class of heavy gun and mortar battery practice indicated in War Department orders, will wear on the cuff of the right sleeve of the dress coat a badge consisting of a scarlet figure "1," embroidered on a blue cloth disk. This badge will be attached at the middle line of the outside of the cuff, 2 inches from the bottom.

A badge of similar design, consisting of the figure "1" embroidered upon olive-drab cloth for the cotton service coat, or upon olive-drab woolen melton for the woolen service coat, will be worn on the cuff of the right sleeve by enlisted men belonging to batteries entitled to wear this badge.

Figures will be issued by the Quartermaster Corps upon requisition as soon as practicable after the annual ratings of the winning batteries are announced by the War Department. They will be issued without cost and all enlisted men of the batteries will wear them until the ratings for the succeeding year are published.

(e) Gunners' Insignia, Field and Coast Artillery. The gunners' insignia will be worn on both sleeves of the dress coat, the service coat and the overcoat. The insignia will not be worn with the fatigue uniform, nor will it be worn by noncommissioned staff officers of the Field or the Coast Artillery, nor by enlisted men of the Coast Artillery holding rated positions.

The gunners' insignia of Field Artillery and of gun and mortar companies, Coast Artillery, will be worn in a position corresponding to that prescribed for the insignia of rated positions, point of projectile up; the insignia of mine companies will also be similarly worn, with the maneuver ring of the mine case up.

(f) Insignia of Rated Positions in the Coast Artillery. The insignia of rated positions in the Coast Artillery will be worn on both sleeves of the overcoat and the dress, service, and fatigue coats. In the case of noncommissioned officers, the line connecting the two points of the lower bar of the chevron will be tangent to the circle indicating the rating; if this is not practicable, the insignia will be worn one-half inch below the center of the lower edge of the chevron. If not a noncommissioned officer, the insignia will be worn in the middle of the sleeve and midway between the elbow and top of sleeve.

The following-named insignia of rated positions will be worn as indicated:
 Casemate electrician, chief planter, and chief loader: Maneuvering ring of mine up.

Observer and plotter: Point of triangle up.

(g) Service Stripes. All enlisted men who have served faithfully in the Army, Navy, or Marine Corps for a period of three years, continuously or otherwise, will wear as a mark of distinction a service stripe of the corps, department, or arm of the service in which the service was rendered.

For each additional period of three years' faithful service, continuous or otherwise, an additional service stripe will be worn.

Whenever the three-year period covers service in two or more corps, departments, or arms of the service, the service stripe therefor will be of the color of the facing of the corps, department, or arm of the service in which the major portion of the period was served.

Service stripes will be worn diagonally, upon both sleeves of the dress coat, below the elbow, extending from seam to seam, the front end being the lower and about $3\frac{1}{2}$ inches from the end of the sleeve. In case of more than one stripe, they will be worn one above the other in the order in which they were earned, $\frac{1}{4}$ -inch space between stripes.

(h) Other Sleeve Insignia of Enlisted Men. Insignia for artificers, cooks, farriers, first-class privates (Engineers, Ordnance, Signal Corps, and Hospital Corps), horseshoers, mechanics, saddlers, and wagoners will be worn on both sleeves of the overcoat, and the dress, service, and fatigue coats, midway between the elbow and top of sleeve; insignia for privates (first class) and cooks, Quartermaster Corps, will be similarly worn; insignia for first-class privates of the Hospital Corps will be worn on the white coats also.

(i) Various Sleeve Insignia of Enlisted Men. The following insignia will be worn as indicated:

Artificer: Head of hammer up.

Chief musician: Bell of bugle to the front.

Chief trumpeter: Bell of bugle to the front.

Commissary sergeant (regimental): Cusps of crescent to the rear.

Cook: Crown of cap up.

Farrier: Head of horse to the front.

First-class privates, Ordnance Department: Flame of shell up.

First-class privates, Signal Corps (dress chevron): White flag to the front.

Horseshoer: Toe of shoe up.

Mechanic: Head of hammer up.

Mechanic—Artificer: Head of hammer up.

Mechanic—Farrier: Head of horse to the front.

Mechanic—Horseshoer: Toe of shoe up.

Mechanic—Saddler: Blade of knife up.

Quartermaster sergeant, master electrician, sergeant (first class), sergeant, corporal, and privates (first class), Quartermaster Corps: Hilt of saber to the front.

Principal musician: Bell of bugle to the front.

Saddler: Blade of knife up.

Sergeant of field music: Bell of bugle to the front.

Signal Corps: Dress chevrons to be worn with the white flag to the front.

Stable sergeant: Head of horse to the front.

Wagoner: One set of opposite spokes horizontal.

(j) Kinds of Chevrons and Other Insignia to be Worn with Various Uniforms. The different kinds of chevrons and other sleeve insignia for enlisted men will be worn with the various uniforms as follows:

| Kind of chevron or other insignia. | To be worn on— |
|---|--|
| Dress..... | Dress coat. |
| Olive-drab woolen..... | Olive-drab woolen coat, overcoat, and olive-drab shirt. |
| Olive-drab cotton..... | Olive-drab cotton and the fatigue coats, except on fatigue coats of Coast Artillery. |
| Olive-drab cotton on white background... | White coats (by noncommissioned officers and privates, first class, Hospital Corps). |
| Red material on blue denim background.. | Fatigue coat, Coast Artillery. |
| White material stitched in buff color..... | White coats (by cooks and bakers, Quartermaster Corps). |
| Blue denim material stitched in buff color.. | For all enlisted men of the Quartermaster Corps whose classification calls for mechanical or manual labor. |
| Blue denim material stitched in orange color traced in white. | For all enlisted men of the Signal Corps whose classification calls for mechanical or manual labor. |
| Green material on blue denim background. | Fatigue coat, Coast Artillery School Detachment. |

86. Rescinded.**87. Leggings.**

Officers will wear russet leather or pigskin leggings with the service uniform, except that, unless otherwise prescribed, mounted officers and other officers when mounted may wear russet-leather boots instead, and that in the field officers may wear canvas leggings or woolen puttees.

Enlisted men will wear the prescribed leggings with the service uniform.

88. Meat Can, Knife, Fork, and Spoon will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, these articles will be carried in the haversack when dismounted; when mounted, in the near-side saddlebag or offside pommel pocket.

89. Nose Bag or Feed Bag will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, the nose bag will be carried by officers on offside of the cante, and, when the blanket is carried, it will inclose the end of blanket roll on offside of the cante, as prescribed in the Cavalry Drill Regulations for enlisted men. The feed bag (grain bag inclosed) will be carried as a roll in the pommel coat straps and, with the new model equipments, on top of the pommel pockets.

The blanket will not be carried on the saddle by officers merely for purposes of inspection.

90. Oilskin Clothing (black), including hats and half-hip rubber boots, may be worn by officers and enlisted men of mine companies, mine planters, cable steamers, Quartermaster Corps, of companies, Coast Artillery Corps, on duty in the Coast Defenses of the Columbia, by troops in Alaska, and by officers and enlisted men on duty at the Sandy Hook Proving Ground. (C. U. R., No. 12, June 15, 1915.)

91. Overalls. Troops to whom overalls have been issued will wear them on stable duty instead of the fatigue uniform.

92. Overcoat.

(a) Blanket-lined overcoats will be issued to troops stationed in extremely cold regions when the necessity for such issue is certified by the post com-

mander, but only to men performing guard duty or other necessary outdoor duty when exposure to weather would jeopardize life or limb. These overcoats will not be charged to the enlisted men, but will remain the property of the United States.

(b) Olive-drab. The olive-drab overcoat will be worn over any uniform without change of headgear whenever prescribed. When off duty, the overcoat may be worn in cold or other inclement weather.

(c) The overcoat will be buttoned throughout whenever worn.

(d) When in the opinion of the commanding officer the climatic conditions make it advisable, officers may be permitted to wear, in the field only, a short double breasted overcoat of drab moleskin cloth lined with sheepskin and with a six-inch rolling sheepskin collar dyed beaver shade and provided with two outside lower pockets.

Although the wearing of this coat is permissible under the conditions named above, it should not be so construed by commanding officers as to result in a part of the officers of a regiment wearing, at formations under arms in the field, this short coat and others at the same time wearing the olive-drab overcoat [92 (b)]. All should wear it or none. The wearing of mixed uniforms at formations under arms is not permissible.

93. Overshoes may be worn by officers and enlisted men when not at formations and will be worn whenever prescribed by the commanding officer.

94. Picket Pin and Lariat will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, these articles, if new model, will be carried, the picket pin in picket-pin carrier (special) and the lariat, rolled, on top of the cante roll, fastened with coat straps; if old model, the picket pin, with lariat neatly coiled, will be fastened to the near cante ring.

95. Pistol. The pistol will be worn when equipped for field service by veterinarians and all officers, except chaplains and officers of the Medical Department. (See notes 2 and 3, p. 1888.) The pistol will be worn on the right hip. The pistol belt will be worn outside the coat or overcoat.

96. Poncho. To use the new pattern poncho as a rain protection, button the poncho together, commencing at the end provided with buttons, the length of the closed portion depending upon the height of the wearer, then pass the part so buttoned over the body and insert the head through the opening provided, the upper or unbuttoned part falling to the rear and forming a cape. If necessary, the cape thus formed may be secured by buttoning it to one of the rear buttons by means of the buttonhole in the center of the back thereof or by tying the gilling cord furnished with the poncho around the waist.

97. Ribbons.

(a) The sections of ribbons are a part of the uniform and will be worn as prescribed in this order.

(b) By Whom Worn. By those entitled to wear the corresponding badges or medals.

(c) When Worn. With the special evening dress, the dress, the mess jacket, the service, and the white uniforms.

[Note: The medal of honor, instead of the ribbon, is worn with the special evening dress and mess jacket.]

(d) How Worn. With the cotton service, the white uniform, and the white mess jacket, the ribbons, without space between them and without overlapping, will be sewed on a bar having a brooch-pin arrangement or eyelet shanks. In the latter case the bar will be secured to the coat in the same manner that the buttons are secured to the service coat. With the woolen service, the dress, the

blue mess jacket, and the special evening dress the ribbons may be sewed on the coat or on a bar as just described.

Ribbons will be worn on the left breast in a horizontal line about 4 inches below the middle point of the top of the shoulder.

In cases where the ribbons are sewed on the coat, enlisted men, in full dress uniform, wearing badges will pin them just above the ribbons, so as to exclude the ribbons from view. If the ribbons are not sewed on the coat, they will be removed.

With the special evening dress, the blue mess jacket, and the white mess jacket, ribbons will be worn on the left breast of the coat in a horizontal line about 4 inches below the middle point of the top of shoulder, the ribbon nearest the center of the body nearly touching the edge of the lapel. If necessary to have more than one line of ribbons, the other lines will be placed below and parallel to the first line, with a space of three-eighths inch between lines, the middle of each line being in the middle of the space between the edge of the lapel and the left side of the body.

With the dress, the white, and the service uniforms ribbons will be similarly worn except that the lines will begin nearer to the center of the body.

(e) Order in Which Worn. Ribbons will be worn in the following order, from right to left:

- (1) The medal of honor ribbon.
- (2) The certificate of merit ribbon.
- (3) The Philippine congressional medal ribbon.
- (4) The campaign ribbons in the order of the dates of the campaigns.
- (5) Army of Cuban Pacification ribbon.

(f) Not to be Worn by Officers Suspended from Command or Enlisted Men in Confinement. Ribbons will not be worn by officers suspended from rank and command, nor by enlisted men serving sentence of confinement.

(g) Not to be Worn on Shirt. Ribbons will not be worn on the olive-drab shirt.

98. Saber.

(a) Officers of the dismounted service and of the staff departments, and the noncommissioned officers of the dismounted service and staff departments armed with the saber, will not carry the saber in the field. Officers and enlisted men of the mounted service when acting as dismounted troops will not carry the saber. At other times the saber will be worn by all officers when on duty with troops under arms or side arms, and on the occasions stated in the "Tables of Occasions."

(b) When dismounted, the saber will be habitually worn guard to the rear, with the scabbard hooked. When worn with the overcoat, the belt will be inside and the saber outside the overcoat. When mounted, the scabbard will be worn attached to the near side of the saddle by saber straps passing through the pommel ring and the quarter ring of the saddle. With the new model equipment, when mounted, the scabbard will be worn in the saber carrier which is held in place by passing its attaching strap through the loop on the off cantle hinge; the depending billet buckles to the carrier strap; adjust so that saber shall swing in a vertical plane. The officer uses the saber carrier for either saber. It goes on the near side also.

(c) The proper saber knot, as indicated in the "Tables of Occasions," will always be worn with the saber.

(d) Upon social occasions when the saber is worn, it may be temporarily laid aside, but the belt and slings will not be removed.

(e) The adjutant will wear side arms when placing officers in arrest. (See par. 51 (b and c).)

99. Saber Knots.

(a) The dress saber knot will be attached to the saber when worn with the full dress, the dress, and the white uniform, and when worn by the officer of the day with the special evening dress or the mess jacket, as authorized in par. 27.

(b) The service saber knot will be attached to the saber when worn with the service uniform.

100. Saddlecloth. To be used by all officers when mounted in uniform, and to be worn over the saddle blanket or pad. (For saddlecloth insignia, see par. 83.)

101. Sashes. General officers above the grade of brigadier general will, with the full dress uniform, wear the sash across the body from right shoulder to the left side and not extended around the waist; brigadier generals will wear the sash in one thickness around the waist, so as to fit snugly over the belt.

102. Shirts.

(a) Olive Drab. The commanding officer may, when he considers it advisable, on account of climatic or other conditions, prescribe the wearing of the olive-drab shirt without the coat at certain drills. (See par. 111.) A belt will then be worn instead of suspenders. When the shirt is so worn, elastic or other arm bands will not be worn.

(b) When the olive-drab shirt is worn without the coat, except when the coat is only temporarily removed, the insignia of rank will be worn on the collar by officers, as prescribed in par. 82, and the chevrons will be worn on the sleeves of the shirt by noncommissioned officers as prescribed in par. 85 (c).

(c) The olive-drab shirt will be worn with the service uniform in the field.

(d) White Evening Dress. White evening dress shirts with plain stiff bosoms will be worn by officers with the special evening dress and the mess jacket.

103. Shoes.**OFFICERS.**

The russet leather shoes will conform in general style to the shoes issued by the Quartermaster Corps. The high shoes of polished black leather, black enamel, or patent leather, will have plain black leather or plain kid tops, with or without toe tips.

Full Dress and Dress Uniform (Dismounted). High shoes of polished black leather, black enamel, or patent leather.

Service Uniform. High russet leather shoe.

Special Evening Dress and Blue Mess Jacket. High or low shoes or pumps of black enamel or patent leather.

White Uniform. Low white canvas shoes.

ENLISTED MEN.

For All Occasions. Russet leather shoes, as prescribed, for all occasions.

The Gymnasium Shoe will be worn in gymnasium work. It may be worn in barracks and may, when prescribed by the commanding officer, be carried in the surplus kit and used as a camp shoe.

104. Shoulder Belts will be worn with the full dress uniform by all officers of the Signal Corps, including those detailed therein.

105. Shoulder Knots will be worn on the full dress coat, the special evening dress coat, and the blue and the white mess jackets, except that general officers will wear epaulets with the dismounted full dress, unless capes, waterproofs,

or overcoats are worn because of inclement weather, in which event the shoulder knots may be worn.

106. Shoulder Straps will be worn on the dress coat.

107. Socks. Black socks will be worn with the blue uniform dismounted and white socks with the white uniform.

108. Spurs will always be worn when boots are worn, whether mounted or dismounted. When mounted, with leggings or woolen puttees, spurs will be worn. Black straps will be worn with black boots and russet-leather straps with russet-leather boots and leggings when the latter are worn on mounted occasions.

109. Stable Frocks. Troops to whom stable frocks have been issued will wear them on stable duty instead of the fatigue uniform.

110. Suspenders may be worn, but they must not be visible.

111. Rescinded.

112. Tin Cup will be carried as prescribed in orders from the War Department and in authorized equipment manuals, whenever issued. When such orders and manuals are not issued for particular organizations or arms of the service, the tin cup will be carried in the haversack on dismounted duty and will be secured to the canteen strap on mounted duty.

113. Waist Belts issued by the Quartermaster Corps will be worn when the olive-drab shirt is worn without the coat or sweater (par. 102 (a)). They may be worn at other times, if so desired.

114. Waterproof Capes or Overcoats. Officers may wear waterproof capes or overcoats, as nearly as practicable the color of the service uniform, when on duty involving exposure to rainy or other inclement weather. Under similar conditions mounted officers and enlisted men may wear the slicker and dismounted officers and enlisted men the ponchos issued by the Quartermaster Corps.

Slickers, instead of ponchos, are issued to enlisted men of the Quartermaster Corps, both mounted and dismounted, and to enlisted men of the Hospital Corps detailed as ambulance drivers and ambulance orderlies (C. U. R. No. 7, Jan. 12, 1915.)

115. White Collars and Cuffs.

(a) Officers. With the full dress, the dress, and the white uniforms, and with the service uniform (except when in the field, at inspection in field equipment, drill, target practice, or on other duty involving physical exertion) officers will wear white cuffs and a plain white standing collar or white stock; the collar to show one-fourth inch above the collar of the coat.

With the special evening dress and the mess jacket, either the standing or turned-down collar may be worn.

(b) Enlisted Men. With the dress and the full dress uniform, and with the service uniform when worn on pass from garrison, enlisted men will wear a plain standing white collar; the collar to show one-fourth inch above the collar of the coat.

116. Wire Cutters will be carried as prescribed in orders from the War Department or in authorized equipment manuals. When not otherwise prescribed, they will be carried in the near side saddle bag or in the near side pommel pocket. (C. U. R. No. 5, Dec. 16, 1914.)

PART III.

UNIFORM OF THE UNITED STATES ARMY.

TABLES OF OCCASIONS.

OFFICERS.

SERVICE UNIFORM AND EQUIPMENT.

| 3. For field duty..... | { All officers except officers of the Medical Department and chaplains. | <p>{ 3. Field glass.¹ } See footnote 2, p. 1901. 4. Compass. } Note. Company officers and battalion commanders of infantry will carry whistles. For dispatch cases, see par. 71. D. When mounted: Add to B: 1. Pistol (with holster and 21 rounds of ammunition). 2. Pistol belt (to be worn over the coat).² 3. Field glass. } See footnote 2, p. 1901. 4. Compass. } 5. Saber (see par. 98a). Note. Medical officers on duty with the sanitary units of the mobile army will carry field glasses and compass.</p> |

¹ The field glasses issued to organizations by the Signal Corps are not issued for the personal use of officers, and will not be used in lieu of the officers' personal field glasses. This does not prohibit the use of high-power glasses by battery and machine-gun company commanders.

NOTES.

1. Except by the officer of the day, the service uniform will not be worn after retreat by officers in garrison, unless prescribed by the commanding officer for some particular duty, nor will it be worn off the post except as authorized in the Table of Occasions of the dress uniform (dismounted), occasion 3, p. 1889.

2. Whenever necessary for personal protection, the personnel of the Medical Department may carry pistols.

3. Veterinarians when in the field will carry pistols and ammunition.

4. The service hat will be worn with the service uniform for field duty and target practice. It will also be worn with the fatigue uniform and with stable frocks, except by enlisted men of the Coast Artillery Corps. It may be worn in garrison with the service uniform when waterproof capes, overcoats, slickers or ponchos are worn, or when, in the opinion of the post commander, exceptional or severe climatic conditions would make the wearing of the caps endanger the health of his command.

5. General officers, officers of the Staff Corps and Departments, and Cavalry officers will wear the officers' leather waist belt with magazine pocket and necessary leather slides—for first-aid packet pouch, for the canteen, and for the pistol holster. Officers of Infantry, Field Artillery, Engineers, Coast Artillery, and Signal Corps will wear the web pistol belt, model of 1912.

See note 2, p. 1897.

OFFICERS—Continued.

WHITE HOUSE.

| Occasions. | Uniform. |
|---|---|
| (a) Official occasions. | |
| When calling by appointment upon the President of the United States. | Full dress, dismounted. |
| New Year's and other state receptions (until 6 p. m.). | Full dress, dismounted, for dismounted officers. Full dress, mounted, for officers of cavalry and field artillery; full dress, mounted or dismounted, for all other mounted officers, and retired officers of the mounted service. |
| State receptions (evening) ¹ | Full dress, dismounted. |
| State dinners ² | Full dress, dismounted. |
| (b) Social occasions. | |
| When calling by appointment on the President and wife of the President (until 6 p. m.). | Unless white uniform with side arms be indicated: Dress, dismounted, with side arms, for dismounted officers. |
| All other daytime functions, including luncheons, afternoon teas, garden parties, etc. | Dress, mounted, with side arms, for officers of cavalry and field artillery; dress mounted or dismounted, with side arms, for all other mounted officers and retired officers of the mounted service. |
| Unofficial dinners..... | } Special evening dress. Retired officers may wear the full dress, dismounted. |
| Evening musicale or dance..... | |

¹ State receptions (evening) at the White House are the customary New Year's reception and those known as the diplomatic, judicial, congressional, and Army and Navy receptions, or others of special formality such as the President may give in honor of a foreign or other distinguished personage.

² State dinners are those customary dinners given by the President, known as the diplomatic dinner, and others of special formality, to which officers of the Army may be invited strictly in their official capacity.

SCHEDULE OF UNIFORMS WHEN OFFICERS OF BOTH SERVICES APPEAR TOGETHER.

Throughout the military and naval service of the United States, whenever on occasions of ceremony officers of both services are required to appear together in uniform, officers of the Army will be governed by the following schedule:

Uniform A:

Army, full dress.

Navy, special full dress.

Marine Corps, special full dress.

Uniform B:

Army, dress.

Navy, service dress.

Marine Corps, undress.

Uniform C:

Army, special evening dress.

Navy, evening dress A.

Marine Corps, special full dress.

Whether the full dress, mounted or dismounted, or the dress, mounted or dismounted, shall be worn, will be determined by the nature of the occasion as set forth in the "Tables of Occasions."

Tables of Occasions—Continued.

ENLISTED MEN.

SERVICE UNIFORM.

| Occasions. | All enlisted men. | Articles. |
|---|-------------------|--|
| 1. For habitual garrison wear until retreat when not under arms. | When dismounted. | <p>A.</p> <ol style="list-style-type: none"> 1. Service cap. 2. Service coat. 3. Service breeches. 4. Olive-drab woolen gloves, when prescribed (optional when not on duty). |
| | When mounted | <p>B.</p> <ol style="list-style-type: none"> Same as A, omitting "8. Olive-drab woolen gloves," etc., and adding: 1. Regulation riding gloves, when prescribed (optional when not on duty). 2. Spurs. |
| 2. For habitual garrison duty under arms. 3. For inspection and guard mount, when prescribed by the commanding officer. See occasion 2, p. 1898, and occasion 1, p. 1899. | When dismounted. | <p>C.</p> <ol style="list-style-type: none"> Same as A, adding: 1. Garrison belt. 2. Cartridge box. (When the new garrison belt is issued, it will be worn instead of the russet leather belt and cartridge box.) |
| | When mounted | <p>D.</p> <ol style="list-style-type: none"> Same as A, omitting "8. Olive-drab woolen gloves," and adding: 1. Regulation riding gloves, when prescribed. 2. Spurs. 3. Garrison belt. 4. Cartridge box. |
| 4. For all other ceremonies when climate or weather will not permit the use of the dress or full dress. | | |
| 5. When changing station by rail or water. | Dismounted... | Same as C. |

[Note: The new garrison belt for enlisted men of infantry is of olive-drab webbing with sliding ammunition pockets; and for cavalry, is of russet leather with sliding ammunition pockets and attachments of leather.]

Tables of Occasions—Continued.

ENLISTED MEN—Continued.

SERVICE UNIFORM—Continued.

| Occasions. | All enlisted men. | Articles. |
|-------------------------|-------------------|---|
| | | F. |
| | | 1. Service hat, with hat cord sewed on (peaked, 4 indentations). |
| | | 2. Olive-drab shirt. |
| | | 3. Service coat. |
| | | 4. Service breeches. |
| | | 5. Russet leather shoes. |
| | | 6. Leggings. |
| | | 7. Identification tag. |
| | | 8. Brassards, by those entitled to wear them. |
| | | 9. Ribbons by those entitled thereto. (Not to be worn on the olive-drab shirt.) |
| 6. For field duty. | When dis-mounted. | 10. Olive-drab woolen gloves, when prescribed (optional when not on duty). |
| | | 11. Field belt. |
| | | G. |
| | | Same as F, omitting "10. Olive-drab woolen gloves," and adding: |
| | When mounted | 1. Regulation riding gloves, when prescribed. |
| | | 2. Spurs. |

[Note: The personal equipment of enlisted men will be as prescribed in orders and regulations.]

NOTES.

1. Except by members of the guard, the service uniform will not be worn out of barracks after retreat by enlisted men in garrison, unless prescribed by the commanding officer for some particular duty, or authorized as stated in note 3, below.

2. There are two kinds of service uniforms, the woolen olive-drab and the cotton olive-drab. The woolen olive-drab uniform will be prescribed for habitual wear when the climate or weather does not require the cotton olive-drab.

3. The cotton olive-drab will be prescribed by commanding officers for soldiers on pass in warm weather and also for use in garrison in warm weather when out of barracks after retreat. The woolen olive-drab will not be worn by soldiers on pass from commands supplied with the dress uniform.

4. When under arms, every enlisted man will carry the arms pertaining to his grade and branch of service.

5. With dismounted service uniform, in garrison under arms and when changing station by rail or water, noncommissioned staff officers will wear belt and saber instead of belt and cartridge box.

6. With dismounted service uniform, in the field, noncommissioned staff officers will carry the pistol instead of the saber.

7. The service cap is not authorized for enlisted men in the Philippines; the service hat will be worn for field duty.

8. When troops are traveling by rail, the train commander may cause the arms and equipments not required for the necessary guard duty en route to be properly secured and stored in a property or baggage car. (Par. 393, Field Service Regulations, 1914.)

9. Trousers, cotton or woolen service, may be issued to and worn without leggings by such enlisted men as are on duty in offices, in the buildings in

which offices are situated, including enlisted men of the Hospital Corps while on duty in dispensaries. The trousers will be worn only during the time actually engaged on such office duty.

10. The service hat will be worn with the service uniform for field duty and target practice. It will also be worn with the fatigue uniform and with stable frocks, except by enlisted men of the Coast Artillery Corps. It may be worn in garrison with the service uniform when waterproof capes, overcoats, slickers, or ponchos are worn or when, in the opinion of the post commander, exceptional or severe climatic conditions would make the wearing of the caps endanger the health of his command.

| 1. On fatigue, at stables and at mountain battery drills involving packing and unpacking, at work as garrison prisoners, or on any other duty which would render the uniform dirty or unsightly. (Mounted troops to whom stable frocks and overalls have been issued will wear them on stable duty instead of the fatigue uniform.) | All enlisted men, except of the Coast Artillery. | <ul style="list-style-type: none"> 1. Fatigue coat. 2. Fatigue trousers. 3. Service hat. 4. Russet-leather shoes. |
| 2. On fatigue, at work or drill at emplacements, and at work as garrison prisoners. (Fatigue clothing will not be worn by enlisted men at drill in range towers or plotting rooms.) | Enlisted men of the Coast Artillery and of the aviation section Signal Corps. | <ul style="list-style-type: none"> 1. Fatigue coat. 2. Fatigue trousers. 3. Blue denim hat. 4. Russet-leather shoes. 5. Leather gloves by those whose work requires it. |
| 3. On all mechanical and manual work. | All enlisted men of the the Quartermaster Corps whose classification calls for mechanical or manual work, and enlisted men of the aviation section Signal Corps. | As prescribed for the Coast Artillery. |

[Note: Noncommissioned officers in charge of working parties will not wear the fatigue uniform unless their duties be such as to make it necessary.]

PART IV.

LIST OF ARMS AND EQUIPMENTS TO BE IN POSSESSION OF OFFICERS.

For the purpose of inspection the whole equipment may be required.
General, Lieutenant General, and Chief of Staff. Such as they may desire.
All Other Officers—

DISMOUNTED OFFICERS.

A.

Arms. Saber, pistol, and ammunition.

B.

Personal equipment—

- | | |
|---|--|
| 1. Bedding roll (canvas). ¹ | 14. Pencils. |
| 2. Blanket. | 15. Pistol belt. ² |
| 3. Canteen, with strap. | 16. Pistol holster. |
| 4. Clothing roll (canvas). ¹ | 17. Saber belts (full dress and garrison). |
| 5. Compass. ³ | 18. Saber knots (dress and service). |
| 6. Field glass. ³ | 19. Saber scabbard. |
| 7. First-aid packet and pouch. | 20. Shelter tent, mounted, complete. |
| 8. Fork. | 21. Spoon. |
| 9. Haversack and pack carrier. | 22. Tin cup. |
| 10. Identification tag. | 23. Watch. |
| 11. Knife. | 24. Whistle, by all company officers and battalion commanders of infantry. ⁴ |
| 12. Meat can. | |
| 13. Notebook. | |

¹ The bedding roll adopted by the Quartermaster Corps or any other canvas roll may be used as a combination bedding-clothing roll.

² Field glasses and compasses, by officers serving with troops and all others when their duties may require their use. For exceptions, in case of medical officers and chaplains, see page 1902.

³ General officers, officers of the Staff Corps and Departments, and Cavalry officers will wear the officers' leather waist belt with magazine pocket and necessary leather slides for first-aid packet pouch, for the canteen, and for the pistol holster. Officers of Infantry, Field Artillery, Engineers, Coast Artillery, and Signal Corps will wear the web pistol belt, model of 1912.

⁴ Three types of whistles of different tone are furnished by the Quartermaster Corps, as follows:

The "Siren" for the Battalion Group, consisting of major, battalion adjutant, and battalion sergeant major of the Infantry and Cavalry arms.

The "Kinglet" for the Company Commander Group, consisting of captain and two musicians.

The "Thunderer" for the Platoon Leader Group, consisting of lieutenants and sergeants.

NOTE.

The bedding and clothing rolls adopted by the Quartermaster Corps may be purchased from the Depot Quartermaster, Twenty-sixth Street and Grays Ferry Road, Philadelphia, Pa., at the prices specified in the Annual Price List of Clothing and Equipage.

MOUNTED OFFICERS.

Arms. Same as A, except that the articles mentioned are not prescribed for chaplains.

Medical officers and dental surgeons will not be required to provide themselves with pistols and ammunition, but they may carry same when necessary for personal protection.

Personal Equipment. Same as B, omitting "9. Haversacks and pack carrier," and adding—

1. Dispatch case, by staff officers and those acting as such, whose duty may require them to use a dispatch case. (See par. 71.)
2. Saber straps or saber carrier. (See par. 98 (b).)
3. Shoulder belts, by officers of the Signal Corps, including those detailed therein.
4. Spurs (with russet and black leather straps).

Chaplains will not be required to provide themselves with compass, field glass, pistol belt, saber knot and saber straps, or carrier.

Medical officers and dental surgeons will not be required to provide themselves with field glass, compass, and pistol, but medical officers on duty with sanitary units in the field will carry field glass and compass. (See note 2, p. 1888.)

Horse equipments—

| New Model. | Old Model. |
|--|--|
| 1. Bridle. | 1. Bridle. |
| 2. Cooling strap. | 2. Bridle, watering (issued only with curb bridle, M. 1902). |
| 3. Carrier strap. | 3. Currycomb. |
| 4. Currycomb. | 4. Feed bag. |
| 5. Feed bag. | 5. Grain bag. |
| 6. Grain bag. | 6. Halter, complete. |
| 7. Halter, stable. | 7. Horse brush. |
| 8. Horse brush. | 8. Horse cover (blanket lined, when required). |
| 9. Horse cover (blanket lined, when required). | 9. Lariat. |
| 10. Lariat. | 10. Lariat strap. |
| 11. Picket pin. | 11. Link. |
| 12. Picket pin carrier, special. | 12. Picket pin. |
| 13. Pommel pockets, officer's. | 13. Saddle (McClellan or Whitman). |
| 14. Ration bags. | 14. Saddlebags. |
| 15. Saddle, officer's. | 15. Saddle blanket. |
| 16. Saddle blanket. | 16. Saddlecloths (2), officer's (with insignia). |
| 17. Saddlecloths (2), officer's (with insignia). | 17. Surcingle. |

NOTES.

1. For articles that officers may draw from the Ordnance Department for their official use, see A. R., 1522 and G. O. 24 W. D. 1914. Dispatch cases are issued as indicated in par. 71.

2. Officers below the grade of major, required to be mounted, will be furnished with horse equipments by the Ordnance Department. (A. R., 1520.)

INFANTRY DRILL REGULATIONS

FOR

AUTOMATIC MACHINE RIFLE, CALIBER .30

MODEL OF 1909

**PARAGRAPHS 97 TO 145, INCLUSIVE, HAVE BEEN LEFT OUT,
AS THEY PERTAIN ONLY TO CAVALRY.**

MACHINE-GUN DRILL REGULATIONS, 1914.

1. It is presumed that members of a machine-gun organization are primarily cavalrymen and infantrymen and have been instructed as such. Subjects covered by the drill regulations of the particular arm or by authorized manuals have been omitted from the text, except in cases where the importance of the subject renders repetition advisable.

2. All members of a machine-gun organization will receive instruction in all that pertains to the machine gun and its equipment.

3. These regulations refer to the automatic machine rifle, caliber .30, model of 1909.

4. The term "machine-gun organization" refers to both mounted and dismounted units. Where the regulations are applicable to Cavalry only or to Infantry only, it will be indicated as Machine-Gun Troop; Machine-Gun Company; Machine-Gun Platoon, Cavalry; or Machine-Gun Platoon, Infantry.

SIGNALS.

5. Signals used by machine-gun organizations will be those prescribed in the drill regulations of the particular arm, field service regulations and other manuals of instruction governing the arm.

Prescribed signals are limited to such as are essential as a substitute for the voice under conditions which render the voice inadequate.

Signals described in these regulations as peculiar to the employment of machine guns are prescribed for use only under the conditions described above.

(C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

6. **Action Front (Right, Left, or Rear).** Strike three or four blows with the clenched fist in the direction in which action is desired.

7. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

8. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

9. **Close.** Extend the arm horizontally to the right and bring the hand repeatedly to the point of the shoulder.

10. **Extend.** Sweep the arm, fully extended, slowly and horizontally across the body.

11. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

12. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

13. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

14. Rescinded. (C. C. I. and C. D. R. A. M. R. No. 1, Sept. 11, 1916.)

THE SQUAD.

15. Soldiers are grouped into squads for the purpose of making units for the operation and service of machine guns in battle and to facilitate their control and movement.

16. Men must be taught the necessity not only of remaining with the squad to which they belong, but, what is of greater importance, of keeping the gun sufficiently manned to do efficient work at all times.

17. The squad dismounted is formed and maneuvered as prescribed for the squad in the drill regulations of the arm to which it belongs. Four members of the squad constitute the gun squad; one is designated as gunner, who carries the rifle and gunner's pouch; one as loader, who carries ammunition; and one as tripod carrier. The fourth member of the squad assists in the operation of the rifle, keeps it supplied with ammunition, and performs such other duties as may be assigned to him.

18. The rifle is operated by the gunner and the loader, the former being preferably a noncommissioned officer or experienced private.

19. When not assembled, the rifle and tripod are handled in the most convenient manner.

TO PREPARE TO FIRE.

20. Being in any formation: 1. **Action Front (Right, Left, or Rear).**

The rifle is set up in the position designated by the squad leader by the gunner and tripod carrier. With the tripod at its maximum height, the gunner sits on the trail seat; at other elevations he takes the most suitable position. The loader places his ammunition boxes within convenient reach and takes such position on the right of the gun as will enable him to readily perform his duties. The disposition of the loads carried by the other members of the squad, the duties to be performed, and the position to be occupied by each will be as directed by the squad leader, who takes position so as to best direct the fire of his gun. Sights are set by the gunner and the gun loaded at command **LOAD**, or at first designation of the target. In order to reduce exposure to hostile fire, no more men than are absolutely necessary should be kept at the gun.

21. This formation of the squad, with the gun in readiness to fire, is termed the "firing formation."

TO LOAD.

22. **Load.** The gunner cocks the rifle; the loader raises the feed piece high enough to release the actuator and inserts a feed strip, being careful to depress the outer end so that the feed strip will properly enter the feed guides. He also steadies the piece by placing the left hand over the rear sight movable base.

23. The cocking handle will always be set at "Safe" except when actually firing.

24. After the first command for loading, the loader, unless otherwise directed, will keep the rifle loaded.

TO UNLOAD.

25. **Unload.** In order to remove a partially exhausted feed strip, the gunner sees that the rifle is cocked and steadies it if necessary. The loader raises the feed piece as in loading, and when the pawls are disengaged withdraws the strip and replaces it in the ammunition box.

When the feed strip is clear of the guides, the gunner, holding the cocking handle, pulls the trigger and allows the actuator to move slowly forward in order to release the tension on the actuator spring. The actuator should not be allowed to snap forward by the action of the spring alone.

26. When operating the rifle alone the gunner performs the operations prescribed for the loader.

TO CHANGE THE BARREL.

27. The gunner unscrews the barrel-locking screw and rotates the locking nut. The loader removes the barrel, the gunner assisting, if necessary, by inserting the screw-driver end of the dismantling wrench between the barrel and receiver. The loader mounts the new barrel, pushing it home; the gunner locks the locking nut and screws up the locking screw.

28. The command change barrel (feed piece, firing pin, or any other part) should be frequently given during drill.

TO SUSPEND FIRING.

29. **Suspend Firing.** The gunner removes his finger from the trigger and sets the cocking handle at "Safe." If the feed strip is nearly exhausted, the loader inserts a full one. All remain in position.

TO CEASE FIRING.

30. **Cease Firing.** The gunner sets the cocking handle at "Safe" and the piece is unloaded. The gunner lowers the sight leaf and replaces tools in the gunner's pouch. The loader replaces the feed strips in box; other members of the squad assist when so directed.

31. At any preparatory command for movement, Cease Firing is executed, the gun is dismounted from tripod, and all loads are prepared for carrying.

FIRINGS.**CLASSIFICATION OF FIRE.**

32. Machine-gun fire is classified and subdivided as follows:

- | | | |
|--|---|---------------------|
| 1. According to the manner in which a target is covered with fire. | { | a. Fixed. |
| | | b. Distributed. |
| | | c. Searching. |
| | | d. Combined sights. |
| 2. According to its use— | { | a. Ranging. |
| | | b. For effect. |

DEFINITIONS AND USE.

33. **Fixed fire** is that in which the gun is directed and fire delivered at a small target, or at a single aiming point on a large target.

Distributed fire is that in which the fire is distributed along a line, a number of different aiming points being used. These points must be selected close enough together to insure the target being covered with fire.

Searching fire is that in which the fire of the gun is distributed in the direction of depth.

Combined sights are used for the same purpose as searching fire, i.e., to secure distribution in the direction of depth. For this fire two or more guns must be employed, and such differences made in the elevation of the guns or each pair of guns that their beaten zones will overlap and a greater total depth of beaten zone be thus secured.

Ranging fire has for its object the determination or verification of the firing data when no range-finding instrument is available.

Fire for effect has for its object the infliction of losses upon the enemy.

APPLICATION OF FIRE.

34. In battle the question as to whether or not a certain target is to be taken under fire is a tactical one, and must be decided according to the conditions of the combat and the particular mission assigned to the machine-gun organization.

35. The tactical employment of the guns and selection of targets are discussed in these regulations. The decision having been made to take a certain objective or target under fire, it remains for the machine-gun commander to determine how best to apply the fire power of his guns to accomplish the desired result.

36. To secure the greatest moral and material effects, the burst of fire from the guns must be sudden and unexpected and continued without interruption until the desired effect is produced.

37. "Ranging fire," therefore, must not be employed unless it is certain that the ultimate results of the fire will be materially increased by the opportunity thus afforded for a more perfect adjustment of the fire.

This implies that ranging fire should not be attempted against targets which, by moving, could disappear from view in the interval between ranging fire and fire for effect, nor should it be attempted when the guns themselves are under fire.

In these cases fire for effect should be opened at once and any adjustment, during the natural pauses in the fire, left to the platoon leaders and those directly concerned with the control of fire.

FIRE DIRECTION AND FIRE CONTROL.

38. The captain, through his officers and noncommissioned officers, directs and controls the fire of the organization.

The following paragraphs set forth, in a general way, the functions and duties of the officers, noncommissioned officers, and gunners.

39. The captain—

1. Selects and designates the target, allotting to each platoon its sector.
2. Causes the range to be measured, or, if instrumental range finders are not available, calls upon the platoon commanders for an estimate of the range, and takes a mean of the estimates furnished him.
3. Decides what kind of fire is to be employed and how many guns are to be used. He also decides whether separate aiming points are to be used for each gun or platoon or whether a single aiming point is to be used for all guns.

40. The platoon commander—

1. If called upon for an estimate of the range, causes the range to be estimated by two or more members of his platoon best qualified in the estimation of distances and announces the mean of their estimates to the captain.
2. Allots to each gun its sector and puts into execution the commands or directions of the captain, having first taken such precautions to insure correct sight setting and clear description of the target as the situation permits or requires; thereafter gives such additional commands or directions as are necessary to exact compliance with the captain's will; he corrects the sight setting when necessary; he designates an aiming point when the target can not be seen; he keeps on the alert for signals from the captain; replaces casualties at the guns; keeps a careful check on ammunition so that he can report at any time the amount available for immediate use.
41. If a platoon be detached and acting alone, the platoon commander exercises the functions outlined above for the captain.

42. Supernumerary enlisted men assist the captain in the observation of fire and perform such other duties as he may direct.

43. In the platoon organization the sergeant assists the platoon commander.

44. The squad leader—

1. Repeats to the gunner such firing data, orders, and commands as may be given and sees that they are properly executed.

2. Observes the effect of fire of his gun and makes such corrections in the sight setting and in the number of shots fired at each aiming point as are necessary to make the fire more effective. He constantly endeavors to carry out the will of his superior officers and keeps on the alert for commands and signals.

3. Keeps the gun properly manned by details from his own squad; keeps check on the ammunition, so as to be prepared at all times to report the amount remaining on hand available for immediate use, and sees that the immediate supply of ammunition is so placed that the action of the gun will not be delayed for lack of ammunition.

45. The gunner—

1. Keeps his gun in proper working order and obeys implicitly the orders of the squad leader.

METHOD OF INSTRUCTION.

46. The importance of maintaining fire discipline and securing implicit obedience to the commands of the captain or other officer directing or controlling the fire of machine guns in battle is so great that a portion of each day's drill or training will be devoted to instruction in the firings.

47. Firing instruction in the squad must have for its object the attainment of proficiency in the mechanical operation and manipulation of the piece and the development of fire discipline.

48. Firing instruction with the gun squads combined must follow this instruction in the squad, and has for its object the instruction of officers and noncommissioned officers in fire control and in the application of fire, as well as in the development of fire discipline.

49. Feed strips loaded with dummy cartridges should always be used for drill and instruction, loading being simulated only when such cartridges are not available.

When ammunition is available, instruction should frequently be held with ball cartridges.

50. In battle, targets ordinarily will remain exposed to view in the open but a short time; therefore great skill in the service of the piece and a high order of fire discipline are required to deliver quickly an effective fire upon such targets.

51. The squad is practiced in directing the gun quickly upon a suddenly appearing target, in following its movements, and in keeping up an effective fire upon it.

52. Targets moving at various angles to the front and at different rates of speed should be frequently selected; mounted detachments or vehicles appearing on the terrain may be utilized for targets.

53. Every means should be utilized in the arrangement of targets to secure different ranges and different degrees of visibility in order that the maximum amount of instruction may be imparted in picking up and describing them, in range finding, and, in fact, in all that goes with the actual operation and service of the guns in action.

54. Silhouettes arranged in lines of different lengths should be placed in positions that will be at different angles to the front of the position selected for the gun or guns used in this instruction.

55. For indoor practice the ingenuity of the instructor must be called upon for the preparation and arrangement of various miniature targets to represent those ordinarily met with in battle.

THE GUN SQUAD.

56. The squad leader should have—

1. Such perfect knowledge of his gun that he can determine at once the cause of the failure of any part to function.

2. A sufficient knowledge of the ballistic properties of the machine gun to enable him to obtain the greatest effect from its fire.

3. A knowledge of the influence of ground—

(a) With reference to the position of his gun.

(b) With reference to the position of the objective.

4. A quick apprehension of his target and of opportunities to inflict heavy losses.

57. The gunner occupies the most important position in the gun squad in so far as accurate delivery of fire is concerned. All men of the organization will be instructed in the duties of this position. The gunner should be selected from the men showing the greatest aptitude and attaining the greatest proficiency at machine-gun target practice.

Firing alone will not determine the qualifications for this post. He should be able—

1. To know instinctively when his gun is not correctly adjusted.

2. To load the piece in any position, without the assistance of the loader.

3. To manipulate the rear and telescopic sights rapidly and accurately.

4. To aim quickly and accurately.

Before firing, the gunner must—

1. Make sure that the barrel is clear.

2. See that the regulator is properly set.

3. Oil the mechanism.

4. Test the mechanism by rapidly opening and closing the breech several times to insure that it works freely and smoothly.

58. All members of the gun squad must be so instructed that each is qualified to perform the duties of each position.

COMMUNICATION AND EXECUTION OF FIRING DATA.

59. The term "firing data" is used to designate the complete information that the gunner must have before opening fire. Firing data are communicated in the following manner:

1. The target, and, if necessary, the particular aiming point on the target.

2. Elevation and deflection.

3. Kind of fire to be used.

4. Number of cartridges or strips to be used.

In action the precision with which firing data must be announced will depend upon the proficiency of the personnel.

60. In order to insure uniformity of instruction throughout the organization, it may be advisable to form the noncommissioned officers into a squad, with the captain or one of the lieutenants as squad leader, and conduct the exercises until the idea and purpose of the instruction are so thoroughly understood that

each noncommissioned officer can impart instruction in an intelligent, proper and uniform manner to the members of his squad.

61. Examples of the communication of firing data by the squad leader to the gunner are as follows:

1. Target. That machine gun at 12 o'clock, or such and such portion of that infantry line, at 2 o'clock, or aiming point (such an object).

2. Battle sight, or 800 (900, 1,000).

3. Right (left) one (or so many).

4. Fix, or distribute, or search.

5. One (or so many) strips.

6. Commence firing.

62. The squad leader, in his description of the target or aiming point and in his designation of the portion to be covered by the gunner in firing, while being as concise as possible, must assure himself that the gunner understands his directions thoroughly.

63. The squad leader should be equipped with field glasses to aid him in his definition of the target, and the gunner has the telescopic sight, which he should use, if necessary, to follow the leader's description and pick out his aiming point.

64. The following commands or appropriate signals given during pauses in the firing may be used to communicate changes in the firing data:

To increase or decrease the elevation 100 (or such number of) yards: **UP: 100** (or such number). **DOWN: 100** (or such number).

If the command up or down be given without any number added, the gunner raises or lowers the point of strike of the bullets by use of the elevating gear and does not change the sight setting, but selects his point or points of aim above or below the target.

To change the deflection to the right or left any number of points:

Right: One (or such number).

Left: One (or such number).

If the command right or left be given without any number added, the gunner moves the point of strike of the bullets to the right or left by traversing and does not change the sight setting, but selects his point of aim farther to the right or left.

To change the kind of fire, the appropriate command, fix, distribute or search, is given.

If a complete change of targets be desired, the command suspend firing should be given and appropriate data for the new target announced.

THE GUN SQUADS COMBINED.

65. Previous to taking the firing formation, firing data may be communicated to the platoon leaders, and when practicable to squad leaders, they having preceded the guns for this purpose.

66. The firing data announced by the captain will designate the target for each platoon and the range and deflection, the kind of fire and the number of rounds being left to the discretion of the platoon commanders.

67. The command commence firing is given by the captain when all guns are ready unless he has previously commanded fire when ready.

68. To facilitate observation of the effect of fire, the right gun only of each group with the same aiming point, should fire at command. The fire of each other gun of the group should be delayed for a few seconds after the opening of fire by the gun on its right.

THE PACKER.

69. The object of this instruction is detailed training in—

- (a) Setting up and fitting the aparejo, as prescribed in the handbook of the Automatic Machine Rifle, Caliber 30, Model of 1909.
- (b) Care of equipment.
- (c) Care of pack animal.
- (d) Harnessing and unharnessing.

CARE OF EQUIPMENT.

70. The leather parts of the equipment should be exposed to the sun as little as possible and when wet should be dried in the shade.

71. Immediately after the equipment is removed from the animal, canvas parts should be scraped free from all adhering substances, with a dull but smooth-edged knife. Especially must constant attention be given to the cleanliness and pliability of the canvas of the corona, crupper and cincha, and of the dock piece. The canvas side of the corona and crupper should not be exposed to the sun for the purpose of drying.

72. Woolen parts should be rubbed between the hands or hung up and beaten with switches or wands to remove dust, mud and hair, and to make them soft and pliable. They should be exposed frequently to the sun, completely unfolded. Blankets should be washed in tepid water at least once a month.

73. Metal parts must be kept free from dust, dirt, sweat and hair. Those issued with coats of paint or lacquer are to be maintained in that condition. Bright parts should be polished. The tongues, rollers and keepers of buckles must work freely, to which end the straps must be unbuckled in cleaning.

DISPOSITION OF THE EQUIPMENT.

74. The aparejo with crupper, sobrejalma and pack frame attached rests on its boots; crupper double forward; the cincha passed over the frame as in unharnessing; the blanket is folded and placed on the cincha, folded edge to the front; the corona, folded, canvas side in, is placed on the blanket, folded edge to the front. When exposed to the weather, the aparejos must be covered with the rigging cover. The bridle and blinder are hung on pegs or laid across the corona. Loads should be kept with the pack harness to which they pertain. All articles should be plainly marked with the number of the animal to which they are fitted.

75. In camp the aparejos of each platoon should be in line parallel to and in rear of the line of tents, the center of the aparejos being in the center of the space allotted to the platoon. Aparejos may be similarly kept at the picket line.

The aparejos should be raised from the ground. If suitable material can not be obtained, they may be placed on ammunition boxes. Bridles and blinders should be placed on the corona before the packs are covered with the rigging cover.

The rifle should be kept in the case and when practicable under cover.

76. It is important that the men be trained to place the equipment as prescribed, for in field service, mules must frequently be saddled in the darkness and it is imperative that an unvarying uniform method of placing the equipment be adopted in order to avoid confusion and delay.

CARE OF THE PACK ANIMAL.

77. In order that injuries and sickness may be avoided or promptly discovered and cured, the animals are carefully inspected by their drivers immediately after they are unharnessed, and the results are reported to squad leaders, who will inspect to see that this duty is efficiently performed. Such correction or treatment as is practicable is applied at once, and difficult or serious cases are reported to the stable sergeant.

78. Report should be made of abrasions, lumps, bunches, swellings, rope burns, discharges from eyes, nose and mouth, loss of shoes, failure to feed properly, cases of fatigue—in short everything indicating the existence of disease or injury in need of correction.

79. Bunches under the aparejo are caused by the sudden relief of excessive pressure on that part of the body. To determine the location of the fault in the aparejo, the face of the bunch is wet with water, the aparejo is placed in its correct seat without corona or blanket and with the crupper turned forward, is gently rocked from side to side. Upon removal, a damp spot on its surface will indicate where a portion of the filling should be carefully removed without disturbing the remainder. The bunch will disappear on the next day's travel; if not traveling, a bunched animal should be loaded and exercised; one or two hours is sufficient.

80. Sores and abrasions may be caused by the presence of foreign substances, such as burs or gravel, and by inequalities or wrinkles in corona, blanket or cincha. Sores under the crupper and dock piece result from the aparejo riding too far forward or because the boots are too close to the animal's body or do not carry horizontal or parallel to the axis of the animal. Abrasions of the withers or loins indicate that the saddle bars are not horizontal or that they are not parallel to the axis of the animal or that the arches are too broad or too narrow.

Abrasions are treated by the temporary removal of the surfaces in contact and by the application of antiseptic, cooling and healing powders and lotions.

81. In general, swellings are caused by pressure and sores by friction. They can be avoided only by correct setting up of the aparejo, its proper fitting, and its modification to conform to changes in the condition of the animal. Very tight cinching instead of correcting bad adjustment causes swellings, pain, fatigue and excessive sweating, and makes the animal unruly and hard to manage in its effort to get rid of the load.

HARNESSING AND UNHARNESSING.

82. The blanket, after being well shaken, will be folded into six thicknesses, as follows: Hold it well up by the two corners the short way up and down; double it lengthwise (so the fold will come across the "U" and "S"), the folded corner (middle of blanket) in the left hand; take the folded corner between the thumb and second finger of the right hand, thumb pointing to the left; slip the left hand down the folded edge two-thirds its length and seize it with the thumb and second finger; raise the hands to the height of the shoulders, the blanket between them extended; bring the hands together, the double fold falling outward; keeping the folded corner between the thumb and second finger of the right hand, slip the first finger of the right hand between the folds and seize the double folded corner; turn the left (disengaged) corner to the left and seize it and the other double fold with the left hand and stretch and even the folds; raise the blanket and place it between the chin and breast; slip the hands down halfway, the first two fingers of each hand outside (in front), the other fingers and thumb inside (behind), seize the

blanket with the thumbs and first two fingers, let the part under the chin fall forward; hold the blanket, arms extended, even the lower edges, seize the middle points between the thumbs and forefingers and flit the outside part over the right arm; the blanket is thus held before placing it on the pack animal.

The blanket when folded is like a flattened S instead of like a flattened spiral G and wrinkles can be more easily detected.

TO HARNESS.

83. All men are instructed in the duties of both near and off packers. In harnessing and unharnessing they work in pairs, one on each side of the pack animal.

A quiet, well-trained animal is assigned to two recruits, each of whom should be supervised at first by a thoroughly instructed man. The instructor causes an animal to be harnessed and packed and points out the names of the different parts of the pack outfit and explains their use. He then has the pack and harness taken off and placed in rear of the animal.

84. The pack outfit being in position, the instructor causes the recruits to stand to heel, and commands:

1. **By detail, harness.**

Upon the completion of each detail the recruits remain in place.

2. **BRIDLE.** The near packer seizes the blinder and bridle, placing the former over his arm; with the reins in the right hand and the bit in the left, he approaches the mule from the near side, slips the reins over the head, letting them rest on the neck, reaches under and engages the snap in the right cheek-piece ring, inserts the bit in the mule's mouth, and engages the snap in the left cheek-piece ring.

The bit should hang so as to touch but not draw up the corners of the mouth.

3. **BLINDER.** The near packer takes hold of the halter with the left hand, grasps the edge of the blinder near one end with the right hand; carries it well over the animal's neck to the off side, tail down; brings the blinder well to the front over the ears and places it over the eyes, the tail on top of the neck. The blinder should not be raised too high in passing it over the neck as the animal may duck from it.

A pack mule is blinded during harnessing and packing and until trained during unpacking and unharnessing. To teach it not to move when blinded the blinder must always be removed before requiring it to change position.

4. **CORONA.** The off packer seizes the corona at the ends of its center seam and throwing the half over his arm, as explained for the blanket in paragraph 82, places it on the mule, still keeping hold of the middle points; slides it once or twice from front to rear to smooth the hair, being careful to raise it in bringing it forward.

5. **BLANKET.** The off packer on the near side places the folded blanket on the corona, upper folded edge to the rear, in a manner similar to that prescribed for putting on the corona. He then passes to the off side and with the assistance of the near packer on the near side smooths and evens the blanket.

6. **SADDLE.** Both packers, each working on his own side, grasp the aparejo by the lower corners, raising it high enough to clear the rump and set it on the back a little in rear of its proper position.

7. **CRUPPER.** The near packer takes hold of the crupper with both hands; the left hand on lower edge, fingers under; the right hand on upper edge, palm down; the off packer takes hold similarly, hands reversed; both raise crupper well up, reverse it, and turn it down over the croup. The quicker the action the

more easily the crupper is turned. The near packer raises the animal's tail and places the dock piece well under it, taking care that no hairs are caught. Both then place the breast against crupper to hold it in place and set the aparejo forward into position, taking care to keep it straight, the near packer with the right hand on the center of the aparejo and his left on rear corner, and the off packer with left hand on the center of aparejo and his right hand on the rear corner. The off packer goes to the side of the mule, pulls the gas pipe end of the cincha toward him, and guiding it down the middle passes it under the belly to the near packer. He then steps to the shoulder, faces to the rear, and places his right hand between the corona and withers and his left hand on the rear corner of the aparejo. The near packer seizes the end of the cincha at its corner and passes the cincha strap through the cincha eye from above, brings it up, and passes it through the rendering ring from above and again through the cincha eye to the right of the other part of the strap. He then grasps the cincha strap near the cincha eye in his left hand and places the right hand on the rear corner of the aparejo.

8. **CINCHA.** Both packers hold the aparejo forward in place, taking care not to raise the front of the aparejo. The near packer pulls the cincha strap taut with his left hand, and calls Set. At this the off packer passes in rear and observes whether the aparejo is straight; if not, it is correctly adjusted. He then takes hold of the cincha strap on the right side of the near packer and places his right knee against the boot. The near packer raises his left foot to the boot and both pull together until the cincha eye is at the edge of the boot, with the cincha in the center of the aparejo, after which the off packer returns to the off side. The near packer passes the cincha strap through the finger loop from above, assisted by the off packer if necessary, and secures it. He then removes the blinder and passes it over his left shoulder with the tail under the right arm.

85. To harness without detail: **HARNESS.**

TO UNHARNESS.

86. 1. By detail, unharness.

2. **BLINDER.** (Par. 84-3.)

3. **UNSADDLE.** The near packer loosens the cincha strap and folds his end of the cincha over the pack frame. Both then push the aparejo slightly to the rear. The near packer places his left hand on the upper edge of the crupper, his right on the lower edge; the off packer takes a corresponding position, hands reversed; both together raise the crupper and turn it forward over the cincha; take hold of the aparejo as in saddling, pass it backward over the rump and lower it carefully to its place in rear.

4. **BLANKET AND CORONA.** The off packer on the near side, grasping the front and rear edges of the blanket at the middle points, removes it; allows it to fall into a fold between his hands and places it along the near side of the corona; grasps the corona at the middle points of its front and rear edges, removes blanket and corona, and places both on the aparejo, corona on top.

5. **UNBRIDLE.** The near packer removes the blinder and unbridles, and places blinder and bridle on the corona.

87. To unharness without detail: **UNHARNESS.**

PACKING AND UNPACKING.

88. The mule being harnessed and in front of his load, the instructor commands: 1. **PACK.** At this command each packer procures a hanger containing the side loads and hangs it on the hanger hooks of the frame. The load-

holding-down clip is adjusted so that when the clasp is passed through the staple on the lower side bar of the frame the clip will be drawn taut and held so by the keeper.

The weight of both hangers should come upon the aparejo at the same time in order to avoid a possible turning of the aparejo. The top load, if any, is then put in place and fastened with the straps provided.

89. Unpack. The top and side loads are removed in reverse order from that in which they were placed in position.

TO PREPARE THE RIFLE FOR ACTION.

90. In active service the guns will rarely be unpacked at the actual firing position. The necessity of approaching a position under cover will seldom permit taking the animals to the selected position, and ordinarily they will be taken only as far forward as cover can be found for them. This must, however, be as close to the position as possible. From this point to the firing position the gun, its accessories and ammunition must be moved by hand.

91. In the following instruction, designed to teach the mechanism of preparing the gun for action and moving it into the firing position, full advantage must be taken of whatever cover the terrain affords for unpacking the gun and moving it forward. Varied ground must be sought for this instruction and the position of the enemy must always be assumed.

The animals to be unpacked, the amount of ammunition, etc. to be moved to the firing position should always be designated.

92. At command (pars. 114 and 159) the squad halts. The gunner withdraws the rifle from the case. The loader removes ammunition boxes and case with spare barrel; the tripod carrier removes the tripod, with such assistance as may be necessary. The remaining members of the squad remove ammunition and such of the loads of the other animals as may have been indicated by the squad leader. The squad leader assembles the squad in front of the led animals.

93. No exact method can be prescribed for the advance to the firing position, as the method to be adopted will be governed by the conditions surrounding each problem.

The squad leader should always lead his squad and be the first to arrive at the firing position.

94. Having selected the position in which the gun is to be set up, the squad leader commands: **ACTION FRONT.**

95. If while mules are loaded, the command action front be given, the gun, in the absence of instructions, is placed in the firing formation 5 yards to the front and slightly to the right of the gun animal.

96. Action right (left or rear) are similarly executed.

CAVALRY UNITS.

Paragraphs 97 to 145 pertain to cavalry units only and are not included.

INFANTRY UNITS.

THE SQUAD.

FORMATION OF SQUAD.

146. The composition of the squad is as follows:

Squad leader.

The gun squad—the gunner, Nos. 1 (loader), 2 (tripod carrier) and 3.

The drivers—Nos. 4, 5 and 6.

The ammunition squad—Nos. 7 and 8.

The habitual formation is in column.

The squad leader is the leader of his squad; he is 3 paces in front of its center. Nos. 1, 2 and 3 and the gunner in line from right to left follow the squad leader at 3 paces distance. Nos. 7 and 8 are each 40 inches, respectively, in rear of the gunner and No. 1. No. 4 follows No. 7 at one horse length distance. No. 5 follows No. 4 and No. 6 follows No. 5 one horse length in rear of the gun mule in front.

The mules carrying the equipment of the gun squad are formed in column, one horse length in rear of the squad, the distance between mules being about 1 pace. Each mule is led by one of the drivers. In case there are more mules than drivers, the necessary men are detailed to lead them. (See Pl. III.)

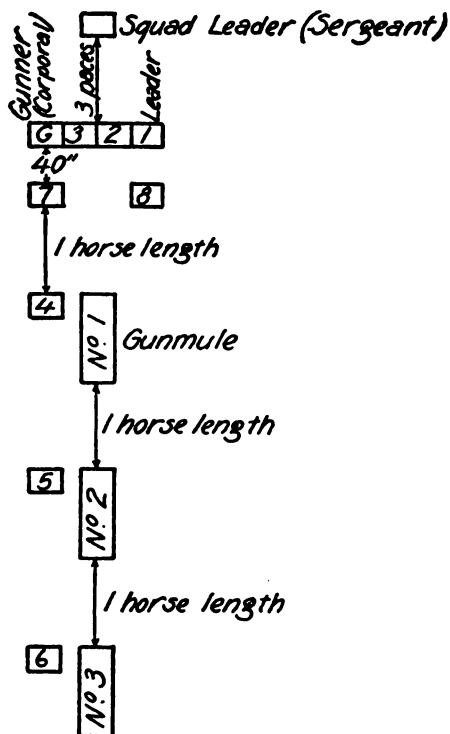

PLATE III
The Gun-squad with packs
 Par. 146

Whatever the number of men left in the squad, after the details of men to lead the mules have been made, they retain the formation of, and maneuver as an infantry squad of reduced numbers.

147. The mules of the gun squad are numbered from front to rear 1, 2 and 3 and are led by numbers 4, 5 and 6, respectively.

LEADING THE MULE.

148. The mule when packed is led and maneuvered by means of the bridle. When leading the mule, the soldier takes position on his near side holding the reins near the bit in the right hand and the loop of the reins in the left hand.

To gather the mule, the right hand is raised slightly until it touches his lower jaw. The mule must always be gathered before moving, before halting, and before changing gait or direction.

The mule must never be faced or threatened by the man leading him. He must be taught by quiet and gentle treatment to effect all changes of gait and direction evenly. He should not be turned short but on the arc of a circle of 1 yard radius. He should be led with a loose rein and urged on, if he lags, from the rear.

PLATE IV
By the right flank
Par. 151

PLATE V
Right oblique
Par. 151

TO HARNESS AND PACK BY SQUAD.

149. The squad is marched by the squad leader to the stables. After designating the men who are to lead mules, the squad leader commands: 1. **HARNESS AND PACK.**

At this command the aparejos are brought from the saddle room and lined up at about 4 paces interval in numerical order, the gun pack on the right.

Each aparejo, its accessories and packs are arranged as prescribed in paragraph 74.

The squad leader inspects the rigging and packs and sees that all articles are properly arranged and directs the men detailed to lead mules to bring the mules to the packs.

The mules are lined up about 4 paces in front of their proper packs and are

saddled and packed by the members of the squad, working in pairs, as described in paragraphs 84 and 88.

The squad leader superintends the harnessing and packing and, after tasks are completed, inspects each animal to see that its aparejo and packs are properly adjusted and secured.

TO FORM THE SQUAD.

150. The animals being packed, the squad leader places himself 3 paces in front of the place in which he desires the squad to form and commands: **FALL IN.**

The squad takes the formation prescribed in paragraph 146.

PLATE VI

*To turn on moving pivot
Par. 152*

MOVEMENTS AND FORMATIONS.

151. The squad with piece packed is marched to the front, to the flank, to the right or left oblique, is halted and turns on a moving pivot by the commands prescribed in the Schools of the Soldier and Squad, Infantry Drill Regulations.

The squad executes the movement as therein prescribed, the mules being led so as to conform to the movement and preserve their distances and proper order. (Pls. IV and V.)

TO TURN ON A FIXED PIVOT.

152. 1. **Squad right, 2. MARCH.** The squad executes the movement as prescribed for the front rank of an infantry squad (par. 119, I. D. R.).

The mules are led so as to conform to the movement; each following the one in lead at its prescribed distance. (Pl. VI.)

TO TURN AND HALT.

153. 1. Squad right (left), 2. MARCH, 3. Squad, 4. HALT.

The squad executes the movement as prescribed in paragraph 120, Infantry Drill Regulations.

The gun mule is led by the left flank, about the length of the mule, and then to the "right about" to its position in rear of the squad. The other mules are led so as to conform to the movement of the gun mule. (Pl. VII.)

TO MARCH TO THE REAR.

154. 1. To the rear, 2. MARCH.

Each mule is turned to the right about and moved straight to the rear.

The squad executes To the rear, March, as explained in paragraph 72, Infantry Drill Regulations, and by shortening the step gradually gains a distance of 2 paces from the rear mule. If executed from a halt, the command 1. **About face**, 2. **Forward**, 3. **MARCH**, is given.

The squad faces about and steps off in time to follow at a distance of 2 paces from the rear mule.

155. This movement is used only for moving short distances to the rear.

TO TURN ABOUT.

156. 1. Squad right (or left) about, 2. MARCH.

The squad executes Squad right (left) about, followed by the mules.

157. For route marches, and whenever possible, the mules may be linked.

TO LINK MULES.

1. Link. The gun mules are always led. The rear mules are linked by means of the reins as follows:

No. 2 mule is linked to the rear hook on the off side of the gun mule frame.

No. 3 mule is linked to the rear hook of frame on the near side of No. 2 mule, etc.

After linking the mules, their leaders "fall in" with the squad or may be required to march in rear of the mules to better observe the riding of the packs.

TO UNLINK.

158. Unlink. The mules are unlinked by their leaders and normal distances are gradually regained.

TO PREPARE FOR ACTION.**159. 1. PREPARE FOR ACTION.**

At this command the squad halts, if not already halted, and the guns and accessories are removed as prescribed in paragraph 92.

The mules having been linked as described in paragraph 157 are left under cover in charge of the leader of No. 1 mule. The squad leader, carrying the spare-parts case, or loading tool, assembles the squad and moves it forward to the firing position by the commands and in such formation as are best suited to conditions. (I. D. R., par. 212.)

160. As the members of the squad become familiar with their duties, the commands "Prepare for action," "Squad column," or "As skirmishers" (so many paces), "Follow me," may follow one another in rapid succession.

161. Having selected the position in which the gun is to be set up, the squad leader commands **ACTION FRONT** (right, left).

The gun is set up and the squad takes the firing formation as described in paragraph 20.

TO PACK.

162. Being in the firing formation, to pack, the squad leader commands: **1. PACK.**

The rifle is prepared as in paragraph 31.

163. If the mules are close at hand, they are brought to the firing position by the man in charge at the command pack, or signal to come forward.

164. When the mules arrive at the firing position, the gunner, tripod carrier and loader repack the gun mule.

The other mules are repacked by the remaining members of the squad working in pairs.

165. If the mules are not to be brought to the firing position, the squad is first moved to the position of the mules or to a position to which the mules can be brought, and the rifle and equipment repacked as above described.

TO UNPACK AND UNHARNESS.

166. The squad is marched to the place of unpacking and unharnessing and upon arrival thereat the squad leader commands: **1. UNPACK AND UNHARNESS.**

The squad halts. The mules are formed in line on the gun mule at 4-pace intervals, gun mule on the right.

The packs are removed and placed in their proper place of storage.

The mules are unsaddled and the rigging is put in its place. The squad leader inspects the animals for abrasions or other injuries; sees that the corona and crupper are scraped, if necessary, or gives such other instructions as may be needed with reference to the equipment.

The squad is then formed and marched to the barracks.

THE COMPANY.

167. The machine gun company is divided into platoons of two gun squads each.

168. The number of squads organized depends upon the number of machine guns assigned to the company.

169. The captain is 15 yards in advance of the leader of the directing platoon, which in line is normally the first platoon. Each platoon leader is one horse length in front of the leader of his directing squad, which in line is habitually his left squad.

The agents of communication and range finder sergeant, boot to boot, ride one horse length in rear of the captain. Scouts, cooks and other additional men may be assigned to squads or go where directed by the captain.

In line the squads are side by side without interval, each squad being formed in column.

170. In firing formation the captain is 12 yards in rear of the center of the line occupied by the guns. Platoon leaders are 2 yards in rear of the guns, opposite the center of their platoons.

Squad leaders are at the guns. During actual firing all are dismounted, and officers and noncommissioned officers take such positions as will best enable them to maintain efficiency of fire.

171. The company, without packs, is formed as prescribed in Infantry Drill Regulations.

172. In active service, both on the march and in action, the necessary security for the guns and animals is provided and all service of communication usually performed by members of the machine gun company.

173. In case the number of men available is in excess of the number needed for the gun squads, these men are assigned to the squads as extra men.

174. In case the company becomes reduced in numbers, squads are equalized by transfers from squad to squad.

175. No squad will contain less than four men.

176. When the company is so reduced in numbers as to make it impossible to assign at least four men to a squad, one or more squads are broken up and the men are assigned to the remaining squads.

177. The platoon and squad leaders are permanently assigned by the captain.

178. At the formation of the company the gun platoons and their squads are numbered consecutively from right to left, and these designations do not change.

179. In case the number of machine guns assigned to a company or detachment is not more than two, the company or detachment is organized, as above prescribed, into one gun platoon of two gun squads and is led and maneuvered as prescribed herein for a company.

180. The lieutenants and noncommissioned officers, in order of rank, are assigned as platoon leaders as follows:

1. Gun platoon, No. 1.
2. Gun platoon, No. 2.
3. Gun platoon, No. 3.

181. Noncommissioned officers next in rank are assigned as squad leaders. If sergeants still remain unassigned, they are assigned to the gun platoons.

During battle these assignments are not changed except that, when a platoon leader is disabled, his duties will be assumed by the senior noncommissioned officer remaining on duty with said platoon, who will continue to exercise these functions until the captain makes a permanent assignment of a leader. Other casualties are replaced under the supervision of the platoon leader.

182. The first sergeant, when not commanding a platoon, is posted on the right of the range finder sergeant. In action, if not commanding a platoon, he accompanies the captain.

The quartermaster sergeant, when present, is assigned according to his rank as sergeant.

The artificer, cooks and extra men are assigned to squads.

Orderlies accompany the captain or are posted at his discretion.

183. The company, without its special equipment, is maneuvered and drilled as an infantry company.

PLATE VIII
Company in Line
Par. 184

The company must be drilled and exercised in the movements prescribed in Infantry Drill Regulations up to and including the School of the Company.

184. The platoons are first formed by their leaders and at the command form company are conducted to their positions.

In maneuvering a company the squads of a platoon are never separated.

The posts of officers and noncommissioned officers are shown in Plate VIII.

In case the squads are depleted in strength or the number of mules assigned to each squad is such that the detail of men to lead them reduces the front of the squad to less than four files, each squad occupies the same front and maneuvers in the same manner as though it had a front of four files.

TO DISMISS THE COMPANY.

185. The captain directs the platoon leaders: **DISMISS YOUR PLATOONS.** The gun platoons are conducted to the stables by the platoon leaders. The mules are unpacked and unharnessed by squad.

MOVEMENTS AND FORMATIONS.

186. The alignments are executed as prescribed in Infantry Drill Regulations. The men leading the mules dress toward the designated flank, keep the mules straight and correct their intervals and distances.

187. The company harnesses, unharnesses, packs, unpacks, advances, marches by the flank, to the rear and obliquely by the same commands and means prescribed for the squad, prefixing the word "company" to the command where necessary.

188. In the execution of all movements platoon or squad leaders repeat the commands of the captain or give the necessary commands applicable to their respective platoons or squads.

189. Marching in column, or obliquely, the guide of the leading element is, without indication, the guide of the movement.

The guide is responsible that the direction and rate of march is maintained.

Unless otherwise announced, the guide of the company or platoon in line is right.

190. The rests are executed, and attention resumed, according to the principles laid down in the School of the Soldier, Infantry Drill Regulations. The men leading mules remain on the left of and close to their mules so as to keep them in place.

MOVEMENTS ON THE FIXED PIVOT.

191. The company being in line, to turn the company: 1. **Company right (left)**, 2. **MARCH**, 3. **Company**, 4. **HALT**, or 3. **Forward**, 4. **MARCH**, executed as prescribed in paragraph 176, Infantry Drill Regulations. The mules are led so as to conform to the movement.

192. Being in line, to form column of squads: 1. **Squads right (left)**, 2. **MARCH**, executed as prescribed in paragraph 178, Infantry Drill Regulations. The squads execute **Squads Right** at the command and follow successively in their proper places in column.

MOVEMENTS ON THE MOVING PIVOT.

193. Being in line, to change directions: 1. **Right (left) turn**, 2. **MARCH**, 3. **Forward**, 4. **MARCH**, executed as prescribed in paragraph 179, Infantry Drill Regulations. The mules are led so as to conform to the movement.

194. Being in line, to form column of platoons: 1. **Platoons right turn**, 2. **MARCH**, executed by each platoon as prescribed above for the company. The gun platoons execute the movement at the command of their leaders and follow successively in column at a distance of 2 paces from the rear mules of the preceding platoon.

195. Being in column of platoons or squads, to change direction: 1. **Column right (left)**, 2. **MARCH**, executed as prescribed in paragraphs 180 and 181, Infantry Drill Regulations.

196. Being in line, to form column of squads and change direction: 1. **Squads right (left), Column right (left)**, 2. **MARCH**, or, 1. **Right (left) by squads**, 2. **MARCH**, executed as prescribed in paragraph 183, Infantry Drill Regulations. The mules are led so as to conform to the movement.

197. Being in column of platoons, to form column of squads: 1. **Right (left) by squad**, 2. **MARCH**.

The leading platoon executes the movement as above described for the company. The rear platoons execute the movement successively at the command of their leaders in time to follow in their proper places in column.

ON-RIGHT (LEFT) INTO LINE.

198. Being in column of squads or platoons, to form line on right (or left): 1. **On right (left) into line**, 2. **MARCH**, 3. **Company**, 4. **HALT**, 5. **FRONT**, executed as prescribed in paragraph 187, Infantry Drill Regulations.

FRONT INTO LINE.

199. Being in column of squads or platoons, to form line to the front: 1. **Right (left) front into line**, 2. **MARCH**, 3. **Company**, 4. **HALT**, 5. **FRONT**, executed as prescribed in paragraph 188, Infantry Drill Regulations.

200. Being in column of squads, to form column of platoons: 1. **Platoons right (left) front into line**, 2. **MARCH**, 3. **Company**, 4. **HALT**, 5. **FRONT**, executed as prescribed in paragraph 189, Infantry Drill Regulations, except that the rear gun platoons continue the march and are halted at the command of their platoon leaders when they have closed to their proper distance from the preceding platoon.

RIGHT (LEFT) INTO LINE.

201. Being in column of platoons or squads, to form line to the right or left: 1. **Line to the right (left)**, 2. **MARCH**, 3. **Company**, 4. **HALT**, 5. **FRONT**.

If in column of platoons, the commander of the leading platoon commands: **RIGHT TURN**. The other platoon leaders command: **FORWARD**, if at a halt. At the second command the leading platoon turns to the right on a moving pivot. The command **HALT** is given when it has advanced the desired distance in the new direction; it halts; its commander then commands: **LEFT DRESS**. The leaders of the rear platoons command: 1. **Right turn**, in time to add, 2. **MARCH**, when at a distance equal to the front of the platoon from the right flank of the preceding platoon. Each platoon is halted on the line by its leader, who then commands **Left dress**. All dress on the platoon first in line.

FACING OR MARCHING TO THE REAR.

202. The company in any formation may be faced and marched to the rear for a short distance by the commands: 1. **Squads right (left) about**, 2. **MARCH**, or, 1. **About**, 2. **FACE**, 3. **Forward**, 4. **MARCH**.

The squads execute the movement as prescribed in paragraphs 154 and 155. Before any further movement is executed the company must be again faced to its original front.

MOVEMENTS WITH INFANTRY.

203. The foregoing movements and formations are used when maneuvering with infantry and whenever compact formations are desired.

In the various formations of the regiment the company is posted as shown

in Plate IV, Infantry Drill Regulations, or as directed by the colonel. (See par. 329, I. D. R.) When marching in review, the habitual formation of the company is a column of platoons.

EXTENDED INTERVALS.

204. Being in column of squads, to form line with extended intervals to the right or left; 1. **Squads right (left)**, 2. **MARCH**, executed simultaneously by each squad.

205. Being in column of squads, to form line of platoons with extended intervals: 1. **Platoons column right (left)**, 2. **MARCH**, executed simultaneously by each platoon.

206. Line with extended intervals or line of platoons with extended intervals may be formed to the front or on the right or left from column of squads to the principles for forming line to the front or on right or left as follows: 1. **Right (left) front into line with extended intervals**, or, 1. **Right into line with extended intervals**, 2. **MARCH**.

207. Being in line with extended intervals, to march in column of squads to the right or left: 1. **Squads right (left)**, 2. **MARCH**, or if in line of platoons with extended intervals, 1. **Platoons column right (left)**, 2. **MARCH**.

ROUTE STEP AND AT EASE.

208. The company is marched at route step and at ease and resumes attention by the commands and in the manner prescribed in paragraphs 190 and 193, Infantry Drill Regulations.

ROUTE COLUMN.

209. The habitual column of route is with the mules in double column and the men of each platoon in column of squads.

Being in column platoons, to form route column: 1. **Route column**, 2. **MARCH**.

The mules are retained in double column by their leaders. The men of each gun platoon execute right by squad in time to follow in their proper place in the column.

210. Being in route column, to form column of platoons: 1. **Column of platoons**, 2. **MARCH**. The men of each platoon execute left front into line in double time.

211. Being in route column, to form column of squads: 1. **Column of Squads**, 2. **MARCH**. The men of the gun platoons execute left front into line in double time. The gun platoons then execute successively, at the commands of their leaders, Right by Squad as prescribed in paragraph 199.

212. When economy of road space is not material, the column of squads may be employed in route marches.

TO PREPARE FOR ACTION.

213. In leading the company to the place selected for unpacking the mules, such formation is adopted as will admit of the most advantageous use of natural cover.

At a point where the mules are unpacked the captain determines the necessity for and strength of the detail to remain with the mules and where they are to be located; the number and strength of the patrols to be sent to the front and flanks, if any; the amount of ammunition and number of heavy intrenching tools to be taken forward; and the manner in which the ammunition supply is to be renewed; and gives his instructions accordingly, assign-

ing additional men to special tasks or as additional members to other squads. He then commands, **PREPARE FOR ACTION**.

At this command each squad prepares for action, and assembles as prescribed in paragraph 159. The company is then moved forward in a formation suitable to conditions. (I. D. R., par. 212.)

TO MAKE CAMP.

214. Upon arriving at the camp site, the picket line, picket pins and sledges are unpacked and the picket line put down in the position designated by the captain. He designates the place for the line of riggings and loads and commands: **UNPACK AND UNHARNESS**.

As the mules are unharnessed they are led to and tied on the picket line. Each squad leader supervises the unpacking and unharnessing of his squad and upon its completion assembles his squad.

The company is then assembled and tents are pitched by the commands and in the manner prescribed in Infantry Drill Regulations (par. 792 et seq.).

Details are then made to complete the camp.

TO BREAK CAMP.

215. The animals are watered, fed, groomed, harnessed, and the individual packs of the men made up and deposited at such place as may be designated for the formation of the company.

216. The ordinary duties incident to the breaking of camp, such as loading the wagon, policing, etc., are performed by men not needed to care for animals.

217. The animals are packed at the last minute which will insure the company being in its proper place at the hour appointed for marching.

218. The regulations regarding camp sanitation, prescribed in Infantry Drill Regulations (pars. 661 to 677) and other manuals treating of this subject, are to be strictly observed in the camp of the machine-gun company.

CEREMONIES.

COMPANY INSPECTION.

219. Being in line at a halt, all officers and men dismounted: 1. **Open ranks**, 2. **MARCH**.

At the command of March the front rank executes Right Dress; the rear rank of each squad marches backward four steps, halts, and executes Right Dress. The mules are reined back until the gun mules are four steps in rear of the line of the rear rank, the other mules having the same distance from the preceding mule of its squad. All leaders of mules dress to the right.

The captain aligns the front rank, rear rank, and mules, takes post 3 paces in front of the right guide, facing to the left, and commands: 1. **FRONT**, 2. **PREPARE FOR INSPECTION**.

Each gun, tripod, spare parts and loading case is removed from the packs. Each gun is mounted on its tripod, pointing straight to the front, two paces immediately in front of the center of the squad to which it belongs. The cases and pouches pertaining to each gun are placed on the ground to the left of it and opened so that all contents are visible. The leaders of the gun platoons supervise the arrangement of the equipment in their platoons. All resume the attention. The platoon leaders carry saber.

The captain returns saber and inspects the platoon leaders, after which they face about, order saber, and stand at ease. Upon the completion of the inspection they carry saber, face about, and order saber. The captain may direct the platoon leaders to accompany or assist him, in which case they return saber and, at the close of the inspection, resume their posts in front of the company, draw and carry sabers.

The inspection of the company proceeds as prescribed in paragraph 745, Infantry Drill Regulations.

When inspecting the gun platoons, the gun is inspected first in its position.

As soon as the piece and spare parts of each squad are inspected, they are repacked.

Men armed with pistol execute inspection arms as the inspector approaches.

220. If the inspection is to include an examination of the equipment, the captain causes the mules to stand fast, close ranks and take intervals (par. 109, I. D. R.).

The mules are led to the flank so as to maintain their proper relative positions with their squads.

The captain then commands: 1. **UNSLING EQUIPMENT**, 2. **OPEN PACKS**, executed by the men as prescribed in paragraph 747, Infantry Drill Regulations.

Squad leaders of the squads designate men to relieve those holding the mules a sufficient length of time to allow the latter to unsling and arrange their equipment in the places that would be occupied by them if in ranks.

After the men have arranged their packs as prescribed, the mules are unpacked and their packs arranged as follows:

The hangers are removed and arranged in line to the right and left of each mule and opposite its head. The top loads are removed and arranged in an orderly manner to the right of the hangers. Ammunition boxes are removed from the hangers and opened, unless otherwise directed. If desired the mules may be unsaddled, the aparejo being placed in rear of the mules to which they pertain.

The captain passes along the ranks and then inspects the mules' equipment. The inspection completed, he returns to the right of the company and commands **CLOSE PACKS**.

The men close their packs as prescribed in paragraph 747, Infantry Drill Regulations, and then repack the mules. The mules being packed, the men form in rear of their own packs. The captain commands **SLING EQUIPMENT**.

The equipments are slung and belts fastened.

The captain then causes the company to assemble.

The mules are led to the flank and take their proper positions in rear of their squads.

221. Should the inspector be other than the captain, the latter, after the company has completed its preparation for inspection, commands: **REST**, and takes post in front of the right guide of the company on the same line as the platoon leaders.

222. When the inspector approaches, the captain faces to the left, brings the company to attention, faces to the front, and salutes. The salute acknowledged, the captain carries saber.

The inspection proceeds as before; the captain returns saber and accompanies the inspector as soon as the latter passes him.

223. Should the company be inspected with the regiment, the captain carries saber, but does not salute upon the approach of the inspector.

MUSTER.

224. The inspection preceding muster is conducted as above prescribed for the company. The company is then mustered as prescribed in paragraph 756, Infantry Drill Regulations.

TACTICAL EMPLOYMENT OF MACHINE GUNS.**INTRODUCTION.**

225. Machine guns are not a fourth arm. Their proper rôle on the field of battle is supplementary and auxiliary to rifle fire.

226. The maneuvering and handling of machine guns on the field of battle must have for its one and only object the utilization of their fire power to its full effect.

227. Proper and commensurate results from the employment of machine guns can not be looked for except when the training and instruction in the working and manipulation of the guns have been thorough and complete. Neither can commensurate results be expected unless these weapons receive proper tactical employment.

228. All officers should familiarize themselves with their uses, for it is only by proper coördination and the utilization of their full fire power, in conjunction with the fighting power of his main command, that a commander can obtain the maximum results. A true knowledge of their capabilities and limitations is therefore essential to all commanders.

229. The difficulties of control in action will require that great latitude be given the machine-gun commanders. A thorough understanding of the commander's plan of action and an intimate knowledge of the principles of combat of all arms, is essential to the machine-gun commander in order that in any given situation he will be able to contribute to the general success.

230. Careful study, participation in combat exercises and maneuvers with the regiment and other units, and the execution of combat exercises, in which the presence of other arms is assumed, must form a great part of the training of machine gun organizations.

231. Any officer or intelligent enlisted man who has been properly instructed can master the details of drill, mechanism and firing, but it is only by proper study and from experience gained in combat, either real or assumed, that a machine-gun commander can hope to learn how to handle his guns correctly in the field.

232. The essential characteristics of machine-gun fire as compared with collective rifle fire are: Its volume, due to the mechanical action of the guns; its density, due to the compactness and small dimensions of the cone of dispersion; the facility with which fire can be opened, directed and controlled; and its nerve-racking rattle which gives to it a moral effect greater than that of collective rifle fire.

233. The machine gun is light in weight, easily handled and can be carried into action by hand. Extra men are required to supply it with ammunition and to observe the effects of its fire.

The machine gun represents a concentrated mass of rifle fire that can be used from a contracted front in a short time, against a given target, to produce a desired result.

234. The machine gun does not require a larger target than the rifleman, but annihilating effects are produced better and more quickly upon dense and compact targets. The amount of ammunition required to produce a particular result will increase very rapidly as the density of the target decreases.

235. The compactness of the cone of dispersion makes it profitable to employ their fire in preference to rifle fire at long and distant ranges when artillery is not available and when the situation demands that targets at these ranges be taken under fire.

236. Machine guns can not, on account of their limited ammunition supply, keep up an uninterrupted fire action.

237. The decisive moments of an action are the times of all others for their use. Their great fire power must be economized for these moments.

238. Being weapons of "emergency" or "opportunity," their use is determined by the opportunities that arise during the progress of an engagement in which full advantage may be taken of the special characteristics of their fire power.

239. The task to be assigned to the machine-gun organization in any particular engagement is governed by the opportunities that are likely to arise in which the fire power of the guns may be most effectively employed. The character of the battle or pending engagement, whether offensive or defensive; the general tactical principles applicable thereto; the part to be played therein by the regiment or force to which attached; the terrain and its adaptability for the use of the guns; and the state of the ammunition supply, are the principal factors that determine the proper employment of the machine-gun organization.

240. The machine-gun organization should generally be employed as a whole. If necessity demands, it may be divided into platoons, but guns should never be employed singly except under exceptional circumstances.

241. In general, when the results desired can be obtained without the fire of machine guns, this fire should be reserved.

242. When guns are available, it may be advantageous to attach them to convoys; to troops detailed to guard and protect lines of communication; to defend bridgeheads, blockhouses, etc.

243. Supports will be provided for machine guns when necessary. Their flank protection is ordinarily secured by combat patrols. (Pars. 396, 397, 398 and 399, I. D. R., and par. 609, Cavalry Service Regulations.) Communication between the combat patrols and the machine guns will be maintained by scouts specially assigned to this duty from the machine-gun personnel.

244. In irregular operations, special care and precaution must be taken for their protection on the march. They are particularly vulnerable on the march in close country.

245. Their use must be governed by the object of the expedition and the character and weapons of the enemy. When in position their fire is well adapted to stop fanatical rushes and is terrifying and paralyzing in effect against semicivilized people.

246. Machine guns are also of great use in street fighting, in quelling riots and in dispersing mobs.

247. Because of the extended front of modern battle lines it will often be the case that only mounted troops can reach decisive points quickly enough to seize favorable opportunities, in which the machine guns attached to the cavalry will play an important rôle.

Machine guns with cavalry must, therefore, have the mobility of cavalry.

248. Their action, particularly with the independent cavalry, is fire action with the aim of increasing the offensive and defensive power of mounted troops and of facilitating with the execution of their tactical mission. Normally, their fire will be used to augment the fire of dismounted troops, but occasions will frequently arise when their fire will take the place of the dismounted fire action of the cavalry, thereby leaving the latter free to utilize its mounted action.

249. Promptness in grasping the situation, good judgment in placing the guns, and accuracy in determining ranges must be developed in officers and enlisted men.

250. With the cavalry, machine guns take an important part in pursuing the retreating enemy or in covering a withdrawal. In supporting artillery they should operate on its exposed flank. Their use against artillery is exceptional and only when artillery is limbering or unlimbering, or when a position can be reached at close range against the flank.

251. In the approach march of cavalry against cavalry, the machine-gun detachment must take up positions as quickly as possible to support the deployment.

252. During the cavalry battle, machine-gun fire on the portion of the enemy's cavalry against which the decisive charge is to be delivered may throw it into confusion.

253. During mounted attacks against the flank of dismounted troops or artillery, well-chosen opportunities for machine-gun fire from the front may hold the enemy in place and prevent his changing position to face the attacking cavalry.

254. In the execution of the important missions intrusted to the cavalry, there will be great opportunities for the machine guns not only in the frontal attack but in operations against the flank or in rear of the hostile lines.

255. After a successful assault, the machine guns should be advanced as rapidly as possible to assist in repelling counter attacks or to join in the pursuit. The fire of the guns at this time is particularly effective and should be utilized up to extreme ranges in order to prevent the reorganization of the enemy's forces and to create further confusion in his ranks.

256. If the assault be not successful, the machine gun must be in position to cover the withdrawal.

257. To open the way for independent cavalry, to assist the cavalry of the advance guard to seize important points, to be held by the chief as a fire reserve, ready to support threatened points and to aid dismounted troops in gaining superiority of fire, are the principal missions of machine guns.

258. No definite position in the regiment for the machine guns on other than ordinary marches can be prescribed, as this will depend upon the possible use to be made of them. Their position must, however, be such that, without interfering with the maneuvering of the regiment, the guns will be ready to carry out the tasks assigned to them.

MACHINE GUNS WITH THE ADVANCE GUARD.

259. The machine guns attached to the advance guard may be utilized most effectively to force the enemy to deploy at a distance, thus delaying his advance long enough to allow the infantry to come up, to gain and hold important ground, to cover the deployment of the main body, and in general, to carry out the aggressive mission usually assigned to an advance guard.

260. As a rule, therefore, the machine guns of the advance guard should be ordered into action early and later withdrawn, to be held in readiness for further employment as soon as sufficient troops are deployed to make their use during the early stages of the action unprofitable.

261. At long ranges observation of the effect of fire and the target will ordinarily not be such as to warrant the use of machine guns to combat the defender's long-range rifle or machine-gun fire. The machine-gun organization, therefore, will seldom be justified in going into action or opening fire at ranges greater than 1,500 yards.

DEFENSE.

262. In defense it will often be necessary to strengthen the firing line at threatened points, to support a counter attack, to prevent flanking movements, to resist the final charge, or to cover a withdrawal. This demands the development at certain points of a highly concentrated volume of fire in the shortest possible time.

The development of this kind of fire is the function of machine guns. Positions in the line of defense should be prepared and cover constructed whenever the time permits, in order that the attack, in whatever direction it may develop, may be met with the maximum fire power of the guns. Ranges to prominent points should be measured.

263. The area to be covered by fire should be determined and such positions selected as will enable the guns to command narrow approaches, cover dead spaces, and bring cross fire to bear on ground in front of trenches and other important defensive works. This is particularly the case when night attacks are expected. Concealment and cover from rifle and shrapnel fire should be constructed when possible. Secondary positions should also be selected and prepared for use in case the original positions become untenable.

While the guns should be in position at the beginning of an action, their fire should be reserved until stages when the targets are most vulnerable.

264. It must be remembered that while in attack an intense fire distributed along the enemy's front, irrespective of hits, will generally prevent him from rising to take aim and fire, and thus permit the advance of our firing line, it is only by means of hits and casualties produced that an attack can be stopped. To paralyze the attack by large losses in a minimum time by sudden overwhelming and unexpected fire is the principal function of machine guns in the defense. Such losses and such effect can be produced only when the targets are large and vulnerable, as in the last stages of the attack.

DELAYING AND REAR-GUARD ACTIONS.

265. In a "delaying action" the machine-gun organization should be assigned a position where it will be able to concentrate its long-range fire on the closed bodies of the enemy, force his early deployment, and cover the withdrawal. Machine guns attached to the rear guard should be employed in the same general manner.

In these actions, owing to the volume of fire which they are capable of developing from a narrow front and the ease with which they can be withdrawn from action, machine guns should find one of their most valuable employments.

WITHDRAWAL FROM ACTION.

266. In a "withdrawal from action" the machine-gun organization should be employed in the same general manner as in delaying and rear-guard actions.

RECONNAISSANCE.

267. The machine gun being a weapon of opportunity, the occasions for its fire will arise quickly and pass as quickly; its effect therefore must be immediate and decisive. Time occupied in the search for technical and tactical advantages must not delay the action.

A good eye for ground and skill in making use of cover are all-important and every position should be reconnoitered previous to its selection and occupation.

268. The duty of locating the enemy and securing information concerning him devolves in general upon other troops. A machine-gun commander

must, however, obtain for himself such special information as is needed to insure the proper posting and the effective employment of the guns to carry out the task assigned to them.

He must know what and where the targets are, where there are suitable fire positions, and the best means offered by the terrain for approach thereto.

269. From knowledge gained through his preliminary reconnaissance with the detachment commander, the machine-gun commander may be able to at once select positions for his guns and conduct them into position. If not, additional reconnaissance must be made by him and his subordinates, assisted by enlisted men specially trained as scouts, who should be well mounted and equipped with field glasses.

270. When an action is imminent, the scouts may be from 700 to 1,000 yards in advance of the command, with which they retain communication by signal or otherwise. They will discover and report:

- (a) The position of the enemy.
- (b) The position of friendly troops.
- (c) Good firing positions.
- (d) Routes for the advance of the guns under cover.

271. As soon as the position is selected, the scouts should fall back on the flanks, keeping in constant communication with the "combat patrols" and giving timely warning of the approach of hostile patrols or of movements of the enemy threatening the flanks.

272. Scouts should always operate in pairs or greater numbers.

273. If assigned to the reserve or on defense, reconnaissance must also be made and firing data obtained for use in case the guns are put into action.

274. Patrols preceding the guns should never go into the proposed positions unless ordered to do so, as they are likely to expose themselves and thus betray the position. They should approach the position close enough to assure themselves that it is not occupied by the enemy.

275. The time and place for preparing for action and moving the guns forward by hand will depend upon the terrain and the state of the engagement. As a general rule the guns should remain in pack and be transported as close to the contemplated position as cover from view and fire of the enemy will permit.

SELECTION OF A POSITION.

276. Before a position is selected and occupied by the guns it must be reconnoitered by the machine-gun commander in person.

277. It is only when moving to the rear in delaying or rear-guard actions, when the machine-gun commander's position is with the guns, that a subordinate may be sent to select a position.

278. In selecting a position the attainment of the greatest fire effect and the tactical requirements of the task assigned must govern.

279. The following are, in general, the features to be sought in the selection of a position:

In attack, when supporting the advance of the attacking line, effective range (1,500 yards or less); a clear view of the enemy's position; sufficient height above or distance from the flank of the firing line so as not to endanger or obstruct its advance; facility for moving forward to within close range (600 yards) of the enemy's position.

In defense, an extended clear field of fire on which a good fire effect is possible up to within the shortest range; a firing line at right angles to the line of fire; cover obstructing the enemy's view; good communications laterally and to the rear.

In delaying or rear-guard actions, short ranges will not be used ordinarily, and the position selected should allow for the development of the greatest fire effect at ranges from 600 to 1,500 yards or more.

280. Positions close to objects, the range of which is known to the enemy, are to be avoided. Those near prominent objects, as they aid the enemy to find the range, are to be avoided. A position in front of a dark background, or ground covered with suitable growth, will make it difficult for the enemy to find the range. Every kind of mask to hinder observation by the enemy should be used.

281. In delaying or rear-guard actions positions covering the exit of defiles, bridges, fords or any obstacle which causes the enemy to assume a narrow, deep formation, should be selected.

One carefully planned ambush will often do more to delay an enemy than the most stubborn stand.

OCCUPATION OF A POSITION.

282. The requirements of the situation will demand that frequently the gun detachments, and at times the guns, be kept under cover and in readiness in rear of or near the actual firing positions until the opportune moment for opening fire arrives. This will usually be the case in the attack and also in defense when time does not permit of the deliberate preparation of firing positions.

283. For this purpose the squads should be held in line of squad columns or line of skirmishers covering the front to be occupied by the guns.

284. Whenever time is available, artificial cover for the guns should be constructed.

285. The machine-gun commander will give such necessary instructions or commands for taking the firing formation, occupying the position and opening fire as the situation demands.

Particular effort must be made to take positions under cover and to surprise the enemy by a sudden opening of fire.

If the guns must go into action without delay, the commander must endeavor to surprise the enemy by the rapidity with which he takes the firing formation and opens fire.

286. The position of each gun is selected by the squad leader with due regard to fire effect and cover. The interval between the guns will depend upon the available front and the kind of fire, artillery or infantry, to which the guns are to be subjected. If liable to come under artillery fire, the interval should, in general, be such as to insure that no two guns are included in the burst of a single shrapnel. This interval can be taken to be not less than 20 yards. The greater the interval the more difficult the central control. On the other hand, the closer together the guns are placed the greater their vulnerability.

COMMUNICATION.

287. During the action communication is maintained between the machine-gun commander and the detachment commander by messengers or signals. Communication must be maintained also with the noncommissioned officer in charge of the led animals. Signals are used whenever practicable.

MANEUVER OF THE GUNS DURING ACTION.

288. In attack, no opportunity should be lost for advancing the guns from one position to another, in order to reach a position within close range of the enemy by the time the attacking line is ready to deliver the assault.

The final position selected for the guns should be such that in case the assault

is successful the guns may be advanced rapidly to assist in holding it or to join the troops sent in pursuit; or, in case of repulse or counter attack, that the guns can cover the reorganization of the firing line.

289. The advance of the guns should be subsequent to that of the attacking line which they are supporting.

Constant endeavor should be made to maintain close relation with the advancing firing line, and opportune moments seized for the advance of the guns under cover of its fire.

290. The advance should preferably be made on the flank, and successive positions for the gun selected with the one object of aiding the advancing line.

291. Whatever cover is afforded by the natural features of the terrain must be taken advantage of in advancing the guns. Exposed places must be crossed at a run and in a sufficiently extended formation to minimize losses.

292. In the defense, after occupying a position once assigned, the further maneuver of the guns will generally be determined and prescribed by the commander of the force to which attached.

293. In rear guard or delaying actions, the movement of the guns must conform to that of the troops to which attached.

A subordinate officer and men with the necessary engineering tools should be sent to the rear for the purpose of selecting and preparing positions for the guns.

The amount of resistance that is to be made at each of the successive positions is determined by the orders of the rear guard or other commander.

Care should be exercised that the guns do not become so involved in any position as to prevent their withdrawal.

OPENING AND CONDUCTING THE FIRE.

294. The decision to open fire must not be made hastily. In advance guard, rear guard and delaying actions, when the object sought is to delay the advance of the enemy, fire should generally be opened as early as possible.

295. In all cases it must be remembered that the effectiveness of machine-gun fire, like that of rifle fire, is dependent mainly upon the range.

296. Firing over the heads of our own troops is an admissible procedure, but should be resorted to only when the terrain is such as to give the guns sufficient height above them and the conditions and circumstances of the action demand it.

297. When machine guns are employed to support a cavalry charge, the concealment of the guns in the fire position is of minor importance. The chief object to aim at is to keep the guns hidden until such moment as they can be brought into action suddenly from a position whence the fire of every gun can be concentrated on the enemy just before the moment of impact.

To effect this the machine-gun commander must act with promptitude and decision and clearly understand the cavalry commander's plan of action.

When this fire becomes masked by the advance, the machine-gun commander must be on the alert for opportunities to fire on the enemy's supports and reserves.

298. Tactical importance must govern in the choice of a target. In the attack that part of the enemy's line against which the attacking line is advancing will usually be the proper target. The opening and duration of the fire, in this case, must be governed entirely by the opportunities offered for helping the attacking line. As long as the line is able to advance by means of its own force or fire power, the fire of the guns should be withheld. As the advance of the line becomes more difficult, opportunities for the use of the guns will present themselves. The proper moment for opening fire can be determined only by

close observation of the advancing line. Active preparations in the attacking line to move forward or the beginning of the advance by rushes will generally indicate the proper moment for opening fire.

299. The decision to open fire must not be made dependent upon the possibility of securing hits, the suppression of the enemy's fire being equally important. The enemy's firing line, whatever its vulnerability, must be covered with as great a volume of fire as possible and firing continued until the attacking line has established itself in its advanced position. Fire should then be suspended until another favorable opportunity presents itself.

300. When the attacking line has reached the position from which the assault is to be delivered, the maximum fire power of the guns must be joined to that of the attacking line in the preparation for the assault. Here again close observation of the attacking line is necessary to determine the proper moment for opening fire.

301. During the assault, if the position of the gun is such that fire can be delivered without endangering the attacking troops, this should be done, the elevation being increased as the assaulting line advances so as to cover the ground in rear of the enemy's position.

302. When the guns are assigned a task in the defense, the time for opening fire must be governed entirely by the possibility of making hits and definitely stopping the advance.

303. The advance of the enemy to the assault must always be the signal for opening fire with the maximum fire power of the guns. Previous to this time when deciding upon opening fire, the probable losses that will be inflicted upon the enemy must be weighed against the probability of the guns being disabled by the enemy's artillery before the assault is attempted, in case the position of the guns is disclosed.

304. When the tactical requirements of the situation do not define a target consideration will be given to those targets which promise a large percentage of hits. Large, deep, broad and dense targets should then be selected, if visible.

305. It must be borne constantly in mind that the ammunition supply is limited. When, however, it is decided to open fire upon a target for the purpose of obtaining a particular result, the necessary ammunition must be expended without hesitation.

"Fire of insufficient effect weakens the moral element of one's own troops while strengthening that of the enemy."

306. Losses inflicted upon the enemy are all the more demoralizing in effect if produced in a brief period. In most cases, therefore, it will be advisable to open fire from all the guns simultaneously.

307. A change of targets is made only when the guns have been successful in their firing at the former target. Frequent changes of target weaken the fire effect and are therefore to be avoided.

308. It will not be possible to avoid on all occasions the distribution of fire over several objectives; but the distribution of the fire must not degenerate into a useless, ineffective division.

THE LED ANIMALS.

309. When the organization is engaged the led animals are left under cover. They are held in any suitable formation, provided they are enabled to leave their position quickly.

310. The noncommissioned officer in charge must remain in constant communication with the organization and follow its movements as closely as possible, even though he has received no orders to that effect, and he must keep

in constant readiness to move forward and transport the guns and ammunition.

311. Whenever necessary the security of the led animals must be provided for by the posting of small combat patrols or covering detachments.

AMMUNITION SUPPLY.

312. Before going into action such additional ammunition as the pack animals can carry is added to their loads.

313. The ammunition carried with the guns and in the combat train will ordinarily be sufficient for one day's fighting. After the animals are unloaded and the organization prepares for action, the necessary men and animals may be sent back to the combat train to secure ammunition.

314. Immediately after an engagement or as soon as possible after the arrival of the refilled combat wagons of the regiment steps must be taken to replace the ammunition expended in action.

CONSTRUCTION OF COVER.

315. When using natural cover or constructing artificial cover it should be borne in mind that the angle of fall of rifle fire distant 900 yards is about 1 degree and that the angle of fall of shrapnel is about 7 degrees. To secure defilade these angles should be exceeded. The trenches described in paragraphs 484 et seq., Infantry Drill Regulations, are appropriate and adaptable for the use of the gun squads.

316. When the regiment intrenches, positions in the line of defense are assigned to the guns by the regimental commander. The members of the machine-gun organization construct and develop trenches according to the time available and the amount of protection deemed necessary.

317. Special care must be taken in the selection of profile and in the construction of loopholes that the foreground can be swept by the fire of the guns and that the field of fire conforms to that contemplated in the instructions of the regimental commander.

318. It is most important that the location of the machine guns in the line of defense be concealed. For this reason all possible means should be taken for the concealment of their trenches, and profiles that, in the general line of defense, would be distinguished readily by the enemy should be avoided.

It may be necessary to construct hasty cover for the guns in the attack or when the machine-gun organization has been assigned some special mission.

319. If natural cover is available for the other men, only such cover is constructed as is necessary for the guns and the men connected with their service.

**REGULATIONS PRESCRIBING
STANDARD FOR
FIELD FIRING AND THE PROFICIENCY
TEST**

UNITED STATES ARMY

1911

FIELD FIRING AND THE PROFICIENCY TEST

JUDGING THE RESULTS OF FIELD-FIRING EXERCISES, INCLUDING

METHOD OF ARRIVING AT STANDARD OF PROFICIENCY IN THE ANNUAL PROFICIENCY TEST.

1. Field-firing exercises are usually arranged as tactical schemes representing a fraction or episode of a combat, and hence should be judged from two standpoints. They are judged in the first instance by the tactician, who has in view the adequacy of the reconnaissance, the dispositions made as a result of the reconnaissance, and the promptness with which they are conceived and executed; the use of cover, the maintenance of fire discipline, fire control, and fire direction; and, in general, whether or not the execution of the exercise was in conformity with the tactical idea involved. In the second instance they are judged by the ballistician, who determines what result in hits and distribution should have been obtained under the circumstances. He then counts the hits and figures hit, makes note of the time consumed in firing, and compares these results with what they should have been, and, should this comparison prove unfavorable, he seeks for the cause of failure.

THE STANDARD OF COMPARISON AND INFLUENCES MODIFYING IT.

2. Owing to different well-known causes, the variations in the trajectory are such that in a series of shots fired at a target no two shots will strike in the same spot, the hits being arranged in a certain diagram called the "shot group," the size of which varies with the skill of those firing. Good shots will make a small group and poor shots a large one. A computation of the hits to be expected from riflemen of a given class is based upon the science of probabilities, which teaches that the distribution of shots in the diagram of hits, apparently regardless of any rule, is in fact in conformity to a law which does not exhibit itself until after the delivery of a large number of shots.

3. If, therefore, the dimensions of the shot group pertaining to riflemen of a certain class or grade are measured for the different ranges, a large number of hits being considered, the mean dispersion or measure of the strip containing the best 50 per cent of the hits will provide a basis for computing the probable number of hits to be expected from shots of this class at any range at targets of a given size.

4. Through an extended series of firings at the Musketry School measures have been found for the dispersions of good shots and average shots from 200 to 1,000 yards, inclusive, and these are shown in Table I. Good shots are taken as including experts and sharpshooters in the proportion of 1 to 4, and average shots as including shots of all grades as these are found in an average well-instructed command.

5. For use in connection with Table I, a table of probability factors is given under the heading "Table II," and a statement of dimensions and vulnerable areas of the various types of field targets is given under Table III. The dispersions set forth in the tables are those obtained on targets selected for their visibility. In addition to this the ranges were accurately known and the firing was conducted under circumstances tending to give somewhat better shot groups than those which would be obtained either in field firing or in service firing. In all the firings upon the results of which Table I is based, the aiming point used was the lowest point of the vertical diameter of the bull's-eye, and the assumption is made that in field firing or in service firing the aiming point will be the middle point of the bottom line of the figure, or otherwise the lowest element of the objective selected as an aiming point. The experimental firing at the School of Musketry indicates that the average battle sight corresponds to a sight setting of 436 yards. This firing also indicated that the average reading on the leaf sight was approximately 50 yards short of the actual range. The mean temperature at the School of Musketry is about 60° F. and the target range is about 400 feet above sea level. Where other conditions prevail, these results will of course be modified. In the appended tables of percentages of hits to be expected at various ranges, those which are computed for misplaced centers of impact due to aiming at the bottom of the figure are based upon the above consideration—i.e., that the battle sight corresponds to a range of 436 yards, and that the leaf sight, if set at a reading corresponding exactly with the range, will place the center of impact about 50 yards short of the aiming point.

6. **Examples of Use of Tables.** What percentage of hits would be obtained by "average" shots on a wall 5 feet high and 3 feet wide at a range of 1,000 yards with the correct elevation? From Table I the mean vertical dispersion of average shots at 1,000 yards is found to be 8.29 feet. If the height of the target is now divided by this mean vertical dispersion, the "probability factor" is obtained thus: $5 \div 8.29 = 0.603$. Look in Table II for the probability factor 0.603, and, by interpolation, it is found to correspond to a percentage of 31.55. That is to say, a target of infinite width and 5 feet high, if fired at by average shots, with the correct elevation, would receive 31.55 per cent of hits. The target is not of infinite width, however, and it now becomes necessary to compute the percentage of this 31.55 per cent of hits that would be received on the target's 3 feet of width. This is arrived at in a manner similar to the computation of the vertical probabilities. From Table I is found the mean lateral dispersion of average shots at 1,000 yards—7.37 feet. The width of the target is divided by this figure, the quotient being the probability factor, thus: $3 \div 7.37 = 0.407$. The probability factor, 0.407 (see Table II), corresponds to a percentage of 21.65. That is to say, a target of infinite height and 3 feet wide would receive 21.65 per cent of hits under the conditions named. If this result to be expected on a strip 3 feet wide (21.65 per cent) be now multiplied by the result to be expected on a strip 5 feet high (31.55 per cent), the product will be the percentage of hits to be expected on a target 5 feet high by 3 feet wide by average shots at 1,000 yards with the correct elevation—i.e., with the center of impact at the center of the target. Thus, $21.65 \times 31.55 = 6.83$ per cent, which is the desired result.

7. To find the percentage of hits on a target composed of a number of silhouettes, the same process is employed, the final figure being obtained by finding the ratio of the surface of the exposed figures to that of the rectangle that incloses them.

Example. With the correct elevation, what percentage of hits will be obtained by average shots on a line of 10 kneeling figures occupying a front of 10 yards;

range 500 yards? The rectangle inclosing the line of figures is 42 inches high by 360 inches wide, on which, according to the example above noted, there would be obtained 42.5 per cent of hits. The surface of this rectangle contains 15,120 square inches, while the surface of the 10 figures contains only 6,550 square inches (see Table III), which is 43.3 per cent of the surface of the rectangle. As the vulnerable surface is only 43.3 per cent, then the hits to be expected on this surface are 43.3 per cent of 42.5 per cent, or 18.40 per cent. The percentage of hits determines the accuracy of the firing. Thus, as in the above firing, there should have been 18.40 per cent of hits. Had a firing line obtained only 15 per cent of hits in this firing, then their percentage of accuracy would have been 15/18.4, or 81.5 per cent.

8. Having found the percentage of accuracy attained by any unit in any exercise, it next becomes necessary, if this percentage be low, to determine the causes of inaccuracy.

9. The effect of invisibility or a low degree of visibility of targets in diminishing the effects of fire is very marked, and is due in the first place to the difficulty of pointing out obscure targets, and in the second place to the difficulty in aiming accurately at a faintly outlined object. In cases where figures are not conspicuous enough to serve in themselves as aiming points, auxiliary aiming points must be selected and designated to the firing line. This is a difficult procedure, requiring good training and perfect understanding between officers and men. More time is required in such cases, and when different elements of an objective possess different degrees of visibility the distribution is likely to be affected, the greater visibility of some of the figures serving to attract the aim of the marksmen. Assuming a perfect performance so far as target designation and understanding are concerned, there is still loss in effect below computed results, due to varying degrees of visibility of figure targets, in that usually a less well-defined aiming point is presented and the dispersion of the individual is thereby increased. In certain lights figure targets may be plainly seen, and under opposite conditions as to light and background the outlines are barely distinguishable from the surroundings. Between these two extremes of high and low visibility there is some latitude. An effort has been made to establish a measure of this loss in effect, and after certain experimental firings and taking all things into account, it is estimated that the maximum loss of accuracy expressed in percentage of hits considered to be admissible with troops who have been given suitable visual training is 25 per cent. This figure is a maximum, and the loss will usually be less, the amount to be assigned being a matter of judgment.

10. In addition to that which is due to low visibility, loss of accuracy may be due to wild firing which may result from—

1. Nervous excitement, firing without looking through the sights.
2. Not firing at the designated objective.
3. Firing faster than is consistent with accuracy (faster than ordered).
4. Not setting sight as ordered.

All of which may be attributed to poor fire discipline or control, or both. It may also be caused by—

5. Vague and indefinite instructions concerning the location and extent of the objective.

6. Hurried, indistinct, or ambiguous orders for firing.
7. Incorrect estimation of the range.

All of which may be attributed to poor fire direction. Of all these factors the one that is most potent in the reduction of accuracy is the error in the estimation of ranges.

11. The effect of incorrect estimates may be computed within a close approximation by finding the ratio between the error and the mean longitudinal dis-

person for that range. Having found this ratio, the reduction in accuracy is found in Table V.

12. Example. Average shots fire at a range of 900 yards, but use an elevation of 1,000 yards. What effect will this error have on their hits? From the table of dispersions it is found that the mean longitudinal dispersion of average shots at 1,000 yards is 105.89 yards. The error in range is 100 yards. The ratio of the error to the mean dispersion is $100 \div 105.89$, or 0.944. This 0.944 is the density factor and corresponds to a density (see Table V) of 0.445. That is to say, this firing would have resulted in but 44.5 per cent of the hits that would have been obtained had the correct elevation been used. In seeking for causes of loss of accuracy one should first look for the error in estimating the range, and if this does not fully account for the reduction, then one must look to lack of proficiency in fire discipline, control, and direction for the answer.

13. Having disposed of the accuracy of the fire, distribution is next taken up. What is sought is an evenly distributed fire. When the fire is evenly distributed, the number of figures struck depends on the ratio of the number of hits to the number of figures in the target. Having found this ratio, the percentage of figures that should have been struck can be read directly from the "Table of distribution," hereto appended.

14. Example (see Table IV). On a target consisting of 100 figures there are 50 hits on 26 figures. What is the percentage of distribution? The ratio of hits to targets is $50/100$ or 0.50. From the table the factor 0.5 corresponds to a percentage of 39.4 figures that should have been struck. That is to say, 39 per cent of 100 figures or 39 figures should have been struck. As only 26 figures were struck, however, then the percentage of distribution is $26/39$ or 66 per cent.

15. An even distribution of fire is usually obtained by allotting certain definite sectors of the target to each subdivision of the firing line. The company commander designates the sectors for each platoon; the platoon commanders, the sectors for each section, etc. Ambiguity in giving instructions as to distribution will cause a falling off in the percentage of figures struck, as will also an indifferent control or execution of these instructions. An equally distributed fire is especially difficult of attainment when firing at a group in which some of the targets stand out in bold relief and others are obscure or partially hidden. Men instinctively fire at the targets they can see. Failure to attain a proper distribution under such circumstances usually indicates a lack of good fire discipline and control, provided the commander of the firing line has issued lucid orders.

16. Next in order comes the matter of time. The time required for the execution of an exercise includes several operations other than the actual delivery of fire. They are:

1. Making a preliminary reconnaissance for the purpose of locating the targets.
2. Selecting a position from which the most effective fire may be brought to bear upon the target.
3. Finding the range to the target.
4. Placing the organization in the position selected.
5. Pointing out the target to subordinate commanders and indicating to them the sectors that are to be covered by the fire of their subdivisions.
6. Pointing out the targets to the individuals of the firing line.
7. Giving the preliminary commands for firing.
8. Setting sights.
9. Assuming a position for aiming at the designated objective.

No fixed standard of time can be set down for each or any of these operations. It will vary somewhat with each exercise, depending upon the nature of the terrain, the range, and the degree of visibility of the targets.

17. There remains the question of the actual time required to execute the fire, since it is not absolutely the number of hits made, but it is the number of hits made in a unit of time which must be the basis of judgment. Von Rohne states: "In field firing it is less a matter of obtaining large percentages of hits than of an absolute large number of hits in a unit of time." There is necessarily a limit to rapidity of fire which if exceeded will result in some loss in accuracy. This rate of effective fire depends upon a number of factors:

1. It will be faster for trained than for untrained troops.
2. A company on a peace footing will have a greater rapidity of effective fire than one on a war footing.
3. It will be faster at a large than at a small target.
4. It will be faster at a target which stands out in bold relief than at one which is vague in outline and whose color blends with a neutral background.
5. The physical condition and the morale of untrained troops has a marked influence on the rapidity of effective fire.
6. The aiming position also has its effect—one can fire faster from an easy position than from a cramped one.
7. It will be faster at short range than at long range.
8. It will be faster at the beginning of an action than after firing has continued for some time.

18. There is some variety of opinion as to the rates of fire which are consistent with accuracy, and it is obvious that in proposing a standard of performance no more can be done than to present an approximation to which there must be exceptions. The standard rates of fire proposed below are based upon experience and observation at the Musketry School. When firing a single clip the rate of fire is obviously faster than when two or more clips are fired.

| Range. | |
|-----------------|--------------|
| 10 per minute: | |
| | 200 yards. |
| | 300 yards. |
| | 400 yards. |
| 7.5 per minute: | |
| | 500 yards. |
| | 600 yards. |
| | 700 yards. |
| 5 per minute: | |
| | 800 yards. |
| | 900 yards. |
| | 1,000 yards. |

This rate includes the time required for recharging the magazine, which is taken to be 10 seconds. Should the rate of fire at any range fall very much below the rate given, it may be said that a proper use has not been made of the element of time; and should this rate be very much in excess of the standard given, it may be concluded that there has been some loss in accuracy. The rates given should not exclude higher rates of fire in the case of large and very conspicuous targets, such as dense skirmish lines, bodies of cavalry, or batteries of artillery. In no case at ordinary targets, even at the longest range given above, should the rate of fire fall below 5 shots per minute. A lower rate it has been found can not improve the accuracy of the fire in detachment firing, and on the other hand the rate of 10 shots per minute can not be exceeded by the average soldier without a loss in accuracy. A high rate of fire may easily degenerate into unaimed fire.

THE CRITIQUE.

19. In order to be of instructional value every firing exercise should be followed by a critique delivered by a superior officer based upon the conduct of the exercise and the results obtained in accuracy, distribution, and time.

20. In field-firing exercises over unknown ground, the accuracy to be expected from average shots, assuming an error of 5 per cent to have been made in the estimation of the range, is considered to be a proper standard of proficiency in case the performance has been good in other respects.

21. It is not admissible, however, merely to say that a command or a detachment is proficient, or deficient, or to characterize a firing exercise as "Good," "Satisfactory," or "Poor." If no more than this be said no one will know what faults have been committed, or how they should be corrected. The critique should begin with a statement of the exercise, including a description of the targets—kind, number, location, front covered, or intervals between figures, the actual range, the estimated range, the time required for firing—and the computed percentage of hits to be expected by average shots under good leaders, and also by good shots under the same circumstances. This should be followed by a brief outline of the tactical idea involved in the proper execution of the exercise, and this in turn is followed by comments on the manner in which the idea was actually carried out.

22. The accuracy obtained as shown in the actual number of hits made in the exercise should be compared with that to be expected from average and good shots under favorable conditions, and in case of deficiency the reasons therefor should be stated.

23. The same course should be followed with the results obtained in distribution and time which should be taken up in turn.

24. The operations which precede the actual firing and to which particular reference is made in paragraph 16 may be spoken of as the preparation. This phase of a firing exercise has a somewhat remote bearing on the actual results obtained in firing, but must receive some consideration. Assuming correct tactical procedure, the chief element for consideration is the matter of time, and in judging the time consumed prior to opening fire one must consider all the difficulties that have been encountered and then determine whether or not there has been an unreasonable delay which would not have occurred had the leadership been good and the organization properly trained.

25. This part of the critique might be worded, "The preparation was completed with reasonable celerity," or "The preparation consumed 12 minutes. This is considered too long and is mainly due to:

"1. Lack of familiarity with range-finding methods.

"2. Lack of training in describing objectives.

"3. Inadequate reconnaissance resulting in several changes of position before the firing line was so placed that the targets could be seen."

"Further training in these subjects would tend toward greater promptness in opening fire."

26. It will usually be sufficient merely to comment on minor errors committed in the course of the preparation, but in case of serious and unnecessary delays in opening fire, which in combat would give an active enemy a decided advantage, weight should be given in proportion to the fault committed. It should be borne in mind, however, that in passing judgment as to proficiency or deficiency the actual results obtained in firing by a detachment or organization must remain the chief basis, however much this judgment may need to be modified through faults committed in the preparation.

JUDGMENT OF PROFICIENCY TEST AND STANDARD OF PROFICIENCY THEREFOR.

27. The three courses in firing prescribed in paragraph 352, Provisional Small Arms Firing Manual, are designed not so much to illustrate possible phases or situations in action, as is the case in the arrangement of field-firing exercises, as to provide a firing exercise the conduct of which makes for the company or troop a test not only of the ability to shoot, but of the ability to make this skill effective through the means of fire discipline, fire control, and fire direction. As this test is required to be held on Class A ranges the question of distances can not be made to enter as an unknown factor to any great extent. In other respects the arrangement being the same, the basis of judgment and rules provided for field firing may be applied to the results obtained with the three courses in firing. The standard of proficiency settled upon will also be applicable, subject to the exception that the percentage of error allowed in field firing is not admissible.

28. A special requirement is imposed, however, in the case of the three courses in firing in that besides determining the question of proficiency or deficiency, a rating of "Good," "Very good," or "Excellent" is called for according to the results obtained in the case of any organization attaining proficiency.

29. To carry out this provision the four principal factors named may be taken as the basis of judgment as in all field firing exercises, and of these accuracy or the percentage of hits obtained should be given the first consideration.

30. Should a company in firing one of the three prescribed courses obtain a percentage equal or superior to that to be expected from good shots using a sight setting corresponding to the range as computed from tables, then the organization should be given a rating of "Excellent" provided the distribution has not fallen much below what it should be as indicated in Table IV and the rate of fire has not fallen much below the rates given in paragraph 18.

31. Should the organization firing make a percentage of hits about equal to that which is to be expected from average shots using the exact elevation as computed from Tables I, II, and III, then it should be entitled to be classed as "Proficient" and given a rating of "Good" provided the distribution is in close accordance with the hits made as in Table IV, and if the time of execution of the fire agrees closely with rates laid down in paragraph 18. In this case, as ranges will be known very closely, the error of 5 per cent conceded in paragraph 20 is not admissible.

32. In the general case of field firing advantage will appear when the ground surface enables the shot strike to be seen, as, by observation of this effect, errors in elevation may be corrected. The proficiency test being held over ground which is familiar to the organization commander, large errors in elevation are not to be expected. Consequently, the advantage that might be obtained by one organization over another due to differences in surface condition is not apt to be sufficiently important to justify a modification of the standard of proficiency.

33. Should the results obtained in accuracy, distribution, and time of execution of the fire be considerably in excess of that which would justify a rating of "Good," and should they fall somewhat short of being "Excellent" as specified above, a rating "Very good" should be given.

34. Should the results obtained in accuracy in any firing course be very much below the results computed for average shots, the organization should be declared "Deficient" unless it appears that conditions as to visibility have been

sufficient to account for this shortcoming. As an aid to judgment in such a matter reference is made to the statement of percentage of reduction given in paragraph 9. This percentage given represents the maximum reduction in effect due to lack of visibility. With this as a guide each case should be judged on its merits according to conditions as to visibility existing at the time, care being taken that excessive allowances be not made on this account.

35. In other cases a due consideration of the effects of invisibility may be sufficient to justify an increase in rating over that which is indicated by the actual results obtained considered alone.

36. Finally, consideration should be given to the time occupied in the preparation and to the correctness of the procedure followed. As to the weight to be given in the final conclusion to the factor of preparation, no rule can be stated more specific than that given in paragraph 26, and this should be sufficient.

37. The purpose of all field firing exercises, and of those firing exercises designated as tests, is through definite and intelligent criticism to eradicate faulty procedure and bring about an improvement in musketry. With this as a guiding principle, and with a known standard of comparison, and rules of application as given herein, it may be expected that fair and impartial judgments may be reached according to the intent of paragraph 355, Small-Arms Firing Manual.

38. The appended tables numbered from 1 to 6, inclusive, are for general use in connection with this subject; the tables numbered from 7 to 22, inclusive, are for special use in connection with the proficiency test. The data shown in the latter tables have been computed with reference to the particular conditions of the three courses in firing and the ordinary computations are thus avoided. By reference to the proper tables the accuracy of good and average shots at various ranges and on different field targets may readily be found, the intervals between targets being uniform. For the sake of comparison, tables showing the results to be expected with the center of impact properly placed are also given.

39. The effect of errors in the estimation of ranges on the accuracy of the fire may be read directly from the charts shown in plates 1 and 2, the critique being thus facilitated in that the loss in effect will not have to be computed in each case. These charts are graphic presentations of results computed from the table of density factors, plate 1 being for "good" shots, and plate 2 being for "average" shots. At the left-hand edge of the chart is a vertical scale of ranges in yards, with a least reading of 20 yards. At the top of the chart is a horizontal scale of errors in yards, with a least reading of 2 yards. The diagonal curves on the face of the chart represent percentages of accuracy that would be obtained with given errors in the estimation of the range. These percentages are based on the amount that would have been obtained had the correct elevation been used—i.e., this amount is considered the maximum, or 100 per cent. An example will best illustrate the use of the chart. Good shots are firing at 700 yards with an elevation corresponding to 800 yards. What percentage of effect would they obtain? As "good" shots are being considered, reference would be made to plate 1. As the true range is 700, and the range used is 800, the error is obviously 100 yards. Then follow the horizontal line, cutting the range scale at 800, to the right until it intersects the vertical line which cuts the error scale at 100. The curve which passes through this point of intersection is the 50 per cent curve, and is numbered 50. Therefore, under the conditions noted, there would be obtained 50 per cent of the hits that would have been obtained had the correct elevation been used. Had this firing been executed on a line of 30 prone figures with an interval of 1 yard from edge to edge, the percentage of hits to be expected with the exact elevation

would be 4.84 per cent (see Table X). Therefore with an error of 100 yards there could be expected but 50 per cent of this amount ($0.0484 \times 0.50 = 0.0242$), or 2.42 per cent of hits.

TABLE I.
COLLECTIVE DISPERSIONS.
[Mean (50 per cent.) zones.]

| Range. | Average shots. | | | Good shots. | | |
|------------------|----------------|--------------|--------------------|--------------|--------------|--------------------|
| | Vertical. | Lateral. | Longi- tudinal. | Vertical. | Lateral. | Longi- tudinal. |
| | <i>Feet.</i> | <i>Feet.</i> | <i>Yards.</i> | <i>Feet.</i> | <i>Feet.</i> | <i>Yards.</i> |

| 0.9 | 0.479 | 1.9 | 0.038 | | |

TABLE VI.

DISPLACEMENT OF THE CENTER OF IMPACT DUE TO AIMING AT THE BOTTOM OF THE TARGET WITH THE BATTLE SIGHT OR USING AN ELEVATION CORRESPONDING TO THE EXACT RANGE WITH THE LEAF SIGHT.

[Centers of impact are shown as above (+) or below (-) the point of aim.]

BATTLE SIGHT.

[Corresponds to range 436 yards.]

| Range. | Center of impact. | | Range. | Center of impact. | |
|----------------|-------------------|-------|----------------|-------------------|-------|
| | Inches. | Feet. | | Inches. | Feet. |
| 200 yards..... | +17.04 | +1.42 | 250 yards..... | +16.44 | +1.37 |
| 300 yards..... | +15.84 | +1.32 | 350 yards..... | +10.98 | +0.91 |
| 400 yards..... | + 6.12 | +0.51 | 450 yards..... | - 3.78 | -0.31 |
| 500 yards..... | -13.68 | -1.14 | 550 yards..... | -24.78 | -2.06 |
| 600 yards..... | -37.08 | -3.09 | | | |

LEAF SIGHT.

[Approximately 50 yards short at all ranges.]

| | | | | | |
|------------------|--------|-------|----------------|--------|-------|
| 600 yards..... | -14.87 | -1.24 | 550 yards..... | -12.80 | -1.07 |
| 700 yards..... | -19.98 | -1.67 | 650 yards..... | -17.42 | -1.45 |
| 800 yards..... | -26.81 | -2.23 | 750 yards..... | -23.40 | -1.95 |
| 900 yards..... | -34.60 | -2.88 | 850 yards..... | -30.66 | -2.55 |
| 1,000 yards..... | -44.05 | -3.67 | 950 yards..... | -39.30 | -3.27 |

TABLE VII.

PERCENTAGE OF HITS TO BE EXPECTED FROM GOOD SHOTS WITH THE BATTLE SIGHT ON LINES OF PRONE FIGURES WITH AN INTERVAL OF 1 YARD EDGE TO EDGE AND WITH CENTER OF IMPACT MISPLACED BY AIMING AT LOWER EDGE OF TARGET.

| Number of targets. | Range (in yards). | | | | | | | | |
|----------------------|-------------------|-------|-------|-------|------|------|------|------|------|
| | 200 | 250 | 300 | 350 | 400 | 450 | 500 | 550 | 600 |
| 1..... | 18.54 | 14.03 | 10.96 | 9.14 | 7.06 | 6.07 | 4.53 | 3.14 | 1.93 |
| 2..... | 17.09 | 14.71 | 12.78 | 11.47 | 9.24 | 8.27 | 6.45 | 4.58 | 2.93 |
| 3..... | 15.04 | 13.08 | 11.52 | 10.54 | 8.64 | 7.87 | 6.25 | 4.53 | 2.96 |
| 4..... | 14.19 | 12.34 | 10.87 | 9.94 | 8.15 | 7.43 | 5.90 | 4.31 | 2.83 |
| 5..... | 13.72 | 11.93 | 10.51 | 9.61 | 7.88 | 7.18 | 5.70 | 4.16 | 2.74 |
| 6..... | 13.43 | 11.68 | 10.28 | 9.41 | 7.71 | 7.03 | 5.58 | 4.08 | 2.68 |

**EXTRACTS FROM TABLES OF
ORGANIZATION**

**UNITED STATES ARMY
THAT PERTAIN TO INFANTRY AT WAR STRENGTH.**

1917

War Department,
Washington, May 3, 1917.

The following Tables of Organization, approved by the Secretary of War, include the typical Infantry and Cavalry divisions authorized under the national defense act approved June 3, 1916, with the detailed tables of the component units. Departures from the prescribed organization will be authorized by the War Department only.

The bases on which the tables have been prepared are, as regards supply, the same as those prescribed in Tables of Organization, 1914. Rifle ammunition with troops and combat trains has been fixed at 220 rounds per rifle for all rifles in the division, with an equal amount in the divisional ammunition train. The machine-gun ammunition with troops is duplicated in the ammunition train.

The bases for the artillery-ammunition supply are 464 rounds per 3-inch gun and 432 rounds per 3.8-inch howitzer with the divisional artillery.

Alternative animal and motor drawn transport is provided for the divisional trains, and these will be organized according to the special circumstances in each case.

The allotment of personnel and transport from Headquarters and Supply companies for detached organizations is shown in *italics* in the corresponding columns, and these allotments will always be made when an organization is detached.

The letter *h* placed at the upper right hand of any number in the tables indicates "mounted on a horse"; if the letter is preceded by a numeral, the latter indicates the number of men of that grade who are so mounted. In like manner, the letter *m* indicates "mounted on a mule."

These tables will be used as a basis for the equipment manuals of the several arms, and the latter will be made to conform thereto.

BY ORDER OF THE SECRETARY OF WAR:

H. L. SCOTT,
Major General, Chief of Staff.

Official:

H. P. McCAIN,
The Adjutant General.

MODEL REMARKS FOR MUSTER ROLLS.

Note: These Model Remarks are intended as a guide for placing data on the muster rolls required by the printed instructions for the preparation of those rolls.

Absence. (a) Civil Authorities. In hands CAuth fr Jan 10 to Feb 3/14. Offense: Drunk and disorderly. Convicted (acquitted, released on bail, or released without trial).

(b) Detached Service. DS since Jan 15/14 at HQE Dept. Par 15 SO 20 E Dept. 1914.

(c) Furlough. On one mos furlough since Aug 10/14. AR 106.

(d) Sick. (1) Sick in Walter Reed Gen Hosp July 5 to Aug 20/14. (2) Sick in PH Ft Jay, N Y, since May 10/14.

(e) In Confinement. In confinement since Apr 20/14 at Ft Ontario, N Y. See Roll for Mar and Apr 1914.

(f) With Leave. On 10 days' leave July 20-30/14. SOP 100 1914.

(g) Without Leave. AWOL Aug 10 to 15/14 (or since Aug 10/14).

Note: Absence of less than 24 hours will not be noted.

Appointments Continued in Force. (a) Reenl Wrnt as Sgt, and Apmt as 1st Sgt contd.

(b) Reenl Wrnt as Sgt (or Corp) contd.

(c) Reenl Apmt as Ck contd.

Note: Warrants and appointments may be continued only when reenlistment is accomplished on the next day after discharge.

Apprehension. (See Desertion.)

Assignment. (a) Assigned to Co RSO 10 Mar 5/14, not yet joined.

(b) Joined by assignment May 14/14, SOP 20, 1914.

(c) Assigned to Co May 20/14 D and A Card joined Sd (or not yet joined).

Attached. (In case of officers only.)

Attached to Co. Par 1 RSO 40, 1914 joined Aug 10/14.

Certificate of Merit. Awarded C of M for saving the life of a comrade in a skirmish with Filipinos at Tayug, P I, Aug 10/13. GO 20 WD 1914.

Note: To be noted only on first roll after receipt of notice of award.

Change of Name. Name changed fr John A Smith to Robert A Jones. Letter AGO July 10/14.

Changes of Rank or Grade. (a) Aptd Sgt Maj fr July 2/14. RO 20, 1914.

(b) Aptd Bn Sgt Maj fr Aug 2/14. Bn O 12, 1914, under AR 256.

(c) Aptd 1st Sgt fr Sgt Aug 5/14. CO 5, 1914.

(d) Aptd Sgt fr Corp Aug 1/14. RO 10, 1914.

(e) Aptd Corp fr Pvt July 5/14. CO 7, 1914, under AR 271, 275.

(f) Aptd Ck fr Pvt July 5/14. CO 6, 1914.

(g) Rd fr 1st Sgt to Sgt Aug 5/14. CO 5, 1914.

(h) Rd fr Sgt to Pvt and forfeit one mos pay SC July 20/14.

Note: All other changes of rank or grade will be reported in like manner.

Command. (a) Comdg Co.

(b) Comdg Co since Aug 15/14. SOP 25, 1914.

(c) Comdg Co Aug 10 to 13/14.

(d) Relieved fr command of Co Aug 15/14. Par 5, SO 100 WD, 1914.

Confinement. In confinement July 2 to 6/14. SC July 2/14.

Note: See also under headings "Absence," "Desertion," and "Sentences."

Death. Died July 15/14, at Ft Jay, N Y.

Desertion. (a) Deserted July 5/14, at Ft Porter, N Y.

(b) Deserted July 5/14, at Ft Jay, N Y, apprehended July 19/14, by CAUTH, Chicago, Ill, returned to Mil control at Ft Sheridan, Ill, July 20/14. Tried for desertion, found guilty, and sentenced to be confined at hard labor for 4 mos. GCMO 460 C Dept, 1914 (or tried for desertion and acquitted; or, tried for desertion and found guilty of AWOL only and sentenced to forfeit 2 mos pay and suffer a stoppage of \$50 reward for apprehension and delivery). In confinement serving sentence.

(c) Apprehended Aug 5/14, at Albany, N Y, by Mil Auth. In confinement since that date awaiting trial or result of trial.

(d) Restoration to Duty Without Trial. In confinement fr July 4 to Aug 10/14 awaiting trial for desertion. Restored to duty without trial. Par 3, SO 64 E Dept, 1914.

(e) Removal of Charge. In confinement fr July 4 to Aug 10/14 awaiting trial for desertion. Charge removed as having been erroneously made. Par 5 SO 64 E Dept, 1914.

(f) Desertion and Fraudulent Enlistment. (1) Upon the first roll following apprehension will be noted as follows:

On the roll of the organization from which he deserted: "Apprehended (or surrendered) July 1/14 while serving in ——— under the name of John A Jones; in confinement at Ft Logan, Colo, awaiting trial." On the roll of the organization in which serving fraudulent enlistment: "Apprehended (or surrendered) July 1/14 as Martin Brown, who deserted Nov 2/12 from ———; in confinement awaiting trial."

(2) See heading "Dropped" (a) for remarks in case of conviction of desertion and fraudulent enlistment and sentenced to be dishonorably discharged.

(3) See heading "Dropped" (b) for remarks if soldier is not dishonorably discharged, but held to serve out balance of legal enlistment.

(4) If such soldier be held to service as of his fraudulent enlistment and is ordered to be discharged from his enlistment from which he deserted, he will be discharged from the organization from which he deserted and held to service as of the date and the name under which he fraudulently enlisted.

Discharge. 1. Honorable.

(a) Expiration of Service. Hon disch Aug 9/15, at Ft Jay, N Y, per ETS. Character: Excellent. Service honest and faithful. AWOL May 5 to 9/14 (or no AWOL). Absent fr duty Feb 5 to 10/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914). Retained in service to make good AWOL (or absence fr duty under GO 45 WD 1914, or for convenience of Government).

(b) By Purchase. Hon disch Dec 30/15, at Ft Jay, N Y, par 2 SO 95 E Dept 1915. Character: Excellent. Service honest and faithful. AWOL Apr 11 to May 10/15 (or no AWOL). Absent fr duty July 6 to 20/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914).

(c) By Order. Hon disch Sep 30/15, at Ft Jay, N Y, par 15 SO 98 WD 1915. Character: Very good. Service honest and faithful. AWOL July 3 to 10/15 (or no AWOL). Absent fr duty Aug 12 to 20/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914).

(d) On Surgeon's Certificate of Disability. Hon disch Nov 30/15, at Ft Jay N Y, on SCD. Character: Good. Service honest and faithful. AWOL July 16 to 20/15 (or no AWOL). Absent fr duty Oct 16 to 30/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914).

2. Discharge (Sec. 3, Par. 150, A. R.). Disch Nov 8/15, at Ft Jay N Y, par 4 SO 21 E Dept 1915 (or SCD, or ETS). Character: (That which may have been recorded on discharge certificate.) Service honest and faithful (or not honest and faithful). Is not recommended for reenlistment (stating the reason therefor). AWOL Feb 3 to 10/15 (or no AWOL). Absent fr duty May 11 to 20/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914).

3. Dishonorable. Dishon disch Dec 20/15, at Ft Jay, N Y, per GCMO 378 E Dept 1915. Service not honest and faithful. Character: (That which may have been recorded on discharge certificate.) Service not honest and faithful. AWOL June 3 to 20/15 (or no AWOL). Absent fr duty Oct 21 to 30/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914).

(a) Dishonorable Discharge Suspended. Tried by GCM and sentenced to be dishonorably discharged, etc., per GCMO 1812 E Dept 1915. Sentence of dishon disch suspended. In conf at

Dropped. (a) Apprehended (or surrendered) May 20/14 as Martin Brown, who deserted Nov 2/12 fr —; convicted of desertion and fraudulent enlistment and sentenced to be dishonorably discharged, etc. GCMO 450, E Dept, 1914. Dropped fr records July 1/14.

(b) Apprehended (or surrendered) May 20/14 as Martin Brown, who deserted Nov 2/12 fr —; held to serve out balance of his legal enlistment. Par 4 SO 75, WD, 1914. Dropped fr records July 1/14.

(c) Discovered to be a deserter fr the Navy (or Marine Corps) Aug 2/14. Dropped fr records Aug 20/14. Letter AGOWD Aug. 17/14. (See par 133, AR.)

Injuries or Wounds. Sick in PH Ft Jay, N Y, Aug 5 to 11/14 inc. Injured (or wounded) on target range Aug 4/14 LD (or not LD).

Joining, Date of. (See "Assignment," "Desertion," "Return from absence," and "Transfer.")

Medal of Honor. Awarded Medal of Honor for gallant and meritorious conduct at the battle of San Juan, Cuba, July 2/11. GO 40, WD, 1914.

Note: To be noted only on first roll after receipt of notice of award.

Return from Absence. (In cases of absence reported on last muster roll.) Returned fr leave (or furlough, or AWOL, or absent, sick, or confinement, or DS) Aug 25/14.

Retirement. Retired Aug 10/15, at Ft Jay, N Y, par 1 SO 125 WD 1915.

Sentences. (a) Forfeit \$5 SC May 5/14.

(b) Forfeit \$10 per mo for 6 mos and to be confined for same period fr Aug 2/14. GCMO 420, E Dept, 1914.

Transfer. (a) Transferred as Sgt fr Sgt Co B this Regt July 10/14. RSO 7, 1914. Joined Sd.

(b) Transferred as Pvt fr Sgt Co B this Regt Aug 15/14. RSO 40, 1914. Joined Aug 17/14.

(c) Transferred to Co A 1st Inf Aug 20/14. Par 1, SO, 150 WD, 1914.

(d) Furloughed and transferred to Army Reserve Dec 20/15, under GO 11 WD 1913. Character: Excellent. Service honest and faithful. AWOL May 5 to 9/14 (or no AWOL). Absent fr duty Feb 11 to 20/15 under GO 45 WD 1914 (or no absence fr duty under GO 45 WD 1914). Retained to make good AWOL (of absence fr duty under GO 45 WD 1914).

MANUAL OF THE BAYONET
UNITED STATES ARMY
1913

**War Department,
Office of the Chief of Staff,
Washington, February 20, 1913.**

The following Manual of the Bayonet, prepared by a board consisting of Capt. Herschel Tupes, First Infantry, and Capt. Grosvenor L. Townsend, First Infantry, is approved and issued for the information and government of the Regular Army and the Organized Militia of the United States.

By order of the Secretary of War:

**LEONARD WOOD,
Major General, Chief of Staff.**

MANUAL OF THE BAYONET.

UNITED STATES ARMY.

1. The infantry soldier relies mainly on fire action to disable the enemy, but he should know that personal combat is often necessary to obtain success. Therefore, he must be instructed in the use of the rifle and bayonet in hand-to-hand encounters.

2. The object of this instruction is to teach the soldier how to make effective use of the rifle and bayonet in personal combat; to make him quick and proficient in handling his rifle; to give him an accurate eye and a steady hand; and to give him confidence in the bayonet in offense and defense. When skill in these exercises has been acquired, the rifle will still remain a most formidable weapon at close quarters should the bayonet be lost or disabled.

3. Efficiency of organizations in bayonet fighting will be judged by the skill shown by individuals in personal combat. For this purpose pairs or groups of opponents, selected at random from among recruits and trained soldiers, should engage in assaults, using the fencing equipment provided for the purpose.

4. Officers and specially selected and thoroughly instructed noncommissioned officers will act as instructors.

5. Instruction in bayonet combat should begin as soon as the soldier is familiar with the handling of his rifle and will progress, as far as practicable, in the order followed in the text.

6. Instruction is ordinarily given on even ground; but practice should also be had on uneven ground, especially in the attack and defense of intrenchments.

7. These exercises will not be used as a calisthenic drill.

8. The principles of the commands are the same as those given in paragraphs 9, 15, and 38, Infantry Drill Regulations. Intervals and distances will be taken as in paragraphs 109 and 111, Infantry Drill Regulations, except that, in formations for bayonet exercises, the men should be at least four paces apart in every direction.

9. Before requiring soldiers to take a position or execute a movement for the first time, the instructor executes the same for the purpose of illustration, after which he requires the soldiers to execute the movement individually. Movements prescribed in this manual will not be executed in cadence, as the attempt to do so results in incomplete execution and lack of vigor. Each movement will be executed correctly as quickly as possible by every man. As soon as the movements are executed accurately, the commands are given rapidly, as expertness with the bayonet depends chiefly upon quickness of motion.

10. The exercises will be interrupted at first by short and frequent rests. The rests will be less frequent as proficiency is attained. Fatigue and exhaustion will be specially guarded against, as they prevent proper interest being taken in the exercises and delay the progress of the instruction. Rests will be given from the position of order arms in the manner prescribed in Infantry Drill Regulations.

THE BAYONET.

NOMENCLATURE AND DESCRIPTION.

11. The bayonet is a cutting and thrusting weapon consisting of three principal parts, viz., the blade, guard, and grip.

12. The blade has the following parts: Edge, false edge, back, grooves, point, and tang. The length of the blade from guard to point is 16 inches, the edge

14.5 inches, and the false edge 5.6 inches. Length of the rifle, bayonet fixed, is 59.4 inches. The weight of the bayonet is 1 pound; weight of rifle without bayonet is 8.69 pounds. The center of gravity of the rifle, with bayonet fixed, is just in front of the rear sight.

I. INSTRUCTION WITHOUT THE RIFLE.

13. The instructor explains the importance of good footwork and impresses on the men the fact that quickness of foot and suppleness of body are as important for attack and defense as is the ability to parry and deliver a strong point or cut.

14. All foot movements should be made from the position of guard. As far as practicable, they will be made on the balls of the feet to insure quickness and agility. No hard and fast rule can be laid down as to the length of the various foot movements; this depends entirely on the situations occurring in combat.

15. The men having taken intervals or distances, the instructor commands:

1. Bayonet exercise, 2. GUARD.

At the command **guard**, half face to the right, carry back and place the right foot about once and a half its length to the rear and about 3 inches to the right, the feet forming with each other an angle of about 60°, weight of the body balanced equally on the balls of the feet, knees slightly bent, palms of hands on hips, fingers to the front, thumbs to the rear, head erect, head and eyes straight to the front.

16. To resume the attention, 1. Squad, 2. ATTENTION. The men take the position of the soldier and fix their attention.

17. **ADVANCE.** Advance the left foot quickly about once its length, follow immediately with the right foot the same distance.

18. **RETIRE.** Move the right foot quickly to the rear about once its length, follow immediately with the left foot the same distance.

19. 1. Front, 2. **PASS.** Place the right foot quickly about once its length in front of the left, advance the left foot to its proper position in front of the right.

20. 1. Rear, 2. **PASS.** Place the left foot quickly about once its length in rear of the right, retire the right foot to its proper position in rear of the left.

The passes are used to get quickly within striking distance or to withdraw quickly therefrom.

21. 1. **Right**, 2. **STEP**. Step to the right with the right foot about once its length and place the left foot in its proper relative position.

22. 1. **Left**, 2. **STEP**. Step to the left with the left foot about once its length and place the right foot in its proper relative position.

These steps are used to circle around an enemy, to secure a more favorable line of attack, or to avoid the opponent's attack. Better ground or more favorable light may be gained in this way. In bayonet fencing and in actual combat the foot first moved in stepping to the right or left is the one which at the moment bears the least weight.

II. INSTRUCTION WITH THE RIFLE.

23. The commands for and the execution of the foot movements are the same as already given for movements without the rifle.

24. The men having taken intervals or distances, the instructor commands:

1. **Bayonet exercise**, 2. **GUARD**.

At the second command take the position of guard (see par. 15); at the same

time throw the rifle smartly to the front, grasp the rifle with the left hand just below the lower band, fingers between the stock and gun sling, barrel turned slightly to the left, the right hand grasping the small of the stock about 6 inches in front of the right hip, elbows free from the body, bayonet point at the height of the chin.

25. 1. **Order**, 2. **ARMS**.

Bring the right foot up to the left and the rifle to the position of order arms, at the same time resuming the position of attention.

26. During the preliminary instruction, attacks and defenses will be executed from guard until proficiency is attained, after which they may be executed from any position in which the rifle is held.

ATTACKS.**27. 1. THRUST.**

Thrust the rifle quickly forward to the full length of the left arm, turning the barrel to the left, and direct the point of the bayonet at the point to be attacked, butt covering the right forearm. At the same time straighten the right leg vigorously and throw the weight of the body forward and on the left leg, the ball of the right foot always on the ground. Guard is resumed immediately without command.

The force of the thrust is delivered principally with the right arm, the left being used to direct the bayonet. The points at which the attack should be directed are, in order of their importance, stomach, chest, head, neck, and limbs.

28. 1. LUNGE.

Executed in the same manner as the thrust, except that the left foot is carried forward about twice its length. The left heel must always be in rear of the left knee. Guard is resumed immediately without command. Guard may also

*Par. 28*

be resumed by advancing the right foot if, for any reason, it is desired to hold the ground gained in lunging. In the latter case, the preparatory command **forward** will be given. Each method should be practiced.

29. 1. Butt, 2. STRIKE.

Straighten right arm and right leg vigorously and swing butt of rifle against point of attack, pivoting the rifle in the left hand at about the height of the left shoulder, allowing the bayonet to pass to the rear on the left side of the head. Guard is resumed without command.

The points of attack in their order of importance are, head, neck, stomach, and crotch.

30. 1. Cut, 2. DOWN.

Execute a quick downward stroke, edge of bayonet directed at point of attack. Guard is resumed without command.

31. 1. Cut, 2. RIGHT (LEFT).

With a quick extension of the arms execute a cut to the right (left), directing the edge toward the point attacked. Guard is resumed without command.

The cuts are especially useful against the head, neck, and hands of an enemy. In executing left cut it should be remembered that the false, or back edge, is only 5.6 inches long. The cuts can be executed in continuation of strokes, thrusts, lunges, and parries.

32. To direct an attack to the right, left, or rear the soldier will change front as quickly as possible in the most convenient manner, for example: 1. **To the right rear**, 2. **Cut**, 3. **DOWN**; 1. **To the right**, 2. **LUNGE**; 1. **To the left**, 2. **THRUST**, etc.

Whenever possible the impetus gained by the turning movement of the body should be thrown into the attack. In general this will be best accomplished by turning on the ball of the right foot.

These movements constitute a change of front in which the position of guard is resumed at the completion of the movement.

33. Good judgment of distance is essential. Accuracy in thrusting and lunging is best attained by practicing these attacks against rings or other convenient openings, about 3 inches in diameter, suitably suspended at desired heights.

34. The thrust and lunges at rings should first be practiced by endeavoring to hit the opening looked at. This should be followed by directing the attack against one opening while looking at another.

35. The soldier should also experience the effect of actual resistance offered

to the bayonet and the butt of the rifle in attacks. This will be taught by practicing attacks against a dummy.

36. Dummies should be constructed in such a manner as to permit the execution of attacks without injury to the point or edge of the bayonet or to the barrel or stock of the rifle. A suitable dummy can be made from pieces of rope about 5 feet in length plaited closely together into a cable between 6 and 12 inches in diameter. Old rope is preferable. Bags weighted and stuffed with hay, straw, shavings, etc., are also suitable.

DEFENSES.

37. In the preliminary drills in the defenses the position of guard is resumed, by command, after each parry. When the men have become proficient, the instructor will cause them to resume the position of guard instantly without command after the execution of each parry.

38. 1. Parry, 2. RIGHT.

Keeping the right hand in the guard position, move the rifle sharply to the right with the left arm, so that the bayonet point is about 6 inches to the right.

39. 1. Parry, 2. LEFT.

Move the rifle sharply to the left front with both hands so as to cover the point attacked.

40. 1. Parry, 2. HIGH.

Raise the rifle with both hands high enough to clear the line of vision, barrel downward, point of the bayonet to the left front.

**Par. 33.****Par. 36.**

When necessary to raise the rifle well above the head, it may be supported between the thumb and forefinger of the left hand. This position will be necessary against attacks from higher elevations, such as men mounted or on top of parapets.

41. 1. Low parry, 2. RIGHT (LEFT).

Carry the point of the bayonet down until it is at the height of the knee, moving the point of the bayonet sufficiently to the right (left) to keep the opponent's attacks clear of the point threatened.

These parries are rarely used, as an attack below the waist leaves the head and body exposed.

42. Parries must not be too wide or sweeping, but sharp, short motions, finished with a jerk or quick catch. The hands should, as far as possible, be kept in the line of attack. Parries against butt strike are made by quickly moving the guard so as to cover the point attacked.

43. To provide against attack from the right, left, or rear the soldier will

Par. 40

Par. 41

change front as quickly as possible in the most convenient manner; for example:

1. **To the left rear**, 2. **Parry**, 3. **HIGH**; 1. **To the right**, 2. **Parry**, 3. **RIGHT**, etc.

These movements constitute a change of front in which the position of guard is resumed at the completion of the movement.

In changing front for the purpose of attack or defense, if there is danger of wounding a comrade, the rifle should first be brought to a vertical position.

III. INSTRUCTION WITHOUT THE BAYONET.

44. 1. **Club rifle**, 2. **SWING**.

Being at order arms, at the preparatory command quickly raise and turn the rifle, regrasping it with both hands between the rear sight and muzzle, barrel down, thumbs around the stock and toward the butt; at the same time raise the rifle above the shoulder farthest from the opponent, butt elevated and to the rear, elbows slightly bent and knees straight. Each individual takes such position of the feet, shoulders, and hands as best accords with his natural dexterity. **SWING**. Tighten the grasp of the hands and swing the rifle to the front and downward, directing it at the head of the opponent, and immediately return to the position of club rifle by completing the swing of the rifle downward and to the rear. Repeat by the command, **SWING**.

The rifle should be swung with sufficient force to break through any guard or parry that may be interposed.

Being at club rifle, order arms is resumed by command.

The use of this attack against dummies or in fencing is prohibited.

45. The position of club rifle may be taken from any position of the rifle prescribed in the Manual of Arms. It will not be taken in personal combat unless the emergency is such as to preclude the use of the bayonet.

IV. COMBINED MOVEMENTS.

46. The purpose of combined movements is to develop more vigorous attacks and more effective defenses than are obtained by the single movements; to develop skill in passing from attack to defense and the reverse. Every movement to the front should be accompanied by an attack, which is increased in effectiveness by the forward movement of the body. Every movement to the rear should ordinarily be accompanied by a parry and should always be followed by an attack. Movements to the right or left may be accompanied by attacks or defenses.

47. Not more than three movements will be used in any combination. The

Par. 41

Par. 44

instructor should first indicate the number of movements that are to be combined as two movements or three movements. The execution is determined by one command of execution, and the position of guard is taken upon the completion of the last movement only.

EXAMPLES.

Front pass and LUNGE.
 Right step and THRUST.
 Left step and low parry RIGHT.
 Rear pass, parry left and LUNGE.
 Lunge and cut RIGHT.
 Parry right and parry HIGH.
 Butt strike and cut DOWN.
 Thrust and parry HIGH.
 Parry high and LUNGE.

Advance, thrust and cut RIGHT.

Right step, parry left and cut DOWN.

To the left, butt strike and cut DOWN.

To the right rear, cut down and butt STRIKE.

48. Attacks against dummies will be practiced. The approach will be made against the dummies both in quick time and double time.

V. PRACTICAL BAYONET COMBAT.

49. The principles of practical bayonet combat should be taught as far as possible during the progress of instruction in bayonet exercises.

50. The soldier must be continually impressed with the extreme importance of the offensive due to its moral effect. Should an attack fail, it should be followed immediately by another attack before the opponent has an opportunity

Par. 44

to assume the offensive. Keep the opponent on the defensive. If, due to circumstances, it is necessary to take the defensive, constantly watch for an opportunity to assume the offensive and take immediate advantage of it.

51. Observe the ground with a view to obtaining the best footing. Time for this will generally be too limited to permit more than a single hasty glance.

52. In personal combat watch the opponent's eyes if they can be plainly seen, and do not fix the eyes on his weapon nor upon the point of your attack. If his eyes can not be plainly seen, as in night attacks, watch the movements of his weapon and of his body.

53. Keep the body well covered and deliver attacks vigorously. The point of the bayonet should always be kept as nearly as possible in the line of attack. The less the rifle is moved upward, downward, to the right, or to the left, the better prepared the soldier is for attack or defense.

54. Constantly watch for a chance to attack the opponent's left hand. His position of guard will not differ materially from that described in paragraph 24. If his bayonet is without a cutting edge, he will be at a great disadvantage.

55. The butt is used for close and sudden attacks. It is particularly useful in riot duty. From the position of port arms a sentry can strike a severe blow with the butt of the rifle.

56. Against a man on foot, armed with a sword, be careful that the muzzle of the rifle is not grasped. All the swordsman's energies will be directed toward getting past the bayonet. Attack him with short, stabbing thrusts, and keep him beyond striking distance of his weapon.

57. The adversary may attempt a greater extension in the thrust and lunge by quitting the grasp of his piece with the left hand and advancing the right as far as possible. When this is done, a sharp parry may cause him to lose control of his rifle, leaving him exposed to a counter attack, which should follow promptly.

58. Against odds a small number of men can fight to best advantage by grouping themselves so as to prevent their being attacked from behind.

59. In fighting a mounted man armed with a saber every effort must be made to get on his near or left side, because here his reach is much shorter and his parries much weaker. If not possible to disable such an enemy, attack his horse and then renew the attack on the horseman.

60. In receiving night attacks the assailant's movements can be best observed from the kneeling or prone position, as his approach generally brings him against the sky line. When he arrives within attacking distance rise quickly and lunge well forward at the middle of his body.

VI. FENCING EXERCISES.

61. Fencing exercises in two lines consist of combinations of thrusts, parries, and foot movements executed at command or at will, the opponent replying with suitable parries and returns.

62. The instructor will inspect the entire fencing equipment before the exercise begins and assure himself that everything is in such condition as will prevent accidents.

63. The men equip themselves and form in two lines at the order, facing each other, with intervals of about 4 paces between files and a distance of about 2 paces between lines. One line is designated as number 1; the other, number 2. Also as attack and defense.

64. The opponents being at the order facing each other, the instructor commands: **SALUTE.**

Each man, with eyes on his opponent, carries the left hand smartly to the right side, palm of the hand down, thumb and fingers extended and joined, forearm horizontal, forefinger touching the bayonet. (Two.) Drop the arm smartly by the side.

This salute is the fencing salute.

All fencing exercises and all fencing at will between individuals will begin and terminate with the formal courtesy of the fencing salute.

65. After the fencing salute has been rendered the instructor commands: 1. **Fencing exercise,** 2. **GUARD.**

At the command **guard** each man comes to the position of guard, heretofore defined, bayonets crossed, each man's bayonet bearing lightly to the right against the corresponding portion of the opponent's bayonet. This position is known as the engage or engage right.

66. Being at the engage right: **ENGAGE LEFT.**

The attack drops the point of his bayonet quickly until clear of his opponent's rifle and describes a semicircle with it upward and to the right; bayonets are crossed similarly as in the engaged position, each man's bayonet bearing lightly to the left against the corresponding portion of the opponent's bayonet.

67. Being at engage left: ENGAGE RIGHT.

The attack quickly drops the point of his bayonet until clear of his opponent's rifle and describes a semicircle with it upward and to the left and engages.

68. Being engaged: ENGAGE LEFT AND RIGHT.

The attack engages left and then immediately engages right.

69. Being engaged left: ENGAGE RIGHT AND LEFT.

The attack engages right and then immediately engages left.

70. 1. Number one, ENGAGE RIGHT (LEFT); 2. Number two, COUNTER.

Number one executes the movement ordered, as above; number two quickly drops the point of his bayonet and circles it upward to the original position.

71. In all fencing while maintaining the pressure in the engage, a certain freedom of motion of the rifle is allowable, consisting of the play, or up-and-down motion, of one bayonet against the other. This is necessary to prevent the opponent from divining the intended attack. It also prevents his using the point of contact as a pivot for his assaults. In changing from one engage to the other the movement is controlled by the left hand, the right remaining stationary.

72. After some exercise in engage, engage left, and counter, exercises will be given in the assaults.

ASSAULTS.

73. The part of the body to be attacked will be designated by name, as head, neck, chest, stomach, legs. No attacks will be made below the knees. The commands are given and the movements for each line are first explained thoroughly by the instructor; the execution begins at the command assault. Number one executes the attack, and number two parries; conversely, at command, number two attacks and number one parries.

74. For convenience in instruction assaults are divided into simple attacks, counter attacks, attacks on the rifle, and feints.

SIMPLE ATTACKS.

75. Success in these attacks depends on quickness of movement. There are three simple attacks—the straight, the disengagement, and the counter disengagement. They are not preceded by a feint.

76. In the straight the bayonet is directed straight at an opening from the engaged position. Contact with the opponent's rifle may or may not be abandoned while making it. If the opening be high or low, contact with the rifle will usually be abandoned on commencing the attack. If the opening be near his guard, the light pressure used in the engage may be continued in the attack.

Example: Being at the engage right, 1. Number one, at neck (head, chest, right leg, etc.), thrust; 2. Number two, parry right; 3. ASSAULT.

77. In the disengagement, contact with the opponent's rifle is abandoned and the point of the bayonet is circled under or over his bayonet or rifle and directed into the opening attacked. This attack is delivered by one continuous spiral movement of the bayonet from the moment contact is abandoned.

Example: Being at the engage right, 1. Number one, at stomach (left chest, left leg, etc.), thrust; 2. Number two, parry left (etc.); 3. ASSAULT.

78. In the counter disengagement a swift attack is made into the opening disclosed while the opponent is attempting to change the engagement of his rifle. It is delivered by one continuous spiral movement of the bayonet into the opening.

Example: Being at the engage right, 1. Number two, engage left; 2. Number one, at chest, thrust; 3. Number two, parry left; 4. ASSAULT.

Number two initiates the movement, number one thrusts as soon as the opening is made, and number two then attempts to parry.

79. A counter attack or return is one made instantly after or in continuation of a parry. The parry should be as narrow as possible. This makes it more difficult for the opponent to recover and counter parry. The counter attack should also be made at, or just before, the full extension of the opponent's attack, as when it is so made a simple extension of the arms will generally be sufficient to reach the opponent's body.

Example: Being at **engage**, 1. **Number two**, at chest, lunge; 2. **Number one**, parry right, and at stomach (chest, head, etc.), thrust; 3. **ASSAULT**.

ATTACKS ON THE RIFLE.

80. These movements are made for the purpose of forcing or disclosing an opening into which an attack can be made. They are the press, the beat, and the twist.

81. In the press the attack quickly presses against the opponent's bayonet or rifle with his own and continues the pressure as the attack is delivered.

Example: Being at the **engage**, 1. **Number one**, press, and at chest, thrust; 2. **Number two**, parry right; 3. **ASSAULT**.

82. The attack by **disengagement** is particularly effective following the **press**.

Example: Being at the **engage**, 1. **Number one**, press, and at stomach, thrust; 2. **Number two**, low parry left; 3. **ASSAULT**.

83. The beat is an attack in which a sharp blow is struck against the opponent's rifle for the purpose of forcing him to expose an opening into which an attack immediately follows. It is used when there is but slight opposition or no contact of rifles.

Example: Being at the **engage**, 1. **Number one**, beat, and at stomach (chest, etc.), thrust; 2. **Number two**, parry left; 3. **ASSAULT**.

84. In the twist the rifle is crossed over the opponent's rifle or bayonet and his bayonet forced downward with a circular motion, and a straight attack made into the opening. It requires superior strength on the part of the attack.

Example: Being at the **engage**, 1. **Number one**, twist, and at stomach, thrust; 2. **Number two**, low parry, left; 3. **ASSAULT**.

FEINTS.

85. Feints are movements which threaten or simulate attacks and are made with a view to inducing an opening or parry that exposes the desired point of attack. They are either single or double, according to the number of such movements made by the attack.

86. In order that the attack may be changed quickly, as little force as possible is put into a feint.

Example: Being at the **engage**, **Number one**, feint head thrust; at stomach, lunge; 2. **Number two**, parry right and low parry right; 3. **ASSAULT**.

Number one executes the feint and then the attack. **Number two** executes both parries.

87. In double feints first one part of the body and then another is threatened and a third attacked.

Example: Being at the **engage**, 1. **Number one**, feint straight thrust at chest; **disengagement** at chest; at stomach; lunge; 2. **Number two**, parry right, parry left, and low parry left; 3. **ASSAULT**.

88. An opening may be offered or procured by opposition as in the press or beat.

89. In fencing exercises every feint should at first be parried. When the defense is able to judge or divine the character of the attack the feint is not necessarily parried, but may be nullified by a counter feint.

90. A counter feint is a feint following the opponent's feint or following a parry of his attack and generally occurs in combined movements.

COMBINED MOVEMENTS.

91. When the men have become thoroughly familiar with the various foot movements, parries, guards, attacks, feints, etc., the instructor combines several of them and gives the commands in quick succession, increasing the rapidity and number of movements as the men become more skillful. Opponents will be changed frequently.

1. Example: Being at the engage, 1. Number one, by disengagement at chest, thrust; 2. Number two, parry left, right step (left foot first), and lunge; 3. **ASSAULT.**

2. Example: being at engage left, Number one, press and lunge; 2. Number two, parry right, left step, and thrust; 3. **ASSAULT.**

3. Example: Being at the engage, Number one, by disengagement at chest, thrust; 2. Number two, parry left, front pass, and at head butt strike; 3. Number one, right step; 4. **ASSAULT.**

92. Examples 1 and 2 are typical of movements known as cross counters, and example No. 3 of movements known as close counters.

93. A chancery is an attack by means of which the opponent is disarmed, which causes him to lose control of his rifle, or which disables his weapon.

94. When the different combinations are executed with sufficient skill the instructor will devise series of movements to be memorized and executed at the command assault. The accuracy and celerity of the movements will be carefully watched by the instructor, with a view to the correction of faulty execution.

95. It is not intended to restrict the number of movements, but to leave to the discretion of company commanders and the ingenuity of instructors the selection of such other exercises as accord with the object of the drill.

VII. FENCING AT WILL.

96. As satisfactory progress is made, the instructor will proceed to the exercises at will, by which is meant assaults between two men, each endeavoring to hit the other and to avoid being hit himself. Fencing at will should not be allowed to degenerate into random attacks and defenses.

97. The instructor can supervise but one pair of combatants at a time. Frequent changes should be made so that the men may learn different methods of attack and defense from each other.

98. The contest should begin with simple, careful movements, with a view to forming a correct opinion of the adversary; afterwards everything will depend on coolness, rapid and correct execution of the movements and quick perception of the adversary's intentions.

99. Continual retreat from the adversary's attack and frequent dodging to escape attacks should be avoided. The offensive should be continually encouraged.

100. In fencing at will, when no commands are given, opponents facing each other at the position of order arms, salute. They then immediately and simultaneously assume the position of guard, rifles engaged. Neither man may take the position of guard before his opponent has completed his salute. The choice of position is decided before the salute.

101. The opponents being about two paces apart and the fencing salute having been rendered, the instructor commands, **At will, 2. ASSAULT**, after which either party has the right to attack. To interrupt the contest the instructor will command **HALT**, at which the combatants will immediately come to the

order. To terminate the contest the instructor will command, 1. **Halt**, 2. **SALUTE**, at which the combatants will immediately come to the order salute, and remove their masks.

102. When men have acquired confidence in fencing at will, one opponent should be required to advance upon the other in quick time at charge bayonet, from a distance not to exceed 10 yards, and deliver an attack. As soon as a hit is made by either opponent the instructor commands, **HALT**, and the assault terminates. Opponents alternate in assaulting. The assailant is likewise required to advance at double time from a distance not exceeding 20 yards and at a run from a distance not exceeding 30 yards.

103. The instructor will closely observe the contest and decide doubtful points. He will at once stop the contest upon the slightest indication of temper. After conclusion of the combat he will comment on the action of both parties, point out errors and deficiencies and explain how they may be avoided in the future.

104. As additional instruction, the men may be permitted to wield the rifle left handed, that is on the left side of the body, left hand at the small of the stock. Many men will be able to use this method to advantage. It is also of value in case the left hand is wounded.

105. After men have fenced in pairs, practice should be given in fencing between groups, equally and unequally divided. When practicable, intrenchments will be used in fencing of this character.

In group fencing it will be necessary to have a sufficient number of umpires to decide hits. An individual receiving a hit is withdrawn at once from the bout, which is decided in favor of the group having the numerical superiority at the end. The fencing salute is not required in group fencing.

RULES FOR FENCING AT WILL.

106. 1. Hits on the legs below the knees will not be counted. No hit counts unless, in the opinion of the instructor, it has sufficient force to disable.

2. Upon receiving a hit, call out "hit."

3. After receiving a fair hit a counter attack is not permitted. A position of engage is taken.

4. A second or third hit in a combined attack will be counted only when the first hit was not called.

5. When it is necessary to stop the contest—for example, because of breaking of weapons or displacement of means of protection—take the position of the order.

6. When it is necessary to suspend the assault for any cause, it will not be resumed until the adversary is ready and in condition to defend himself.

7. Attacks directed at the crotch are prohibited in fencing.

8. Stepping out of bounds, when established, counts as a hit.

SUGGESTIONS FOR FENCING AT WILL.

107. When engaging in an assault, first study the adversary's position and proceed by false attacks, executed with speed, to discover, if possible, his instinctive parries. In order to draw the adversary out and induce him to expose that part of the body at which the attack is to be made, it is advisable to simulate an attack by a feint and then make the real attack.

108. Return attacks should be frequently practiced, as they are difficult to parry, and the opponent is within easier reach and more exposed. The return can be made a continuation of the parry, as there is no previous warning of its delivery, although it should always be expected. Returns are made without lunging if the adversary can be reached by thrusts or cuts.

109. Endeavor to overcome the tendency to make a return without knowing where it will hit. Making returns blindly is a bad habit and leads to instinctive returns—that is, habitual returns with certain attacks from certain parries—a fault which the skilled opponent will soon discover.

110. Do not draw the rifle back preparatory to thrusting and lunging.

111. The purpose of fencing at will is to teach the soldier as many forms of simple, effective attacks and defenses as possible. Complicated and intricate movements should not be attempted.

HINTS FOR INSTRUCTORS.

112. The influence of the instructor is great. He must be master of his weapon, not only to show the various movements, but also to lead in the exercises at will. He should stimulate the zeal of the men and arouse pleasure in the work. Officers should qualify themselves as instructors by fencing with each other.

113. The character of each man, his bodily conformation, and his degree of skill must always be taken into account. When the instructor is demonstrating the combinations, feints, returns, and parries, the rapidity of his attack should be regulated by the skill of the pupil, and no more force than is necessary should be used. If the pupil exposes himself too much in the feints and parries, the instructor will, by an attack, convince him of his error; but if these returns be too swiftly or too strongly made the pupil will become overcautious and the precision of his attack will be impaired. The object is to teach the pupil, not to give exhibitions of superior skill.

114. Occasionally the instructor should leave himself uncovered and fail to parry, in order to teach the pupil to take quick advantage of such opportunities.

VIII. COMPETITIONS.

115. In competitions between different organizations none but skillful fencers will be allowed to participate.

116. In contests between two men judges may assign values to hits as follows:

| | Thrusts and lunes. | Cuts. | Butt of rifle. |
|----------------------|--------------------------|-------|----------------------|
| Stomach. | 4 | .. | 1 |
| Chest. | 3 | .. | .. |
| Head. | 3 | 2 | 3 |
| Neck. | 2 | 2 | 2 |
| Legs. | 1 | 1 | .. |
| Arms and hands. | 1 | 1 | .. |

Stepping out of bounds, 4 points.

117. When superiority between two men is decided by bouts, each bout will be decided by itself, i.e., points won in one bout can not be carried over to another.

118. Details other than those mentioned above will be arranged by the officials of the competition.

 issues, 1526, 310
 lost or damaged, 1530, 310
 machine-gun target practice, 353, 85
 sales, 354, 85, 1530, 308, 1521, 309, 1526, 310
 small-arms practice, 350, 85, 353, 85
 storage of powder, etc., 1199, 238
- Ammunition: (U.S.R.)**
 cartridges, description and kinds of, 712
 packing, description of colors and mark-
 ings, 716
 variations and corrections, 715
- Ammunition service (F.S.R.), 313-328, 1653-1655**
- Ammunition supply (I.D.), 547-553, 405-406**
- Animal transportation (F.E.).** See Transpor-
 tation, Animal (F.E.)
- Applicants for enlistment: (A.R.), 840-877, 173-179**
 commutation of rations, 1224, 250, 1230,
 251, 1232, 251
 examination, etc., 1404, 300
 hospital corps, 1410, 287
 married men, 852, 176
 medical attendance, etc., 1473, 298, 1476,
 299
 physical examination, 1404, 300
 rations, 1203, 240, 1208, 242, 1209, 243, 1212,
 243
 toilet articles, etc., 1218, 246
 transportation, etc., 1115, 220, 1124, 222
 travel rations, 1224, 250, 1225, 251
- Appointing authority: (C.M.)**
 action on proceedings, 369-377, 1401-1403
 general court-martial, 14, 1287
 power of, how limited, 20, 1289
 special court-martial, 21, 1289
 summary court-martial, 25, 1289
- Appointments: (A.R.)**
 battalion and regimental staff and non-
 commissioned staff, 248-250, 67-68, 256,
 68
 commissioned officers, 21, 14, 22, 14, 24, 14,
 25, 14
 company noncommissioned officers, 270, 71,
 271, 71, 273, 71, 275, 72, 278, 72, 480, 106
 dates determine precedence, 9, 12
 general noncommissioned staff, 103, 26,
 1557, 315
 general officers, 22, 14
 lance corporals, 272, 71
 personal staff, general officer, 41, 17
 Quartermaster Corps noncommissioned
 officers, 1009, 197
 transfer or exchange of officers, 47, 18
 veterinarians. See Candidates for Ap-
 pointment, etc. (A.R.); Examination for
 Appointment, etc. (A.R.)
- Arguments: (C.M.)**
 in closing, 293, 1371
- Arm chests: (A.R.)**
 accountability, 1542, 313
 disposition of surplus, 1542, 313
 packing for transportation, 1544-1546, 313
